The grouping proposed by Dutch Prime Minister Ruud Lubbers would include the 12 EC nations, the Soviet Union and other Comecon countries of Eastern Europe, and the six nations of the European Free Trade Association - Sweden, Norway, Finland, Switzerland, Austria and Iceland.

''Without a European policy, in about five years' time we will again find ourselves having to import vast quantities of oil and facing all the risks this entails,'' Lubbers said.

He said the energy proposal springs naturally from the European Community's original goals of the 1950s, to link France and Germany economically in order to prevent further war between them.

''An energy community for Europe could make an important contribution toward preventing new walls from dividing our continent,'' Lubbers said, ''of preventing us from becoming too heavily dependent on other parts of the world for our energy.''

He said Western Europe has expert know-how and firms interested in oil, coal and natural gas investment.

''On the production side, there are many possibilities in Central and Eastern Europe, particularly in Russia, but these countries are also in desperate need of capital and technology,'' he said.

Environmental coordination also would be greatly enhanced through a formal energy community, he said.

The Dutch prime minister asked his colleagues to consider the proposal, but formal action was not expected during the summit because the agenda was already packed.

#90176u2162 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Senate-House negotiators agreed Monday on legislation to outlaw discrimination against disabled persons, eliminating a provision that would have permitted employers to deny food-handling jobs to AIDS victims.

The legislation would prohibit discrimination against disabled persons in employment, public services, public accommodations and transportation.

The bill requires employers to make ''reasonable accommodations'' for workers who are disabled and for businesses to make ''readily achievable'' changes to serve disabled customers.

With only a few differences between the Senate and House bills, the conferees quickly finished work and sent the bill to the two chambers for final action.

But the elimination of the food handling provision could prove troublesome in the House and Senate. Both signalled approval of the controversial in roll call votes.

The House approved the amendment 199-187 and the Senate by voice vote told its conferees to adopt the amendment after an effort to kill it was defeated 53-40.

The amendment - clearly aimed at AIDS sufferers - would have allowed employers to transfer anyone with a contagious disease out of a food-handling job even if medical evidence showed the disease cannot be transmitted through food. There could be no cut in pay.

The negotiators also agreed to place Congress under the provisions of the bill. Congress has tradionally exempted itself from civil rights and other legislation.

(JUNE 25) UPI - NASA engineers searched in vain during the weekend for a leak in a fuel line fitting taken from the grounded shuttle Columbia's external tank. The engineers now plan to replace the fitting with newer hardware to see if that helps.

The search in Shadyside, Ohio, for victims of flooding 12 days ago is winding down... but the clean-up continues. Authorities say entire families living along creek beds were killed. The toll stands at 23 people dead and as many as 10 people still missing.

New York City prosecutors today told a jury how three young defendants beat and gang-raped a Central Park jogger last year. Charges against the three include attempted murder and rape. One defendant earlier told police the attack was ''fun.''

Liberian rebels boycotted peace talks today aimed at ending the country's six-month-old civil war. A rebel delegate calls negotiations ''a waste of time''... and says President Samuel Doe should resign or face ''the use of force.''

The Palestine Liberation Organization says it has NOT yet broken off peace initiatives in the Middle East... but it may do so if the United States keeps ignoring P-L-O efforts. The Bush administration cut off contacts with the P-L-O after it failed to condemn a planned attack on Israel last month.

The presidents of the East and West German parliaments arrived in Israel today on the first joint foreign visit by top German officials. The speaker of the Israeli parliament... a survivor of the Holocaust... took the day off to avoid meeting the officials.

The House today passed a new Amtrak authorization bill without the provision that was blamed for a presidential veto one month ago. President Bush has said he will approve a new bill that does NOT expand government review of railroad takeovers.

A Los Angeles prosecutor says attempts to strike a plea bargain with Marlon Brando's son have failed. Christian Brando is charged in the killing of his pregnant half-sister's boyfriend.

A man who allegedly attacked comedian Sam Kinison's girlfriend in the comic's Hollywood Hills home was charged today with three counts of rape and two other related felonies in Los Angeles. Unway Carter will be arraigned later today.

The nation's oldest Hispanic civil rights organization has opened its ranks to NON-Hispanic chapters. The vote by the League of Latin American Citizens yesterday in Albuquerque, New Mexico, admitted 24 Filipino chapters from California.

#90176u2227 06/25/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JUNE 25) UPI - As Czechoslovakia moves from communism to capitalism, the country's leader appears to have hung out welcome sign to foreign visitors of all types as well as to personal contacts with Czechoslovaks across the nation.

At a news conference Monday with President Vaclav Havel, presidential spokesman Michael Zantovsky tallied up Havel's meetings with citizens and visitors in his six months in office.

The president took 21 trips inside Czechoslvakia: 14 to the Czech lands and seven to Slovakia. He made eight trips to 12 foreign countries,

clocking more than 6,000 miles in automobiles, and about 18,000 miles in airplanes.

While Havel twisted and fidgeted during the recital, he has evidently not been shy in the past six months about speaking his mind.

The playwright president gave 50 speeches, 10 of them ''of principal importance,'' according to Zantovsky, 55 interviews to foreign journalists 12 fireside radio chats from his Lany Castle country retreat, six news conferences in Czechoslovakia and 12 abroad.

While his former dissident colleague Rita Klimova, now ambassador to the United States, once called the entire Velvet Revolution a play scripted by Havel, the president said he was unable to write any new plays in 123 working days.

He invited four important foreigners to visit, West German President Richard von Weizsacker, Pope John Paul II, the dalai lama and Lithuanian President Vytautis Landsbergis.

Havel also met with arts friends as rock musicians like Frank Zappa, Lou Reed, actress Jane Fonda, playwright Harold Pinter, and Henry Kissinger numbered 38.

Diplomatic foreign visitors included 52 ministers and 34 ambassadors. Havel also met with 163 well-known Czechs and Slovaks.

The presidential post office received 50,000 letters, including 18,241 complaints, of which 3,131 were resolved, Zantovsky said. Last year, the hard-line Communist President Gustav Husak received 10,501 complaints and resolved 1,095 of them, Zantovsky said.

Zantovsky added plaintively that the president's advisers worked hard, too grinding away for 14 to 15 hours a day and taking no more than seven days vacation each.

Answering journalists questions after the account of the presidency, Havel reaffirmed his support for his government's economics team and their free-market reforms, despite recent reports of disagreement between ministers over the pace and extent of the changes.

''It's natural they differ in opinion about economic reform, but this is an act without precedent,'' Havel said.

Havel is shceduled to unveil the country's next government on Wednesday, and is expected to be re-elected president by the Federal Assembly on July 5.

After his election, Havel is to host a grand carnival in Prague Castle, his official residence, with clowns and magicians, and Havel is expected to personally serve sausage, beer and ice cream to the guests.

The following day he is expected to take off for four days at the beach.

WASHINGTON (JUNE 25) UPI - Monday's Supreme Court rulings on two abortion cases from Ohio and Minnesota illustrate yet again the importance of

Justice Sandra Day O'Connor's view of the divisive issue.

Since she joined the Supreme Court in 1981, her long and carefully phrased opinions on the topic have been dissected by both sides of the issue seeking insight into which way the court was leaning on its historic 1973 Roe vs. Wade ruling that legalized abortion.

Those in favor of the right to abortion hope she will arrest the court's conservative move to undo Roe and those opposed to abortion hope she will embrace the position staked out by Justice Antonin Scalia to overturn Roe.

So far she has done little to give solace to the defenders of the right to abortion.

Roger Evans, a lawyer with Planned Parenthood, said the future of a constitutional right an abortion appears to rest heavily on O'Connor.

''The handwriting on the wall is that ... Justice O'Connor is the swing vote on what flies and what doesn't fly. She certainly doesn't support the right to choice to the extent the court has supported it in the past, but she is not as crazed about getting rid of it as Justice Scalia,'' Evans said.

Bruce Fein, a conservative legal scholar, said that the rulings Monday upholding tough restrictions on a minor's right to abortion showed O'Connor was ''nudged a little closer to undoing Roe.''

In a concurring opinion in the Minnesota case involving a parental notification law, O'Connor reiterated her belief first stated in 1983 that any regulation that does not ''unduly burden'' the right to abortion can stand if it serves a ''legitimate state purpose.''

She continued that Minnesota could offer no ''sufficient justification'' for the two-parent notice and voted to strike it down.

However, somewhat paradoxically she voted to uphold another portion of the law that had a two-parent notice with a judicial bypass - a system allowing for a teenager to appeal to a judge to avoid telling her parents.

Fein said it was significant that she applied her test that a state may do what it ''wants as long as it is not an undue burden.''

''If anything, it will give greater worry to defenders of Roe,'' he said.

Janet Benshoof, who argued the Minnesota case for the American Civil Liberties Union, expressed disappointment at the legal basis on which the court struck down the two-parent notification regime without a legal bypass mechanism.

She noted that the court ruled out such a system on grounds it was ''unreasonable,'' but avoided the broader question of whether the state has a compelling interest that overrides a minor's right to privacy.

The result of this reasoning is further confusion, and may require challenges of similar laws involving the abortion rights of minors in eight to 10 other states, she said.

''O'Connor said (parental consent could be required) as long as you give a bypass, no matter how awful the requirement is for minors,'' Benshoof said ''which sort of ignores the fact that many minors cannot for economic or psychological reasons go to a court for a bypass, so it is only available for survival of the fittest.''

Evans said that read together, the rulings mean the ''court is continuing the course it set in Webster, which is, by fractured opinions, steadily eroding the constitutional protections accorded women who might choose abortion. Today's victims are minors.''

TAIPEI, TAIWAN (JUNE 25) UPI - The government Monday lifted a 40-year-old ban on Chinese reporters gathering news on Taiwan and eased restrictions on Taiwanese visiting China.

Government spokesman Shaw Yu-ming said the Cabinet-level task force on mainland China affairs decided to open Taiwan to mainland reporters for up to six months at a time beginning July 1.

The announcement follows repeated protests by Beijing against Taiwan's barring of Chinese reporters and a promise by President Lee Teng-hui in his inaugural speech to increase unofficial contacts across the Taiwan Strait.

More than 5,000 Taiwanese newsmen have covered stories in China since September 1987, but Taipei, citing security concerns, has prohibited Chinese reporters from coming to the island.

Under the new policy, Chinese artists, scholars and athletes, as well as dissidents and students studying abroad, will also be allowed to visit Taiwan for up to six months each year.

But Chinese who belong to the Chinese Communist Party will be required to renounce their party membership before coming to Taiwan, Shaw said.

The Nationalist government has considered the communist leadership in Beijing a rebel regime since losing the Chinese civil war on the China mainland in 1949.

The task force Monday also greatly relaxed restrictions on Taiwanese visiting China, allowing virtually all but high-ranking government officials and security and military personnel to make such trips.

Taiwanese may visit direct relations in China who are ill or elderly for up to three months, also beginning July 1, Shaw said.

President Lee Teng-hui has adopted a conciliatory tone toward China, capping two years of gradual warming of unofficial contacts between the two countries following four decades of hostility.

In his inaugural address May 20, Lee welcomed Beijing to sit down for reunification talks on an equal basis and offered to ''completely open up academic, cultural, economic, trade, scientific, and technological exchange'' if China moves toward democracy and a free market system.

More than 460,000 Taiwanese have visited China since the government began permitting family visits in November 1987, although direct trade and investment ties are still prohibited.

#90176u2292 06/25/1990 ~United Press International

(JUNE 25) UPI - Oil markets were mixed in quiet trading Monday with crude oil prices falling only slightly despite news indicating that producers would continue adding to the current world glut of supplies.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for August delivery ended the day down only 8 cents at $17.38 a barrel after having traded as low as $17.21 a barrel.

Trading volume was a light 65,428 contracts.

''It was all technical today,'' said Kevin Breslin of United Energy Inc. in New York, with traders buying and selling the various spreads between the prices of crude and products.

July delivery unleaded gasoline, in its last week of trading on the Merc, was up 0.90 cent to 62.27 cents a gallon.

August delivery unleaded, which becomes the Merc's spot- month contract next Monday, gained 1.06 cents to 58.33 cents a gallon.

Prompt delivery unleaded climbed on both the main U.S. cash markets - up 1.05 cents on the U.S. Gulf Coast and 0.65 cent on the New York Harbor.

Crude prices were apparently unaffected by Norway's an- nouncement that it would lift July 1 a 1986 decision to unilaterally hold down produc- tion. The move was taken to aid efforts of the 13-nation Organization of Petroleum Ex- porting Countries to support world prices by limiting output, which are currently flagging.

Norwegian oil minister Eivind Reiten said ''cooperation between the producers already has collapsed.''

Bill Hinton of Stotler & Co. in New York said the market knew the Norwegian announcement was coming and had previously discounted the move. ''We were told they were going to do that last week,'' he said.

OPEC president Sadek Boussena also was quoted as saying the cartel would try to bring the maverick United Arab Emirates back into the OPEC quota fold.

The UAE had refused to accept an OPEC limit and has been pumping more than 2 million barrels a day of crude, twice the 1.09 million barrels assigned.

New Kuwaiti oil minister Rashid Salem al-Ameeri also was reported as saying Kuwait would seek an increase in its 1.5 million-barrels-a-day quota to meet the needs of its European refineries.

Kuwait and the UAE have been the main contributors to the OPEC overproduction that has helped create the current world crude glut that driven prices down 20-25 percent since early April.

On the European spot market, Britain's widely traded North Sea Brent gained 5 cents to $16.15 a barrel.

The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - edged up 3 cents to $13.90 a barrel.

On the Merc, heating oil finished the day at 48.92 cents a gallon, up 0.26

cent.

#90176u2311 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - The stock market closed lower Monday in a very subdued session after two attempts to rebound from Friday's plunge were cut short by selling tied to fears about interest rates and corporate earnings.

The Dow Jones industrial average, which sank 44.55 Friday, lost 12.13 to close at 2845.05.

Among broad market gauges, the New York Stock Exchange composite index fell 1.64 to 192.60. The price of an average share lost 29 cents. Standard & Poor's 500-stock index fell 3.12 to 352.31.

Declines thumped advances 1,020-491 among the 1,997 issues crossing the NYSE tape. But volume only amounted to about 133,100,000 shares, down from172,578,860 traded Friday.

While the market closed lower, it didn't do so without the Dow industrials twice trying to post a gain after Friday's sharp drop. The broad market was decidedly lower virtually all day.

At the opening, the Dow industrials jumped out to a double-digit gain but advances led declines only slightly. That advantage soon faded, however, and the blue chips followed the broad market lower just before midday. At mid-afternoon, the Dow recouped almost all the day's losses but soon fell back into the minus column as sellers again managed to keep an attempted advance in check.

Analysts said nervousness about what second-quarter earnings reports may show and about the direction of interest rates kept prices from advancing.

"There are still some concerns looking out over the months ahead on what rates will be doing," said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y. "And, as we start to see a slew of earnings that could be lower than expectations, there's no real rush to be in the market. Investors are taking a low profile and reacting to individual companies based on how they report."

Doran said a good example of a bad reaction to an earnings announcement was the beating the market gave Monday to Caterpillar, which said it expects profits for 1990 to be substantially lower than the $497 million earned in 1989. The stock lost $5 a share and was one of the most actively traded issues.

Meanwhile, interest rates rose sharply in the bond market Monday as players prepared themselves for a wave of auctions this week. The Treasury will auction bills and notes beginning with the regular weekly sale Monday in which $17.2 billion in three- and six-month bills were sold. Treasury notes and bonds were down almost one point in late trading.

"I think rates are a legitimate fear at this point," said Doran. "Mixed signals have been sent from the government. Some in the administration feel there is a credit crunch, but (Federal Reserve Chairman Alan) Greenspan has again been more optimistic.

"So with all of these things, it looks like rates are going to remain stable for the time being, which has prompted a wait-and-see attitude as far as the market is concerned," said Doran.

On the trading floor, Philip Morris was the most active issue, up 1 7/8 to 46 5/8 in the wake of the announcement Friday that it will buy most of Swiss chocolate and coffee giant Jacobs Suchard for $3.8 billion and make an offer for the rest of the company.

Southeast Banking followed, down 3/4 to 9 3/8. Duff & Phelps cut its ratings on the company's debt, citing a surge in non-performing assets since the start of the year. Caterpillar was third, sinking five to 58 1/2.

Among the other blue chips, AT&T, which paid its dividend Monday, lost 3/4 to 41 3/8, while Eastman Kodak fell 3/4 to 40 3/8, Woolworth lost 1/2 to 32 7/8, and Coca-Cola fell 5/8 to 42 3/4. But IBM rose 3/8 to 116 5/8.

Elsewhere, Foxboro catapulted 12 7/8 to 51 after agreeing to Siebe PLC's offer to acquire the company for $52 a share.

Wellman tumbled 3 1/4 to 28 1/4 and said it felt the drop was due to competitor Du Pont's decision to cut prices on polyester fiber by ten percent.

Armco sank 1 1/8 to 7 3/8 after saying it expects a second-quarter loss and may not be able to pay its dividend.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 157,870,270 shares, compared with 207,708,260 shares traded in the previous session.

Prices closed lower in moderate trading on the American Stock Exchange. The Amex Market Value index lost 1.89 to close at 357.39. Declines led advances 362-222 among the 826 issues traded. The price of an average share eased six cents. Composite volume totaled 15,259,500 shares compared with 20,204,970 shares traded Friday. Hillhaven led the Amex issues, unchanged at 1 3/4.

The National Association of Securities Dealers composite index lost 3.69 to 455.64.

WASHINGTON (JUNE 25) UPI - The Supreme Court Monday essentially affirmed right-to-die contracts when it upheld a Missouri law requiring explicit living wills, but also make clear that states have the authority to restrict those arrangements, according to legal experts and health officials.

In its first ruling on the subject, the Supreme Court held 5-4 that states can legislate standards that individuals must meet if they wish to cut off life-sustaining equipment in terminal illnesses.

Legal experts said the ruling was a classic example of the court's attempt to balance the rights of individuals against the responsiblity of the state to protect those rights.

''The Supreme Court makes clear that a competent individual can refuse nourishment but that the Constitution permits the state to impose standards,'' said Barbara Mishkin, a Washington lawyer specializing in health law.

In a ruling that could profoundly affect the way people draw up living wills, the high court upheld a Missouri right-to-die statute that requires extensive evidence of a person's wishes before withdrawing life-sustaining medical treatment.

The ruling comes in a closely watched case from Missouri involving attempts by the parents of Nancy Beth Cruzan, who has been in an irreversible coma since January 1983, to end medical treatment.

Although Cruzan had told a friend a year before she was injured in an automobile accident that she would never want to live as a ''vegetable,'' the Missouri Supreme Court found that her comments did not provide ''clear and convincing evidence'' of her wishes that the court said was necessary to end her life.

Cruzan's family appealed the decision that in practical terms bars the removal of the tube that has sustained her with food and water for more than six years.

While state officials and the Bush administration praised the court's decision, private attorneys and medical ethicists worried that the ruling could have negative effects on the thousands of people who lack explicit wills but are terminally ill.

Attorney General Dick Thornburgh called the case ''difficult,'' but said the decision was ''proper on the basis of the argument we presented'' in a friend of the court brief.

But Alan Meisel, a professor of law and psychiatry at the University of Pittsburgh, said, ''I would have hoped that the court would have said that states cannot require 'clear and convincing evidence.''' Meisel, who has written widely on the subject, added that the standard, adopted by only two states - Missouri and New York - ''infringes on the personal liberty of patients to terminate life support.''

The American Medical Association and other medical groups agreed.

Dr. Nancy Dickey, former chairman of the AMA's Council on Ethical and Judicial Affairs, said the best decisions are made at a patient's bedside, not in a courtroom.

''The AMA is saddened by the position of the court,'' said Dickey, a Richmond, Texas, family practice physician. ''It is an intrusion into the doctor-patient relationship. The AMA has been working to strengthen that relationship.''

The decision ''really puts a lot of onus on the individual to be crystal clear,'' said George Smith, a bioethics professor at Catholic University in Washington. ''On the other hand,'' he said, ''maybe that's good.''

(JUNE 25) UPI - The Senate today opened debate on a constitutional amendment to ban flag desecration. Opponents of the measure called the debate a ''futile exercise'' in politics leading to a meaningless vote, because the House last week failed to pass the measure. But Republican Senator Strom Thurmond of South Carolina said the issue is NOT politics, but whether the flag deserves protection.

Anti-smoking advocates today hailed a study by the Environmental Protection Agency that provides the first body count attributable to the hazards of passive smoking. The study says about 38-hundred people die each year from breathing in secondary smoke. The Tobacco Institute criticized the report as ''speculation'' and said the findings are NOT supported by previous research.

#90176u2353 06/25/1990 ~United Press International

ANCHORAGE, ALASKA (JUNE 25) UPI - Exxon Corp. and its shipping subsidiary will go on trial on criminal charges in April, more than two years after the Exxon Valdez oil spill that gave rise to the charges, according to court documents.

U.S. District Court Judge H. Russel Holland set April 10 for the trial on charges of violating environmental laws and gave the two Exxon companies two weeks to waive their rights to a speedy trial or to protest the trial schedule, including dates for various pretrial motions and hearings.

Under Holland's order, Exxon will go to trial 24 1/2 months after its tanker, the Exxon Valdez, smashed into underwater rocks of Bligh Reef, releasing nearly 11 million gallons of crude oil into Prince William Sound the nation's worst oil spill.

A five-count indictment issued by a federal grand jury in February charges Exxon Corp. and Exxon Shipping Co. with violating the Clean Water Act, the Refuse Act, the Migratory Bird Act, the Ports and Watereways Safety Act and the Dangerous Cargo Act.

The indictment accuses Exxon of killing thousands of protected migratory birds in an illegal spill caused by company negligence and by knowingly employing incomptent or unqualified crewmen to operate the laden tanker. The charges cite the captain's drinking, the third mate's lack of qualifications to control the vessel he was operating and the helmsman's inability to steer.

Convictions could lead to fines of $700 million plus restitution, according to the Justice Department.

Holland's order was filed Friday.

In other new court filings in the case, Exxon Corp. lawyers argued that the indictment did not cite specific criminal acts by the corporation and asked the judge to order the government to spell out what Exxon Corp. did wrong. Without casting blame, Exxon Corp. said it could not be held liable for Exxon Shipping actions.

Holland set a hearing on the Exxon Corp. request for more particulars, but government lawyers replied in writing that ''Exxon's liability stems in part from acts and omissions of its own employees in its medical, legal and policy-making departments.''

''It is well-established that a corporation may be held liable for criminal acts committed by its agents, including low-level employees,'' the Justice Department lawyers said.

Prosecutors argued that ''there is ample authority that Exxon may be held liable as a sole shareholder for crimes of Exxon Shipping because permitting Exxon to hide behind Exxon Shipping's corporate shield would thwart the purposes of the environmental statutes under which Exxon is charged.''

In setting the date for the belated trial, Holland declared the case ''extremely complex'' and involved massive quantities of documents.''

''The court understands also that the case includes one or more counts which are the first ever use of certain federal statutes,'' Holland said in his order. ''Thus the case appears to the court to be both complex and likely to present novel questions of fact and law as to which the parties should reasonably have some additional time beyond that contemplated by the Speedy Trial Act.''

The only individual ever charged in the spill, tanker Capt. Joseph Hazelwood, was found guilty, one year after the spill, of negligent discharge of oil and sentenced to spend 1,000 hours helping the cleanup, now in its second year. The jury acquitted Hazelwood of three other charges, including reckless and drunken conduct. He is appealing his conviction.

The March 24, 1989 spill coated 1,200 miles of coast with oil, ruined fishing, killed tens of thousands of animals and has cost $2 billion to clean up so far.

#90176u2356 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - President and Mrs. Bush treated Washington's diplomatic corps to a Texas-style barbecue on the south lawn Monday afternoon, and will repeat the picnic Tuesday evening for members of Congress and their spouses.

The Bushes, who adopted Texas as their home, imported San Antonio caterer Don Strange to put on the barbecue. They began building their fires in the backyard of the White House Monday morning for the evening event.

The White House kitchen ordered for the two barbecues 650 pounds of beef, 900 pounds of ribs, 300 pounds of chicken, 125 pounds of beans and 120 pecan pies.

White House receptions for the diplomatic corps are usually more formal, sometimes white tie. But the ambassadors and their wives were told to wear casual attire for the outdoor event.

Casual for the men was described as sports coats and slacks, open collars and no ties. For women, casual was interpreted as skirts and blouses.

Country singer Glen Campbell will perform at both the diplomatic picnic and the congressional hoedown.

It was not the first time, the diplomats have been able to don relaxed attire and dine on picnic fare at the White House. In 1984, President and Mrs. Reagan gave a similar party for embassy row.

The menu for the barbecues included corditas (corn tortillas cooked on a hot griddle and topped with refried beans, cheese, guacamole and pica de gallo, fried jalapenas stuffed with cheese, mesquite poblano with grilled chicken, smoked turkey sausage, corn pudding, borracho beans, cole slaw, homemade bread, Texas pecan pie, Hill Country peach cobbler with ice cream soft drinks, beer and wine.

At first the White House said there would be ''open coverage'' of the barbecuse, but at the last minute, reporters and cameramen were barred from the event.

#90176u2406 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Creditors of Campeau Corp.'s two U.S. retailing units claimed Monday that Campeau may be taking steps in bankruptcy court to deny them access to some of the retail chains' most valuable assets.

The dispute could have a major impact on whether much of Campeau's U.S. assets go to the Toronto-based corporation and its leveraged buyout partners or to creditors of Campeau's U.S. retailing units - Federated Department Stores Inc. and Allied Stores Corp.

Bondholders of Federated and Allied will claim in California bankruptcy court Friday that Federated Stores Inc. - a Campeau subsidiary that indirectly owns Federated and Allied - is attempting to shelter certain assets by filing for bankruptcy in two different states.

''We fear that they (Campeau) may be trying to insulate (Federated Stores Inc.) from claims that may be asserted against them by Allied and Federated,'' said Jonathan Jacobson, an attorney in the New York office of Coudert Brothers, which is representing the Allied bondholders' committee.

However, Bruce Bennett, an attorney with Studman, Treister & Glatt, which is representing Federated Stores Inc., described the dispute as a minor procedural issue. He declined to comment further.

The retail chains both filed for bankruptcy in Ohio, where they are headquartered. However, Federated Stores Inc. - which acquired the retail groups through leveraged buyouts in 1986 and 1988 - made its bankruptcy filing in California.

As a result, the California bankruptcy court is only responsible for settling claims of Federated Stores Inc.'s direct creditors - the LBO

participants, including Campeau and its financiers, Edward J. DeBartolo Corp., and Olympia & York Developments Ltd., a Toronto-based company.

But creditors of Federated and Allied claim that the LBO, in transfering much of the chains' value to Federated Stores Inc., damaged the retails chains' ability to pay their bills.

Thus, the bondholders said, funds that should go to paying their claims may instead go to the LBO partners.

For example, a California bankruptcy court ruling could disrupt an Allied claim, worth as much as $500 million, against the Bank of Montreal and Banque Paribas, according to a memorandum filed by the Allied bondholders in the U.S. Bankruptcy Court for the Northern District of California.

A reorganization plan approved in California for the holding companies could nullify the rights of the stores in Ohio to collect those funds, thus quashing a source of payment for the bondholders and creditors.

Although Federated Stores Inc. is run by a separate board of directors, attorneys for the bondholders' committee said it is not clear how much control Campeau still has over the holding company.

On Friday, the bondholders and four other creditor committees will ask the California bankruptcy court to transfer the venue of the holding company cases to Ohio, in effect putting all of the creditor and bondholder claims under a single court.

The U.S. Department of Justice and the U.S. Trustee will also reportedly testify on favor of a transfer of the venue to Ohio.

#90176u2408 06/25/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JUNE 25) UPI - The city's former Communist Party boss, one of the most hated men in the country, went on trial Monday on charges of abuse of power.

Miroslav Stepan is the first high-ranking Communist Party official to be tried. He is charged on two counts of abuse of power under the nation's Communist-drafted penal code.

The charges arise from actions against demonstrators during anti-government demonstrations in 1988 and 1989, including one at which President Vaclav Havel, then a dissident playwright and human rights activist, was arrested.

Stepan is accused of two counts of ordering the Prague police commander,

Gen. Bohumil Carda, to use unauthorized force against demonstrators in Prague's Wenceslaus Square.

Prosecutors say Stepan ordered police to use tear gas and water cannon against peaceful protestors at a demonstration on Oct. 28, 1988, honoring the 70th anniversary of the founding of the Czechoslovak Republic.

Stepan also is charged with a favorite form of Communist Party harassment: busing demonstrators far out of town and leaving them to find their ways home without money or papers.

This action allegedly occurred after hundred of dissidents gathered to mark the 20th anniversary of the death of a student who killed himself protesting the 1968 Soviet invasion of Czechoslvakia. The student, Jan Palach, set himself afire in January 1969.

Prosecutors say Stepan ordered Carda to bus almost 200 demonstrators about 25 miles into the Central Bohemian countryside. Prosecutors say the Prague Party boss had no legal authority to order such an action.

Stepan appeared in a central Prague district court dressed in a gray suit and sat quietly while charges against him were read. After the reading, journalists were asked to leave the courtroom.

The proceedings are closed because the trial is supposed to involve matters of national security, according to local press reports, and Havel is unhappy about this.

''We would be much happier if it were not held in camera,'' presidential spokeman Michael Zantovsky said Monday, but he added that Havel would not intervene. ''We have had very bad experiences in the past with government interference in the courts,'' he said.

A spokesman for the Ministry of Justice who requested anonymity said, ''The whole Stepan file is labeled 'top secret.''' He said the court had asked the Interior Ministry to open the trial to the public, but so far thre has been no reply.

The trial is expected to last eight days, and Stepan is being tried by a three-member tribunal composed of one judge and two laymen.

Three weeks ago several of the country's former top Communist Party leaders, inlcuding former party leader Milos Jakes, were questioned about their role in the 1968 Soviet-led invasion of Czechoslvakia. Alexander Dubcek was overthrown as president and his ''Prague Spring'' reforms canceled.

Only Peter Colodka, the former Communist premier of the Slovak government,

is still in detention, while prosecutors investigate charges of corruption including spending state funds on a lavish birthday party for himself.

Stepan began his career in the Communist Party hierarchy as chairman of the International Union of Students from 1977 to 1986. In December 1986 he became chairman of the Prague Communist organization.

According to a biography of Stepan released by the official Czechoslvak News Agency, CTK, ''At that time he made an impression of a reform communist but as his position strengthened, he became a supporter of the 'hard-line' policy.

''He became the most hated representative of the former regime after the Prague demonstrations in January, 1989, which he helped surpress ruthlessly,'' the biography said.

#90176u2433 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The National Governors Association urged President Bush Monday to take immediate action against global warming, saying U.S. leadership was needed to develop a coordinated international response to the problem.

In a report recommending seven specific U.S. actions, the governors said the nation needed to act now to reduce risks from rising sea levels, altered rainfall patterns and other potential effects of global warming.

The recommendations, while relatively non-controversial, place additional pressure on Bush to move more decisively on global warming, especially with international efforts accelerating to develop a treaty under which all nations would agree on measures to reduce the threat.

Bush has been criticized by some European officials and environmentalists for emphasizing the need to resolve scientific uncertainties about global warming rather than immediate efforts to check it, such as reductions in heat-trapping industrial pollution.

The governors told Bush the nation could not ignore the ''possibly severe environmental and economic consequences associated with global warming'' and that an early response would be the most cost-effective.

It cited an EPA finding that a policy response to global warming begun in 1990 could reduce potential warming by 40 percent more than if the same policies were initiated in 2010.

However, the governors also said that in view of continuing scientific uncertainties about the extent and scope of global warming, the nation could not afford to ''over-react'' and take costly emission reduction measures that it might regret later.

The report said there could be ''serious effects on the economic well-being of the nation'' if the United States went too far in reducing carbon dioxide emissions, the main ''greenhouse'' gas of concern.

Carbon dioxide is released by cars, power plants and factories burning coal, oil and natural gas. Scientists say it is the largest contributor to the growing blanket of heat-trapping pollution in the atmosphere.

In sum, the governors said the nation should combat global warming by taking only those steps that ''provide a reasonable return on investment and offer other social and economic benefits.

''These prudent measures should be undertaken even in the presence of scientific uncertainty,'' the governors said in their report entitled, ''A World of Difference: Report of the Task Force on Global Climate Change.''

''These measures will not give us cause to regret our commitment to them '' it added. ''They are the most sensible steps to take now to achieve our goals.''

The recommendations, formulated by a special task force of governors led by Gov. Jim Thompson of Illinois, echo Bush's call for a ''no-regrets'' global warming policy. The recommendations include:

-U.S. leadership in developing an international climate change treaty ''at the earliest possible date.''

-Greater energy conservation and more use of renewable energy sources, such as solar power, to cut carbon dioxide emissions. The report also endorses greater use of ''safe'' nuclear power.

-Better forestry management programs to increase trees, which absorb carbon dioxide in photosynthesis.

The report stopped well short of environmentalists' call for Bush to set a goal of reducing U.S. carbon dioxide emissions by 20 percent by 2000.

#90176u2435 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - The dollar moved mostly up in dull New York foreign exchange trading Monday, but the Canadian dollar staged a neat recovery after diving on the country's constitutional crisis over Quebec's status.

Currency traders reported that the dollar had a firm tone and gained against the West German mark, Japanese yen and most other major currencies with the exception of the Swiss franc. But activity was dull, they said.

"We were in a slow mode all day," said Joseph Cambria, a foreign exchange manager for Banque Paribas, adding, "It looks as though we're going to have a pretty slow week" with few economic indicators out.

In late New York trading, the dollar was quoted at 1.6775 West German marks, up from 1.6755 marks Friday. Against the Japanese currency it was changing hands at 155.38 yen, also up from 154.90 yen.

Cambria said Canada's dollar fell in early trading on the failure of the ten Canadian provinces to unanimously approve a proposed constitutional amendment giving French-speaking Quebec a special status. But the Canadian dollar perked up later on. "I think people realized it was oversold," Cambria said.

The Canadian dollar plunged to 84.25 U.S. cents on overseas exchanges, but by closing in New York recovered to 84.97 cents.

Bank of Montreal trader Richard Vullo said the Canadian unit was braced by an announcement by Moody's Investors Services, a rating agency, upholding

its rating of Quebec province and Quebec Hydro bonds.

Moody's said it saw "no immediate impact on credit characteristics of Quebec or other Canadian provinces" from the crisis.

Other dollar rates: 1.41 Swiss francs, off from 1.4120; 5.6310 French francs, up from 5.6250; and 1,228.25 Italian lire, up from 1,228. The pound moved down to $1.7305 from $1.7320.

In Europe, the dollar closed marginally lower in quiet, narrow-range trading against the major currencies, dealers said.

"It hasn't been a dramatic day against most currencies," said Alan Chase, the head of strategic trading at National Westminster Bank. He said the U.S. unit was weak in the morning but recovered slightly later.

European units were steady awaiting developments from the European Community conference taking place in Dublin, he said.

The U.S. unit slipped in Frankfurt to 1.6760 deutsche marks against 1.6765. It also eased in Zurich, to 1.4050 Swiss francs from 1.4155.

In London, the pound closed unchanged against the dollar at $1.7305, despite Prime Minister Margaret Thatcher's affirmation, in Dublin, of her intention to take sterling into the European Monetary System's exchange-rate mechanism when Britain's inflation is closer to the EC average.

The dollar edged lower in Paris, Milan and Brussels, at 5.6325 francs against 5.6380, 1,229.40 lire compared with 1,231.50, and 34.36 Belgian francs against 34.45.

Earlier in Tokyo, the U.S. dollar climbed to a six-week high against the yen as the Japanese unit was heavily sold against European units. It closed at 155.62 yen, up from 154.75 yen late last week.

Traders said the dollar moved up on players' belief there would be no fall in U.S. interest rates, and on yen selling against the pound, which was in demand after last week's favorable British trade numbers.

Gold closed higher in Zurich at $353.50 an ounce against $348.50 Friday. It was up as well in London at $353.50 an ounce from $348.50.

Republic National Bank in New York closed cash gold at $353.40 an ounce, up from $350 last week. The New York Commodity Exchange settled gold at $353.80 an ounce, also ahead from $350.40.

Silver closed unchanged in Zurich at $4.85 an ounce, but was higher in

London at $4.85 an ounce against $4.83.

Republic closed cash silver at $4.84 an ounce, up from $4.835. The Comex settled silver at $4.816 an ounce, up from $4.813.

#90176u2443 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Agricultural officials said Monday they were cooperating in a national survey to make sure that ''mad cow'' disease, which has afflicted British cattle, does not exist in the United States.

An upsurge of the fatal disease created public concern in Great Britain last month and temporarily disrupted agricultural trade in Europe. The disease, officially named bovine spongiform encephalopathy, was first diagnosed in Great Britain in 1986.

The Agriculture Department has prohibited importation of live cattle from Britain since July 1989. Restrictions have been in place for several years against importing British meat or bone meal, which has been suspected as a method of transmitting the disease.

There is no evidence to suggest the disease is a human health hazard, the Animal and Plant Health Inspection Service said.

The inspection service said veterinary diagnostic laboratories in 16 major dairy cattle states were taking part in a national surveillance program against the disease. The program calls for examining brain tissue from cattle over two years of age that show signs of neurological diseases.

Iowa State University and the inspection service will work together in examining the tissue samples.

Laboratories in California, Illinois, Iowa, Indiana, Kentucky, Maryland, Michigan, Minnesota, Missouri, New York, Ohio, Pennsylvania, Tennessee, Virginia, Washington state and Wisconsin have agreed to take part in the surveillance program, officials said. Other states have requested inclusion in the program.

''Mad cow'' disease is a fatal degenerative disease that attacks the central nervous system of cattle. It can cause change in temperament, loss of coordination and loss of weight before death. Cause of the disease is unknown.

#90176u2450 06/25/1990 ~United Press International

SEOUL, SOUTH KOREA (JUNE 25) UPI - Gen. Louis C. Menetrey, the outgoing U.S. military commander in Korea, said Monday the American military presence is needed to maintain peace on the Korean peninsula.

Gen. Louis C. Menetrey said chances of a renewed conflict between South and North Korea are not high at this time.

Menetrey, who is winding up a 3-year tour of duty as head of the United Nations Command, U.S. Forces, in Korea, and the United States-South Korea Combined Forces Command, spoke at a farewell news conference.

He said President Bush and other ranking U.S. officials concluded that U.S. forces must be kept in Korea until there is a change in the Korean situation and he agrees with that decision.

The general, talking to newsmen on the 40th anniversary of the outbreak of 1950-53 Korean War, said South Korea's constantly increasing military capabilities enables some adjustments in the force levels of U.S. forces in Korea.

''But I believe they provide an indispensable part of the deterrence to the North as long as the North is ruled by the current regime with their current goals,'' Menetrey said. ''So for the immediate future I believe that American forces are absolutely required to maintain the peace.''

Menetrey, who will be replaced by Gen. Robert W. Riscassi in a change of command ceremony Tuesday, said agreement has been reached with South Korean authorities on the relocation of U.S. bases in and around Seoul.

Asked about plans to reduce the 43,000 U.S. troops stationed in South Korea, Menetrey noted that there is an announced plan to withdraw some

2,000 Air Force and about 5,000 Army personnel, most on support duty, by the end of 1993.

He said unilateral reduction of forces is usually not a good idea for parties to a potential conflict. He said any further reductions should be linked to corresponding North Korean moves.

''I agree that chances of a North Korean invasion today are not likely or not high, but the reason is the strength of our combined defense team,'' Menetrey said. ''Such an attack would be foolish for them at this time.''

The 60-year-old general said the ongoing change in Eastern Europe for openness and reform has had little impact on North Korea but the North will have to change ultimately.

#90176u2459 06/25/1990 ~United Press International

OSLO (JUNE 25) UPI - Starting July 1, Norway will no longer unilaterally hold down on oil production, imposed to aid the now-failing efforts of the OPEC oil cartel to support higher oil prices, Norwegian oil minister Eivind Reiten said Monday.

Reiten said Norway, which has held its oil output between 5 percent and 10 percent below full capacity since 1986, had no reasons to restrict itsproduction from the North Sea any longer.

''There is no longer any point for Norway to maintain its unilateral 'holdback,''' Reiten said, arguing this would not be an ''unfortunate signal to the market at a time of overproduction since the cooperation between the producers already has collapsed.

''On the other hand, we are giving positive signals by saying that we can reintroduce a holdback at any moment if a new basis for cooperation should arise,'' he said.

He added Norway still had a strong interest in cooperation with the other oil-producing countries.

Reiten's announcement came as the 13-nation Organization of Petroleum Exporting Countries is having difficulty making some of its members abide by their assigned production limits.

The result has been a world glut of crude oil, producing a decline of 20 percent to 25 percent in world crude prices since early April and recent discounting by such members as Saudi Arabia and Iran.

OPEC pumps more than a third of the world's crude oil and tries to support

higher prices by limiting members' output. Norway is not a member.

Reiten emphasized that while the OPEC countries have increased production by about 8 million barrels a day - 50 percent - since 1986, production outside OPEC virtually has remained unchanged.

Reiten said that the removal of the current 5-percent holdback by Norway shouldn't have any noticeable effect on the nation's oil price.

''It only accounts for some 80,000 barrels a day of our total (daily) production of 1.7 million barrels,'' Reiten said.

Norway had restricted its oil output by 10 percent in November and December1986 as a contribution to the stabilization of the international oil market but eased this restriction to 7.5 percent in February 1987. The holdback was subsequently reduced last December to 5 percent.

#90176u2499 06/25/1990 ~United Press International

TEGUCIGALPA, HONDURAS (JUNE 25) UPI - More than 9,000 banana plantation workers of the U.S-owned Tela Railroad Co. went on strike Monday to protest layoffs and contract violations and to press demands for higher wages, union officials said.

Rene Ayestas, president of the the workers' local union, said the strike will go on indefinitely unless management makes a favorable offer to settle demands presented several months ago and currently being negotiated with mediation by the Honduran labor ministry.

The union leader accused the company, which operates on Honduras' northern coast, of failing to honor work agreements and of ''laying off people or replacing permanent workers with temporary or contract workers.''

Ayestas said the workers' demands also include an across-the-board wage increase, but he did not specify how much of an increase they are looking for.

A company official said the strike was ''illegal and disappointing, because the mediation period between the union and management has not even been concluded.''

Pineda Contreras, the government mediator, said: ''It was difficult to reach a negotiated accord because of the union's impatience and a certain attitude of reluctance by the company to negotiate.''

The union called a strike last October, charging the company with similar contract violations. Ayestas said the company has not complied with any of

the commitments it made last October to settle the dispute.

Union members began setting up strike committees Sunday in efforts to extend the strike to all the company's banana plantations and departments. They sought support from the Union Federation, one of the country's strongest union umbrellas.

Bananas are the Honduran chief export product, which earn the country $300 million a year.

#90176u2572 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The National Governors Association urged President Bush Monday to take immediate action against global warming, saying U.S. leadership was needed to develop a coordinated international response to the problem.

In a report recommending seven specific U.S. actions, the governors said the nation needed to act now to reduce risks from rising sea levels, altered rainfall patterns and other potential effects of global warming.

The recommendations, while relatively non-controversial, place additional pressure on Bush to move more decisively on global warming, especially with international efforts accelerating to develop a treaty under which all nations would agree on measures to reduce the threat.

Bush has been criticized by some European officials and environmentalists for emphasizing the need to resolve scientific uncertainties about global warming rather than immediate efforts to check it, such as reductions in heat-trapping industrial pollution.

The governors told Bush the nation could not ignore the ''possibly severe environmental and economic consequences associated with global warming'' and that an early response would be the most cost-effective.

It cited an EPA finding that a policy response to global warming begun in 1990 could reduce potential warming by 40 percent more than if the same policies were initiated in 2010.

However, the governors also said that in view of continuing scientific uncertainties about the extent and scope of global warming, the nation could not afford to ''overreact'' and take costly emission reduction measures that it might regret later.

The report said there could be ''serious effects on the economic well-being of the nation'' if the United States went too far in reducing carbon dioxide emissions, the main ''greenhouse'' gas of concern.

Carbon dioxide is released by cars, power plants and factories burning coal, oil and natural gas. Scientists say it is the largest contributor to the growing blanket of heat-trapping pollution in the atmosphere.

In sum, the governors said the nation should combat global warming by taking only those steps that ''provide a reasonable return on investment and offer other social and economic benefits.

''These prudent measures should be undertaken even in the presence of scientific uncertainty,'' the governors said in their report entitled, ''A World of Difference: Report of the Task Force on Global Climate Change.''

The governors' report also recommended:

-U.S. leadership in developing an international climate change treaty ''at the earliest possible date.''

-Greater energy conservation and more use of renewable energy sources, such as solar power, to cut carbon dioxide emissions. The report also endorses greater use of ''safe'' nuclear power.

-Better forestry management programs to increase trees, which absorb carbon dioxide in photosynthesis.

The report stopped well short of environmentalists' call for Bush to set a goal of reducing U.S. carbon dioxide emissions by 20 percent by 2000.

#90176u2581 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - Efforts to float Donald J. Trump's financial empire off the rocks made no apparent progress Monday as two European banks were ''adamant'' in refusing to back the rescue initiative, a banking source said.

Negotiations appeared to be stymied with just over 24 hours to go before the midnight Tuesday deadline by which Trump must pay $43 million in interest and principle overdue on two casino bonds since June 15.

''It doesn't seem as if anybody is blinking at the moment,'' a banking source said of talks, which continued late Monday.

''There is no change,'' said another bank source, who added, however, ''I think there's the feeling that it's possible to do a deal.''

If Trump does not make the payments, he could face foreclosure on his Trump's Castle casino in Atlantic City and possible bankruptcy.

Trump's major U.S. bank creditors for weeks have been trying to assemble a plan to bail out the developer, who owes an estimated $2 billion to banks and $1.3 billion in publicly traded junk-bond casino debt.

U.S. banks and most of their foreign loan syndication partners agreed to lend Trump $65 million so he can make the payments and to suspend interest payments on $800 million in loans. But two European banks have balked.

Citibank and Chase Manhattan Bank - ranked, respectively, first and second among U.S. banks - were taking the lead in the negotiations. Bankers Trust New York Co. and Manufacturers Hanover were involved earlier in the Trump bailout talks, along with three New Jersey bank units.

Most of Trump's creditors agreed on the weekend to make a $20 million bridge loan because time was too short to process the $65 million advance - but even this required the approval of all the banks involved.

''If they don't agree, then this agreement can't go forward,'' the first banker said. But, he added, ''we're still hopeful that both of these foreign lenders will come through and see the virtue of this agreement.''

There was little indication of any shift in the position of Dresdner Bank A.G., a West German institution with a $15 million share of a $75 million loan written by Chase Manhattan on the Trump Tower.

Also holding out, banking sources said, was Societe Generale. The French bank earlier agreed on the plan but later reneged, reportedly because it did not agree with allowing Trump to defer interest payments.

''The German bank is still holding out and the French bank as well has not shifted, so we are still on the phone with them,'' said the banking source who spoke on condition he not be identified. He described them as ''adamant.''

''Their demands at this stage for a counterproposal at this point are a little bit untenable in light of the fact that 60-odd banks have agreed to this,'' the banking source said. He said Dresdner Bank's demand that its share of the Trump loan be bought out was rejected.

The banker voiced frustration at the European banks' position, arguing that all the banks are better off with Trump solvent.

''We think it's inexplicable, them continuing to push for modification in the terms,'' he said. ''We can't see it - it doesn't make any sense.''

''It all has to do with getting special considerations, which at this stage of the deliberation is untenable,'' he said, hinting that this has

created some irritation among American bank negotiators.

One source said the negotiations had moved up to the level of vice chairman at the U.S. banks as the deadline neared.

#90176u2586 06/25/1990 ~United Press International

(JUNE 25) UPI - President Bush met with Republican lawmakers today to review budget negotiations to date. He followed up by scheduling a breakfast meeting tomorrow with congressional leaders from both parties. G-O-P Senator Phil Gramm of Texas says Republicans doN'T understand what the Democrats expect and doN'T know why negotiations are NOT proceeding. Democrats say the president's budget proposal of last week falls far short of needed savings.

The International Anti-Euthanasia Task Force is hailing today's decision by the Supreme Court that lets states require clear evidence of patients' wishes to turn off their life support systems. But the American Civil Liberties Union says the ruling means people can be protected by state statutes, which may be impossible to get. A former top official of the American Medical Association recommended that everyone write living wills to make their wishes clear.

Tomorrow may be a day of decision for Lithuania. A government spokeswoman says the Baltic republic's parliament will consider whether to freeze its declaration of independence. A freeze would clear the way for negotiations with the Soviet Union and a partial lifting of Moscow's economic blockade. Official Soviet news reports a majority of the Lithuanian parliament opposes the freeze.

Attorneys says a judge has awarded more than four-Million dollars in damages to the families of three men killed in a 1986 Aeromexico jet collision with a small plane. A federal judge in Los Angeles granted the award Friday. A federal jury has found the Federal Aviation Administration shared blame equally with the pilot of the small plane. The federal government is expected to pay out more than two-Million dollars in this case.

#90176u2601 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - A private investor said Monday he has cut his stake in Software Toolworks Inc., a Chatsworth, Calif., manufacturer of computer software products whose stock was off sharply last week.

John Purcell, of Stamford, Conn., sold 200,000 of his 1,056,474 shares of common stock for $17 each last Friday, according to a filing with the

Securities and Exchange Commission.

On June 22, the price of Software Toolworks stock plummeted by $2.875 a share in heavy over-the-counter trading of 2.5 million shares, closing at $16. The stock was off 25 cents to $15.75 a share on volume of 1.25 million shares Monday.

Purcell still holds 856,474 shares, which equals 4.3 percent of the company's 19.9 million shares outstanding.

#90176u2606 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Export sales of U.S. seeds, which have grown steadily in recent years, were up sharply in the latest nine-month reporting period, the Agriculture Department said Monday.

The Foreign Agricultural Service said planting seeds worth $491 million were sold in the nine-month period ending in March, up 32 percent from the same period in 1988-1989 ''and exceeding the full 1988-1989 marketing year value by $39.5 million.''

Even if the effect of tariff harmonization is discounted, sales were up 18 percent, the government said.

Field crop seeds - sunflower, soybean, wheat, corn and sorghum - surged 138 percent in tonnage to reach 380,506 tons and 85 percent in dollar value to total $236.7 million in sales. A major factor, the department said, was the effect of harmonization on wheat seed sales.

However, sales of corn seed nearly doubled, reached $103.2 million in the latest nine-month period.

Italy was the No. 1 market for U.S. seeds, buying $91.3 million worth. Mexico was the second-largest buyer, spending $84.5 million.

#90176u2646 06/25/1990 ~United Press International
TOPEKA, KAN (JUNE 25) UPI - Franklin Savings Association's case against the Office of Thrift Supervision opened Monday in U.S. District Court with attorneys offering differing views of accounting practices at the thrift.

The owners of Franklin, the largest savings and loan in Kansas, are seeking to regain control of the thrift, which was placed under conservatorship by the OTS Feb. 16.

OTS staff lawyer Steven Dittrick said in his opening argument that Franklin used accounting ''gimmicks'' to mask its losses and had $365 million in hedging losses, a sum representing 80 percent of the total incurred by all savings and loans in the nation.

But Franklin attorney Roger Stanton accused the OTS of bias against Franklin and said the federal agency did not understand the complicated investment strategies used by the Ottawa, Kan., thrift.

Stanton said the OTS harbored ''improper motives'' against Franklin and failed to deal properly with a savings and loan that was fiercely independent of federal regulators.

Dittrick and Stanton agreed that Franklin was a ''non-traditional'' thrift that did not limit its business to home loans.

Franklin saw substantial growth after the savings and loan industry was deregulated in the early 1980s as it diversified into non-traditional investments.

The thrift invested in mortgage derivative products, brokerage deposits, and junk bonds. Franklin also hedged on the prepayment of its brokered home mortgages by attempting to predict swings in interest rates and by using the futures markets.

OTS attorney Dimmick said Franklin's assets grew from $200 million to nearly $10.5 billion during the early- to mid-1980s. By December 1988, Franklin's had a net loss of some $21.8 million, he said.

But Stanton said OTS examiners only saw the losses generated by Franklin and never saw the gains.

Stanton said part of the investment strategy devised by Franklin was taught to Franklin executives by Wayne Angell, a former economics professor at Ottawa University who later was appointed to the Federal

Reserve Board by President Ronald Reagan.

The message Angell left with Franklin executives, Stanton said, ''was to manage cash flow and the risk of interest rate fluctuation.''

Dimmick accused Franklin of using accounting ''gimmicks'', including a change in accounting practices to hide the losses from its hedging operation and a separate loss from a non-taxable bond issue for which Franklin issued letters of credit. That project, a housing program, later defaulted and resulted in a $185 million loss, Dittrick said.

The OTS lawyer also accused Franklin of trying to claim benefits from a tax-sharing agreement, which he conceded OTS staffers did not catch until two years after it was initiated. Franklin's parent company assumed responsibility for taxes owed by the thrift and the thrift then recorded that amount as capital, Dimmick said.

''These things go to the issue of whether Franklin was operated in a 'safe and sound' manner as required by statute,'' he said. ''OTS does not have to wait until thrifts fail before we impose a conservatorship. The point of the statute is to permit early intervention before insolvency.''

Stanton said the ''unsafe and unsound'' rationale used by the OTS was created after the conservatorship was imposed as a way to shield the agency from legal action following its unwarranted intrusion into the savings and loan.

He accused the OTS of being an erratic regulator which ''functioned more as an adversary than a regulator'' and said an OTS official who recommended the conservatorship suffered from ''contextual myopia'' because he simply was unable to understand the savings and loan's complex investment strategies.

The Franklin case is being tried without a jury. It is expected to last one month.

#90176u2811 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Public housing tenants suspected of illegal drug trafficking will receive proposed eviction notices in about 20 cities this week, the Department of Housing and Urban Development announced Monday.

The ''demonstration project'' is designed to perform ''unique surgery'' by seizing the leases of drug dealers living in public housing projects - even though they have not been convicted - said Frank Keating, HUD's chief laywer.

HUD officials refused to release a list of ''about 20 cities'' involved in the effort, citing security concerns, but Keating said ''they represent a cross-section of the (drug) problem.''

Because of a ruling late Friday by a federal judge in Richmond, U.S. marshals generally will only serve notices that authorities plan to seize leases. The notices provide an opportunity for hearings.

The process began Monday in ''about four'' cities, Keating said, and notices will be served in some 15 other cities by the end of the week.

The actions will involve between ''one and five leaseholds per city,'' Keating said, where ''the most notorious violations'' have been identified.

Asked if children eventually could end up in foster homes because their parents lost their housing leases, Keating said, ''they certainly could.''

Speaking to reporters, Keating first said 22 cities were involved. But he then said there were ''about 20'' cities targeted.

An affected public housing unit must be a ''notorious'' site of drug trafficking, HUD said, where the leaseholder ''participated in, or knowingly allowed, two felony drug offenses. This must be supported by sworn evidence obtained pursuant to a search warrant or police undercover drug buys.''

The American Bar Association, the American Civil Liberties Union and other groups had urged Housing Secretary Jack Kemp to delay the eviction plan because they said it violated the tenants' constitutional right of due process.

HUD regards the actions as civil ''leasehold forfeitures,'' rather than evictions. Civil libertarians say they violate the principle that people are presumed innocent unless shown to be guilty.

Keating said the plan, announced by Kemp last month, is authorized by asset forfeiture provisions of a 1988 federal anti-drug law. Cars, boats and cash are sometimes taken from accused drug dealers before trial under the same legal provision.

In Richmond, U.S. District Judge Richard L. Williams signed a restraining order Friday barring the removal of tenants without first giving them an opportunity for a hearing. A federal judge in New York previously signed a similar ruling.

Asked about the order by Williams - which the judge first applied to Richmond but then expanded to public housing projects nationwide - Keating said, ''He certainly got our attention.''

#90176u2843 06/25/1990 ~United Press International

(JUNE 25) UPI - In a sharply divided opinion, the Supreme Court today upheld two state laws requiring parental notification and a 48-hour waiting period before a minor may have an abortion. The laws also hold that both parents be notified as long as there is a legal system in place for minors to bypass their parents. For example, such a system could allow a judge to decide if an adolescent is mature enough to decide for herself whether she wants an abortion.

Abortion rights advocates say the decisions chip away further at the constitutional right to an abortion. Planned Parenthood chief Faye Wattleton says the rulings pose a danger to teen-agers afraid of telling parents of planned abortions. But a spokesman for the Ad Hoc Committee in Defense of Life says the decisions put abortion ''on an equal footing'' with other surgical procedures which require parental consent.

President Bush and Nelson Mandela met for three hours at the White House today, but remain at odds on some key issues. While Bush agreed to maintain U-S sanctions against South African, he refused the black leader's request for financial support for the African National Congress. And Mandela rebuffed Bush's plea to renounce violence... saying it will be used as a last resort.

London police are trying to determine whether a bomb caused an explosion and fire that ripped through a private club today. The blast seriously injured at least one person. The explosion occurred at the Carlton Club, which is frequented by Conservative members of the British Parliament. Authorities say the evening blast caused extensive damage.

-30- 1788

#90176u2861 06/25/1990 ~United Press International

(JUNE 25) UPI - Court documents indicate the Exxon Corporation and its shipping subsidiary will go to trial next April for the Valdez oil spill... more than two years after the incident. A federal judge in Anchorage Friday set April 10th as the trial date. Exxon and its shipping company are charged with violating several federal acts, including the Clean Water Act.

White House news secretary Marlin Fitzwater says NO deals were cut to secure the release of China's leading dissident, Fang Lizhi, and his wife. The two were allowed to leave the U-S Embassy in Beijing today... more than one year after they sought refuge following the Tiananmen Square massacre. The official Chinese news agency says the couple was freed after admitting to political errors.

The former communist boss in Prague... who is said to be one of the most hated men in Czechoslovakia... went on trial today to face charges of abuse of power. Miroslav Stepan is the first high-ranking Communist Party official to be tried. Prosecutors charge he ordered police to use tear gas and water cannons against peaceful protesters at a demonstration in October 1988.

-30- 1299

#90176u2984 06/25/1990 ~United Press International

(JUNE 25) UPI - Reaction to today's Supreme Court decisions...

A bomb blast rocks a posh London social club...

And Nelson Mandela's meeting with President Bush...

These stories... and more... next from United Press International:

A new Supreme Court decision says families must show convincing evidence of a comatose loved one's wishes before trying to cut off the person's life support systems.

But today's 5to-die may exist for those who have made their intentions clear... such as in a so-called ''living will.''

The former chairman of the American Medical Association's Council on Ethical and Judicial Affairs says the decision may hamper doctors' efforts to serve their patients. Dr. Nancy Dickey recommends people establish living wills to make their wishes known.

The International Anti-Euthanasia Task Force hailed the ruling as a victory but said there is more to be done to protect those it describes as ''the medically vulnerable.''

In two other cases, the high court ruled that states may require parents be notified if their pregnant under-age daughter seeks an abortion. The court also approved a 48-hour waiting period after notification. But the court said the laws require a legal system for minors to try to bypass their parents.

A lawyer for Planned Parenthood says the court is cutting back on constitutional protection of abortion.

But officials of the National Right to Life say the court is sympathetic to parents' interests. The group says the ruling will provide additional encouragement to its cause.

-30- 1733

#90176u3003 06/25/1990 ~United Press International

(JUNE 25) UPI - British authorities confirm it was a bomb that ripped through an exclusive London club frequented by conservative members of the British Parliament.

A police spokesman says the small bomb apparently blew up on the ground floor of the three-story building housing the posh Carlton Club... injuring four people, one of them seriously.

23 other people... most of them choking on fumes from a fire that followed the blast... fled or were helped from the club.

Anti-terrorist police say the bomb was made from about 10 to 15 pounds of explosives and caused extensive damage. NO one has claimed responsibility.

The club is said to be a favorite among conservative politicians... and Prime Minister Thatcher is an honorary member. It is located in the heart of London and lies only a few blocks from Thatcher's official home at Downing Street.

South African black nationalist Nelson Mandela called his three-hour meeting today with President Bush and other U-S officials ''successful''... even though he fell short of receiving guarantees on key questions.

Bush agreed to maintain U-S sanctions against South Africa until the country introduces even greater racial reforms. But he turned down Mandela's request for financial assistance for the African National Congress.

But perhaps more important is what was left UNsaid.

Bush did NOT say whether he would move to relax sanctions as soon as

Pretoria releases all political prisoners and abolishes some apartheid laws. And he also refused comment on whether he would notify Mandela or the A-N-C of any change in U-S policy toward South Africa.

U-S Assistant Secretary of State Herman Cohen says the two leaders also ''agreed to disagree'' on Mandela's support for the use of violence in the fight against apartheid... as well as his support for Libya, Cuba and the Palestine Liberation Organization.

Despite mixed reviews, however, Mandela called Bush ''a man with a head and a heart,'' and said the meeting ''narrowed considerably'' the differences between them.

-30- 2239

#90176u3027 06/25/1990 ~United Press International

(JUNE 25) UPI - President Bush today applauded the release of China's leading dissident, Fang Lizhi, and his wife.

Bush called the release ''a far-sighted, significant step'' that may indicate a desire for better relations between the United States and China. But a White House statement said the administration still has reservations about China's commitment to human rights.

A State Department spokeswoman says the freeing of the two... who spent more than a year in refuge at the U-S Embassy in Beijing ... would NOT end U-S sanctions against China. Washington imposed the sanctions after the massacre of pro-democracy students in Beijing last June.

China today permitted the couple to go into exile in Britain, where Fang is to become a professor at Cambridge University. Fang and his wife left China on a U-S military plane and arrived at a U-S Air Force base near the southern English town of Upper Heyford late tonight.

China's official Xinhua news agency reports the two were allowed to seek medical treatment after admitting political errors linked to the democracy movement. China has charged the pair instigated the demonstrations in Tiananmen Square.

The Senate is set to vote tomorrow on what has been called a ''futile exercise'' regarding a proposed constitutional amendment to ban desecration of the flag.

Because the House last week rejected such an amendment, the Senate vote will be meaningless.

And indications are that the proposal will fail just as it did in the House... which came up 34 votes shy of securing the two-thirds margin

necessary for passage of a constitutional amendment.

Some Democrats accused the Republicans of dragging out the issue as an election-year ploy.

Senate Democratic Judiciary Committee Chairman Joseph Biden of Delaware called the debate and vote an exercise in ''flag politics.'' But Republican Jesse Helms from North Carolina says it's up to the ''vast majority of American people'' to decide the issue.

-30- 2170

#90176u3062 06/25/1990 ~United Press International

(JUNE 25) UPI - The prosecution continues to build its case against Washington, D-C, Mayor Marion Barry.

A witness testifed at the mayor's drug and perjury trial today that Barry forced her to have sex in 1988. Linda Maynard, a native of the Virgin Islands, said she had never told police about the alleged sexual assault at a hotel in St. Thomas... and had NOT planned to reveal it until questioned about it today.

Barry... charged with using crack cocaine and lying about it... refused to comment on Maynard's allegations following today's session.

Two other women testified they had seen Barry smoke marijuana on two different occasions in the Virgin Islands.

Although Barry does NOT face pot-smoking charges, the women's testimony corroborates with what another witness had told the court. Charles Lewis... a former city employee... told the court last week that the Virgin Islands excursion was the first of many times that he and Barry used drugs together.

The second AIDS patient to undergo a controversial new treatment reportedly is on his way home.

The Atlanta doctors who pioneered the treatment... Kenneth Alonso and William Logan... say they've released Tony Mascio of Chicago in ''good condition.''

Two weeks ago, Mascio underwent an experimental blood heating procedure called hyperthermia... which previously has been used only as a cancer treatment.

Doctors heated Mascio's blood to raise his body temperature to 108 degrees to kill the cancer cells and the AIDS virus. The procedure involves passing the patient's blood through a heating apparatus similar to a

dialysis machine.

The operation was first performed in February on an Atlanta man suffering from AIDS... Carl Crawford... whose condition is said to have markedly improved.

And although Mascio seems to have rebounded similarly, his doctors say they woN'T comment on the procedure as a possible AIDS cure until they make further studies of their two patients.

-30- 2152

#90176u3156 06/25/1990 ~United Press International

(JUNE 25) UPI - London police say NO one has claimed responsibility for detonating a small bomb in an exclusive club that caters to Conservative members of Parliament. The blast at the Carlton Club injured at least seven people, one seriously. Authorities say the front of the building was extensively damaged.

The stage has been set for tomorrow's execution of Texas death row inmate James Edward Smith. A court-appointed psychologist in Huntsville today declared Smith mentally competent to choose NOT to appeal his scheduled death date. Smith's mother sought to prevent the execution.

Smith's slated execution will occur hours after Arkansas killer Ronald Gene Simmons is scheduled to receive a lethal injection in Pine Bluff. Simmons, who killed 14 members of his family and two other people in December 1987, has declined to appeal his sentence.

Nelson Mandela today told President Bush that U-S concerns about the use of violence by the African National Congress are pointless. Mandela told reporters after his three-hour White House visit that his group has ''scaled down'' its armed struggle for the past four years.

The Supreme Court today dealt a blow to the abortion rights movement with a pair of decisions that upheld the constitutionality of two state laws requiring adolescents to seek parental O-K before seeking an abortion.

The high court also ruled that comatose patients kept alive by high-tech medical hardware must have explicitly declared a desire to die before becoming incapacitated in order for courts to allow the plug to be pulled.

-30- 1744

#90176u3165 06/25/1990 ~United Press International

(JUNE 25) UPI - Chinese dissident Fang Lizhi and his wife arrived in Britain tonight, hours after the Beijing government relented and allowed the pair to go into exile. The two had been holed up in the U-S Embassy

since last year's Tiananmen Square massacre.

Las Vegas authorities say an off-duty F-B-I agent died this afternoon from gunshot wounds he incurred earlier while trying to stop a bank robbery. Police are looking for two suspects in the slaying of 47-year-old John Bailey.

Fisher-Price Toys today took the New York attorney general's advice and agreed to place stickers on its ''Little People'' boxes... warning that the figures can choke children who put them in their mouths. Starting next year, the warning will appear directly on the toy's boxes.

The Coast Guard says things are looking good for the Texas and Louisiana coasts regarding the three-point-nine-Million-gallon spill of light crude oil from the Norwegian tanker Mega Borg. Officials say the slick continues to dissipate.

Aspiring writers may want to do their aspiring at the University of Texas in Austin. That's because author James Michener and his wife, Mari, have donated three-Million dollars to encourage writers affiliated with the Texas Center for Writers, which he established four years ago.

The White House grilled nearly one ton of meat along with 125 pounds of beans and 120 pecan pies as President and Mrs. Bush hosted Washington's diplomatic corps to a Texas-style barbecue today. The event will be repeated tomorrow for members of Congress and their spouses.

-30- 1736

#90176u3282 06/25/1990 ~United Press International

(JUNE 25) UPI - Black South African nationalist Nelson Mandela is scheduled to address a joint session of Congress tomorrow. The speech will be the anti-apartheid leader's second major stop in the nation's capital. Today, the 71-year-old Mandela met with President Bush for three hours at the White House. Although Mandela termed the visit a success, he did NOT convince Bush to set aside 30-Million dollars in humanitarian aid for his African National Congress.

Three consumer groups today asked the government to recall more than 300-thousand Jeep C-J's. The groups claim the Jeeps are nearly 20 times more likely to roll over than the average car and have caused more than one-thousand deaths. The National Highway Traffic Safety Administration says it is investigating the vehicle's safety. Chrysler... which bought A-M-C after it discontinued the Jeep C-J... says the consumer groups want to generate business for plaintiff attorneys who help support them.

The National Governors Association today urged President Bush to take immediate action against global warming. A governors' report says Bush can

NO longer ignore the- QUOTE- ''possibly severe environmental and economic consequences'' of the problem. While the move is relatively NON-controversial, it does place additional pressure on Bush to pursue policies on a problem on which he has kept a low profile.

A preliminary federal study issued today says some 38-hundred NON-smoking Americans die each year from lung cancer caused by so-called ''secondhand'' cigarette smoke. The Environmental Protection Agency report also said research ''strongly indicates'' that smoking by parents... particularly the mother... is associated with respiratory illness in infants. Anti-smoking advocates praised the spirit of the study, but said the figure of 38-hundred falls well below the actual number of deaths caused by secondhand smoke.

-30- 2079

#90176u3296 06/25/1990 ~United Press International

(JUNE 25) UPI - Taiwan today lifted a 40-year-old ban against Chinese reporters gathering news on Taiwan. Taiwan's Nationalist government also eased travel restrictions on Taiwanese visits to China and vice versa. The move may signal a thaw in relations between the Communist mainland and Taiwan. However, the two nations still do NOT have direct trade and investment ties are prohibited.

The outgoing U-S military commander in Korea says the American military presence is needed to maintain peace on the Korean peninsula. General Louis Menetrey says chances of a renewed conflict between South and North Korea are NOT high right now. But he says the Bush administration agrees U-S soldiers should stay. Menetrey spoke at a farewell news conference in Seoul on the 40th anniversary of the outbreak of the Korean War.

New York police today released a sketch of a man who questioned the Zodiac killer's last victim about his birthdate. But authorities refused to declare the man a suspect in the serial shootings that have left one dead and three wounded. Police say the man depicted in the sketch asked a homeless man in Central Park his birthdate several days before the homeless man was shot last week.

#90177b0003 06/26/1990 ~Business Wire

LOUISVILLE, CO (JUNE 26) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) Tuesday announced that it has shipped the 1,500th 4400 Automated Cartridge System (ACS) library to the Rockwell International Information Systems Center in Seal Beach, Calif.

Rockwell International, headquartered in El Segundo, Calif., is a member of the U.S. Fortune 500 with a ranking of No. 29 among industrial

corporations.

Initially available only for IBM mainframe users, 4400 ACS connectivity now is announced or available for processor environments including Bull HN Control Data Corp., Cray Research, Digital Equipment Corp., Fujitsu, IBM, ICL, Unisys and Unix. Additional connectivity is planned and under development.

In addition, StorageTek recently shipped its 25,000th transport in the 4480 18-track cartridge subsystem program. The 4480 is designed both for use with the 4400 library system or as a manual-only cartridge drive.

The 4400 ACS automates 18-track cartridge handling, previously a manual function. Each library module holds approximately 6,000 cartridges. Sixteen modules containing up to 96,000 cartridges can be connected using pass-through ports. The 4400 ACS integrates robotics, software, hardware and microcode into a system that stores and retrieves data quickly and cost effectively.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

#90177b0012 06/26/1990 ~Business Wire

WASHINGTON (JUNE 26) BUSINESS WIRE - U.S. Sprint Tuesday announced that it has won a five-year, $7.5 million contract with the Navy Resale and Service Support Office for all unmanned pay phones at the U.S. Navy submarine base at New London, Conn.

As part of the contract, U.S. Sprint also will have the right to advertise its FONCARD on the military base. The contract includes interLATA service for over 300 pay telephones, with an opportunity to add more phones at the site during the course of the contract.

David S. Gergacz, chief operating officer of U.S. Sprint's network systems division, said, "The military personnel in New London can enjoy the advantages of U.S. Sprint service on the pay phones, and the overall benefits of our FONCARD service, which we plan to promote extensively to these callers who are customarily large users of such services."

U.S. Sprint plans to begin offering service next month. At that time, the company also will launch a promotional campaign for its PublicFon and FONCARD services to military personnel located on the submarine base in

New London.

U.S. Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SAN MATEO, CA (JUNE 26) BUSINESS WIRE - The management of Bay Meadows Operating Co. and California Jockey Club (ASE:CJ) Tuesday said that in accordance with an agreement reached with a dissident shareholder group, the results of their contested proxy election will not be released until U.S. District Court Judge Thelton Henderson has ruled on a lawsuit filed in conjunction with the matter.

A hearing on the matter has been scheduled for June 28 by Judge Henderson.

Previously Judge Henderson ruled that votes cast at the companies' annual shareholders' meeting not be certified as final or binding until he issued such a ruling.

On April 26 the companies filed suit against the dissident group, the Bay Meadows stockholder committee, charging that the dissidents violated the federal securities law in connection with their attempt to gain a seat on the plaintiffs' board of directors.

California Jockey Club is one of the nation's three publicly traded real estate investment trusts whose primary asset is a horse racing track. Its shares are traded on a paired basis with Bay Meadows Operating Co., which operates Bay Meadows Racetrack on the San Francisco Peninsula.

PHOENIX (JUNE 26) BUSINESS WIRE - Arizona Public Service Co. will reduce its capital expenditures by one-third -- or about $500 million -- by the end of 1993.

In making the announcement this morning, APS President and Chief Executive Officer Mark De Michele said, ''This action plus an undetermined reduction in our operating budget will reduce our pending rate increase request before the Arizona Corporation Commission.''

De Michele stressed that the exact amount of the rate reduction will not be known for several months ''until studies now underway determine the budget savings.'' Earlier this year, the utility filed for the three-year increase of $259 million beginning in 1991.

He renewed a pledge that ''while we seek to make APS leaner and more competitive, we will not compromise either the quality of service provided our customers nor the safe operation of our power plants and other facilities.''

Earlier this month, he said competitive pressures and a weak Arizona economy would require additional belt-tightening and cost-saving measures. De Michele began such efforts more than two years ago at the state's largest utility.

CHATSWORTH, Calif. (JUNE 26) BUSINESS WIRE - Datadesk International Inc., a leading third-party manufacturer of keyboards for personal computers, Tuesday announced that it is now shipping its user-configurable keyboard, the Switchboard.

The innovative keyboard is comprised of independent modules that can be rearranged or changed for optimum user performance. The Switchboard is also the first keyboard engineered to work with the IBM XT, AT, PS/2 and compatibles, and with the Apple Macintosh Plus, SE and II.

The Switchboard was first introduced at MacWorld, held in San Francisco in April, where it was chosen ''hardware pick of the show.''

It was introduced to the PC marketplace at PC Expo last week in New York.

''The enthusiastic interest in the Switchboard and our early orders indicate we have advanced keyboard technology in a direction that pleases the average computer user and the advanced systems designer,'' said Robert Solomon, founder and chief executive officer of Datadesk.

According to Solomon the revolutionary design of the keyboard was guided by the viewpoint that the keyboard is the principal interface connecting the user to the computer system.

''The keyboard is a critical hardware platform for adding input devices that enhance the system. The Switchboard will support Macintosh and PC users as they seek tools to help them interact with graphical operating environments or work optimally with specialized applications,'' Solomon added.

The basic Switchboard has a 105-key layout with removable numeric, cursor and alpha keypads that can be repositioned into six basic layouts. The Switchboard sells for $239.95.

In addition to the basic unit, users may purchase add-on modules that attach to the Switchboard or replace basic keyboard components. These include a trackball with cursor keys for $149, a vertical function keys module for $50, both of which will ship in August; and a programmable 24-key macro/3270 module that will be available in the fall.

Other input devices under development by the company include a digitizer tablet, a LCD calculator module and a Dvorak-style keypad, all of which add flexibility in adapting the Switchboard for a wide range of applications from number crunching, graphic-intensive applications and multiplatform systems.

Founded in 1985, Datadesk International is an award-winning third-party supplier of innovative, ergomonically designed keyboards and input devices for the Macintosh and IBM and compatible PC markets. Its products are distributed by Ingram Micro D, Softsel, Mac America and MicroAmerica, and are sold by major retailers including Computerland, Businessland, Egghead and MacConnection.

Datadesk is based in Chatsworth and is privately held.

KANSAS CITY, MO (JUNE 26) BUSINESS WIRE - US Sprint Tuesday announced an agreement with Hardee's Food Systems Inc. for long-distance services to some 1800 public telephones located at approximately 1500 Hardee's-owned restaurants nationwide.

The agreement is expected to generate revenues in excess of $2 million a

year for US Sprint.

The pact calls for US Sprint to carry all ''0 plus'' and operator assisted long-distance calls from the pay telephones. Public payphone service requires full operator service capabilities, credit card verification and billing.

Hardee's Food Systems Inc., based in Rocky Mount, N.C., is the third largest fast food hamburger restaurant company in America operating over 3,300 Hardee's and 648 Roy Rogers restaurants.

US Sprint is a unit of United Telecommunications Inc., a diversified telecommunications company headquartered in Kansas City.

AUSTIN, TX (JUNE 26) BUSINESS WIRE - Dr. James A. Turman, president of Chaparral Mining Corp., announced Tuesday the preliminary results of Chaparral's ongoing evaluation of the company's 67,825 acre mineral lease located in Webb County, Texas.

Turman stated that the grade of the company's barite is considerably higher than originally thought. Chaparral had valued its barite at $38 per ton, for use as a weighting agent for oil well drilling mud.

The company's latest testing results confirm Chaparral's barite would be sold for pharmaceutical and high-end industrial use. Pharmaceutical grade barite has a market value of $800 to $1,200 per ton.

Test results indicate the presence of other industrial minerals of commercial value. Turman declined to identify the other minerals other than barite until more conclusive tests have been completed.

Turman also announced the signing of a barite sales contract which will net the company $300,000. Under the terms of the contract, the purchaser is responsible for mining, benificiation and transportation of 7,500 tons of raw barite ore.

#90177b0065 06/26/1990 ~Business Wire

IRVINE, CA (JUNE 26) BUSINESS WIRE - Western Digital Corp. (ASE:WDC) Tuesday introduced the WD33C93B, a ''next-generation'' SCSI (small computer systems interface) bus interface controller.

The WD33C93B is 100 percent pin-compatible with the company's previous SCSI controller, the WD33C93A, and contains a number of advanced features which enable peak SCSI performance. Samples of the WD33C93B are available now.

SCSI is the interface of choice for high-performance, multi-user, multi-tasking systems -- such as those utilizing 80386/80486, Motorola 68000 and RISC-based microprocessors -- because of its flexibility and capability of supporting a wide range of devices, peripherals and applications.

Through the WD33C93B, Western Digital can now provide an SCSI solution capable of moving synchronous data at 10 megabytes (Mbytes) per second, the fastest SCSI throughput currently available.

Ten Mbyte/sec. SCSI, or ''Fast'' SCSI as designated by the SCSI-2 specification, reduces the minimum period for synchronous data transfers from 200 to 100 nanoseconds, which significantly improves the SCSI transfer rate.

Western Digital's WD33C93B SBIC is available in low-power CMOS 44-pin PLCC and 40-pin DIP versions. The WD33C93B implements a full range of SCSI bus features including arbitration, disconnect/reconnect, parity generation and checking, soft reset and synchronous data transfers.

It is completely pin compatible with the company's previous-generation SBIC (WD33C93A) and includes 48 mA drivers for direct connection to a single-ended bus.

By controlling the Fast SCSI Select (FSS) bit in the synchronous transfer register, the host can select between normal synchronous transfers (5 Mbyte/sec.) and Fast synchronous transfers (10 Myte/sec.) on both the SCSI and host DMA interfaces.

Among the other advanced features of the WD33C93B is an SCSI-2 command queueing function that sends or receives queue-tag messages at the appropriate points in the SCSI bus sequence for the transfer-and-select, reselect-and-transfer and wait-for-select-and-receive combination commands.

Western Digital's new SBIC also contains a FIFO full/empty (FFE) bit in the auxiliary status register, which eliminates polling of the DBR when

reading or writing to the FIFO.

Additional WD33C93B features include asynchronous data transfers up to 4.0 Mbyte/sec., programmable synchronous offset from one to 12 bytes, an internal microcontroller, selectable initiator/target roles, 24-bit transfer counter and an 8 - 20 MHz selectable input clock. (For additional features see the attached specification.)

The intelligent drives and host bus adapters accompanying the WD33C93B will begin sampling in August.

Western Digital, with headquarters in Irvine, is a multi-national company that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry.

The company's storage-products unit produces intelligent drives and controllers, while its microcomputer-products unit provides communications imaging, systems logic and integrated systems products.

#90177b0068 06/26/1990 ~Business Wire

SUNNYVALE, CA (JUNE 26) BUSINESS WIRE - DAVID Systems Tuesday announced the DAVID Pair Scanner, a hand held instrument for diagnosing and troubleshooting 10BASE-T, twisted pair and coaxial cabling systems.

The Pair Scanner is used when installing or troubleshooting either 10BASE-T (Ethernet), Token Ring, and ARCnet Twisted Pair topologies.

Among its many applications are the locating of breaks, shorts, bad crimps and intermittent faults in wiring, determination that wiring lengths are within specification, generation of ''link integrity test'' for 10BASE-T hub testing, and determination of electrical noise interference problems.

Features of the DAVID Pair Scanner include IEEE 802.3 LAN Activity Monitoring and Log, programmable operation, built-in RJ-45 and BNC cable connectors, and inverted pair detection using optional multiline injectors. The Pair Scanner is hand held, portable and rechargeable; a recharger for 110 volts is available today with 220 volts coming in the near future.

The Pair Scanner uses a radar-like principle to find the location of the fault in the cable in that a very short pulse is sent down the line; when

a fault or the end of the cable is detected, the pulse bounces back. The effective range of the scanner is currently between 20 and 5,000 feet.

DAVID Systems is supplying a Pair Scanner Kit arranged for unshielded twisted pair and 10BASE-T Ethernet. The kit lists for $2,495.00 and includes the Pair Scanner, the 110 volt recharger, a 10BASE-T injector, and associated communication cable and other apparatus.

The DAVID Pair Scanner and the optional injectors are immediately available from DAVID Systems, and complement DAVID's full line of 10BASE-T products.

The DAVID LAN product family includes the DAVID ExpressNet 10BASE-T Hub, Intelligent Concentrators (48 and 132 port), the DAVID ExpressView network management system, the VolksNet 10BASE-T Ethernet LAN for small network configurations, and the recently announced DAVID Ether-T Adapters for IBM personal computers and compatibles.

DAVID Systems is currently shipping over 10,000 ports of 10BASE-T per month.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first EtherNet LAN products in 1985.

As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE802.3 10BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

WASHINGTON (JUNE 26) BUSINESS WIRE - The Interstate Commerce Commission Tuesday approved, by a 5 to 0 vote, the purchase by Rio Grande Industries of the Soo Line Railroad's 532-mile rail line from Kansas City to Chicago, and the grant-back to Soo of certain trackage rights over the line.

The Commission imposed no conditions on the sale, which will give RGI's Southern Pacific rail system direct access to Chicago from the West Coast.

''We appreciate the expenditious treatment given this case by the Commission and its staff,'' commented Philip F. Anschutz, chairman of Southern Pacific.

''The decision recognizes the pro-competitive impact of Southern Pacific acquiring a route between Kansas City and Chicago and responds to the more than 1,000 shippers and the many state and local public agencies who supported this application.''

The purchase price is $86 million, and Southern Pacific has said it will invest $50 million more to improve the line over the next three years. Addition of the line expands the SP rail network to 15,500 miles of routes serving 17 states.

SAN FRANCISCO (JUNE 26) BUSINESS WIRE - Bank of America and Spring Mountain Escrow Corp. of Newport Beach, Calif., Tuesday announced the signing of an agreement to transfer the bank's open escrow accounts to Spring Mountain.

The terms of the agreement were not disclosed.

Spring Mountain is the nation's largest independent escrow company with more than 40 offices statewide and reported revenues of $15 million last year.

It is a subsidiary of Spring Mountain Group, a privately held company that is 80-percent owned by financier Frank E. O'Bryan.

Over the last few months, Bank of America closed 17 of its 18 escrow services offices in California. The San Francisco office will remain open and will specialize in depository and holding escrows. The bank will transfer its real estate/manufactured housing-related escrows and business opportunity escrows to Spring Mountain.

In Northern California, Spring Mountain is in the process of opening offices to service the new business. The company anticipates that it will have 20 new offices in Northern California by the end of the year.

In Southern California, BofA escrow clients will be served by existing Spring Mountain branches.

''We are thrilled to have the Bank of America business,'' said Christine Sanderson, president of Spring Mountain. ''This transaction will diversify our product line, and we will now offer services relating to both real estate and non-real estate transactions.

''Bank of America and Spring Mountain have had previous business relationships, and this familiarity will enhance the transfer of business and assure continuity of service to BofA clients,'' Sanderson added.

Property-related escrows generally are used in connection with the transfer or financing of residential or commercial real estate and manufactured housing. Business opportunity escrows are used to transfer ownership of businesses and liquor licenses.

PHOENIX (JUNE 26) BUSINESS WIRE - SGS-Thomson Microelectronics Inc. Tuesday announced that it has concluded a patent cross license agreement with Hyundai Electronics Industries Co. Ltd.

In connection with such agreement, SGS-Thomson will dismiss two lawsuits filed against Hyundai in federal court in Texas and will file a motion to terminate the investigation instituted by the International Trade Commission on April 24, 1990. Final settlement is conditioned upon approval of the government of Korea.

SGS-Thomson sued Hyundai for infringement of its patents with respect to semiconductor chips known as DRAMs and SRAMs. The ITC complaint sought a permanent exclusion order which would have barred the importation by Hyundai of infringing DRAMs and SRAMs as well as products in which they are incorporated.

''We are pleased that a comprehensive agreement has been reached with Hyundai,'' stated Mark O'Molesky, SGS-Thomson's vice president for business development.

''It was always our objective to license Hyundai to our fundamental semiconductor patents, and we look forward to a long and successful relationship.'' While details of the Hyundai settlement were not disclosed O'Molesky stated that with the Hyundai agreement, SGS-Thomson had now concluded license agreements with all the major Korean semiconductor companies.

SGS-Thomson Microelectronics Inc., in Carrollton, Texas acquired one of Dallas' pioneer semiconductor companies, Mostek Corp. SGS-Thomson has over 1,000 employees at its Carrollton facility with an additional 700 employees at its other U.S.locations.

CALABASAS, CA (JUNE 26) BUSINESS WIRE - At the annual meeting of shareholders, held June 22, Jack Lin, president of National Technical Systems (NASDAQ:NTSC), said that: ''The strong growth experience in our Technical Services Group, which occurred in fiscal 1990, is continuing in fiscal 1991.

''In particular, the company's Nuclear Services unit has experienced rapid growth in certification and spare-part testing for safety-related installations and applications.''

''As evidence of this growth,'' Lin noted, ''we would like to point out that the backlog in nuclear services for fiscal year ended Jan. 31, 1990, was $278,000. Backlog as of May 31, 1990, is already in excess of $1.5 million. We anticipate this trend will continue as strong demand exists for nuclear facility spare-parts testing and recertification.''

Lin noted that commercial space applications and satellite communications continued to provide new horizons and opportunities for the company.

In another area of strategic repositioning, the company has invested heavily in a ''total quality enhancement process'' designed to position NTS at the forefront of its industry with respect to interrelating the various high technologies that the company employs within its operating groups on behalf of its clients.

National Technical Systems, with operations in California, Virginia, Massachusetts and Michigan, is one of the largest independent aerospace testing organizations in the United States. The company provides testing services to a wide range of industries, principally defense, communications, automotive and nuclear power generation.

SAN JOSE, CALIF. (JUNE 26) BUSINESS WIRE - Henry C. Montgomery has been appointed to the position of chief financial officer for TeleVideo Systems Inc. (OTC:TELV).

Montgomery, 54, will be responsible for all of the company's financial operations, including domestic and international activities.

The Montgomery announcement closely follows the recent appointment of Robert C. Wilson, a well-recognized corporate turnaround expert, as advisor to TeleVideo's Chairman and CEO, Dr. K. Philip Hwang, and the firm's board of directors. Montgomery and Wilson previously worked together at Memorex Corp. during the firm's turnaround years, 1974 through 1978. Montgomery served as CFO for Memorex when Wilson was chairman, president and CEO. Both currently serve on the board of directors of Southwall Technologies Inc.

Montgomery's career includes the successful financial restructuring and fiscal development of a number of corporations, including Memorex, Saga and Fairchild Camera and Instrument Corp. Montgomery is chairman and founder of Montgomery Financial Services Corp., an eight-year-old firm that provides companies and individuals with financial management services.

''Montgomery's extensive achievements in the financial management of large and medium-sized organizations will be of considerable assistance to Televideo,'' said Hwang. ''I'm sure that his experience and excellent track record in corporate financial planning, development and control will prove to be invaluable as we address the challenges before us.

''In addition, his knowledge and experience in international finance will be of particular value as we progress with our overseas ventures, including our new programs in the USSR,'' Hwang added.

As vice president and controller of Fairchild Camera and Instrument Corp., Montgomery participated in the firm's financial turnaround and helped Fairchild achieve a compound annual growth rate of approximately 20 percent.

TeleVideo Systems Inc. is a leading supplier of industry-standard, high-performance LAN file servers and workstation products, low-cost video display terminals and computer enhancement products.

SANTA CLARA, CA (JUNE 26) BUSINESS WIRE - 3Com Corp. (NASDAQ: COMS) Tuesday reported record orders and sales for the fourth quarter ended May 31.

Orders of $117.3 million increased eight percent over the third quarter. Sales improved to $116.8 million, up nine percent sequentially from the prior quarter.

Net income of $7.3 million (25 cents per share), an increase of nine percent from the prior quarter, reflected a $2.5 million (five cents per share) one-time accrual for the relocation this fall of 3Com's corporate offices.

"We continue to be pleased by customers' reaction to our new products," said Eric Benhamou, 3Com's president and chief operating officer. "New product revenues have more than doubled from a year ago, and represented 27 percent of sales in the fourth quarter.

"Our performance this quarter reflected strong orders and sales growth, particularly in the United States. Fourth quarter results also reflected gross margin increases, in part due to increased sales of new products and continued improvement in inventory management."

Continued improvement in asset management resulted in cash, cash equivalents, and temporary cash investments increasing seven percent to $86.7 million at the end of May. Additionally, during the last five months the company has set aside a total of $1.7 million to be paid out to its employees under a recently inaugurated profit sharing plan.

3Com also reported results for its fiscal year ended May 31. Orders of $435.8 million increased nine percent over the $399.7 reported in fiscal 1989. Sales of $419.1 million were nine percent above last year's $385.9 million.

Net income for the year decreased 40 percent to $20.5 million, or 71 cents per share (70 cents fully diluted), compared to $34.3 million, or $1.18 per share ($1.16 fully diluted) for last year.

3Com Corp. is a leading independent global data networking company, providing multivendor connectivity that spans organizations and businesses worldwide. The company designs, manufactures, markets and supports networking systems based on industry standards and open system

architecture.

#90177b0173 06/26/1990 ~Business Wire

LOS ANGELES (JUNE 26) BUSINESS WIRE - Westside Savings & Loan Association, a West Los Angeles-based thrift founded in 1984, has received approval from the California State Banking Department to convert to a California chartered commercial bank, making it one of the first such conversions to be approved.

The Office of Thrift Supervision had approved the conversion on May 24.

Joseph L. Borda, chairman, president and chief executive officer of the $133 million institution, said Westside will operate under the name Westside Bank of Southern California beginning in mid-July.

''We were one of a number of solid S&Ls adversely affected by the actions of others in the industry and felt it in our best interest to seek a change of charter,'' said Borda. ''We are delighted the State Banking Department has confidence in our ability to continue to succeed.''

''As a commercial bank, we'll be able to offer additional services to our existing customers,'' he added.

Borda said the conversion also will afford Westside broader investment powers and wider access to capital markets.

The institution will continue operating under the Savings Association Insurance Fund, known as SAIF.

''Although we will be operating under a new charter, our commitment and management expertise remain unchanged,'' said Evie Romero, executive vice president and chief operating officer. ''We will continue to serve our customers and our shareholders.''

Romero said the application process for Westside's conversion to a bank was started last November.

Westside has been the most profitable S&L in Los Angeles County for the past two years, yielding a return on assets more than double the 1 percent industry average.

Westside operates two offices -- the former Viking Savings & Loan in Santa Monica which it acquired in April 1989 and its main office at 1575

Westwood Blvd. Westside is also building a new 22,500-square-foot facility at 11925 Wilshire Blvd. which is expected to be completed by September.

KANSAS CITY, MO (JUNE 26) BUSINESS WIRE - BHA Group Inc. (NASDAQ:BHAGA, BHAGB), the leading aftermarket manufacturer and supplier of parts, rebuilding, conversion and related services for particulate air pollution control equipment (baghouses and electrostatic precipitators), announced Tuesday that it has retained the investment banking firm of First Analysis Securities Corp. (Chicago) to review strategic opportunities for financing the company's continuing growth, such as a joint venture, a private investment by a strategic partner or an additional public offering of its common stock.

A strategic partner and expanded capital base will assist the company in exploiting the international opportunities of its business, including those in eastern Europe, and provide a financing source for large baghouse and electrostatic precipitator reconstruction and conversion projects.

These opportunities should increase with the expected passage of the Clean Air Act and construction of new coal-fired electric generating capacity during the 1990s.

OVERLAND PARK, KS (JUNE 26) BUSINESS WIRE - Western Financial Corp., a Kansas financial holding company whose principal asset is Columbia Savings Association F.A., announced Tuesday that a meeting of the board of directors of Columbia Savings will be held on July 5, 1990, at which time it expects to receive an oral report from the Federal Deposit Insurance Corp. (FDIC) concerning the results of a recent examination of Columbia Savings by the FDIC.

If the FDIC's report to the board of directors at the July 5 meeting and its subsequent final written report are consistent with preliminary information provided to the company by the FDIC, Columbia Savings may be required to take material additional charge offs and to provide material additional allowances for loan and real estate losses.

The preliminary information received from the FDIC indicates that charge offs and additional allowances for loan and real estate losses will be sought which significantly exceed Columbia's current allowances of approximately $1.8 million for loan and real estate losses.

In this event a substantial amount will be charged to Columbia Saving's earnings and capital. The exact amount of charge offs and additional loan and real estate loss allowances to be sought by the FDIC an OTS will not be known to the company until it receives the FDIC's final report and the results of an independent examination currently being conducted by the OTS.

The company's management has been working with the FDIC and the OTS to assist them in the completion of their examinations and will make such further announcements as are appropriate upon receipt of the final examination reports. Management also anticipates submitting an amended Capital Plan to the OTS.

Western Financial Corp. is the parent company of Columbia Savings Association, a banking services company with 28 deposit offices in Kansas and mortgage banking offices in Kansas, Missouri and southern California.

#90177b0193 06/26/1990 ~Business Wire

LOS ANGELES (JUNE 26) BUSINESS WIRE - Travelers Aid Society and AT&T announced Tuesday the launch of a pilot program to provide runaway and ''throwaway'' children with free long-distance calls to their home communities.

Youths up to 23 years of age, who have run away from home or been directed to leave (throwaways), may contact their parents or home communities -- at no charge or obligation -- through Travelers Aid offices in the following locations: the Teen Canteen in Hollywood, Los Angeles International and Ontario airports, downtown Los Angeles, Garden Grove and Long Beach.

Los Angeles is one of a few major U.S. cities that attract runaways from across the country, making it an appropriate pilot site for the calling program, AT&T said. An estimated 10,000 runaways are living on the streets here at any given time, and that number increases to roughly 20,000 during the summer months.

The calling program will be trialed in Los Angeles for one year, at the

end of which it may be expanded to other metropolitan areas.

''The program's goals are two-fold,'' said Wayne Hinrichs, executive director of Travelers Aid Society of Los Angeles, ''first, to allow runaways to contact their parents or others in their home communities without hassle. And second, to get them into counseling and, where possible, reunite them with their families.

''If it's impossible for the child to return home,'' Hinrichs added, ''we help them re-establish ties or strengthen bonds in their home community -- without guilt or anger.''

''In many cases, runaway children would like to contact their parents or other family members, but do not due to a lack of funds or fear that a collect call may not be accepted,'' said Barbara Austin, regional sales manager for AT&T Consumer Communications Services. ''AT&T is working with Travelers Aid to ensure that any runaway child who wishes to call home can do so.''

AT&T's sponsorship covers the cost of both domestic and international long-distance calls, as well as all advertising associated with the program. Ads will feature the slogan ''Start Speaking to Your Parents Again.''

To illustrate the diversity of Los Angeles' runaway population, Los Angeles International Airport was chosen as the site of Tuesday's announcement.

''Although many runaways end up in Hollywood, we also see a significant number at the airport,'' said Jerry Epstein, president of the Board of Airport Commissioners, ''particularly those who have recently arrived in Los Angeles or those who wish to return home but have no definite plan of how to do so.''

Since 1899, Travelers Aid Society has been helping people who encounter problems while away from home. Each office is staffed with volunteers and trained professionals who reach out to runaways, the distressed, the homeless and emotionally unstable. Travelers Aid also serves the business traveler and tourist, providing airport and travel information.

#90177b0197 06/26/1990 ~Business Wire

REDONDO BEACH, CA (JUNE 26) BUSINESS WIRE - TRW is one of four companies selected for negotiations by NASA Goddard Space Flight Center to develop designs for the Advanced Tracking and Data Relay Satellite System (ATDRSS).

Under an 11-month, $7.5-million Phase B study contract, TRW will develop a spacecraft design and operational concept for an advanced space network system for the late 1990s. NASA will select one of the study contractors to build multiple ATDRSS spacecraft under a four-year Phase C/D follow-on contract.

TRW currently is under contract to build seven TDRSS spacecraft. The first TDRS was launched in April 1983 but was damaged and left in a useless orbit when the launch vehicle's final stage failed. It was raised more than 8,000 miles to its operational orbit, using its on-board thrusters, by day-and-night efforts of a NASA/TRW/Contel team.

The second TDRS was lost in the Challenger accident in 1986. A third was launched on the Space Shuttle Discovery, which marked the Shuttle's return to flight in September 1988. The fourth TDRS was launched in March 1989, completing the current three-satellite, fully operational orbital constellation.

Two satellites, TDRS-E and -F, are being completed at TRW facilities in California. TDRS-G, now under construction to replace the satellite lost in the Challenger accident, has received an infusion of new technology, including improved receivers and the use of solid-state power amplifiers to replace selected traveling-wave-tube amplifiers.

''Our unique expertise from the TDRSS program as well as other advanced communications satellite systems is an excellent base from which to develop ATDRSS,'' said TRW Program Manager Brooks Vogt. ''Our reference payload design for ATDRSS makes maximum use of proven TDRS technology to minimize development risk.''

TRW is teamed with Bendix, Columbia, Md., who will support development of operations concepts and Ball Aerospace, Broomfield, Colo., who will provide expertise in phased-array antennas and beamforming networks for space applications.

''The TRW team stands ready to apply our TDRSS experience in providing NASA with an ATDRSS design that will meet all user needs well into the 21st century,'' said R. Gordon Williams, vice president and general manager of the Federal Systems Division of TRW's Space & Technology Group. ''TDRSS has been a program of 'firsts.' ATDRSS will be, too.''

TRW Space & Technology Group is an operating unit of Cleveland-based TRW Inc. The group has built more than 175 communications, defense and scientific spacecraft; developed over 200 advanced space instruments; and

integrated some 550 experiments into their host spacecraft.

#90177b0229 06/26/1990 ~Business Wire

MILWAUKEE (JUNE 26) BUSINESS WIRE - Applied Power (NASDAQ:APWRA) had record sales, operating earnings, and after tax ''cash profits'' in the third quarter of fiscal 1990.

Sales were $113.6 million, up 100 percent over the third quarter of 1989. Operating earnings were $16.0 million, up 78 percent over 1989. ''Cash profits'' -- defined as accounting earnings plus non-cash charges for amortization and depreciation of goodwill, intangibles, and asset write-ups related to acquisitions -- were $7.2 million, or 54 cents per share, up 36 percent compared to cash profits of 40 cents per share in 1989 excluding non-operating one-time net gains from sale of a minority interest in Hein-Werner Corp., settlement of a pension termination, and an unusual foreign currency gain and a one-time expense from allocation to Applied Power's Employee Stock Ownership Plan.

Accounting net earnings in the quarter were $5.2 million, or 39 cents per share, up from 36 cents per share in 1989 excluding the non-operating one-time net gains, and down from 51 cents including the one-time net gains which amounted to $1.9 million.

Richard G. Sim, CEO, commented that ''cash profits, as we define them, are a better measure of the economic performance of the company than accounting earnings.

''In order to maximize cash flow we have been reasonably aggressive in structuring deals to maximize the tax deductible amortization of intangible assets as exemplified in the acquisition of GB Electrical in February 1988 and the recent acquisition of the Tool and Fastener division from Thomas Industries in December 1989.

''This has reduced our accounting net earnings, but increased cash generation as a result of lower cash income taxes. We also have large non-cash charges for amortization of goodwill and asset write-ups from the acquisitions in June 1989 of the Barry Wright Corp., Norelm in September 1989 and other smaller acquisitions.

'Applied Power is a global company which manufactures and distributes tools, equipment, systems, components and consumable items to manufacturing, construction, transportation, mobile equipment, aircraft, natural resource, specialized machinery and office markets. Approximately

45 percent of the company's sales and assets are outside of the United States.

BEVERLY HILLS, CALIF (JUNE 26) BUSINESS WIRE - The U.S. Navy has awarded the Ingalls Shipbuilding division of Litton a $26.4 million increase to a contract received in 1981 to provide continuing engineering and support services for the Ticonderoga (CG-47) class Aegis cruiser shipbuilding program.

This latest contract brings to $203 million the total amount awarded to Ingalls for engineering design, training and logistical support, as well as data and configuration management for the entire Aegis cruiser class. Ingalls also provides technical and data support to the Navy's other

shipbuilder for Aegis cruisers.

This modification to the original award extends the contract into the government's fiscal year 1991.

Lead shipbuilder for the Aegis cruiser program, Ingalls has won contracts to build 19 of the 27 ships authorized by Congress since the program's inception in 1978. Ingalls has already delivered 12 of the cruisers to the Navy on or ahead of schedule and under budget.

Litton is a technology-based company providing advanced electronic and defense systems, industrial automation systems and resource exploration services to U.S. and world markets.

#90177b0278 06/26/1990 ~Business Wire

NEWPORT BEACH, CA (JUNE 27) BUSINESS WIRE - National Telephone & Communications Inc. (NTC), a Newport Beach-based flat-rate, unlimited long-distance carrier, announced plans Tuesday to become a national full-service telephone company.

Donald J. Rackemann, NTC's president and chief executive officer, revealed that the company has entered into an agreement with GSI Communications Inc., a major discount purchaser of U.S. Sprint long- distance services, making the nationwide expansion possible beginning July 1, 1990. NTC currently markets its services in California only.

The discounted rates will allow NTC, as a ''sub-dealer'' to market long-distance service, utilizing Sprint's fiber-optic system, at rates substantially lower than those of any major carrier, but on a ''prompt-payment'' basis, according to Rackemann.

At an ''open house'' celebration held last Sunday in NTC's newly acquired office building, Rackemann told 125 attending shareholders and members of an all-new network sales force, ''the new national program will add a minimum of 2,000 NTC customers within the next 60 days.''

NTC, which services primarily the business community in California, will continue marketing its ''pre-paid'' long-distance functions and Calling Card product which have been saving customers from 18-40 percent on their telephones bills, Rackemann pointed out.

A publicly held company, NTC is certified by the California Public Utilities Commission.

SOLANA BEACH, CA (JUNE 27) BUSINESS WIRE - In his first public statement since his appointment last week as the new president and chief executive officer of Kaypro Corp., Ben F. Fisher announced that Kaypro has begun computer production to fill a backlog of over $500,000 in orders, as well as new orders in excess of $1 million received since last Wednesday.

''Now that our production line is up and running again, we expect to begin shipping tomorrow (Wednesday) and will complete shipment of the backlogged machines by the end of July,'' said Fisher.

Kaypro has resumed operations at its Solana Beach facility. Production was stopped and shipments were temporarily halted for a brief period during which time former management relocated operations to a facility in Carlsbad.

''Kaypro will make substantial progress during the next month,'' said Fisher. ''We've trimmed our expenses and we expect to show profitability very soon.'' Fisher has been with the company since the 1950s and was instrumental in turning around Kaypro's parent company, Non-Linear Systems during the aerospace industry slowdown in the early 1970s.

''It's been extremely gratifying to experience such intense company loyalty among the Kaypro people during these difficult times,'' Fisher commented. ''We have a strong nucleus of employees, most of whom have been here for many years. They really want to see the company succeed.''

Kaypro Corp. has more than 38 years' experience in the high-tech/electronics industry and is an internationally recognized brand name. Currently, Kaypro enjoys a user base of more than a half-million computer systems worldwide and markets a full line of microcomputers for businesses and individuals.

FORT WAYNE, IN (JUNE 26) BUSINESS WIRE - Lincoln National Corp., one of the largest insurance holding companies in the United States, and Dai-ichi Mutual Life Insurance Co., Japan's second-largest life insurance company,

announced the formation of a strategic alliance today.

Under terms of the agreement, Dai-ichi will purchase two new series of Lincoln National convertible preferred stock and will enter into a series of business relationships with the Fort Wayne-based corporation.

The approximate value of the new convertible preferred stock, which will only be sold to Dai-ichi, was placed at $312 million. The agreement will take effect after the required waiting period under the Hart-Scott- Rodino Antitrust Improvements Act.

The agreement calls for Dai-ichi to purchase a 5 percent share of Lincoln National through the first series of convertible preferred now and another 4.6 percent share through a second series of convertible preferred stock within a year.

In addition, Lincoln National and Dai-ichi will develop reciprocal business relationships in the areas of investment management, reinsurance, pension products and group health products. A joint management committee will be formed to develop these business opportunities.

This is the largest investment in a U.S. insurer by a Japanese insurer.

Noting that Lincoln National and Dai-ichi Mutual Life entered into a reinsurance agreement in 1987, Rolland said the two companies' relationship dated back to visits by Dai-ichi officials to Fort Wayne almost 30 years.

Dai-ichi Mutual Life is the third largest insurer in the world. It reported assets of $110 billion and revenues of $23 billion at the end of its fiscal year in March.

Lincoln National reported assets of $25.1 billion and revenues exceeding $8.1 billion at the end of 1989. Listed on the New York, Midwest, Pacific London and Tokyo stock exchanges, Lincoln National has affiliates throughout the United States and in the United Kingdom providing individual life and health insurance, property-casualty coverage, employee benefits, reinsurance and investment management services.

MILPITAS, CA (JUNE 26) BUSINESS WIRE - June 25, 1990, Qume Corp. and the investor group led by David Lee, chairman and chief executive officer of

Qume, and Wearne Brothers Ltd. of Singapore and certain of its affiliates announced that definitive loan agreements to finance the purchase of Qume shares pursuant to a previously announced proposed merger were signed today.

Under the loan agreements, the Singapore branch of Chase Manhattan Bank (National Association) agreed to lend up to $35 million on a senior basis and Wearnes Technology (Hong Kong) Ltd., an affiliate of Wearne Brothers Ltd., has agreed to loan Singapore $65 million (approximately $34.5 million) on a subordinated basis to finance the acquisition of shares and the expenses of the merger.

Funding of these loans is subject to certain conditions, including satisfaction of all conditions to the consummation of the merger (other than financing) and the absence of material adverse changes to the company.

The agreement relating to the previously announced proposed merger provides for the acquisition of the company in a cash merger which would result in the public shareholders of the company receiving $7.25 per share in cash.

Completion of the merger is subject to certain conditions, including the approval of stockholders of the company at a meeting of the stockholders expected to occur in September 1990, and filings with governmental agencies.

Qume Corp. (NASDAQ:QUME) manufactures and markets page and daisywheel printers, display products and computer supplies and accessories. In addition, the company's Data Technology Division offers disk drive controller boards, chip sets and high-capacity flexible disk drives and subsystems. Qume's products are marketed worldwide through a variety of distribution channels and OEMs.

#90177b0620 06/26/1990 ~Business Wire

NEWPORT BEACH, CALIF. (JUNE 26) BUSINESS WIRE - Coronary artery disease (CAD) is the No. 1 killer of women in the United States, killing more women than lung cancer or breast cancer.

Out of the 520,000 fatal heart attacks which occur in the United States every year, 48 percent are in women. In women, the reason for this level of mortality is often late referral for treatment.

Late referral may be explained by late diagnosis. According to Linda

Crouse, M.D., a Kansas City cardiologist: ''After age 65, screening tests are not routinely reimbursed by Medicare. I suspect many women don't seek medical attention for diagnostic purposes for this reason.''

Even when they are tested, however, the most common test given, stress electrocardiography or the ECG treadmill test, is highly inaccurate in women. ''Treadmill testing has about a 70 percent accuracy rate in men and only about a 50 percent accuracy in women. It is very difficult to be certain if a woman has coronary artery disease if ECG testing alone is used for diagnosis,'' Crouse said.

A more accurate test -- exercise or stress echocardiography -- uses ultrasound to detect exercise-induced changes in the motion of the left heart wall. These changes are the earliest sign of coronary artery disease, even preceding electrocardiographic changes. According to Crouse the sensitivity rate for diagnosis using stress echocardiography is around 90 percent. ''Earlier detection means earlier intervention,'' she added.

The technology is widely available. Advanced Technology Laboratories of Bothell, Wash., pioneers in the medical applications of ultrasound, has just introduced its new Ultramark 7 Ultrasound System with unique integrated digital technology.

Digital technology allows physicians to comparatively study four views of the heart on a single screen. Comparison between pre- and post-exercise, or pre- and post-treatment or intervention, is possible. Digital image acquisition eliminates disruptive respiratory and motion artifact.

Color-flow imaging, also available on the Ultramark 7 System, allows assessment of cardiovascular structure and blood flow, in addition to providing anatomic information.

The enormous progress in cardiovascular medicine over the last decade has been largely due to new strategies for preserving heart muscle following a heart attack.

Angioplasty, clot dissolving drugs and other medications contain, or, in some cases, actually prevent, damage to the heart. But accurate diagnosis is critical to physicians' abilities to treat CAD effectively. Echocardiography allows physicians to make early, accurate diagnosis and then assess the results of their treatment strategies through consecutive examinations.

Early diagnosis is key to preservation of heart muscle, and it is in this area that women appear to be discriminated against. According to a recent Cedars-Sinai Medical Center study of 2,297 coronary artery bypass patients of whom 20 percent were women, men were more likely to be referred for

surgery following abnormal tests, whereas women were not generally referred until they were older and sicker. As a result, they had higher in-hospital mortality.

According to Crouse, only when women are given a test which will accurately assess the presence or absence of coronary artery disease will improvement be seen in the morbidity and mortality picture for women with CAD.

''We believe that the use of exercise echocardiography, with its high sensitivity and specificity, will significantly improve our ability to detect coronary artery disease in women,'' she said.

Issues concerning women and coronary artery disease, with emphasis on new technology to accurately diagnose it, are explored on a video news release available upon request from Communicore.

SECAUCUS, NJ (JUNE 26) BUSINESS WIRE - ILIO, INC. (NASDAQ/NMS Symbols: ILIO, ILIOW, ILIOU) Tuesday reported record net sales and net income for the fiscal year ended April 30, 1990.

Net sales for fiscal 1990 increased 52 percent to $36,767,855 as compared to $24,194,968 for the year ended April 30, 1989. Net income for the year ended April 30, 1990 increased 124 percent to $1,214,436 as compared to net income of $541,873 for fiscal 1989.

Net income per common and common equivalent share increased to $0.60 ($0.59 fully diluted) for the fiscal year ended April 30, 1990 as compared to $0.37 for fiscal 1989, after giving retroactive effect to the 4 for 3 stock split in May 1990. Per share results for the year ended April 30, 1990 were affected by an increase in the weighted average number of shares outstanding due to the company's initial public offering, completed in November 1989.

For the fourth quarter ended April 30, 1990, net sales increased 44 percent to $13,569,983 as compared to $9,417,473 for the fourth quarter last year. Net income increased 111 percent to $630,732 as compared to $298,718 for the fourth quarter of fiscal 1989.

Net income per common and common equivalent share increased to $0.24 ($0.23 fully diluted) for the fourth quarter ended April 30, 1990 as compared to $0.20 for the fourth quarter of fiscal 1989, after giving retroactive effect to the 4 for 3 stock split in May 1990. Per share results for the quarter ended April 30, 1990 were affected by an increase in the weighted average number of shares outstanding due to the company's initial public offering, completed in November 1989.

Commenting on the results, Jerry Ross, ILIO's chairman of the board and chief executive officer, said, ''We are very excited about the company's continued growth. We have successfully increased consumer awareness of the ILIO brand name and broadened our customer base.''

ILIO, INC. designs, markets, sells and distributes women's cotton sportswear and apparel primarily under the ''Ilio'' trademark and through private label arrangements.

The company markets its lines of sportswear, which retail for under $30, to moderately priced department stores, specialty stores, specialty chains and mass merchants. ILIO completed its initial public offering in November 1989.

#90177b0623 06/26/1990 ~Business Wire

MIDDLETOWN, PA (JUNE 26) BUSINESS WIRE - In meetings in New York City with the financial community Tuesday, CareerCom Corporation (NYSE:CCM) announced that the Company's truck school enrollments had rebounded to a point where they now exceed 1,600 students.

This figure is almost three times the truck school enrollments reported by the Company in the third week of March. As previously announced, the Company's truck school enrollments declined significantly from the December 1989 average enrollments of 2,570 students as a result of the student funding changes implemented by the federal government in January.

Because of the importance of the Truck Driver Training Division to the Company's revenues and net income, the increase in truck school enrollments was gratifying according to Chief Executive Officer, Robert A. Smith. Smith stated that the Company believed it was possible to achieve truck school enrollments in excess of 2,000 students by the beginning of the Company's 1991 fiscal year on October 1, 1990.

Smith stated that student enrollments in the Company's three other operating divisions in fiscal year 1990 had been running approximately four percent to four and one-half percent below comparable enrollment figures in fiscal year 1989 on a same school basis. Smith stated that the Company had been able to achieve higher overall revenues in these divisions in the current fiscal year despite this decline in enrollments, principally as a result of tuition increases.

The Company also announced that it has tentatively reached an agreement with its major institutional lender to restructure the Company's existing loan agreement. The restructured agreement, when effected, is anticipated to provide the Company with additional liquidity and less stringent financial covenants. When implemented, the new agreement will permit the Company to satisfy the outstanding request of its bonding company for collateral to secure required school bonds.

As a result of the magnitude of the decline in truck school enrollments, the Company stated that it anticipated the likelihood of reporting a loss in the June 1990 quarter, and for the six months ending September 30, 1990. Smith stated that, while the Company was disappointed that the funding shortfall will produce these losses, he felt extremely confident that with rising truck school enrollments, the Company was on its way back to reporting healthy earnings.

CareerCom Corporation is a leading owner and operator of career training institutes located throughout North America. The Company currently maintains 71 accredited, post- secondary schools offering programs of study in a variety of career-oriented disciplines.

AVENEL, NJ (JUNE 26) BUSINESS WIRE - CONCORD CAMERA CORP. (NASDAQ/NMS Symbol: LENS) Tuesday announced it has entered into an Original Equipment Manufacturer (OEM) agreement whereby it will manufacture computer

peripheral parts for a New York Stock Exchange company whose name was not disclosed.

The terms of the agreement consist of a four-phase plan with the first three phases covering the first year of the relationship. The first 90 day period calls for CONCORD to hire 50 direct labor employees and will encompass trial production and start up; the second 90 day phase requires CONCORD to hire an additional 150 direct labor employees and will involve pre-production of the products; and the third phase, which will last approximately six months, calls for CONCORD to hire an additional 500 direct labor employees and will encompass high volume production.

The fourth phase of the agreement (assuming the successful completion of the first three phases) involves the company's long term plan to have its own manufacturing facility in the People's Republic of China (PRC). CONCORD will be given the opportunity to submit a competitive proposal to provide a facility for the company's use. In consideration of this, and in the event the company does acquire its own facility, CONCORD agrees to transfer all trained personnel to the company.

#90177b0625 06/26/1990 ~Business Wire

SAN DIEGO (JUNE 26) BUSINESS WIRE - Software Products International (SPI) Tuesday announced the introduction of the Open Access III compiler, a compiler and run-time system for Open Access III.

The compiler is available immediately.

Introduced in January 1990, Open Access III is a database-oriented, multifunction business software system for IBM PCs, XTs, ATs and compatibles. It offers growing businesses a cost-effective solution for everyday management problems, and it's the only multifunction program that is ''network ready'' for up to four users.

Included in Open Access III is an Open Architecture system that allows users to write customized applications in the ''C'' language and incorporate them directly into the Open Access environment.

No other multifunction or integrated software program has its own compiler and run-time system. The Open Access III compiler allows users to enhance the speed, power and flexibility of their current applications.

And it adds new functions to the Open Access programming language to provide a complete selection of programming tools for sending and receiving electronic mail. No similar programming language provides these advanced communications capabilities.

The compiler, with its supplied run-time system, makes it easier for professional application developers to create finished, market-ready applications that can be run separately from Open Access III.

Run-time systems for both single-user and network applications are included. The run-time system gives users license for unlimited distribution of applications with no royalty payments required.

Applications include all of Open Access III handy desk accessories, including graphics, E-mail, calculator and more. Combined database applications can automatically be tied in with all of Open Access III's other modules, including word processing, spreadsheet and communications.

Software Products International, based in San Diego, was founded in 1979 to develop, publish and market business software products for personal computers. The company is privately held with international product revenues exceeding $18 million for fiscal 1989.

MIAMI (JUNE 26) BUSINESS WIRE - Noven Pharmaceuticals Inc. (NASDAQ:NOVN) announced Tuesday that it reacquired exclusive U.S. and Canadian rights to its transdermal estrogen drug delivery system from Rorer Group Inc.

The original agreement entered into between Noven and Rorer in April of 1989 provided for Noven to supply its transdermal estrogen system to Rorer on a worldwide basis excluding Japan. Under that agreement Noven retained non-exclusive rights to market and sell the product in the United States and Canada.

Steven Sablotsky, chairman of the board and president of Noven said, ''Although the reacquisition of exclusive North American rights was expensive, we feel it will provide Noven new opportunities for the marketing of its product in the United States and Canada.

''It is the goal of Noven to become a fully integrated pharmaceutical company with a domestic sales force.'' Additionally, Sablotsky added, ''Rorer, soon to be Rhone-Poulenc Rorer, is presently pursuing registration of Noven's transdermal estrogen system in the international arena and remains committed to its success.''

Terms of the amendment to the licensing agreement were not disclosed.

Noven Pharmaceuticals is engaged in the development and manufacturing of transdermal drug delivery systems. Transdermal systems by definition move a drug or other substance from outside the skin through the skin and into the bloodstream.

The many benefits of transdermal drug delivery include controlled delivery for a finite period, improved patient compliance, and the avoidance of problems associated with oral drug delivery. Noven Pharmaceuticals' transdermal drug delivery systems represent a significant advance in among other things, surface area, adhesive characteristics, and compatability with numerous drugs.

MENLO PARK, CALIF. (JUNE 26) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday announced OpenCase, a program aimed at delivering a complete distributed application development environment for open systems using Computer-Aided Software Engineering (CASE) technology.

The company has signed an agreement with Systematica Ltd., a leading software engineering company in the United Kingdom, to assist Informix in developing OpenCase products that meet United States and European market requirements.

Informix's OpenCase programs will enhance programmer productivity and the quality of applications for open systems by providing a flexible, integrated environment that supports the full software lifecycle -- from application specification through maintenance. OpenCase is designed specifically to address the software development needs of the growing open systems marketplace.

''Distributed UNIX-based systems running powerful database engines such as Informix On-Line are increasingly replacing proprietary systems for large-scale transaction processing applications in the corporate environment,'' said Mikael Wipperfeld, manager for Informix's integrated development environment program.

As part of its OpenCase program, Informix is working with business partners such as Systematica to integrate the highest quality CASE tools and training across the entire software lifecycle and to address specific vertical market requirements. Informix also plans to offer consulting services and customization of its development environment to meet customer needs.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

Headquartered in Menlo Park, Informix has a European headquarters in London and an Asia/Pacific headquarters in Singapore.

#90177b0630 06/26/1990 ~Business Wire

MIAMI BEACH, FLA. (JUNE 26) BUSINESS WIRE - Life-like color is only one advantage of a break-through in commercial holographic technology recently achieved by Miami-based Holographic Images Inc.

Founder Larry Lieberman said the technique, which integrates motion, full color and three-dimensions, ''represents the first time that anyone has commercialized full-color holography.'' The new process employs photographic film and makes it economically feasible to create multiple copies of full-color holograms.

Other innovations of the technology include freedom from studios and models -- the new methodology takes images from life, on site; and the ability to capture three-dimensional graphics, directly from a computer, in full-color hard-copy that shows a series of perspectives.

Although the possibility of full-color holography had been demonstrated, commercial production makes Holographic Images unique. ''We put a lot of pieces of research together,'' Lieberman said. ''For the first time we have a practical technique for achieving full, realistic color in holograms.''

The evidence hangs on an office wall: In true jewel-tones, two live parrots bob, switch their tails and turn with a seemingly flat surface.

Except for remarkable three-dimensional depth -- of subjects and background -- the effect is like rear projection of a color film-loop.

Lieberman wants to make Holographic Images' resoures available to more artists. He envisions the company playing a role similar to a lithographic studio or record company: Holographic Images would provide the technical expertise and hardware necessary to create multiple images of a work; and market them for the artist.

Holographic Images Inc. was established by Larry Lieberman and incorporated in 1982. The company established offices on Miami Beach in 1987.

B&W photos, color slides and additional background materials available. On-site location shots/interviews may be arranged.

BEVERLY HILLS, CALIF. (JUNE 26) BUSINESS WIRE - Apple Computer Inc. Tuesday introduced a major new revision of HyperCard software at the opening day of Digital World in Beverly Hills.

HyperCard 2.0 now provides users with easy access to the power of Macintosh computer programming, and greater flexibility to manage and create information, using virtually any type of media. The new version contains more than 100 new features.

''When we introduced HyperCard in 1987, it represented a revolutionary new personal computing tool,'' said Randy Battat, vice president of Apple Product Marketing.

''HyperCard 2.0 greatly extends the potential of the original version of HyperCard, giving Apple customers new tools and functions for using and creating custom Macintosh software. We expect to see a vast new array of applications for both the casual Macintosh user as well as for advanced programmers.''

Among the easiest to use and learn programming tools for personal computers, HyperCard 2.0 is expected to appeal to beginners who can put it to work immediately. HyperCard 2.0 features an entirely new set of ready-to-use and example stacks for storing personal and business information, creating graphics and charts, and playing games and puzzles.

HyperCard 2.0 will be available in volume worldwide in July. Software-only

upgrades will be available through user groups, book publishers and participating Apple dealers. HyperCard 2.0 can also be purchased separately for $49.95.

SAN FRANCISCO (JUNE 26) BUSINESS WIRE - Macworld magazine is releasing additional test results to supplement tests appearing in the July 1990 issue of the magazine as part of its ongoing coverage of the subject of extremely low frequency (ELF) emissions from personal computers.

Macworld, which is read by over 400,000 owners or prospective buyers of Apple Macintosh computers, recently published articles identifying ELF emissions produced by personal computers as cause for serious concern.

Macworld's position is that the existing body of research on ELF emissions and human health present significant reasons for concern on the part of personal computer users.

The test results below indicate that many personal computers, including IBM, NEC and Compaq models, are also of concern.

SUNNYVALE, CA (JUNE 26) BUSINESS WIRE - MASS Microsystems (NASDAQ:MMIC) announced Tuesday that it has appointed Advanced Promotion Technologies of Deerfield Beach, Fla., a Value Added Reseller for the purchase of ColorSpace IIi desktop video cards for use in the company's Vision System electronic promotion delivery system for supermarkets.

Each Macintosh II computer can use up to five ColorSpace IIi cards to control the five remote color video monitors.

Apple Computer Inc. announced on May 8, 1990 that it had entered into a Value Added Reseller agreement with Advanced Promotion Technologies Inc. for purchase of Macintosh computers used in Advanced Promotions Technologies Vision System. The agreement, which was valued at more than $10 million, was announced at the 1990 Food Marketing Institute convention in Chicago, Ill.

The Vision System, which consists of a Macintosh II computer, videodisc player, MASS Microsystems videographics cards, color monitor and thermal printer, allows supermarket retailers to reach shoppers with full-motion video messages, instant electronic coupons and frequent shopper programs at supermarket checkout lanes.

Each of the ColorSpace IIi card located in each Macintosh computer will control one color monitor located at each checkout lane. Acccording to Advanced Promotion Technologies, a short ten-second video is played on the color monitor while the cashier is scanning the customer's order.

The video can tell shoppers about their instant savings, give them helpful information about in-store specials and display the shopper's current point balance in the frequent shopper program.

Advanced Promotion Technologies is a joint venture company of Procter & Gamble, Dun & Bradstreet, CheckRobot, PNC Corp. and Schlumberger. Schlumberger, the company's newest partner, is the world's leading producer of smart cards.

MASS Microsystems is a multimedia driven, peripheral enhancement company operating worldwide. The Company manufactures an award-winning line of videographics products and 45Mb removable cartridge storage systems for the Apple Macintosh family of personal computers.

CUPERTINO, CA (JUNE 26) BUSINESS WIRE - Apple Computer Inc. Tuesday announced that Robert Puette will become the new president of the company's Apple USA division, effective July 1.

Puette will be responsible for all of the division's sales, marketing, support and channel activities. Puette comes to Apple after a notable 24-year career at Hewlett-Packard Co., where he led the startup, development and expansion of Hewlett-Packard's worldwide personal computer business. His most recent position at Hewlett-Packard was general manager Personal Computer Group.

He will report to Michael Spindler, Apple's chief operating officer.

''Bob Puette's arrival marks a major milestone in the development of Apple's USA business,'' said Spindler. ''He has a proven ability to effectively manage large, complex organizations. He's demonstrated

exceptional business and technical expertise in the global personal computer market. And he's known for his strong and thoughtful leadership.

''All told, Bob has the right set of skills and experience to galvanize Apple's U.S. business in the coming years,'' Spindler said.

Puette held the following executive positions at Hewlett-Packard:

-- General manager, PC Group (1981-1990). In this capacity, Puette developed Hewlett-Packard's startup personal computer efforts into a substantial global business. He directed every segment of Hewlett Packard's personal computer business worldwide.

-- General manager, Computer Support division (1979-1981). In this role, Puette turned a traditional cost center into one of Hewlett-Packard's most profitable divisions. Hewlett-Packard's support organization has been ranked ''Number One'' by Data Pro in customer satisfaction since the early 1980s.

-- Marketing manager, Realtime Computers (1977-1979).

From 1966 to 1977, Puette held a number of product, product marketing and operations management positions at Hewlett-Packard's Santa Clara division. He is 48 years old and has a bachelor of science in industrial engineering from Northwestern University and a master of science in operations research from Stanford University.

#90177b0639 06/26/1990 ~Business Wire

MILPITAS, CA (JUNE 26) BUSINESS WIRE - NetFRAME Systems Inc., the leading company delivering network server platforms for personal computer-based local area network (LAN) environments, Tuesday announced the completion of a third-round, $12 million private financing to support the company's rapid growth and further penetration of the network computing market.

The capital was secured from several new investors, including PW Private Capital Technology Fund (managed by PaineWebber Development Corp.), Morgan Guarantee Trust and the Fleming Venture Fund of London, as well as current technology and venture investors including Olivetti, Apple Computer, Xerox Bessemer Ventures, Kleiner Perkins Caufield & Byers, Menlo Ventures, MK Global and 3i Ventures.

To date, equity investments in the company now total $29.25 million.

NetFRAME's ''network mainframe'' systems -- a family of high-reliability, high-capacity network file and application servers designed to run all industry standard network operating systems including NetWare 386, OS/2 LAN Manager and Unix -- have been shipping since late 1989 to corporate customers that are:

-- establishing, expanding or connecting PC networks in departments and divisions,

-- seeking cost-effective alternatives to mini- or mainframe investments, but require the same high levels of reliability, data integrity, security and maintenance control found in mainframe solutions, or

-- automating branch office operations yet want to manage and administer server systems from a central location.

By taking a fresh architectural approach to increasing input/output (I/O) throughput, NetFRAME created the first dedicated server platform by combining the high reliability, data integrity and capacity of mainframes with the simplicity, flexibility and cost advantages of personal computers.

NetFRAME systems are sold in the United States, Europe and the Far East by highly qualified resellers including Businessland Advanced Systems, Evernet, USConnect, Syscom and others.

NetFRAME Systems Inc., a privately held company started in 1987 by Carlton G. Amdahl, a veteran mainframe computer scientist, and Enzo Torresi, co-founder of Businessland Inc., designs, manufactures and markets a family of high-performance network servers designed specifically for client/server computing in corporate environments.

#90177b0647 06/26/1990 ~Business Wire

ATLANTA (JUNE 26) BUSINESS WIRE - Zenox Inc. (NASDAQ:ZENO) announced Tuesday it has completed the acquisition of the assets of GMX

Communications Inc. (OTC:GMXC), in a transaction valued at $18.5 million, subject now only to the approval of the FCC in transferring certain broadcast licenses involved in the acquisition.

Zenox Inc. is an Atlanta-based diversified holding company, with subsidiaries engaged in the healthcare, investments, food and beverage, manufacturing, and communications industries.

The acquisition of Nashville-based GMX Communications' assets will add approximately $33 million in gross revenues, and an estimated $1.2 million in pre-tax net profits to a consolidated Zenox Inc., according to Richard G. English, president and CEO of Zenox.

The $18.5 million sales price will include a combination of cash, Zenox notes, Zenox common stock, and the assumption by Zenox of certain GMX liabilities.

Presently, GMX Communications owns and operates eight licensed radio broadcasting stations in four Southeastern markets, which will all be transferred into a newly incorporated wholly owned subsidiary, Zenox Communications Inc., for financial and operational management, as soon as the FCC has granted license transfer under a filing now in preparation.

Zenox has already announced plans to expand this company through additional acquisitions of both radio and TV properties.

GMX Communications also owns and operates Granite Corp., General Masonry Inc., and Hermitage Contractors Inc., all of which are engaged in the commercial building and construction business.

Zenox will transfer all assets and business into a newly incorporated wholly owned subsidiary, Zenox Construction Inc., for financial and on-going operational management. According to English, Zenox plans to expand this company through additional business development at home and abroad.

NASHVILLE, TN (JUNE 26) BUSINESS WIRE - Grading, designing lesson plans, creating seating charts, and developing presentations -- tasks that eat away at teachers' valuable time -- have been simplified through the introduction Tuesday by Apple Computer Inc. of the HyperCard for Education software tool for the Macintosh computer.

Tailored specifically for teachers to help them organize their classroom management tasks, HyperCard for Education demonstrates the capabilities of the HyperCard software tool in education.

Designed for kindergarten through twelfth grade teachers who have little or no experience using computers, HyperCard for Education is easy to use and features an extensive on-line help system.

HyperCard for Education utilizes HyperCard 2.0, a new software tool introduced today by Apple Computer simultaneously at the National Educational Computing Conference (NECC) in Nashville, Tenn. and Digital World in Beverly Hills, Calif. HyperCard 2.0 is a significantly enhanced update of HyperCard 1.2.

With HyperCard, users can manage and create information using virtually any type of media, including text, graphics, video, sound, voice and animation. HyperCard for Education demonstrates the power and capabilities of HyperCard 2.0 in the classroom, and allows even teachers with no previous computer experience to benefit from the ease-of-use of the traditional Macintosh environment.

#90177b0656 06/26/1990 ~Business Wire

LOS ANGELES (JUNE 26) BUSINESS WIRE - Martin S. Blinder, chairman of the board and chief executive officer of Martin Lawrence Limited Editions Inc. (NASDAQ:MLLE), Tuesday announced that the company estimates that its net sales for the second quarter ending June 30, 1990, will be approximately 12 to 17 percent lower than net sales in the same quarter last year.

The company anticipates that its earnings for the quarter will be approximately 6 to 10 cents per share, compared with 24 cents in the same quarter last year.

Blinder stated that the primary reasons for the decrease in sales and earnings are attributable to a softening in the art market as well as a continued decline in overall consumer retail spending. The company believes that the slowdown in the art market is primarily the result of the disappointing art auctions held in early May at the major New York auction houses, Sotheby's and Christie's.

The failure of these auctions to generate the anticipated selling prices for contemporary works of art has resulted in continuing negative media publicity, which has further adversely affected the art market. The company believes that the next test of the art market's strength will come

in November at the fall auctions in New York. As a result, the company anticipates that the art market may continue to face uncertainty in the coming months.

Martin Lawrence Limited Editions is an integrated publisher, retailer and wholesaler of limited-edition serigraphs, lithographs, sculptures and other works of fine art created by internationally reowned and emerging artists.

The company also purchases, for resale, original works of art as well as limited-edition works by recognized artists not published by the company. At the present time it operates 43 retail art galleries located in nine states and Washington.

#90177b0657 06/26/1990 ~Business Wire

KANSAS CITY, MO (JUNE 26) BUSINESS WIRE - Stuart Hall Co. Inc., (NASDAQ:STUH), Tuesday announced record sales and earnings for the second quarter and six months ended May 31, 1990.

For the second quarter net earnings increased 42 percent to $1,208,769, or 31 cents per share, up from $854,053, or 22 cents per share, for the prior second quarter. For the latest second quarter sales increased 20 percent to $36,068,850, compared to sales of $30,114,280.

Sales for the six months were $57,873,346 as compared to $48,733,581 for the similar period a year earlier. Net earnings for the latest six months rose to $1,749,112, or 44 cents per share, from $1,493,530, or 38 cents per share.

In announcing the results the company noted that it currently enjoys the largest order backlog in its history, giving every indication that the company will achieve its sales forecast of $127,500,000 for fiscal 1990.

The company also indicated that during the next 60 days it will introduce the largest group of new products in its history and said that these products would be in its office supply, school supply and writing paper categories.

Commenting on the company's growth outlook, Charles Hanson, chairman, stated, ''Based on the current strong demand for our full product line we now feel strongly that fiscal 1991 sales may exceed the $156 million previously forecast. With this in mind, our board of directors has authorized management to enter into an agreement with Chase International,

a division of Chase Manhattan Bank in New York, to privately place in the international market $12.5 to $15 million of the company's common shares.

''Placement of the common shares at a price above $15 per share is essentially non-dilutive to earnings per share due to the offset savings on interest costs on the company's short term borrowings. The company feels that placement of the shares is possible at the desired price level.

''We also feel it is noteworthy that we are moving ahead as rapidly as possible with our recycled paper products program and feel that these products will make a significant contribution to our continuing growth in the future,'' Hanson concluded.

Stuart Hall also announced that the board of directors has declared a regular semi-annual dividend of 3 cents per common share payable Aug. 1, 1990 to shareholders of record July 16, 1990.

Stuart Hall Co. Inc.
Operating Results
(Unaudited)

	Quarter Ended May 31,		Six Months Ended May 31,

SAN DIEGO (JUNE 26) BUSINESS WIRE - Edward T. Maggio, Ph.D., president of Synbiotics Corp. (NASDAQ:SBIO), Tuesday announced that its wholly owned subsidiary, UniSyn Fibertec Corp., has completed the purchase of assets of the Biotech Project of CD Medical Inc., a wholly owned subsidiary of Dow Chemical Co.

The Biotech Project of CD Medical develops, manufactures and markets hollow fiber devices and instrumentation used in cell culture.

The purchase of these assets was partially financed by a $1 million bridge loan provided by H & Q Life Science Venture Partners and Ventana Growth Fund. This bridge loan is anticipated to be replaced in the near future with a larger permanent financing of approximately $3 million.

The financing will include the purchase by a group of international investors, including the above, of a minority interest in UniSyn Fibertec.

Synbiotics Corp. is a leader in the development, manufacture and marketing of high-technology veterinary therapeutic and diagnostic products. Through a wholly owned subsidiary, the company also develops and manufactures novel human pharmaceutical compounds.

SANTA ANA, CA (JUNE 26) BUSINESS WIRE - McDonnell Douglas Field Service Co. (MDFSCO) introduced its newest service option - Business Partnering - offering more flexible services and a value-added service solution to OEMs, VARs and VADs and their own customers at DEXPO East 90.

Through its Business Partnering capability, MDFSCO is poised to provide a service solution directly to OEMs and resellers' customers on their behalf providing the OEMs and resellers the freedom to concentrate on manufacturing and distributing products.

A total-solution field service company, MDFSCO delivers national on-site maintenance from more than 100 field offices. Included in its Business Partnering package is the same comprehensive range of services offered to

end users today such as, on-site service and warranty repair, software support and depot repair.

Also featured at the DEXPO East 90 show in booth No.531 is McDonnell Douglas Field Service Company's traditional third- and fourth-party services. One of the largest independent field service organizations in the United States, MDFSCO is a single source for quality repair and maintenance service on mainframes, minis, CAD/CAM workstations, micros, peripherals and communications networks.

With more than 1000 trained technicians, support engineers and staff personnel, MDFSCO provides the flexibility necessary in designing programs to meet customers' requirements.

Services are marketed nationwide to companies in all facets of commerce including retailing, transportation, distribution, communications, health care, educational organizations and federal and local government agencies.

To handle such a diverse clientele and product offering, MDFSCO operates three depot centers located in Irvine, Calif.; Norristown, Pa.; and Dallas in addition to the 100 service centers located in all the major metropolitan areas in the United States.

All the repair centers utilize the latest technologies in fault isolation, repair and certification to insure the highest quality of spare parts availability. The Irvine facility also houses a large Class 100A Cleanroom and state-of-the-art servo writers for sealed head disk assembly repair.

In addition to depot service, McDonnell Douglas provides on-site repair service. More than 100 manufacturers' products are maintained. An important part of the services, Preventive Maintenance is always performed per the manufacturer's specifications or recommendations.

#90177b0662 06/26/1990 ~Business Wire

MOUNTAIN VIEW, CA (JUNE 26) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) announced its fiscal 1990 second quarter operating results.

Revenue for the second quarter ended June 1 was $35,347,000, up 26 percent from the $28,089,000 reported in the second quarter of fiscal 1989. Net income was $7,883,000 compared to $7,576,000 reported in fiscal 1989. Earnings per common share were 36 cents for the quarter, compared to 35 cents reported in the second quarter of fiscal 1989.

Revenue for the six months ended June 1 was $72,528,000, a 35 percent increase from the $53,628,000 reported for the like period in fiscal 1989. Net income was $18,025,000 compared to $14,561,000 for the like six months of fiscal 1989, an increase of 24 percent. Earnings per common share were 83 cents for the six months of 1990, a 24 percent increase over the 67 cents reported for the first six months of 1989.

Apple Computer remained the company's largest customer, accounting for approximately 23 percent of Adobe's total revenue for the quarter and 22 percent for the six months. Royalty revenue is being received from 29 customers and totaled $21,044,000, an increase of 8 percent, compared to $19,408,000 in second quarter of fiscal 1989.

For the six months ended June 1, royalty revenue was $45,270,000, a 24 percent increase over the $36,560,000 reported for the first half of fiscal 1989.

Application product revenue of $12,278,000 increased 66 percent over the $7,403,000 reported in second quarter fiscal 1989. Application product revenue for the first six months of fiscal 1990 was $23,195,000, a 62 percent increase over the $14,280,000 for the like period last year.

During the quarter, Adobe announced plans to sell a PostScript cartridge for Hewlett-Packard's LaserJet II printer along with add-on outline font cartridges. In early June, Adobe held its first Developers' Conference and launched PostScript Level 2, the first major update of the PostScript language since its introduction over five years ago.

Three new PostScript controller designs that expand the price/performance range for PostScript printers were also introduced. In addition, Adobe announced new OEM agreements with Xerox Corp. and the Eastman Kodak Co., bringing to 37 the announced OEM customers of the company.

Adobe's board of directors declared a cash dividend for the second quarter of 6 cents per common share for shareholders of record as of July 9 payable on July 23.

#90177b0663 06/26/1990 ~Business Wire

SAN DIEGO (JUNE 26) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Tuesday announced the issuance of a U.S. patent that protects the adenosine-regulating technology on which the company was

founded.

The patent, issued March 27, 1990, covers inventions made by Gensia co-founder Dr. Harry Gruber and is owned by the University of California. Gensia has an exclusive license to the patent, according to David F. Hale, president and chief executive officer.

''The issuance of this patent is an important milestone for Gensia in our efforts to protect the company's proprietary technology,'' Hale said. ''Gensia is expanding its U.S. and foreign patent applications as we develop new analogs and medical indications.''

Gensia intends to develop its adenosine-regulating agents (ARAs) for the treatment of cardiovascular disease.

Gensia believes that these compounds may significantly reduce heart tissue damage caused by acute ischemia (lack of oxygen to the heart muscle), which typically occurs during heart attacks, episodes of unstable angina, and cardiac procedures such as coronary artery bypass surgery and coronary angioplasty.

''Our first adenosine-regulating drug, ARA-100, is in Phase 2 clinical trials in patients with ischemic heart disease in Europe and in the United States,'' Hale added.

''This adenosine-regulating technology has also been shown in pre-clinical research to have protective and inhibitory mechanisms that we believe may aid in the treatment of stroke, epilepsy and other neurological disorders.''

Gensia Pharmaceuticals Inc. is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

IRVINE, CA (JUNE 26) BUSINESS WIRE - Advanced Logic Research Inc. (NASDAQ:AALR) Tuesday unveiled its new PowerFlex 20CSX, 20-MHz 386SX personal computer with 32-KB cache and super VGA card; 800 by 600 (optional support up to 1024 by 768).

The system is positioned to support GUI (Graphical User Interface) and Windows 3.0 applications.

The highly efficient design provides a 4-deep write buffer and 32-KB static cache RAM that provides up to 50 percent faster system performance than non-cached 16-MHz 386SX products.

The PowerFlex 20CSX is offered in three models: Model 1 has a base configuration of 1-MB RAM; Model 40 includes 3-MB RAM and 40-MB hard drive and super VGA card; and Model 110 comes with 3-MB RAM and 106-MB hard drive and super VGA card. All models come standard with 1.44-MB floppy disk drive.

Suggested retail prices of the ALR PowerFlex 20CSX Models 1, 40 and 110 are $1,749 (U.S.), $2,549 (U.S.) and $3,349 (U.S.) respectively. Shipments have begun to authorized ALR distributors and ALR Power Partner Resellers worldwide.

Advanced Logic Research Inc. is a leader in high-performance CPU technology. We carry the most comprehensive line of ISA, Micro Channel and EISA-based PCs ranging from entry-level 12.5 MHz 286 computers to 33-MHz 386 and 25-MHz i486-based high-performance systems, and multiprocessor systems based on UNIX and Novell.

ALR products can be purchased through value-added resellers, value-added dealers, major chains and retail locations throughout the United States, Canada, Europe, Latin America and Asia. ALR stock is publicly traded on the NASDAQ National Market System under the symbol AALR.

ROCHESTER, NH (JUNE 26) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) Tuesday reported record operating results for its first fiscal quarter which ended May 31, 1990.

Net sales of $35.5 million represented a 57 percent increase over sales of $22.6 million reported in the first quarter of the preceding fiscal year. International sales were $8.2 million in the first fiscal quarter of 1991, a 116 percent increase over the $3.8 million reported in the first quarter of fiscal 1990.

Pretax earnings of $11.5 million represented a 42 percent increase over pro forma pretax earnings of $8.1 million reported in the comparable quarter of the preceding fiscal year.

Net income in the first fiscal quarter totalled $7.1 million, or 27 cents per share, compared to pro forma net income of $5.1 million, or 21 cents per share, in the comparable quarter of the preceding fiscal year.

''We have been very pleased by a number of events at Cabletron. Our Multi Media Access Center has become our highest growth product line, and our 10BASE-T products and Desktop Network Interface adapter cards, both introduced last year, have gained rapid customer acceptance. Our Remote LANVIEW/Windows network management software continues to be the popular choice of both network designers and network managers,'' said Craig Benson Chairman of the Board and Chief Operating Officer.

''Going forward we will continue to deliver to our customers the standards- based connectivity and powerful software tools that have been instrumental to our success,'' Benson added.

Headquartered in Rochester, NH, Cabletron is a leading independent developer and manufacturer of standards-based network management solutions including software, hardware and connectivity products. The company's world-wide base of installed products exceeds over 1.3 million nodes.

COLUMBUS, OHIO (JUNE 26) BUSINESS WIRE - A liquid nutritional formula for abnormal glucose tolerance was recently granted a patent by the U.S. Patent and Trademark Office.

The patent is the first received for a medical nutritional product by Ross Laboratories, the leader in the U.S. medical nutritional market. Ross is a division of Abbott Laboratories.

The product, GLUCERNA, is the only liquid medical nutritional product designed for patients with high blood sugar levels. Before the product's introduction, no product was available specifically for the dietary management of patients with abnormal glucose tolerance, such as those with diabetes mellitus or stress-induced hyperglycemia.

GLUCERNA is a high-fiber, low-carbohydrate enteral formula that provides complete balanced nutrition and can be used as the sole source of nutrition for extended periods or as a nutritional supplement between meals.

''As one component of diabetes management, GLUCERNA should be used in conjunction with a program of home- or self-blood glucose monitoring to assure consistent blood sugar levels,'' said Ronald Isaac, M.D., director of medical nutrition and medical services at Ross. ''Patients should seek the advice of a physician or registered dietitian before using this product,'' he added.

GLUCERNA is one of a line of disease-specific nutritagnal" products, including PULMOCARE, ALTERNA and REPLENA. GLUCERNA is available for purchase over-the-counter or can be special ordered in local pharmacies. It comes in ready-to-use 8-fluid ounce cans in a vanilla flavor.

#90177b0678 06/26/1990 ~Business Wire
NEW YORK (JUNE 26) BUSINESS WIRE - Microsoft Corp. Tuesday announced that Microsoft Works, the bestselling integrated software package, has been selected by IBM Corp. for inclusion with every PS/1 Personal Computer, the new IBM computer created specifically for the home market.

Since Microsoft Works will already have been installed on the hard disk, users can be productive immediately, whether writing a letter with the word processor, analyzing family finances with the spreadsheet or creating a household inventory with the database.

"Since its introduction in 1987, more than 40 percent of Microsoft Works sales have been to people who use it at home for personal and business productivity. We're delighted to team up with IBM to offer a powerful and attractively priced computing solution to home users," said Mike Maples, vice president of applications software at Microsoft Corp.

Version 2.0 of Microsoft Works offers capabilities that allow users to perform a variety of useful tasks, such as producing professional-quality letters and reports, easily creating a database of important names and phone numbers, analyzing household finances with the spreadsheet, or accessing online services such as CompuServe with the telecommunications module.

Easy integration lets users insert a spreadsheet listing a household inventory into a letter, or paste stock price information from Dow Jones News/Retrieval into a spreadsheet.

Complete built-in help and training is available at the touch of a single key. The program contains more than 300 Help screens and more than 50 built-in interactive lessons and demonstrations. Help message on every screen reminds users that help is available with a single keystroke or the click of a mouse. The suggested retail price of Microsoft Works is $149.

Microsoft Corp. (NASDAQ: MSFT) develops, markets, and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90177b0682 06/26/1990 ~Business Wire

NEW YORK (JUNE 26) BUSINESS WIRE - In a move that heralds a new era in personal communications, Motorola Inc., Schaumburg, Ill., announced a global communications system that will allow people to communicate by telephone anywhere on earth -- whether on land, at sea or in the air -- via portable cellular radiotelephones operating as part of a

satellite-based system.

Callers using the new system will not need to know the location of the person being called; they will simply dial that person's number to be connected instantly.

Motorola calls the new system Iridium and has established a satellite communications business unit to develop it. The heart of Iridium is a ''constellation'' of 77 satellites in low-earth orbit, working together as a digital switched communications network in space. The system will be able to handle both voice and data.

Motorola Inc. is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include two-way radios, pagers, cellular telephones and systems, semiconductors, defense and aerospace electronics, automotive and industrial electronics, computers, data communications and information processing and handling equipment.

Motorola was a winner of the first annual Malcolm Baldrige National Quality Award, in recognition of its superior companywide management of quality processes.

GLENDALE, CA (JUNE 26) BUSINESS WIRE - GLENFED Inc. (NYSE:GLN) Tuesday announced it has amended its Dividend Reinvestment Plan with the intent of curbing certain abuses by participants in the voluntary cash payment feature of the plan.

The changes will be effective with respect to the voluntary purchases to be made on Aug. 1, 1990, and with the next regular quarterly dividend.

Under the amended plan, the discount for purchases with reinvested dividends and voluntary cash payments was reduced from 5 percent to 2 percent.

Keith P. Russell Jr., GLENFED's chief operating officer, said the changes in the plan are consistent with the company's main objective of providing its shareholders with an opportunity to invest in the company on a long-term basis.

Russell added that the company believes the recent price changes in its

common stock appear to result from arbitrage transactions by participants in the voluntary cash payment feature of the plan, which resulted in downward pressure on GLENFED's stock price. The company also believes that nothing has occurred with respect to its business operations that would cause such price decline.

GLENFED Inc. is a real estate and consumer bank holding company and is the parent company of Glendale Federal Bank, the nation's third-largest savings bank, which operates 239 banking offices in California, Florida and Washington.

#90177b0691 06/26/1990 ~Business Wire

CAMBRIDGE, MA (JUNE 26) BUSINESS WIRE - Lotus Development Corp. Tuesday announced shipments of Lotus 1-2-3 for ALL-IN-1, a 1-2-3 spreadsheet for Digital Equipment Corporation's VAX/VMS family of computers that provides tight integration with ALL-IN-1, Digital's market-leading integrated office system.

The product was announced in March and is shipping on schedule.

Lotus 1-2-3 for ALL-IN-1 provides 1-2-3 functionality to commercial and technical VAX users at every level of an organization. The product can be used on all VAX/VMS computers running ALL-IN-1, from a single-user VAXstation to a VAX 9000 mainframe.

The Minnesota Timberwolves basketball team has been beta testing Lotus 1-2-3 for ALL-IN-1 for several months, and is using the product to develop a prototype of a salary planning model. The model will allow the team's senior executives to perform ''what if'' salary analyses for current players and draft picks.

Proposed salaries are compared to historical averages for players in similar positions or similar draft choices. For example, Minnesota Timberwolves managers would use the 1-2-3 for ALL-IN-1 application to determine how much they should offer a second-round draft pick by analyzing the average amount offered to second-round draft picks for the last five years.

Lotus 1-2-3 for ALL-IN-1 will be distributed through Digital's worldwide direct and indirect sales channels, including Digital's sales force, direct marketing organization (including DECdirect and the Electronic Store), distributors and OEM partners. Support and Training

Digital will support 1-2-3 for ALL-IN-1 as a Digital product, with technical telephone support, Digital Software Information (DSIN) access, critical on-site support and software updates. This support will be available worldwide, 365 days a year.

As part of its Enterprise Integration Services, Digital will offer customer training worldwide for 1-2-3 for ALL-IN-1. This will be supplemented by additional courses from Lotus, as well as from two leading training facilities, ERI training of New York City and LeBlanc and Associates of Chicago.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and a worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

SARASOTA, FL (JUNE 26) BUSINESS WIRE - Elcotel Inc. (NASDAQ/NMS:ECTL), manufacturer of public communications products Tuesday announced that it has undertaken a significant reorganization of its operations.

The company stated that changes had been made to correct problems which caused it to report a reduction in sales for the fiscal year ended March 31, 1990, compared to the prior year, resulting in the company's first loss on continuing operations.

Fred W. Kruse, formerly senior vice president, has been appointed chief operating officer, directly responsible for marketing and sales. Customer services, field engineering, and order processing have been consolidated in a new organization designated Customer Relations headed by Richard Maxey, also reporting to Kruse.

Fred Kruse continues with overall responsibility for manufacturing and PAOF administration. Donald L. Shapiro, vice president and controller, has assumed responsibility for material control and procurement, reporting to George W. Kruse, chief financial officer.

Robert Alexander, formerly senior vice president in charge of marketing and sales, has left the company to form a new organization which will act as distributor of Elcotel products related to the hospitality industry. Several former Elcotel marketing and sales personnel are expected to join Alexander in this venture.

George C. Pierce, chief executive officer, stated, ''The organizational changes we have made will not only allow us to better serve our customers, but the overall efficiency of the company has been improved by the elimination of redundant functions.

''We have reduced payroll about 20 percent to meet the challenge of a short-term softness in the market for our products. Engineering enhancements to several products, to be completed over the next several months, are expected to significantly increase sales.

''This reduction in personnel cost, together with tighter control of all expense areas and better inventory control, will reduce our break-even level of sales to an amount we believe we can readily exceed by next quarter.''

HINTON, VA. (JUNE 26) BUSINESS WIRE - WLR Foods, Inc. (NASDAQ:WLRF) announced that its board of directors Tuesday declared a quarterly cash dividend of $0.075 per share payable July 27, 1990 to shareholders of record July 13, 1990. The amount represents a 2.3 percent increase over the $0.073 paid previously. The increase was instituted to simplify the calculation of fractional cents that resulted from a three-for-two stock split effected May 9, 1990.

James L. Keeler, president and chief executive officer, commented, ''While the dividend increase resulted from the need to make a technical adjustment, we did so to the benefit of shareholders. Further, this action does not preclude the Board's consideration of the cash dividend increase normally decided upon at its meeting in October.''

WLR Foods Inc. is engaged in fully integrated turkey and chicken production, processing, further processing and marketing. The company is the eighth largest poultry processor/further processor in the United States.

#90177b0716 06/26/1990 ~Business Wire

DENVER (JUNE 26) BUSINESS WIRE - Compliance Recycling Industries Inc. (NASDAQ:CRIK) Tuesday reported fiscal 1990 revenues for the year ending March 31, of $1,648,167, with a net loss of $572,388 or 7 cents per share, as compared to fiscal 1989 revenues for the year ending March 31, of $1,523,466, representing a net loss of $228,944, or 3 cents per share.

Fiscal 1990 weighted average shares outstanding were 8,450,252, as compared to fiscal 1989 weighted average outstanding of 7,694,280.

The announcement was made by Jeffrey L. Stanich Sr., chairman of the board of Compliance Recycling Industries Inc.

Stanich noted, in making the announcement that ''while our loss of fiscal 1990 was as expected, we are pleased to report that so far during the first quarter of fiscal 1991, as of June 15, the company has completed Compliance Unit sales in excess of $385,000, as compared to a total of $400,000 for all of fiscal 1990.

''The company anticipates that by the end of our first quarter, on June 30

we will have secured a total of some $450,000 in unit sales alone.''

Stanich went on to explain that while the company anticipates a loss of anywhere from $75,000 to $100,000 for the first quarter of fiscal 1991, ending June 30, 1990, ''We are confident that by the close of our second quarter, ending September 30, 1990, we will see the comapny's turn-around complete, with reveneus expected in the $700,000 range, representing earnings of approximately $100,000.''

According to Stanich, the turn-around is a result of several factors including: ''In the past six months, the company has undergone an extensive reorganization and redirection in our marketing efforts, as indicated by the addition of Thomas M. Reynolds as president. Secondly, we are in the midst of servicing new market areas, such as the Chicago metropolitan area, where our sales office opened on May 7.

''We have written orders from this office accounting for in excess of $100,000 in equipment sales to date. A regional operations facility to handle the servicing of these accounts on a local level will open in the Chicago area during the second quarter of fiscal 1991 (ending September 30 1990).''

Stanich indicated that an additional four Regional Operations Facilities will be opened throughout the country within the next 18 months to service the balance of the country. Currently the company operates two facilities in Pennsylvania and Colorado.

Furthermore, according to Stanich, ''The regulations and laws that have been enacted during the past few years are creating a bona fide need for metal finishers to comply with EPA standards - or face the penalties for non-compliance, which can be heavy monetary fines, or in some instances, jail terms.''

As a result, Stanich reports, ''Metal finishers today are looking for the most econmical way to comply with the federal regulations and still continue to operate their businesses. Compliance Recycling Industries has been found to serve that need very well.''

Compliance Recycling Industries Inc., is a service-oriented hazardous waste treatment company whose product, The Compliance System effectively removes toxic heavy metals and cyanides from water and allows these metals to be recycled into raw materials for use in industry. The company manufactures, sells and services its product line from Regional Operations Centers in the Philadelphia and Denver areas.

Headquartered in Denver, the company will soon relocate its corporate headquarters to Chicago.

WASHINGTON (JUNE 26) BUSINESS WIRE - Dr. Robert Tinker, Chief Science Officer of the Cambridge-based Technical Education Research Centers (TERC) was presented with the first Siemens Award for the Advancement of Science at the Computerworld Smithsonian awards event held at the National Building Museum.

Dr. Tinker's unique contributions to science teaching and learning span more than 20 years. He is credited with first introducing networked programs using computer technology into the science classroom, and developing such influential programs at the National Geographic Kids Network, the Star Schools program, LabNet and the Global Lab.

Under his leadership, TERC created one of the first elementary science curricula which connects classes on a network and focuses science curricula on important issues, such as acid rain. Other programs have permitted the expansion of network science to include more than 600 classes in the United States, Japan, and the Soviet Union. To date, his work has reached more than 75,000 students and 2,500 teachers worldwide.

According to Hans Decker, president, Siemens Corp., ''Dr. Tinker's vision of children as scientists, tackling real world problems, makes him the ideal recipient of this award.'' The corporation is the initiating sponsor of a Benefactor's Award given in conjunction with the annual Computerworld Smithsonian event. ''Siemens believes that members of the scientific and academic communities who are laying the groundwork of scientific education must be recognized and encouraged to continute their work.''

A current program, Gloabal Lab, is engaging students, teachers and scientists around the world in tackling global ecology problems. This year, it will reach into as many as 12 developing nations.

Dr. Tinker's programs for students and teachers aim to demystify the sciences by allowing hands-on participation. He maintains that, ''Few students have the opportunity to do science. They may learn what others have done, memorize equations and definitions, they may repeat historic experiments, but they rarely learn first-hand the excitement of science and rarely attempt to discover anything new.''

Many educators may feel that original work is beyond the capability of beginning students and has no place in introductory-level instruction. Dr. Tinker believes that with the assistance of the computer as a tool for

experimentation and data analysis, the pursuit of original research for the beginning student is both possible and highly desirable.

Founded in 1965, TERC is a nonprofit organization committed to improving science and mathematics education.

The Siemens U.S.A. group of companies employs some 31,000 people at 400 sales and service locations and 63 manufacturing facilities.

The Smithsonian Institution is the recipient of an annual grant from the Awards Foundation, a nonprofit program designed to recognize heroes of technological innovation, demystify public perceptions of technology and identify the benefits technology brings to the lives of the general public.

CHICAGO (JUNE 26) BUSINESS WIRE - At its annual meeting here Tuesday, Midwesco Filter Resources Inc. shareholders elected two executives of Chicago-based corporations to the board of directors for the first time.

The new board members are: Arnold F. Brookstone, 60, senior vice president and chief financial and planning officer of Stone Container Corp., and Eugene Miller, 64, vice chairman of the board and chief financial officer of USG Corp.

Brookstone and Miller fill newly created positions on the board which now totals five members. David Unger, chairman; Henry Mautner, vice chairman;

and Gene K. Oglivie, president, were re-elected.

Brookstone has held his position with Stone Container since 1981. He is also a director of Seminole Kraft Corp. and Stone Savannah River Paper and Pulp Corp., both manufacturers of paper products, and Donnelly Corp., a manufacturer of automotive products.

Miller has been vice chairman and CFO of USG since March 1987, was executive vice president of USG beginning in March 1985 and has held other positions there since 1977. Other directorships include Rodman and Renshaw Capital Group Inc., Chicago; Coleman Cable Co., North Chicago; and P.O.B. Publishing Co., Ann Arbor, Mich. He has authored over 1,000 articles in national and business publications.

Shareholders also authorized indemnification agreements for board members and authorized the 1990 Independent Directors Stock Option Plan.

With locations in Niles, Ill. and Winchester, Va., MFRI is a vertically integrated manufacturer and marketer of filter bags, including its proprietary Seamless Tube filter bag, as well as related parts, accessories and services.

The company's products and services are used primarily by operators of utility and industrial coal-fired boilers, incinerators and cogeneration plants and by producers of metals, cement, chemicals and other industrial products.

EVENDALE, OH (JUNE 26) BUSINESS WIRE - In a move to enhance customer service, GE Aircraft Engines Tuesday announced a $100 million investment plan which will be implemented at three Aircraft Engines customer service facilities during the next few years.

This investment is in addition to the $187 million in improvements announced by the company in January. Both phases of the investment plan are directed toward responding to customer needs for increased support as the business responds to a rapidly expanding engine market.

The second phase investment includes: o Increasing aircraft engine overhaul capacity by establishment of a new Engine Maintenance Center in Suffolk, Va., at a vacant manufacturing facility already owned by GE.

o Improving GE Aircraft Engines' overhaul and repair capacity with the completion of a new engine test cell at GE's Engine Maintenance Center in Ontario, Calif. Both the completion of the test cell and establishment of the new overhaul facility will complement GE's Aircraft Engine Maintenance Center located at Strother Field near Arkansas City, Kansas, which is approaching full capacity. o Expanding training capabilities for GE customers worldwide through construction of a new GE Customer Training Operation in Springdale, Ohio, which will train more than 2,000 commercial and military customers a year to service and repair GE engines.

''Our mission is to provide GE customers with the highest quality engines and service in the world,'' said Brian H. Rowe, GE Aircraft Engines' senior vice president and group executive. ''Our customers have shown tremendous confidence in us with increased orders and it is our intention

to re-earn their confidence every day.

''Excellence in customer service means not only providing the highest quality products, but continuously improving support of our products after the sale. These investments will help assure that GE Aircraft Engines product support meets customer needs today and in the 21st century.''

Currently, GE Aircraft Engines employs approximately 37,250 people worldwide. 1989 sales were $6.8 billion. The business' customer service network supports 189 customers in 81 countries around the world.

BOSTON (JUNE 26) BUSINESS WIRE - The long awaited marriage of the telephone and the personal computer is a step closer.

Business communications for people who use an Apple Macintosh computer and Northern Telecom's Meridian 1 PBX will be easier and more productive with the introduction of Meridian TeleCenter, a software personal productivity tool introduced Tuesday.

Meridian TeleCenter uses the ''point-and-click'' interface of the Apple Macintosh computer to enhance access to the features of Meridian 1 business communication systems.

Now teachers, engineers, and office workers can initiate calls through computer-based directory dialing, create call logs of all incoming and outgoing calls, set up conference calls and call forwarding, and access Meridian Mail voice messaging -- all with the simple-to-use Macintosh interface.

Today's announcement was made at Boston College, which has been testing Meridian TeleCenter in its telecommunications service center for several months, ''As a Beta test site, I was from the start excited about the concept and tremendously impressed with its ease of use,'' said Jeff Jeffers, director, network services, Boston College.

''In little time, Meridian TeleCenter not only became my task but my friend -- a friend that helped make my time more productive than ever.''

Meridian TeleCenter combines Northern Telecom's advanced telecommunications systems with the Apple Macintosh computer's leadership in user accessibility, connectivity and multimedia,'' said Rick Faletti, vice president and general manager, Meridian Communication Systems

division, Northern Telecom Inc.

''Meridian TeleCenter extends the advanced functionality of the Meridian 1 computer-to-PBX interface directly to the desktop. The payoff for our customers is a higher return on their investments in telecommunications and personal computing.''

''Meridian TeleCenter simplifies the way people interact with increasingly sophisticated telecommunications systems,'' said Dave Cote, director of Large Business Marketing, Apple Computer Inc.

''Not only will it allow users to access voice communications through the familiar Macintosh interface, but also to integrate telephony information with data and applications from throughout the enterprise. Meridian TeleCenter extends the power and potential of Macintosh to enhance organizational productivity.''

Meridan TeleCenter is designed to evolve in several ways. Northern Telecom has been working with selected developers to integrate telephony data and functions with personal computing software applications.

For example, two vendors demonstrated planned application integration at the Boston College event. ACIUS of Cupertino, Calif., exhibited a customer service application in which the number of an incoming call is identified and instantly brings up customer information from a 4th DIMENSION database.

Software Ventures of Berkeley, Calif., showed how MicroPhone II could be integrated with Meridian TeleCenter to manage data calls to remote computers.

Later this year, Northern Telecom plans to release application programming tools to link Macintosh users to Meridian services through use of the Macintosh Communications Toolbox.

This will allow users and developers to integrate telephony functions and information with off-the-shelf and customized in-house software applications. Potential applications include file transfer, screen-sharing, and transmission of electronic mail, facsimiles and video.

In 1991, Meridian TeleCenter will be extended to support Apple's recently announced ISDN card and toolkit, providing users with Meridian TeleCenter functionality across Integrated Services Digital Network (ISDN) services. Meridian TeleCenter will also be extended to support Centrex business services, Customer Local Area Signaling Service (CLASS), and other personal computing platforms.

Meridian TeleCenter has suggested customer list price of $200 per package

and will be available in August through authorized Northern Telecom Meridian 1 communication systems distributors. The software package includes two disks and documentation. It works on all Macintosh computers running System Software 6.0.2 or later with at least two megabytes of internal random access memory.

Meridian TeleCenter will work with Meridian 1, Meridian SL-1 with Release 14 software or later, or Meridian SL-100 with BCS 32 software. Meridian TeleCenter operates with Meridian modular telephones (models M2006, M2008, M2016 Secure, and M2616) with programmable data adapters installed.

Apple Computer Inc. develops, manufactures and markets personal computer systems -- the productivity tools for today and the future -- for business education, government and the home. Apple Computer Inc., with its headquarters in Cupertino, Calif., employs approximately 12,000 people worldwide.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

TULSA, OK (JUNE 26) BUSINESS WIRE - Health Concepts IV Inc. (ASE:HCF)

announced net revenues of $4,322,464 up 56 percent, net income of $282,664 up 50 percent, or $0.12 earnings per share, second quarter 1990 compared to $2,777,385 net revenues, $188,693 net income, or $.08 per share, second quarter 1989.

Robert Lobato, the company's president and chief financial officer, stated that the increase in revenue represents approximately a 36 percent increase in patient volume. ''Maintaining a strong patient census and focusing on operating cost controls, we continue to improve our profit margins.'' In years of tremendous growth the company has been able to maintain net profit margins over 4 percent followed by a year with net profit margins over 9 percent.

The company's warrants, an option to purchase a share of common stock at $3, will cease trading on Friday, June 29, 1990 allowing until July 9, 1990 for settlement. Lobato stated that the company will not extend the warrants. Lobato further explained, ''Monies received from the exercise of warrants will be applied directly to company debt. Through June 1, 1990 debt was reduced by over $550,000. The increase in equity, both by profits and the exercise of warrants, continues to strengthen the company's financial position and enhances shareholder equity.''

Founded in 1984, Health Concepts IV Inc. provides treatment for those suffering from the adverse effects of alcohol and drugs. The company's capital-defensive strategy of leasing excess bed capacity in hospitals has proven a successful formula that promotes cost-contained growth while preserving a high level of care.

CHERRY HILL, NJ (JUNE 26) BUSINESS WIRE - Infotron Systems Corp.

announced Tuesday that it has issued $3 million of 10 percent subordinated notes to Safeguard Scientifics Inc., a publicly-held technology company and Radnor Venture Partners, a venture capital fund in which Safeguard is a general partner.

The proceeds of the subordinated notes will be used by Infotron for working capital purposes.

Safeguard Scientifics and Radnor Venture Partners, entitled to elect one member to Infotron's board of directors, have chosen Warren V. Musser, Safeguard Scientifics' chairman of the board and CEO as their nominee.

Safegaurd Scientifics is an entrepreneurial technology company whose current activities include distribution of microcomputers and related products and services; design, production and sale of office workstation systems, microcomputer software systems and telecommunications equipment, among other businesses. Safeguard has had a long-standing interest in telecommunications and was the founder, in 1983, of Novell, which has become the leading local area networking software systems company.

Radnor Venture Partners, formed in 1988, makes investments in early and late stage companies with a focus in the computer software, biotechnology and telecommunications areas.

Infotron Chairman and CEO Dr. James C. Castle said that the association with Safeguard and Radnor would help the company increase revenues profitably and conclude development of its next-generation of networking technology, which is currently underway.

Ira Lubert, managing director of Radnor Venture Partners, explained that the decision to invest in Infotron was a reflection of Radnor's confidence in the management of the company and its anticipated growth as a leading competitor in the communications network business.

The subordinated notes are repayable over a five-year period, secured by Infotron's assets and are accompanied by warrants to purchase 1 million shares of Infotron's common stock at a price of $4 per share and 800,000 shares of Infotron's Series A preferred stock at a price of $4 per share.

If the transaction is approved by Infotron's shareholders, the warrants to purchase Series A preferred stock will automatically convert to warrants for the same number of shares of common stock. The common stock issuable upon full exercise of the warrants, after shareholder approval, would represent 25.8 percent of the common stock outstanding after exercise of the warrants.

Infotron Systems Corp. is an international provider of integrated strategic networks, serving multi-national banks, manufacturers,

government agencies and common carriers through a sales/service infrastructure in 57 countries. It supplies the systems and services which turn a company's communications network into a strategic resource by moving information -- data, voice and video -- faster, less expensively and more reliably, producing improved results at the customer's bottom line.

STAMFORD, CT (JUNE 26) BUSINESS WIRE - ''Motorola's announcement today to develop a satellite-based global communications system is exciting news for Europe,'' said Robert Crawford, director of the Scottish Development Agency, North America.

''The plan could significantly accelerate the communications linkup between all regions of Europe and facilitate the 1992 process of making Europe a much greater economic entity and marketplace.''

''Europe is projected to be the fastest growing cellular market in the 1990's,'' said Crawford, ''and Motorola is on the cutting edge of this trend.''

In a separate announcement just two months ago, Motorola Cellular Subscriber Division announced plans to build a $160 million telecommunications facility in Scotland which will manufacture land-based cellular subscriber equipment for the European market. The company expects to employ 2,000. Motorola's Scottish facility is its third cellular telephone manufacturing facility in Europe.

#90177b0769 06/26/1990 ~Business Wire

SEBRING, FL (JUNE 26) BUSINESS WIRE - First Home Federal Savings and Loan Association announced that, as a result of comments received during a routine examination by the Office of Thrift Supervision, the Association will write down the carrying value of a foreclosed 116-unit apartment complex in Tampa by $248,000.

This will reduce First Home's net income for the June 30 quarter by a comparable amount.

The examiners also advised First Home that it should increase its general loan loss reserves. Although First Home's management will continue to evaluate its loan portfolio to determine appropriate levels of general reserves, First Home currently expects to increase its projected loan loss provision from $9,000 to $47,000 per quarter, commencing with the quarter ending Sept. 30.

President Stanley F. Davis stated that First Home will show a profit for the June 1990 quarter and that, were it not for the effect of the write-down and certain merger-related expenses, First Home's net income for the current quarter would approximate its net income in the comparable 1989 quarter.

On March 9 First Home entered into an agreement to be acquired by Huntington Bancshares Inc., an Ohio-based bank holding company. The merger, which is not affected by the recent examination results, is subject to various closing conditions, includng receipt of required regulatory approvals and approval by the shareholders of First Home.

Huntington's Federal Reserve Board application has been approved, and final action on its application for approval by the Office of Thrift Supervision should be taken in August. First Home and Huntington are in the process of preparing prospectus/proxy soliciting materials for the special meeting of First Home shareholders.

It is presently anticipated that the special meeting will be held in August.

First Home, which operates from seven offices in central Florida and one in the Tampa area, had total assets of $208 million at March 31 and stockholders' equity of $23 million. First Home's capital substantially exceeds all fully phased in regulatory capital requirements.

DEERFIELD BEACH, FL (JUNE 26) BUSINESS WIRE - June 26, 1990, CheckRobot Inc. (NASDAQ:CKRB) Tuesday announced that it has received its largest order to date for Vision Systems from Advanced Promotion Technologies Inc. (APT).

Advanced Promotion Technologies is a joint venture company consisting of CheckRobot Inc., Procter & Gamble, Dun & Bradstreet Corp., The Central Bancorporation Inc., and Schlumberger Technologies Inc. This order covers

systems which will be used for five Kroger store locations in the Southeast, as well as other supermarket retailers throughtout the United States. The Vision Systems is manufactured by CheckRobot for Advanced Promotion Technologies.

CheckRobot also announced today the GTE Interactive Services Inc., a subsidiary of GTE Corp., headquartered in Atlanta, has acquired an equity position in Advanced Promotion Technologies.

The company previously announced on June 20 the closing of the initial phase of its proposed $8 million private placement of Convertible Preferred Stock, raising $500,000 (less commissions and selling expenses) from local and other U.S. investors. The company anticipates additional closings of the offering over the next few months as the main portion of the offering is effected by Dyment Miller Long Associates Inc., a Montreal-based investment banker.

CheckRobot Inc. develops and markets ACM automated checkout machines. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar-code scanners and a proprietary merchandise security system, the ACM allows shoppers to scan and check out merchandise quickly before paying centrally located cashiers.

WALTHAM, MASS (JUNE 26) BUSINESS WIRE - AICorp. Inc. Tuesday announced the initial public offering of 2,250,000 shares of its common stock at $9.50 per share.

The offering is being managed by Alex. Brown & Sons Inc. and Donaldson, Lufkin & Jenrette Securities Corp.

Of the shares being offered, 1,500,000 are offered by the company and 750,000 are offered by certain stockholders. Net proceeds to the company will be used for general corporate purposes, including the acquisition of capital equipment, the repayment of certain indebtedness and working capital.

AICorp is listed on the NASDAQ National Market System under the symbol AICP.

AICorp develops, markets and supports knowledge base/computer-aided software engineering (''knowledge Base/CASE'') products for the development, implementation and maintenance of Knowledge Base applications. Knowledge Base software applications automate business processes that require judgment and are, therefore, too complex or too expensive to be practically addressed using traditional programming methods.

The company's primary product, Knowledge Base Management System (''KBMS'') operates on IBM mainframes and personal computers and Digital Equipment Corp. computers. Examples of applications where Knowledge Base solutions are currently in use include insurance underwriting, product pricing, production sceduling and credit authorization.

The company's products are used in a variety of industries, including financial services, manufacturing, retail, transportation, telecommunications and governmental agencies.

#90177b0780 06/26/1990 ~Business Wire

NEW YORK (JUNE 26) BUSINESS WIRE - Kaneb Services Inc. (NYSE:KAB) Tuesday introduced its new subsidiary, Kaneb Metering Corp., at a meeting of New York securities analysts and media.

It also demonstrated the subsidiary's first product, LaserTite, which will be the initial entry of the Dallas-based firm into the liquid precision testing, measuring and monitoring industry.

Kaneb Metering's computerized LaserTite uses a highly accurate laser

doppler paired with state-of-the-art emulation probe to test underground storage tanks (USTs) for leakage. The market for precision testing of USTs was created by Environmental Protection Agency (EPA) regulations to lower the incidence of groundwater contamination. The rules affect about 1.8 million USTs, 95 percent of which hold petroleum products, and 35 to 40 percent of which are found at gas stations, truck stops and convenient stores.

Company research indicates the size of the UST testing market in the United States at more than $500 million annually by 1992. The industry currently is served by a number of small companies with equipment that generally measures changes in product volume to find leaks.

Kaneb Metering sells the service, not the equipment. It currently has five tank testing vans, which have performed more than 400 tests in the Dallas/Fort Worth area. Each van can test multiple tanks simultaneously. Management said it expects to increase the number of vans to 30 by the end of September and add 50 more in 1991. Marketing efforts will be conducted at 13 district offices across the country which, together, will service a market area encompassing an estimated 70 percent of the total UST market.

Barnes explained that other products based on LaserTite's technology are on the way. Initially, this would broaden Kaneb Metering's precision testing market to include the approximately 350,000 large above-ground storage tanks, followed by barges and ocean-going tankers.

The subsidiary also plans to develop additional products for the other two segments of this market, which are continuous monitoring and inventory control.

Kaneb Services Inc., is firm currently involved in two lines of business. It has an ownership interest in Kaneb Pipeline Partners L.P., which operates a 2,075 mile refined petroleum products pipeline system in North and South Dakota, Iowa, Nebraska and Kansas.

The second area is its new wholly-owned subsidiary, Kaneb Metering Corp., which is introducing products to serve the liquid precision testing, measuring and monitoring industry.

Kaeb plans to grow by acquiring and/or building service-oriented businesses that have unique assets, methodologies or technologies and are in industries with above-average growth potential.

#90177b0798 06/26/1990 ~Business Wire

NEW YORK (JUNE 26) BUSINESS WIRE - The head of GE's Power Generation business told members of the financial community this morning that power generation will be a major contributor to GE's projected double-digit growth in the 1990s. He said power generation sales through 1993 will be up more than 50 percent.

GE is the world's leading supplier of products and services for electric power generation, including gas and steam turbines; nuclear reactors, fuel and services; environmental services, and a worldwide network of field engineers and equipment service centers.

David C. Genever-Watling, vice president and general manager of GE Power Generation, spoke to an audience of more than 300 security analysts, portfolio managers and other members of the financial community at Morgan Stanley's 2nd Annual Generation Gap Conference in New York.

He said GE Power Generation's technology, global reach, aggressive investments and commitment to customer service are the key to the company's continued success in a robust worldwide power generation marketplace. (Genever-Watling is slated to assume responsibility as senior vice president of GE Industrial & Power Systems on September 1.)

Genever-Watling said, "If we focus sharply on the market and execute with precision, we fully expect our financial results to reflect our continued success.

"Our sales will be up over 50 percent, and funds flow will be in excess of three-quarters of a billion dollars, even as we fund aggressive capacity and technology development programs and provide the operating funds to support such a high-growth business. GE Power Generation will be a major driver in the healthy double-digit growth of the corporation."

He said further that GE Power Generation will continue to invest heavily in additional capacity, plant modernization, technology development, training programs, and advanced operating systems over the next few years.

Genever-Watling attributed GE's successes thus far in the marketplace to a combination of technology leadership and a strong global position. "Nowhere is this technology leadership better exemplified," he noted, "than with GE's new 7F gas turbine which went into full commercial operation at Virginia Powers's Chesterfield 7 plant on June 12."

"While other companies may talk about the new generation of turbine technology, GE's machine is generating commercial power at this moment," he added.

NEW YORK (JUNE 26) BUSINESS WIRE - SCOR U.S. Corp. (NYSE: SUR) announced that the merger of SCOR U.S. and Rockleigh Management Corp. was approved by the shareholders at the SCOR U.S. annual meeting held Tuesday.

The merger will become effective upon the filing of a Certificate of Merger with the Secretary of State of Delaware. As a result of the merger the shareholders' equity of SCOR U.S. will increase to more than $200 million and the total assets of the combined entity are over $600 million. No goodwill was recognized in connection with the transaction.

The two reinsurance subsidiaries of Rockleigh, the Unity Fire and General Insurance Co. and General Securities Assurance Corp. of New York, which are known as The Unity Group, will join Scor Reinsurance Co. as subsidiaries of SCOR U.S.

On a pro forma consolidated basis, the merger would have resulted in a book value per share of SCOR U.S. stock at March 31, 1990 of $11.83, as compared to the actual book value of $11.42 at that date. It would have had no dilutive effect on the first quarter 1990 actual earnings per share of SCOR U.S.

SCOR S.A., one of the five largest professional reinsurance companies in the world, owned approximately 71 percent of SCOR U.S. and 100 percent of Rockleigh prior to the merger. As a result of receiving approximately 5.3 million shares of SCOR U.S. common stock, valued at approximately $53 million, in the stock for stock transaction, SCOR S.A. now owns approximately 79 percent of SCOR U.S.

Scor Reinsurance Co. is a leading provider of property and casualty reinsurance to primary insurers throughout the United States. Scor Re

specializes in underwriting treaties covering commercial and technical risks and is a recognized leader in the provision of facultative property, casualty and special risks covers. Headquartered in New York, Scor Re operates branch offices in Chicago, Dallas, Hartford, Conn. and New York City.

The Unity Group, headquartered in New York, has been operating in the United States since the early part of this century. The Group writes primarily property business on a treaty basis through reinsurance intermediaries based on long established relationships.

Scor Re, Unity Fire and General Security are rated ''A'' (Excellent) by A.M. Best.

SCOR S.A., the ultimate parent of SCOR U.S., is headquartered in Paris and is represented and does business through branches and subsidiaries throughout the world.

#90177b0812 06/26/1990 ~Business Wire

SYRACUSE, NY (JUNE 26) BUSINESS WIRE - Carrier Corp. Tuesday introduced

its new PreVent unit, a device that virtually eliminates the release of chlorofluorocarbon (CFC) refrigerants during the purge cycles of centrifugal chiller air conditioning systems.

CFC refrigerants, such as CFC-11, CFC-113 and CFC-114, have been linked with the depletion of the atmospheric ozone layer. They are used in centrifugal chillers, the heart of most large commercial air conditioning systems.

Because portions of a chiller operate in a vacuum, air can be drawn in during normal operation. A purge system vents this air to avoid chiller performance degradation. Up to 400 pounds of refrigerant a year can be lost during purging cycles.

Carrier's PreVent device can be installed on any manufacturer's low-pressure chiller and can be adapted for use with HCFC-123.

The company will begin taking orders for the product in September through its Carrier Building Systems and Services offices in the United States. The device will be available for sale in international markets in 1991.

The PreVent unit also is being offered as a package with Carrier's other innovative CFC recycling and containment products - the Refrigerant Management System (RMS) and PreVac (TM) system.

The RMS is the first commerically available product that safely recovers and recycles CFC-11 in the quantities of up to 3,300 pounds that are required by commercial chillers.

The PreVac system helps reduce refrigerant purge requirements by preventing air infiltration when a chiller is idle during the non-cooling season.

Carrier is the world's largest manufacturer of heating and cooling systems and equipment. It is a subsidiary of United Technologies Corp. (UTC). UTC, based in Hartford, Conn., provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

HAMMONTON, N.J. (JUNE 26) BUSINESS WIRE - Empire Financial Corp. (EMPR), previously reported that a current examination of Empire was being conducted by the Office of Thrift Supervision (OTS).

Empire recently received a supervisory directive from OTS pursuant to which the bank was directed to immediately restrict new lending/investments to: one-to-four family mortgage loans on existing dwellings; construction loans for single family dwellings on spot, non-speculative basis, and loan-to-value ratio of 80 percent or less; investments that qualify as liquid assets pursuant to applicable regulations; commercial secured/unsecured lines of credit up to $500,000; passbook loans and existing legally binding commitments to fund loans or loans in process.

The supervisory directive, among other things, requires Empire to restrict asset growth during any quarter to an amount equal to the net interest credited on deposit liabilities; determine and certify that all funds distributed under existing legally binding commitments and loans in process are in compliance with applicable regulations and internal policy requirements; cease granting any loan extensions or modifications of any loan maturities or collateral, except under certain circumstances, without prior written notice and non-objection from OTS; review and classify all of the bank's assets pursuant to applicable regulations and establish appropriate valuation allowances.

Also; obtain an opinion that the bank is subject to the loans-to-one-borrower limitations contained in OTS regulations, which is indicated to be $500,000; cease all new transactions with affiliated persons; rewrite an outstanding line of credit and rescind an additional line of credit to an affiliate of one of the directors; file criminal reference forms where criminal activity is suspected or has caused a loss to the bank; calculate deficiencies and penalties resulting from the bank's not meeting certain liquidity requirements; obtain current appraisals with regard to certain collateral property and amend various loan underwriting policies to insure adequate follow-up and compliance with applicable regulations.

Headquartered in Hammonton, N.J., Empire Financial Corp. is a unitary savings and loan holding company, which owns and operates Empire Savings Bank, SLA and its subsidiary. Empire Savings Bank, SLA, a New Jersey chartered thrift, member S.A.I.F. and equal opportunity lender, operates full service banking centers in southern New Jersey.

KNOXVILLE, TENN (JUNE 26) BUSINESS WIRE - Following is a statement by TVA Senior Vice President of Nuclear Power Oliver Kingsley on the NRC SALP

report for Browns Ferry Nuclear Plant:

The latest SALP report indicates that the performance at Browns Ferry is improving, but there's still a lot of work to be done. TVA has developed and taken the actions necessary to improve performance at Browns Ferry, and I believe there have been many positive changes that have substantially improved the plant's performance and its readiness to operate.

We're pleased, for example, with the progress that has been made in the radiological controls, security, and emergency planning organizations. We recognize, however, that we must continue to strive for the highest standards of excellence, and I won't be satisfied until we have improved ratings in all areas. This means we will devote strong management attention to such things as following procedures, reducing personnel errors, and thoroughly understanding the impact of every action that is taken in the plant.

While I am pleased with the progress at Browns Ferry over the last 15 months, I must urge all employees to work even harder so the plant can achieve the highest possible performance in all areas. We recognize that many challenges still lie ahead in the startup and operation of Browns Ferry, and further improvement is essential.

BIRMINGHAM, ALA. (JUNE 26) BUSINESS WIRE - Matthew L. Gold, chairman and chief executive officer of Precision Standard Inc. (NASDAQ:PCSN) announced Tuesday that its Pemco Aeroplex subsidiary (formerly Hayes International) had launched an operations improvement project at its Birmingham facility to achieve cost reductions, elimination of waste and redundancy, shorter lines of communication and responsibility, and improved efficiency.

The project will involve a team of managers who will be assigned as the acting heads of major departments to observe, evaluate and improve departmental efficiency.

Gold said: ''The company is disappointed with the lack of improvement in its Birmingham facility, and this action is being taken to ensure that the unit is properly structured to handle the volume of business expected under its recently announced contract awards.''

As disclosed previously in filings with the Securities and Exchange Commission, Precision Standard has established reserves totaling $12.7

million for estimated losses to complete one of Hayes' contracts with the U.S. government.

Precision Standard, with facilities in Alabama, California, Colorado and Florida and offices in Denver, Boston and London, performs maintenance and modification of aircraft for the U.S. government and foreign and domestic commercial customers.

The company also manufactures aircraft cargo systems, aerial targets for military customers, precision springs and components, and rocket vehicles and control systems.

#90177b0836 06/26/1990 ~Business Wire

WALTHAM, MA (JUNE 26) BUSINESS WIRE - Robert J. Fabbricatore, chairman of the board of Computer Telephone Corp., announced Tuesday that the company's operating income increased to approximately $1,332,000 for the year ended Mar. 31, 1990 as compared to the operating loss of approximately $1,039,000 for the comparable 1989 period.

Fabbricatore stated that after giving effect to a non-recurring gain of approximately $1,580,000 in fiscal 1989 resulting from the sale of certain customer bases, which gain was adjusted in March 1990 to give effect to a $250,000 reduction in the sales price and a non-recurring gain of approximately $804,000 from the sale of certain corporate investments, the company had net income after taxes of approximately $1,651,000 for fiscal 1990 ($.71 per share) as compared to net operating income after taxes of approximately $471,000 for fiscal 1989 ($.18 per share).

Fabbricatore reported that this substantial increase in earnings occurred despite the fact that gross revenues decreased from $10,900,000 to $9,170,000 for the year ended Mar. 31, 1990. He pointed out that the decrease in revenues resulted primarily from the company's continuing efforts to expand network services, the more profitable segment of the company's business.

As part of the company's program to further expand network sales and service, the company is establishing an office in New York City to service Metropolitan New York area.

Fabbricatore also reported that at the Combined Special and Annual Meeting of Shareholders held on May 14, company shareholders approved the sale of the company's Executone customer base to Executone Information Systems Inc. Upon closing, Executone transferred back to the company 347,866 shares of Class I common stock.

Fabbricatore also pointed out that the company had purchased from an unaffiliated shareholder 263,000 shares of company Class I common stock for $341,900, final payment of which will be made next month. In addition subsequent to March 31, 1990 the company purchased 50,000 shares from unaffiliated shareholders for approximately $194,000.

The company acts as an authorized agent for the sale of network services under non-exclusive arrangements with New England Telephone Co., Southern New England Telephone Co. and New York Telephone Co. in the states of Massachusetts, Connecticut, Rhode Island, Maine, New Hampshire, Vermont and New York.

In addition, the company acts as the non-exclusive agent for AT&T in the sale of network services on a national basis. The company also sells, markets and services telephone microprocessing hardware, software and other components.

CHERRY HILL, NJ (JUNE 26) BUSINESS WIRE - Marsam Pharmaceuticals Inc. and Geneva Generics, a subsidiary of CIBA-GEIGY Corp. Tuesday announced that they had entered into a definitive agreement to develop, manufacture and distribute generic pharmaceutical products under the Geneva-Marsam name to hospitals and other health care institutions.

Under the terms of the agreement, Marsam Pharmaceuticals will be responsible for the development and production of generic injectable products, while Geneva Generics will be responsible for the development and production of the unit dose form of oral solid dose generic drugs, and for the marketing and distribution of both types of products.

Geneva Generics and Marsam Pharmaceuticals will share the profits from this venture.

In addition, as previously announced, CIBA-GEIGY is purchasing approximately 10 percent of the stock of Marsam Pharmaceuticals for $10 million. CIBA-GEIGY has completed the purchase of approximately a 9-percent stock interest from the company for $9 million and the additional 1 percent is being purchased from a selling shareholder for $1 million.

Marsam Pharmaceuticals Inc. is an emerging leader in the development and manufacture of injectable drugs for the hospital and institutional marketplace.

Geneva Generics is a leading developer, manufacturer and distributor of quality generic pharmaceutical products. Its parent company, CIBA-GEIGY, is a diversified chemical and pharmaceuticals company engaged principally in the research, development and marketing of a wide variety of special-purpose chemicals and pharmaceutical products throughout the world.

STAMFORD, CONN. (JUNE 26) BUSINESS WIRE - Champion International Corp. Tuesday announced that its board of directors has approved the construction of a deinking facility at its Sheldon, Texas, newsprint mill.

The project, estimated to cost $85 million, is projected to produce about 145,000 tons of recycled pulp a year, all of which will be used in the manufacture of newsprint at the Sheldon mill. Simons Eastern Consultants Inc. of Decatur, Ga., has been chosen to do the engineering.

The new plant, a major commitment to recycling, will remove at least 175,000 tons a year of old newspapers and magazines from the municipal solid waste stream when completed in 1992.

Champion will be working with county and local governments in Texas to establish its own reliable waste paper collection system. The mix of the waste paper is extremely important. By carefully controlling the input, the company is convinced that the newsprint produced with the recycled pulp will be as good a quality as that produced from traditional virgin fiber.

This addition to the Sheldon mill will enable Champion to meet the need for recycled pulp while maintaining its leadership in the U.S. newsprint industry.

Champion is one of America's leading manufacturers of paper for business communication, commercial printing, publications, and newspapers. Headquartered in Stamford, the company owns or controls 6.4 million acres of timberlands in the U.S. and is a major manufacturer of plywood and

lumber.

HOUSTON (JUNE 26) BUSINESS WIRE - Paul J. Varello has been named as chairman and chief executive officer of American Ref-Fuel Co., succeeding Bruce I. Hendrickson.

Varello comes to the Houston-based waste-to-energy company from Fluor Daniel Inc., where he served as President of its Process Sector in Irvine, Calif.

Hendrickson, who has served as American Ref-Fuel's chairman since the company's inception in 1983, returns to assume duties within Browning-Ferris Industries Inc. Hendrickson will continue as a member of the American Ref-Fuel Co. Management Committee.

An 18-year veteran within the Fluor Daniel organization, Varello held a number of senior management positions including executive vice president of Worldwide Marketing and Sales. He holds a bachelor's degree in civil engineering from Villanova University and is a graduate of Harvard's Advanced Management Program.

American Ref-Fuel Co. is a partnership formed by subsidiaries of Browning-Ferris Industries Inc. and Air Products and Chemicals Inc. to market waste-to-energy facilities. American Ref-Fuel is a full service (design, construction and operation) systems contractor for the development of waste disposal systems featuring the Deutsche Babcock Anlagen mass burning technology.

The company currently operates a 2,319 tons-per-day (TPD) facility for the Town of Hempstead, N.Y., and is nearing completion of a 2,277 TPD plant in Newark, N.J. Other facilities are under construction or under development in Preston, Conn.; Bergen County, N.J.; Oyster Bay, N.Y.; East Bridgewater Mass.; and Bethlehem (Albany area), N.Y.

#90177b0849 06/26/1990 ~Business Wire

CLEVELAND (JUNE 26) BUSINESS WIRE - Sealy Inc. has promoted Gary Fazio to Vice President/National Sales Manager, for its domestic bedding business.

In his new capacity, Gary will be responsible for sales of both Sealy and Stearns & Foster bedding products and will report directly to R. James Alexy, Senior Vice President of Sales and Marketing for Sealy Inc. Reporting to Gary will be Sealy's Regional Sales Managers. Gary will relocate to Cleveland.

An 18-year veteran in the bedding industry, and with Sealy since 1981, Gary moved successfully through several sales and sales management assignments and, in 1987, was named Central Regional Vice President of Sales for the company.

In announcing the appointment, Alexy stated, ''Gary Fazio's outstanding record, personal commitment and dedication in increasingly responsible sales management roles in our company, and his long experience in the industry, make him particularly well suited for his new executive assignment. As the largest company in a highly fragmented industry, where our next competitor is half our size, we must rely on molding the talents of our best internally developed management professionals with executives

of comparable professional calibre attracted from outside the industry. This will satisfy the managerial demands and standards of our growing organization.''

Sealy Matress Co., a wholly owned subsidiary of Sealy Corp., produces the complete Sealy line of mattresses including the world famous Posturpedic. Other operations include: The Stearns & Foster Bedding Co., one of the oldest and largest premium-brand bedding manufacturers in the country; Advanced Sleep Products, a leading manufacturer and distributor of waterbeds; Woodstuff Manufacturing Inc., a manufacturer of Waterbed furniture; and the Sealy Furniture Co. and the Stearns & Foster Upholstery Furniture Co., manufacturers of convertible sofas.

CHICAGO (JUNE 26) BUSINESS WIRE - Dayton Hudson Corporation expects to open approximately 300 new Target stores and 80 new Mervyn's stores during the next five years. Chairman and Chief Executive Officer Kenneth A. Macke made the comment to an institutional investors conference here this afternoon.

Target currently operates 407 stores in 32 states and Mervyn's operates 221 stores in 15 states. ''Target and Mervyn's continue to be our main engines for growth,'' Macke told the analysts and portfolio managers attending the William Blair-sponsored conference.

''We have a disciplined strategic planning process,'' Macke said. ''We always plan on a five-year basis. We view the process as extremely important to insure that we can open the specific number of stores to achieve our 15 percent earnings growth objective.''

Store locations were not identified. Macke said the Corporation identifies specific sites one year at a time.

Target is the nation's largest upscale discount chain. Its annual revenues in 1989 were $7.5 billion.

Mervyn's is Dayton Hudson's moderate priced department store chain, with an emphasis on active and casual apparel and soft decorative home. Mervyn's annual revenues in 1989 were $3.9 billion.

Last Friday, Dayton Hudson completed the acquisition of Marshall Field & Company. The Field's stores will become part of Dayton Hudson's 37-store department store division.

In 1989, Dayton Hudson reported annual revenues of $13.6 billion. Nationwide, the Corporation operates 665 stores in 33 states.

ATLANTA (JUNE 26) BUSINESS WIRE - Fulton Federal Savings Bank (NASDAQ:FFSB) announced Tuesday that Upshaw C. Bentley Jr., Charles T. Cantrell, Henry B. Garmon and Shepherd R. Marsh were re-elected to three year terms as directors at Monday's Annual Meeting of Stockholders.

Approximately 97 percent of the shares of Fulton Federal common stock voted at the meeting (representing approximately 72 percent of the total number of shares outstanding) were voted in favor of the election of each nominee. Also at the annual meeting, the appointment of Deloitte & Touche as the bank's independent certified public accountants was ratified.

Henry B. Garmon, chairman and chief executive officer, said, ''We are gratified by the support our shareholders continue to show during these difficult times.''

Referring to press reports concerning Fulton Federal's prospects, Garmon said: ''It is unfortunate that certain remarks made by me in response to questions at yesterday's annual meeting and in subsequent interviews have been taken out of context in a manner that confuses our situation.

''As we have consistently stated, we believe that the proposed sale of our 22 metro-Atlanta branches to First American Bankshares Inc. for a premium of approximately $50 million would be in the best interests of the bank and its constituencies.

''However, as we have also previously stated, we belive that the regulators have significant reservations about the capital plan that we have filed with the Office of Thrift Supervision, in part due to their concern that the proceeds from the proposed branch sale will not be sufficient to support the continued operation of the remaining, smaller bank.

''We are continuing to work with the regulators to address their concerns and to attempt to develop a solution to Fulton Federal's problems, which could involve alternatives to the branch sale. However, no firm offer or agreement in principle has been reached other than the First American transaction, and it is impossible for us to predict with certainty what the regulators will ultimately decide.

STAMFORD, CT (JUNE 27) COMTEX - International Credit Corp., a unit of P.J. King Companies, Inc., has filed suit in federal court in Minnesota against Savin Corp. and Savin Credit Corp., alleging that the two breached a 1986

agreement concerning the sale of 7,600 copier and facsimile machine leases.

The suit seeks more than $20 million in damages.

The 1986 agreement concerned the sale of the leases to International Credit.

Savin was to remarket the copiers and facsimiles when they came off lease, according to a Securities and Exchange Commission filing.

International Credit, which is alleging fraud and breaches of warranty, contract, state statutes and the Racketeering Influenced Corruption Act, is seeking to treble the $20 million in damages under the federal RICO statutes.

The two parties had been negotiating a settlement of the dispute, but International Credit cut off talks and filed the suit.

Savin plans to either reopen the talks or defend itself against the suit.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 26, 1990

KUALA LUMPUR (JUNE 26) - Malaysia's cocoa beans exports fell three per-cent to 56,021 tons in the first quarter of the year from 57,621 tons in the same period last year, the Statistics Department said Tuesday.

Exports in May fell 11 per cent to 17,522 tons from 19,749 tons a year earlier.

The main buyers during the quarter were Singapore (20,292 tons), the United States (10,318 tons), West Germany (9,505 tons), the Netherlands (6,310 tons) and Britain (4,762 tons).

-30- 658

#90177d1630 06/26/1990 ~French/German News Agency

Tokyo (JUNE 26) - North Korea's trade in 1989 totalled some 4.08 billion dollars, a 10.1 percent drop from 1988, the first year-to-year decline in six years, a Japanese trade organisation estimated Tuesday.

The Japan External Trade Organisation (Jetro) said the Communist nation's exports last year fell 6.6 percent to 1.56 billion dollars while imports

amounted to 2.52 billion dollars, a 12.1 percent minus.

Jetro officials said one of the main reasons for the drop in trade was a sharp decline in imports from the Soviet Union, chiefly oil, coal and wheat.

The trade deficit of North Korea, which is believed to trade with 33 countries in the world, decreased to 960 million dollars from 1.2 billion dollars.

Jetro's projections were estimates based upon Western figures beccause Pyongyang does not release official trade figures.

Japan is North Korea's biggest trading partner in the West.

The Communist nation's exports to Japan last year fell 8 percent to 280 million dollars while imports dipped 17.5 percent to 210 million dollars.

#90177d1870 06/26/1990 ~French/German News Agency
BERLIN (JUNE 26) - A Soviet soldier, holding a couple and two children hostage, was shot dead by East German police sharp-shooters in a gunbattle at a road block, the Interior Ministry announced Tuesday.

The soldier, aged 19 was not identified but the ministry said he was a corporal from a base at Magdeburg.

The man left his base Monday morning armed with an automatic rifle. A few hours later he turned up at a camp site where he forced a man and woman and their two children to get into his car.

With East German anti-terrorist forces in pursuit, he was forced to stop at a road block near Magdeburg. He tried to shoot his way out and wounded a policeman. It was then that the police opened fire and shot the man dead, the ministry said.

The hostages were unhurt but were taken to hospital in shock.

There are 380,000 Soviet soldiers stationed in East Germany.

-30- 1053
#90177d2030 06/26/1990 ~French/German News Agency
TAIPEI (JUNE 26) - Outflow of capital and a declining local stock market have led to a record 3.4 percent drop in the annual M1-B money supply growth rate for May, Central Bank deputy governor Chiu Cheng-hsiung said Tuesday.

Some nine billion U.S. dollars had been sent abroad in the first six months of the year, Mr. Chiu said.

Strong U.S. dollar buying amid speculation of a depreciation of the local currency and the Central Bank's efforts to prop it up by selling the greenback, had also contributed to the decline in money supply for the third consecutive month, he said.

M1-B, comprising cash in circulation, checking accounts, passbook accounts and passbook saving deposits, fell 1.1 percent in March and 3.3 percent in April.

Extensive capital had been diverted from the shrinking stock market to time deposits and foreign exchange deposits, Mr. Chiu added.

Meanwhile, tight credit had pushed interest rates for local currency in the money market to the highest in 10 years since Monday.

Annual rates rose to 18.5 percent for 10-day commercial papers, 18.2 percent for negotiable certificates of deposits and 18 percent for bankers' acceptances.

The Central Bank adopted a tight money policy a year ago to tackle inflation and money supply growth.

#90177d2040 06/26/1990 ~French/German News Agency

Accra (JUNE 26) - Ghana has announced a 28.44 percent rise in the producer price of cocoa ''to fulful its determination and promise to improve the living standards of our farmers.''

An official statement issued Monday night said one tonne of cocoa would fetch 224,000 cedis (680.85 dollars), up from 174,400 cedis (530 dollars).

The new producer price takes effect from the beginning of the mid-crop season, which opened last Friday.

Ghana is the world's third largest cocoa producer after the Ivory Coast and Brazil.

-30- 692

#90177d2070 06/26/1990 ~French/German News Agency

TOKYO (JUNE 26) - Japan's index of mining and manufacturing in May rose 2.4 percent from April for the sharpest gain in 14 months, the Ministry of International Trade and Industry said in a preliminary report Tuesday.

"The May figure reconfirmed that the economy is in a robust uptrend," said a ministry official, pointing to April's 0.9 percent monthly fallback which was mainly attributed to a decline in export volume.

The output index stood at 124.8, against the base of 100 for the year 1985, up 4.1 percent from a year earlier.

The shipment index in May rose 4.4 percent from April to 126.8, also the steepest monthly rise in 14 months, and 5.3 percent from the same month last year, the ministry report said.

Meanwhile, the inventory index gained 0.7 percent from the previous month and 4.9 percent from the year-before level to 110.8.

-30- 1023

#90177d2110 06/26/1990 ~French/German News Agency

TOKYO (JUNE 26) - Televised tobacco advertising in Japan increased five-fold from 1985 to 1989 as foreign manufacturers -- mainly from the United States -- stepped up efforts to sell cigarettes, according to a study released here.

The trend contrasts with that of other industrialised countries, including the United States, Britain and France, which have banned tobacco advertisements on television and elsewhere because of health hazards associated with smoking.

The study, released Monday by the private Video Research Institute, said airtime spent on televised tobacco ads increased from almost 24 hours in 1985 to 117 hours last year, on all stations broadcasting to the Tokyo region.

Increased advertising by foreign cigarette manufacturers was to blame, the study said.

The number of Japanese smokers has risen rapidly in recent years, reaching 32 million in 1989 in a country of 132 million people.

A record 61 percent of adult males are smokers, compared with some 30 percent in the United States. Only 12 percent of Japanese women are smokers, but some analysts predict an increase in the next few years.

Of 300 billion cigarettes sold in Japan last year, foreign brands accounted for 14.7 percent, six times more than in 1986.

The unprecedented increase has raised an outcry among non-smokers, who charge the government with laxity toward the large foreign companies whose

promotions regularly crowd film and television screens here.

This, they say, contrasts sharply with the numerous restrictions on advertising their products in their own countries.

#90177d2120 06/26/1990 ~French/German News Agency

DHAKA (JUNE 26) - At least 10 people were killed and tens of thousands stranded as flash floods hit several Bangladesh districts, newspapers here reported Tuesday.

In northwestern Bogra district two children drowned Monday in swirling waters and more than 20,000 people were stranded in their flooded homes when the level of the Jamuna river suddenly rose after three days of rain, the reports said.

They said that the river, flowing two feet (60 centimeters) above the danger mark, broke an embankment and flooded at least six villages in Shariakandi sub-district.

#90177d2140 06/26/1990 ~French/German News Agency

TOKYO (JUNE 26) - The Japanese economy has entered the 43rd month of uninterrupted expansion and is expected to continue growing, the Economic Planning Agency (EPA) said in a report Tuesday.

The economy started to expand in December 1986 and has since then kept rising without any slowdown, the government agency noted.

"The economy of our country is growing steadily, helped by a boost in domestic demand," EPA Director General Hideyuki Aizawa was quoted by officials as reporting to a cabient meeting Tuesday.

The report said that private-sector capital investment in Japan's manufacturing industry and service sector had also been expanding in recent months, while consumer spending and housing starts were at high levels.

-30- 904

#90177d2270 06/26/1990 ~French/German News Agency

ABU DHABI, June 26 (AFP) - An influential newspaper in the United Arab Emirates (UAE) on Tuesday denounced and rejected Iraqi accusations that the UAE had been responsible for a recent fall in world oil prices.

Al-Khaleej, published in the emirate of Sharjah, described such charges as "unjust, tendentious and without foundation."

Iraq recently accused the UAE of failing to respect its production quota,

assigned by the Organization of Petroleum Exporting Countries (OPEC), and of adopting a "short-term strategy" to the detriment of other OPEC members.

OPEC ministers last May agreed to cut production by 1,455,000 barrels a day from the organization's daily ceiling of 22.05 million until the end of July.

The move was designed to boost slumping prices.

UAE Oil Minister Mana Said al-Oteiba has declared that his country cut production by 200,000 barrels a day to 1.9 million.

Al-Khaleej argued that in the past the UAE had voluntarily lowered output from 2.1 million barrels a day to 1.9 million and was "determined to cut back even more."

LONDON (JUNE 26) - A 1901 Picasso painting of children playing in the Tuileries gardens in Paris, was auctioned for 13.7 million pounds (23.5 million dollars) at Christie's on Monday.

The work was painted soon after the painter arrived in Paris and had been estimated at five million pounds.

It was bought by an anonymous European collector.

A Renoir oil painting of women bathing, "Les Baigneuses", inspired by a trip to Guernsey in 1882, was bought for 3.9 million pounds (6.7 million dollars) by the Japanese firm Aska International.

The same firm has already acquired Renoir's Portrait of Jeanne Samary (1.2 million pounds) and two views of the Seine river by Gustave Caillebotte.

Monday's sale netted 43 million pounds (73.6 million dollars).

#90177d2930 06/26/1990 ~French/German News Agency

HONG KONG (JUNE 26) - Hong Kong's domestic exports increased in May for the first time in six months, official figures showed Tuesday.

The value of locally made goods shipped overseas in May was 18.8 billion Hong Kong dollars (2.4 billion U.S.), up 6.4 percent from the same month last year.

During the same month re-exports, mainly goods from China, rose some 25 per- cent to nearly 35 billion dollars (4.5 billion U.S.) while imports grew 16 per cent to 56.5 billion (7.2 billion U.S.)

Hong Kong recorded a trade deficit of 2.8 billion dollars (358 million U.S.) for the month, a slight improvement on the 2.9 billion (372 million U.S.) deficit logged in May 1989.

Government financial officials have assumed a gradual revival of domestic exports in their forecast of an annual economic growth rate of three percent for the British colony this year.

-30- 1037

#90177d2940 06/26/1990 ~French/German News Agency

SUVA (JUNE 26) - Fiji's national carrier Air Pacific almost doubled its profit to a record 17.45 million Fijian dollars (11.7 million U.S.) for the financial year to March 31, chairman Gerald Barrack said here Tuesday.

Air Pacific, almost 70 percent owned by the Fiji Government, made a profit of 9.1 million dollars (6.2 million U.S.) in 1988-89, and a profit of 2.4 million dollars (1.4 million U.S.) in 1987-88 after a series of losses in the first half of the decade.

Mr. Barrack attributed the improvement to Air Pacific's first full year of operations on its routes to Melbourne, Australia, and Japan.

The airline's other shareholders are Australia's Qantas Airways Ltd. with 19 percent, Air New Zealand three per cent and the remainder shared among six small Pacific island states.

"This year's profit represents a return of 12 percent on revenue," Mr. Barrack told a news conference.

The airline still carries accumulated losses of 4.9 million dollars (3.2 million dollars) which it incurred six years ago when it introduced flights to North America.

Air Pacific began its first service to Tokyo's Narita Airport in October, 1988 and plans to introduce a second weekly service from this October.

#90177d3080 06/26/1990 ~French/German News Agency

PRAGUE (JUNE 26) - The crisis within the Czechoslovak Socialist Party has reached a climax with the resignation of the party president after charges he was throttling the party press.

The party's president, Jiri Vyadil, has been replaced by party vice-president Milan Adam, the former education minister under the previous Czech regional government.

The decision, announced Tuesday by the Socialist daily Svobodne Slovo, brings to a head a two-week crisis that began with the Socialist party's crushing defeat in the June 8-9 elections when it scraped a meagre 2.5 per cent of the vote.

Mr. Vyvadil, a 36-year-old lawyer, has been accused by numerous party members of "authoritarianism" and of taking "erroneous decisions" during the election campaign.

Last Tuesday six Socialist Party leaders, including Civic Forum member Jan Skoda, resigned in protest against the president's policies and attempts to control the party press.

Their resignation came a day after Mr. Vyadil dismissed the director of the party's Melantrich publishing house, Milan Nevole, and Lubomir Petrik, the editor-in-chief of Svododne Slovo, Czechoslovkia's leading newspaper with a circulation of 500,000.

His decision to replace the two men with an editorial committee prompted a strike by journalists that closed the presses of Svobodne Slovo for three days.

The two journalists have been reistated after a meeting of the SPC central committee.

The employees of Melantrich have called for the independence of the publishing house with the Socialist Party as only one of its stockholders.

The party leadership decided Monday to speed up the process of making Melantrich independent and also will launch a referendum on changing the party's name, a name that was forced on them by the ruling communists in 1948.

In the June 8-9 elections, the Socialists failed to win the five per cent of the vote needed to be represented in the Czechoslovak federal assembly, while 44 years ago the party was the second political force in the country

behind the communists.

FRANKFURT (JUNE 26) - The West German Dresdner Bank is to gain access to a network of 72 branches in East Germany through a joint venture with the East German Deutsche Kreditbank, Dresdner Bank said on Tuesday.

The two banks signed an agreement in Dresden, East Germany, on Monday for the creation of a joint subsidiary which will take over the 72 Kreditbank branches. Dresdner Bank will hold 49 percent of the equity.

The deal will take to 107 the number of Dresdner Bank branches in East Germany available to do business when monetary union takes effect and the Deutschemark becomes the single currency on July 1.

Dresdner Bank, the second biggest West German bank, has opened 35 branches in East Germany since the frontier between East and West was breached in November 1989.

VENICE, Italy (JUNE 26) - South Africa will continue to support the price of gold, the director of the South African central bank Chris Stals has told a world gold conference which began here on Monday.

In recent weeks South Africa has acted to support the price, and will continue to do so for as long as reserves were available, he said.

His remarks were seen as being partly responsible for pushing the price of gold above 350 dollars an ounce from the level of 348.50 on Friday.

The director of international operations at the central Bank of Brazil Emilio Garofalo said that Brazil had sold at least 100 hundred tons of gold in recent months in order to put an end to smuggling by paying dollars for gold on market terms.

This gold had then been put on the international market, but Brazilians were beginning to hoard gold again, he said.

The director general of the Bank of Italy Lamberto Dini said that the role of gold as a reserve instrument was not over even though it did not have the key function it enjoyed in the 1960s.

The Soviet Union could use its reserves of gold to support a process of making the ruble convertible, although there were risks in this. European

countries could use their reserves of gold to create gold-backed Ecus, he said.

PARIS (JUNE 26) - The Japanese Toray company and the French Elf-Aquitaine oil firm are to double the carbon-fibre output of their French subsidiary SOFICAR which works for the aero industry, Elf said on Tuesday.

An investment of 270 million francs (48 million dollars) will be made to increase output to 700 tons per year.

A new production unit will be installed to manufacture two types of fibre currently produced in Japan and imported by SOFICAR.

During the last 10 years the world market for carbon fibre has increased tenfold. In 1989 6,000 tons were produced. Of this, 1,050 tons were produced in Europe.

It is expected that in 1995 the market will total more than 11,000 tons, of which 2,000 tons will be required in Europe, the statement said.

Toray owns 70 percent of SOFICAR. An Elf subsidiary, Atochem, owns 30 per cent.

NOUMEA, June 26 (AFP) - New Caledonia's chief nickel producer said Tuesday it was rejecting a demand by striking workers to review a profit-sharing accord.

"The agreement signed in November 1989 is clear," said Daniel Bonnin, secretary general of Societe le Nickel (SLN), which was hit by a strike nine days ago.

He said the accord "provides that profit-sharing rates are calculated on a self-financing capacity of 950 million francs (168.5 million dollars) for 1989 and we refuse to reconsider that."

The New Caledonian Federation of Workers and Employees Unions, the chief labor group at SLN and the force behind the strike, is demanding that the rates be based on a sum of 1.8 billion francs (319.3 million dollars).

Mr. Bonnin stressed that each of SLN's 2,000 employees will collect an average of 25,575 francs (4,536 dollars) under the 1989 benefits.

Three mines and a factory have been paralysed by the strike since June 17, resulting in lost nickel production of 1,158 tons.

SLN produced 47,000 tons of nickel in 1989, representing 80 per cent of the output of New Caledonia, the world's third-largest nickel supplier.

Mr. Bonnin said that no progress had been achieved during several meetings since the strike began and that no real "negotiations" were under way.

JAKARTA (JUNE 26) - Thailand and the Philippines have expressed a wish to lease more transponders on Indonesia's telecommunication satellites, the official Antara news agency said Tuesday.

Thailand, which already leases 2.5 transponders, intends to lease another six-eighths of a transponder in mid-1991 to accommodate its telecommunications operations, Antara said.

The Philippines, which also leases 2.5 transponders, has asked for an additional eighth of a transponder, Antara said, citing the result of a meeting last week in Bandung, West Java between Indonesia's state telecommunications company Perumtel and current and prospective clients.

Neighbouring Papua New Guinea has also asked to lease an eighth of a transponder to provide communications channels for its oil contractors by the end of this year, Antara said.

Other users of Indonesia's two Palapa telecommunications satellites currently in orbit are Malaysia and Vietnam.

Antara cited a Perumtel official as saying that demands for transponder space had also come from Australia and New Zealand.

ZURICH, Switzerland (JUNE 26) - The Credit Suisse bank has acquired 80 per cent of the U.S. BEA Associates which has personal portfolios worth 10 billion dollars under management, Credit Suisse said on Tuesday.

The agreement is subject to approval by U.S. authorities, which should be given by the end of the year, the bank said.

Credit Suisse, which ranks behind the Union of Swiss Banks and the Societe de Banque Suisse, made net profits of 783 million Swiss francs (516 million dollars) on a balance sheet of 80 billion dollars in 1989.

HONG KONG (JUNE 26) - Fourteen drug traffickers were executed Tuesday in the capital of China's southwestern Yunnan province, the official New China News Agency (NCNA) reported.

The death sentences, approved by China's supreme court, were read out at a mass rally in Kunming, where provincial governor He Zhiqiang called on all traffickers to turn themselves in, NCNA said.

Executions in China are usually carried out immediately after conviction with a bullet to the back of the head.

About 520 kilograms (1,140 pounds) of heroin and 480 kilograms (1,000 pounds) of opium were also burned at the rally, the news agency said.

TOKYO (JUNE 26) - Japan's Dai-ichi Mutual Life Insurance Co. said Tuesday it will take a 9.6 percent stake in U.S. life insurance firm Lincoln National Co.

Dai-ichi plans to buy some 22.7 billion yen (150 million dollars) worth of preferred stock, which can be converted into common stock, from the seventh-largest U.S. life insurance firm in July, company officials said.

It will buy another 24 billion yen (160 million dollars) worth in May 1991, bringing its total purchase to 4.44 million shares, or 9.6 percent of Lincoln National's common stock after the increase in shares, the officials said.

ANKARA (JUNE 26) - Turkish, Syrian and Iraqi officials began a two-day

conference here on Tuesday aimed at ending a longstanding dispute on sharing the waters of the Euphrates River, the Anatolia news agency reported.

Turkish Land Management Minister Cengiz Altinkaya said in an opening speech that he hoped the Euphrates, which rises in Turkey before flowing into Syria and Iraq, could be a "bridge of peace" between the three countries.

He denied allegations that Turkey was using the 1,000 kilometer (600 mile) long river as a weapon to threaten its two neighbours, which depend on the Euphrates for irrigation, power supply and drinking water.

Syria and Iraq, although bitter rivals in the Arab world, joined forces in January in criticising Ankara for a month-long diversion of the Euphrates aimed at filling the huge Ataturk dam in southeastern Turkey.

The diversion prompted renewed calls by Syria and Iraq for an agreement on the Euphrates, amid fears of future water scarcity in the Middle East.

The two countries claim the 500 cubic meters (17,500 cubic feet) a second of Euphrates water Turkey allows across its border with Syria is insufficient and want the amount increased to 700 cubic meters (24,500 cubic feet) a second.

Turkey maintains that the amount is sufficient to fill its neighbours' needs and has tried to play down the dispute, describing it as a "technical issue" and accusing Syria and Iraq of making it a political problem.

The Syrian and Iraqi delegations at the conference were headed by the countries' irrigation ministers, Abd al-Rahman Madani and Abd al-Wahab Mahmoud Abdullah, who arrived separately here late Monday.

The two have expressed hopes for an agreement on the Euphrates, while Mr. Abdullah is also seeking a settlement on sharing the waters of the Tigris river, which flows into Iraq from Turkey, Anatolia reported.

#90177d3750 06/26/1990 ~French/German News Agency

YAOUNDE (JUNE 26) - The editor-in-chief and political editor of Cameroon's state radio have written an open letter to the government denouncing their obligation to broadcast lies about recent unrest, which they said has lost them all credibility.

In the letter published Monday in the independent daily Le Combattant, the two French-speaking journalists pointed out that the government had told them to report that six people killed at an opposition party rally at

Bamenda last month were "trampled to death", though several witnesses said they were shot by security forces.

They added that they had been ordered to report that the leader of the party, the Social Democratic Front, John Fru Ndi, had fled to Nigeria, when in fact he was still in Bamenda in the English-speaking part of Cameroon.

Senior journalists responsible for English-language broadcasts in the West African state had been arrested, sacked and blacklisted after a programme on multi-party politics early in May, the editor-in-chief Zacharie Ngniman and his colleague Antoine-Marie Ngono added.

Calling for "the right balance" in order to restore the credibility of the official press, the two added that the reputation of the official media had been dealt its "final blow" when Roman Catholic church leaders recently told a news conference "you are only your master's voices".

Observers here commented Tuesday that censorship of the privately owned press, which does not come under the responsibility of the interior ministry, has eased considerably in recent months. Several papers have increased their circulation and openly contradict the official press.

They added that unease among journalists in state-run media had notably increased since the trial in April of Yondo Black, a leading lawyer jailed for three years for subversion, apparently because he wanted to form a political party.

Multi-party politics are constitutionally legal in Cameroon, but opposition groups have been unable to obtain official recognition.

#90177d3880 06/26/1990 ~French/German News Agency

CAPE TOWN (JUNE 26) - An 11-point anti-apartheid manifesto supporting sanctions against South Africa was put to the South African Council of Churches (SACC) here Tuesday by its general secretary the Reverend Frank Chikane.

His list backs the African National Congress (ANC) in its demands for the maintenance of sanctions imposed in 1986, and for free elections, enfranchising the black majority, to a constituent assembly to draft a new constitution.

He also called on church leaders to promote the idea that the process of dismantling apartheid was irreversible.

Among the plan's other demands were a call for the abolition of the death

penalty, in abeyance since President Frederik de Klerk's historic speech at the opening of parliament on February 2, and a campaign to repeal the Land Acts of 1913 and 1936, which give whites an 87 per cent share of South Africa.

The churches should call for the army's covert Civil Co-operation Bureau (CCB), accused of murdering opponents of apartheid at home and abroad, to be disbanded, and demand that Mr. Justice Louis Harms's judicial commission into political murders should be expanded to investigate the CCB, Mr. Chikane said.

The SACC should also press for the repeal of an act requiring political and charity groups to reveal sources of foreign funding, he said, urging delegates to endorse the list.

The SACC also protested at the deportation of a West German observer, the Reverend Gottfried Kratz of Berlin, who was sent back from Jan Smuts airport on Johannesburg Monday on his way to the SACC's 22nd annual conference.

The Department of Home Affairs said it had asked Mr. Kratz to apply for a visa, but he had not done so.

An SACC statement said the Rev. Kratz had been deported four years ago, after five years' work in Cape Town, because he "stood for the truth against the lie that is apartheid."

PRAGUE (JUNE 26) - Civic Forum's Dagmar Buresova was elected president of the Czech regional parliament here Tuesday, while Frantisek Miklosko of the Public Against Violence (PAV) was elected president the same day of the Slovak regional assembly in Bratislava, the official CTK news agency reported.

Ms. Buresova, 60, a lawyer for dissidents in the 1970s who became justice minister in the transitional Czechoslovak government in December, was the only candidate for the post of Czech regional parliament leader.

Nominated by Civic Forum, which holds 127 of the 200 seats in the Czech parliament following the June 8 and 9 elections, Ms. Buresova's candidacy was supported by the other three parties, including the Communist Party.

In Bratislava, Mr. Miklosko, 43, a former Catholic dissident and scientific researcher until 1983 before working as a manual labourer, was elected leader of the Slovak parliament by a 138 to seven margin.

A member of the PAV coordinating center and the party supporting President Vaclav Havel in Slovakia (with 48 of 150 deputies in the Slovak parliament), Mr. Miklosko also had the support of the second-largest party the Christian Democratic Movement (CDM).

Mr. Miklosko's brother, Jozef Miklosko, 51, is a CDM leader in Slovakia.

The Federal assembly meets Wednesday in Prague and Alexander Dubcek is expected to be re-elected to head of the national parliament.

BEIJING (JUNE 26) - Some 110,000 students in China's eastern Shandong province will spend part of their summer vacation working in the countryside,

in factories or on road construction crews, a newspaper reported Tuesday.

China Youth News, the official Communist Youth League paper, said that some of the students involved in "key projects" would be placed in "construction brigades."

It did not say how long the manual labor sessions would last.

Since China's nationwide student-led democracy movement was crushed last year, university students have been encouraged to do manual labor during their vacations as the authorities try to regain a firm grip on campuses.

KHARTOUM (JUNE 26) - Government troops have driven Sudan People's Liberation Army (SPLA) rebels out of Maridi district in the west of south Sudan's Equatoria Province, military junta member Dominique Kasianu said here Tuesday.

General Kasianu added that the Sudanese army had destroyed an "undetermined number" of SPLA bases and accepted the surrender of 77 rebels.

He said that "some 13,000 people" who had been forced to leave the district had returned "once it was cleaned up."

A truck convoy carrying relief aid under the United Nations Lifeline Sudan operation would arrive shortly at Yambio in the west of Equatoria, Gen. Kasianu added.

The SPLA has been fighting since 1983 to free mainly Christian and animist

southern Sudan from domination by the Moslem majority north.

#90177d4040 06/26/1990 ~French/German News Agency
JOHANNESBURG (JUNE 26) - A South African police spy held by the anti-apartheid African National Congress (ANC) in Angola since 1986 has been freed, state-run radio said Tuesday, citing Law and Order Minister Adriaan Vlok.

Billy van Zyl, 28, from security police in Port Elizabeth, was captured trying to infiltrate the ANC in Angola.

He was handed over to South African police in the Zambian capital Lusaka two weeks ago and has now returned home, according to Mr. Vlok.

His release was the result of intense negotiations between police and the ANC following historic first-ever talks between the government and the ANC at Groote Schuur in Cape Town on May 2-4, the radio said.

There was no mention of a trade-off on the government's side, although President Frederik de Klerk announced on June 7 he was releasing 48 ANC political prisoners.

His "gesture of goodwill" was made despite the ANC's decision to delay until July 10 its reponse to a joint report defining political crime, identifying political prisoners and exiles, and outlining timescales for their release and repatriation, drafted by a committee appointed at the Groote Schuur talks.

#90177d4110 06/26/1990 ~French/German News Agency
DUBLIN (JUNE 26) - The European Economic Community on Tuesday pledged "all possible assistance" to victims of the earthquake that cut a swathe of destruction through northwestern Iran last Thursday.

The two-day EEC summit that ended here expressed "profound sympathy ... at the terrible loss of life, injures and devastation."

"The Community and its member states wish to give all possible assistance to the victims of this disaster," a communique said.

"They have already begun a substantial programme of relief and will give every consideration to immediate further aid and to reconstruction assistance."

The Community allocated one million European Currency Units (ECUs) (1.21 million dollars) in aid on the day of the earthquake, and doubled it to two million ECUs (2.42 million dollars) on Friday as the toll neared 30,000.

According to Iranian officials, the final death toll could be 50,000.

-30- 1103

#90177d4190 06/26/1990 ~French/German News Agency

DUBLIN (JUNE 26) - French President Francois Mitterrand held firm Tuesday on his position that France "won't accept" the naming of headquarters for European Economic Community (EEC) agencies so long as Strasbourg is not officially confirmed as the seat of the European parliament.

Before the meeting of European leaders here, Mr. Mitterrand said if Strasbourg were not named as the home of the European parliament during the two-day summit France would obstruct the naming of other EEC institutional headquarters.

"France won't accept that the headquarters for other EEC agencies be named while doubt hangs over headquarters established fully 32 years ago," said Mr. Mitterrand. "As the two matters are linked, if the question keeps dragging on, there is going to be a lot of impatience."

The 12 European leaders meeting here decided to put off discussions on the European Parliament until the next summit in October.

There has been intense rivalry between Strasbourg and Brussels to become the seat of the European parliament, and a 750-seat assembly is currently under construction in the Belgian capital. France has already complained that much European parliamentary business is shifting to Brussels.

During a press conference here, Mr. Mitterrand reiterated France's demand that "all European parliamentary sessions, ordinary and extraordinary, be held in Strasbourg."

But he did not rule out the possibility that Strasbourg could be confirmed as the seat of the European parliament in October.

"I know these summits well, and I've see how these things evolve," he said. "It seems to me that we're reaching the final stage of this debate."

About French threats to block the decision on headquarters for the EEC environmental agency, an executive-training agency for Eastern European countries, and a trademark and patent agency, Mr. Mitterrand remarked: "There,
 we'll be onlookers."

In April, the European parliament voted on a compromise arrangement whereby "extraordinary" sessions could be held in Brussels, while ordinary sessions would be held in Strasbourg.

Mr. Mitterrand said he was not prepared to compromise for fear that "very quickly, all the sessions become extraordinary."

LOME (JUNE 26) - Sierra Leone's President Joseph Momoh has asked Nigeria, Guinea and Togo to join efforts to have Liberian President Samuel Doe step down, it was announced here Tuesday.

Sierra Leonean Ambassador to Togo Umaru Vury said Tuesday that Mr. Momoh had sent a message to this effect to Togolese President Gnassingbe Eyadema.

Negotiations in Sierra Leone between Mr. Doe's government and rebels of the National Patriotic Front of Liberia (NPLF) were stuck because the government is refusing to discuss a rebel demand for Mr. Doe's departure, Mr. Vury said.

Mr. Momoh, "in view of the large daily loss of life" in Liberia, wanted to meet General Eyadema and Nigerian and Guinean leaders Ibrahim Babangida and Lansana Conte to discuss means of having Mr. Doe "revise his position", the ambassador said.

Both Sierra Leone and Guinea are sheltering thousands of refugees who have fled the fighting in the neighbouring West African country.

Acting Sierra Leone head of state Salia Jusu Sheriff has told a visiting Organization of African Unity (OAU) official that the "refugees (are) bound to have an effect on the country's fragile economy," the official said in Freetown Monday.

Mr. Momoh was said in Freetown to have left on a three-week trip to Yugoslavia and China.

Gen. Eyadema, who received the ambassador here Tuesday, did not make any comment to the press.

#90177d4210 06/26/1990 ~French/German News Agency

MANHEIM, WEST GERMANY (JUNE 26) - Two state prosecutors Tuesday demanded that a West German business executive serve six and half years in jail for helping Libya build a chemical arms plant at Rabta.

Prosecutor Hans-Heiko Klein said it was ''an irrefutable fact'' that Juergen Hippenstiel-Imhausen, head of Imhausen Chemie, had sold construction blueprints and technical equipment for production of the lethal poison gases Lost, Sarin and Soman.

He said Hippenstiel-Imhausen, 49, also evaded tax on earnings from the Rabta deal, which lawyers of the accused earmarked at 13 million marks (about 7.7 million dollars).

Libya has vehemently denied the allegations, saying the plant produces only pharmaceuticals.

Prosecutor Klein said Hippenstiel-Imhausen violated West German law, which bans arms exports to countries at war or to world trouble spots, and which damage West Germany's foreign relations.

He added that the manager knew from the beginning that the plant, which was dubbed Pharma 150, was to be built in Libya and not in Hong Kong, as it was officially claimed.

The prosecutor said the executive would deserve the name ''dealer of death'' when the sentence is to be handed down on Wednesday.

Hippenstiel-Imhausen told the court he regretted his acts, and said he had been paying the price since his arrest in May 1989. His lawyers pointed out that the manager had confesssed, and asked the judge to hand down a two-year sentence or at the most a three-year one.

Meanwhile, a new scandal loomed with a report charging that two other West German firms and a Dutch one have been involved in the construction of a second plant for chemical weapons in Libya.

A report scheduled to be aired on West German Ard television late Tuesday claimed that the trade firm Rose in Stuttgart and Abacus in Ulm as well as the Dutch Kwint techniek in Culemburg have been helping to build a plant in Sebha in the Libyan desert.

The report quotes West German and U.S. intelligence sources as saying the

plant is being set up in a bunker under an old fort with the help of Imhausen Chemie blueprints.

The state prosecutor's office has opened an investigation, the report added. No comment was available Tuesday from that office or from the three companies.

On June 18, The Washington Times said a U.S. espionage satellite had photographed the site of a chemical plant in the Libyan desert several hundred kilometres south of the capital Tripoli. Like the suspected poison gas plant at Rabta, the new factory was being built underground to defend it from attack, it added.

White House Spokesman Marlin Fitzwater then commented: ''We are prepared to believe the worst. We are suspicious of a second plant.''

#90177d4250 06/26/1990 ~French/German News Agency

PRETORIA (JUNE 26) - Ten ultra-right wing leaders emerged from more than two hours of talks with President Frederik de Klerk here Tuesday with no guarantees about the future of the Afrikaner people, they told Agence France-Presse.

Reconstituted National Party (HNP) leader Jaap Marais said: "I have no clear impression that the state president has given us an unequivocal assessment about the future of the Afrikaner people or has obviated the introduction of a communist government."

The only assurance Mr. De Klerk gave the besuited spokesman of the khaki-clad delegation was that he was as concerned about the future of Afrikaners as they were.

"We believe that he has been drawn into a web where only people from the left wing have influence on him," Mr. Marais said.

"Mr. De Klerk must stop capitulating to Britsh, American and communist demands."

The rightwing was mobilising itself against the "communist threat," he said, singling out the anti-apartheid African National Congress (ANC), whose 1955 Freedom Charter, signed 35 years ago Tuesday, envisages a socialist-oriented mixed economy.

"The ANC has started a war. They intend to destroy the Afrikaner people. We are not going to just lie down and be destroyed by these people."

Mr. De Klerk's team included Law and Order Minister Adriaan Vlok, while Mr.

Marais's delegation featured former police Colonel Servaas de Wet, who heads what Mr. Vlok has branded the "totally unnecessary" commando wing of the neo-fascist Afrikaner Resistance Movement (AWB).

Roelf Meyer, Deputy Minister for Constitutional Development, was also at the talks. His Johannesburg office was wrecked in a suspected far right bomb attack at the weekend.

Mr. De Klerk himself is allegedly the target of a right-wing death plot revealed to the left-leaning Afrikaans weekly Vrye Weekblad last Friday by Jan Johannes Smith, a supposed former security policeman who infiltrated right-wing circles close to AWB leader Eugene Terre'Blanche.

ROERMOND, NETHERLANDS (JUNE 26) - Firearms seized by the Belgian police earlier this month in the arrest of suspected IRA militants were used in two IRA attacks in the Netherlands and West Germany, police said here Tuesday.

Ballistics experts identified a Kalashnikov assault rifle and a revolver as weapons used in the killing of two Austrilian tourists in this southern Dutch town on May 27, police spokesman Louis Steen said.

Experts also established that a British corporal and his daughter were killed in West Germany in October last year with the same revolver, he added.

The Irish Republican Army has claimed responsibility for both attacks.

The Dutch authorities are now expected to demand the extradition by Belgium of three suspected IRA militants who were carrying the firearms when they were arrested on June 16.

#90177d4280 06/26/1990 ~French/German News Agency

WINDHOEK (JUNE 26) - Allegations that Angolan government troops are using Namibian military bases surfaced for the second time in a week here Tuesday.

The private National Society for Human Rights (NSHR) here said some 60 armed men wearing foreign military uniforms were using a former South African Defence Force (SADF) base near Tsintsabis, some 150 kilometres (92 miles) from the Angolan border in north-eastern Namibia.

The foreign troops, wearing Soviet, Cuban and Angolan government uniforms,

confronted and questioned an NSHR team at the weekend, the society said.

Koos van der Merwe, a parliamentarian for South Africa's far right Conservative Party, alleged in Cape Town last week that soldiers from Luanda's FAPLA army were using a Namibian airbase at Rundu, on the border, to attack the rebel National Union for the Total Independence of Angola (UNITA).

That claim brought a denial both from Pretoria's Department of Foreign Affairs, and from a Namibian defence ministry spokesman, who said Namibia would never make bases available to FAPLA.

The South West Africa People's Organisation (SWAPO), in government in Namibia since the former South African colony gained independence on March 21, fought with FAPLA troops against UNITA at various stages of the 23-year bush war SWAPO waged from 1966.

#90177d4290 06/26/1990 ~French/German News Agency

CINCINNATTI, OH (JUNE 26) - Italy's Fiat Aviazione is likely to join the program to develop the GE-90 aircraft engine, due to be launched by General Electric of the United States, GE officials said Tuesday.

However, GE official Roger Morello, confirming the participation of French auto firm SNECMA, said no agreement had yet been signed with Fiat although discussions were under way.

Sources said, nevertheless, that an agreement under which Fiat would take a 10 per cent stake in the GE-90 project could be signed as early as Wednesday.

Following the decision by West Germany's MTU to link up with GE rival Pratt and Whitney, there have been repeated reports of GE trying to link up with Fiat, Japan's Ishikawajima Heavy Industry and Sweden's Volvo.

IHI recently decided to link up with another rival, Britain's Rolls-Royce although, according to GE sources, this would not necessarily bar the Japanese firm from taking a stake of around eight per cent in the GE-90 development or from being involved in the manufacture of smaller pieces for the GE-90 engines.

Volvo will reportedly have a four or five percent stake in the GE-90 while it has been confirmed that SNECMA will have a 25 per cent participation, leaving GE with a controlling majority participation even if all the other foreign options materialize.

GE is hoping the GE-90, scheduled to be ready by 1995, will be used to

power the projected twin-engined Boeing 777 aircraft (which will have a capacity of 350 passengers) and possible future Airbus 330 and McDonnell Douglas MD-11 models.

Mr. Morello speculated the market could amount to some 2,500 aircraft over a 25-year period.

But both Pratt and Whitney and Rolls-Royce are also gearing up to supply the Boeing 777 and other new aircraft.

Separately, Jean Bilien, president of CFM International (a jointly owned subsidiary of France's SNECMA and General Electric), said his company was negotiating with the Soviet aeronautics firm Ilyushin about possible participation in developing an engine for 60 IL-86 aircraft.

Mr. Bilien said his company was also discussing with China the possibility of CFMI becoming involved in the development of a 150-seat aircraft.

DUBLIN (JUNE 26) - EEC leaders joined British Prime Minister Margaret Thatcher and Premier Charles Haughey of Ireland on Tuesday in condemning Monday's bomb attack in London, attributed to the IRA, that injured seven people at a Conservative club.

The European Economic Community summit issued a communique describing the attack on the Carlton Club as an "outrage" and renewed the EEC's rejection of "all forms of terrorism."

The summit "has to some extent been overshadowed for us by the terrorist bomb," said Mrs. Thatcher, an honorary member of the all-male club that has been the meeting point for Conservative leaders for 150 years.

"Even though their main target was obviously Conservatives, it's clear they intended to kill and maim passers-by, tourists and anyone," she said.

"I hope the timing of the attack, to coincide with this European Council, will bring home internationally just what depraved and evil criminals we face."

Mr. Haughey, speaking at a press conference just before Mrs. Thatcher, said the attackers "have their own unintelligible agenda which we'd better leave to themselves."

He said that the perpetrators, if they fled to Ireland, would face extradition proceedings under European agreements.

Relations between Britain and Ireland recently soured after Irish courts released several suspected members of the Irish Republican Army (IRA), denying extradition requests from Britain for them to face trial in connection with terrorist offences.

The head of Scotland Yard's anti-terrorist branch, George Churchill Coleman,
on Tuesday said the bombing bore all the hallmarks of the IRA.

Mrs. Thatcher herself escaped from an IRA bomb attack on a hotel in Brighton, southern England, in October 1984 that left six dead.

THE HAGUE (JUNE 26) - The Dutch post office were also licked when the Netherlands were dumped out of the World Cup by West Germany last Sunday.

They had already printed the first one million stamps of a special 16 million issue to commemorate a Dutch victory in the competition.

The other 15 million had fortunately not yet been made, but the million already prepared and printed with the hasty inscription "Netherlands World Champions 1990" will now go to the furnace.

LUSAKA (JUNE 26) - The Zambian government declared a curfew Tuesday in a bid to curb the ongoing bloody food riot which has resulted in more than 20 deaths, according to uncomfirmed reports.

A government statement released in the afternoon said a 6 p.m. to 6 a.m. curfew was in effect ''and anyone found during these hours and who fails to stop for the police will be arrested.''

The scene at the country's University Teaching Hospital (Uth) Tuesday was one of chaos and panic as riot victims soaked in blood were being rushed in by fast-moving police vans.

''The situation at the hospital is really bad. Every after 10 to 15 minutes more bodies are being brought in. The number could be more than 50,'' one medical person who sought anonymity told the German Press Agency dpa.

Over 100 seriously injured patients have been admitted to Uth, and only senior medical consultants have been mobilised to attend to the patients.

Zambian President Kenneth Kaunda broke off a holiday in Mfuwe, eastern Zambian, to take charge of efforts to end the rioting.

Sporadic gunfire could be heard early Tuesday in the city centre and suburbs as convoys of police and paramilitary officers in combat dress entered Lusaka on the second consecutive day of riots.

Looters plundered shops in the city centre. Police cordoned off the area and turned people away from work. Public transport was practically at a standstill.

In Kitwe, a copperbelt town about 400 kilometres north of here, police stopped demonstrators from storming state shops. In 1986 food riots in the copperbelt claimed more than 15 lives.

Zambians are angered by a doubling of the price of maize-meal, a heavily subsidised basic food.

REYKJAVIK (JUNE 26) - Queen Elizabeth II and Prince Phillip were in Iceland Tuesday on the last day of a two-day visit, the first ever by a British monarch.

The Queen was scheduled to leave for Canada on Wednesday while her husband was to return to Britain, official sources said.

Upon the royal couple's arrival here on Monday, they were greeted by a 21-cannon salute fired from the escort ship, Penelope, accompanying the royal yacht Britannia.

The Queen paid a call on President Vigdis Finnbogadottir, who visited Britain in 1982. Diplomatic sources described it as a gesture of "esteem and friendship" to Mrs. Finnbogadottir.

During a press conference, the Queen said she had enjoyed her visit to the National Museum in the Icelandic capital where she was offered nordic texts written in the Icelandic language by Viking sages.

Knowing the Queen's love of animals, her Icelandic hosts took her on a visit of a stables where ponies are bred for horseracing.

In a speech, the Queen noted that Britain and Iceland share an insular geography and a maritime cultural heritage.

PARIS (JUNE 26) - French Socialist deputies are going to demand nationalization of Framatome, the world's leading maker of nuclear reactors, a leading Socialist announced here on Tuesday.

The announcement by Louis Mermaz, head of the Socialist parliamentary grouping, came at a time when there has already been months of conflict over control of the French firm -- pitting the Socialist government against Compagnie Generale d'Electricite (CGE), a big private telecommunications group.

The government has just reconfirmed its desire to restore state control of Framatome. An authoritative source said that the government recently indicated that it wanted to buy at least six percent of the CGE's holding in the reactor-maker, but without paying too high a price.

On Sunday, Finance and Economy Minister Pierre Beregovoy said that "France's nuclear policy cannot be determined by the private sector", thus stressing the government's strategic interest in the whole nuclear sector.

CGE was privatized in 1987, entailing the removal of Framatome from the public sector, but the government still holds 45 percent of it. On June 24, CGE signed an agreement with construction group Dumez to acquire its shares, boosting the CGE holding in the reactor-maker from 40 to a controlling 52 per- cent.

Framatome has considerable political impact, both in France and abroad, explaining the government's determination to regain control. The CGE's bold stroke was generally interpreted as a challenge to the Socialists.

Framatome has been shaken for years by constant disagreements on strategy between its boss, Chairman Jean-Claude Leny, who guards his firm's

independence, and CGE Chairman Pierre Suard.

The latter did not stint on criticism of the agreement signed last year between Framatome and West Germany's Siemens Group and to cooperate on selling pressurized water reactors worldwide. Mr. Suard thinks the terms are too favorable to Siemens.

Framatome made a net profit of 742 million francs (125 million dollars) last year, down 30 percent from 1988. Sales doubled to 19.9 billion francs (nearly 3.4 billion dollars). The discrepancy is explained by difficulties involving invoicing dates.

#90177d5700 06/26/1990 ~French/German News Agency

MOSCOW (JUNE 26) - Lithuania's parliament Tuesday postponed a debate on suspending the Baltic republic's declaration of independence after a Kremlin meeting between the Lithuanian and Soviet leaders, a parliamentary spokesman said.

The spokesman, contacted in Vilnius, said the postponement of the debate until Thursday was announced after Mr. Landsbergis told the parliament Tuesday that more time was needed to consider options on returning from Moscow.

The debate on a moratorium had been scheduled to start in Vilnius on Tuesday.

Mr. Gorbachev "may be moving in the direction of the Lithuanians," the spokesman said, after the Soviet leader called Lithuanian Prime Minister Kasimiera Prunskiene by telephone, having earlier conferred with Mr. Landsbergis here.

The spokesman stressed that Mr. Landsbergis had initiated the Moscow meeting.

The Kremlin has refused to open negotiations on Lithuania's March 11 independence declaration unless the parliament suspends its proclamation during the talks.

The parliamentary spokesman said that clarification was needed on the legal acts that would be covered by such a moratorium. He said that Mr. Gorbachev had on Tuesday offered "different versions" in his separate conversations with Mr. Landsbergis and Mrs. Prunskiene.

According to Interfax, a Moscow radio publication, Mr. Gorbachev offered negotiations "in the context of a broad inter-republican dialogue on preparing] a new union accord and setting up a union of sovereign states."

Mr. Gorbachev's spokesman, Arkadi Maslennikov, told reporters on Tuesday that the Soviet leader's offer was "a very generous offer, and it's still on the table".

#90177d6190 06/26/1990 ~French/German News Agency

OTTAWA (JUNE 26) - Two more members of parliament from Quebec province announced Tuesday that they were quitting Prime Minister Brian Mulroney's Progressive Conservative Party following failed efforts to ratify a constitutional amendment granting Quebec special status.

Louis Plamondon and Benoit Tremblay, both representing constituences in the Montreal area, declared themselves independents in the Chamber of Commons.

They linked their move with the failure of Canada's 10 provinces to ratify the so-called Meech Lake accord by a Saturday deadline. The accord would have formally recognized French-speaking Quebec as a "distinct society" within the Canadian federation.

The defections brought to five the number of Quebec deputies who have quit the Conservative Party, which still holds a comfortable majority in the lower chamber.

The highest-level defection occurred last month, when then-environment minister Lucien Bouchard, a close Mulroney aide, left both the cabinet and the party.

Political observers here said most of Quebec's Conservative deputies in the federal parliament would remain loyal to Mr. Mulroney to avoid playing into the hands of Jean Chretien, the new leader of the opposition Liberal Party.

Mr. Chretien is seen as a strong candidate against the prime minister in the next federal elections, expected to be held in 1992.

NEW DELHI (JUNE 26) - Renewed inter-caste clashes in the Taj Mahal town of Agra in northern India left at least two dead and one injured Tuesday, the Press Trust of India (PTI) said.

The new deaths in the curfew-bound town took the death toll to seven after the violence, involving rival Harijan, or Hindu untouchables, and upper caste Jats, erupted Friday.

Agra district magistrate A.K. Verma, quoted by PTI, said two died in Agra's

curfew-bound Barakhamba locality, but did not give details.

Police told PTI 299 suspects had been rounded up since Friday, including 44 detained Tuesday.

The trouble erupted after the Jats prevented a Harijan marriage procession from passing through a particular part of the city.

#90177d6270 06/26/1990 ~French/German News Agency

TUNIS (JUNE 26) - An emergency Arab foreign ministers' meeting called by the PLO for Wednesday has been postponed but will take place here in the next few days, informed sources at the Arab League headquarters said.

The PLO had formally requested the meeting to discuss Washington's decision last week to break off its 18-month old dialogue with the organisation, and to take "effective measures against mounting Israeli threats."

Several Arab League members had asked for it to be postponed, saying their ministers' timetables were too full, according to the League sources, who were unable to give a precise new date for the talks.

Observers said the meeting will probably not take place before next week because of a Moslem holiday.

U.S. President George Bush said June 20 that Washington was breaking off its dialogue with the Palestine Liberation Organisation because the group failed to condemn an abortive Palestinian commando attack on Israel last month.

After the May 30 raid, the PLO issued a statement denouncing attacks against civilians without referring to the commando operation, which was claimed by the Palestine Liberation Front, a radical faction within the PLO structure.

#90177d6370 06/26/1990 ~French/German News Agency

PARIS (JUNE 26) - Credit Lyonnais bank (CL) announced Tuesday that it would increase its holding in Woodchester Investments plc, which operates in Ireland and Britain, from 29.85 percent to 45.4 percent.

Woodchester is involved in such sectors as consumer loans, commercial banking, insurance and factoring. The deal is subject to official approval in both countries.

CL's increased stake will result from a Woodchester capital increase of

about 100 million Irish pounds (160 million dollars). Forty-five million of the 51 million new shares will be reserved for the French bank.

The shares will be bought by Compagnie Rhodanienne de Gestion, a CL subsidiary, which holds the current 29.85 percent.

Other major shareholders in Woodchester, prior to the capital increase, are Irish Life Assurance plc (10 to 15 percent), Standard Life Assurance Co. and Allied Irish Bank Investments Managers Ltd. (five to 10 percent each).

The shareholders will be called on to approve the deal at a special general meeting in July.

Woodchester, listed in Dublin and London, employs 750 people. Its pre-tax profit rose over a five year-period from 1.5 million to 26.4 million Irish pounds (in 1989). Assets rose over the same period from 55 million to 520 million Irish pounds.

BUDAPEST (JUNE 26) - Hungarian Interior Minister Balazs Horvath called for an investigation Tuesday into accusations that former Hungarian Communist Party leaders assisted Middle Eastern terrorists.

Among those accused of offering aid and shelter to terrorists are Mihaly Koron, who served as justice minister under former party leader Janos Kadar, and Andras Benkey, a former interior minister.

Between 1981 and 1982, the two former ministers allegedly assisted a group of terrorists connected with the Venezuelan "Carlos," wanted for a number of terrorist attacks.

Mr. Benkey, in an interview with Hungarian television Tuesday evening, rejected the accusations and stressed that Hungary is a member of Interpol, the international police organization.

#90177d6480 06/26/1990 ~French/German News Agency

MANAUS, BRAZIL (JUNE 26) - An expanse of Amazon forest the size of Italy and Portugal combined has been cut down in the last five centuries, the secretatry of science and technology said Tuesday.

Speaking here before an international environmental symposium, Jose Goldemberg said more than 404,000 square kilometers (170,000-square miles) of forest had been felled since Brazil was discovered in 1500.

That figure is nearly double earlier official estimates of the amount of Amazon forests churned under as farmers, loggers and miners press deeper into the Amazon, a trend environmentalists have tried to turn around.

President Jose Sarney in April 1989 said that satellite surveys conducted by the National Institute for Space Research showed 250,000 square kilometers (96,530 square miles) of forest had been cut down between 1500 and 1988.

Those findings were culled from 167 photographs taken by the U.S. Landsat-5 satellite, Mr. Goldemberg said, who added they also underestimate by nearly half the amount of forest cleared every year.

Some 33,000 square kilometers (12,745 square miles) are burned or churned under every year, an expanse of land equivalent to the size of the Netherlands, said Mr. Goldemberg, an prominent ecologist.

Mr. Goldemberg's projections are very close to those of the United Nations, which has said that between 40,000 to 80,000 square kilometers (15,500 to 30,900 square miles) are burned or cut down annually.

#90177d7500 06/26/1990 ~French/German News Agency
HAMBURG, WEST GERMANY (JUNE 27) - Police arrested 100 people here Tuesday after violence broke out at the end of a march against the holding of an international business conference in the city, police said.

The protest, which had been banned by the Hamburg city authorities, was against the holding of a conference of the International Chamber of Commerce.

Around 600 people took part, and there was no trouble until the end when some of the demonstrators started throwing eggs and stones at the force of some 2,800 police officers.

-30- 723
#90177d7650 06/26/1990 ~French/German News Agency
TEGUCIGALPA (JUNE 27) - Nicaraguan Vice President Virgilio Godoy, speaking in the Honduran capital Tuesday, said all armies in central America should be disbanded because the military ''devours everything possible and is good for nothing''.

Godoy, who is on a two-day visit, also urged Nicaraguans living in neighboring Honduras not to return in large numbers to their homeland, claiming that such an influx would be a ''catastrophe'' for Nicaragua where unemployment is high.

According to official sources, around 200,000 Nicaraguans, many of them refugees or illegal immigrants, are currently living in Honduras.

The conservative deputy president in the government of Nicaraguan leader Violeta Chamorro said Nicaragua's financial plight was so bad that it would take 30 years of hard work to restore the economic situation which existed in 1979 when the left-wing Sandinistas seized power in a revolution.

-30- 1117
#90177d7700 06/26/1990 ~French/German News Agency
JERUSALEM (JUNE 27) - The speakers of the East and West German parliaments told a meeting here Tuesday that Israel had "nothing to fear from German reunification."

The two top legislators, Rita Suessmuth of West Germany and Sabine Bergmann-Pohl of East Germany, were addressing a conference on the future of Germany organized by the Israeli Center for External Relations Tuesday.

They had met with Israeli Foreign Minister David Levy earlier in the day.

During that meeting, Mrs. Bergmann-Pohl, who is the first top East German politician to visit Israel, hailed as a "symbolic act" what she called the "establishment of relations between Israel and East Germany" prior to German reunification.

Their two-day visit, which started Monday, was seen as a key step along the road to reunification.

Seeking to allay Israeli fears over this process, Mrs. Suessmuth told the Tuesday meeting that reunification was being handled "within the European context, and is based on democracy and the Helsinki accords".

In an allusion to the Nazi genocide of Jews during World War II, she stressed that "Germans had not forogotten their past, they are aware of their responsibilities".

"But only a united Germany can assume political responsibilities," she said.

Mrs. Bergmann-Pohl, meanwhile, denounced the old "Stalinist, anti-Zionist and anti-semite" regime in East Germany, and said she hoped to see the start of "a process of reconciliation with Israel".

The speaker of the Israel parliament, Dov Shilansky, who is a survivor of Nazi concentration camps, bowed out of acting as official host, but was to meet the two speakers privately at his home.

In an historic move in April, the East German government agreed to accept joint responsibility for the massacre of Jews during World War II. It has also said it will pay reparations, as West Germany has long been doing.

PIRMASENS, WEST GERMANY (JUNE 25) EFE - U.S. troops Tuesday began packing up some 100,000 chemical warheads stored in West Germany, following an agreement with the Soviet Union to withdraw and destroy them.

A U.S. military spokesman said the warheads were being packed in special steel containers and will be transported in convoys between July and September from the Clausen military base for temporary storage in Miesau, in the Palatinate region in southern Germany.

The chemical weapons will be shipped in the autumn to the Johnston Islands in the Pacific Ocean, where they will be destroyed at a plant especially built for that purpose.

-30- 827
#90177e0027 06/26/1990 ~Latin America New Agency
LUSAKA (JUNE 26) EFE - Police barred entry to central Lusaka Tuesday as looting continued a day after violent clashes between police and rioters protesting food price hikes left five people dead and at least a dozen injured.

Police used tear gas to break up groups of protesters who ransacked stores in several suburbs of the capital, stoned passing cars and broke shop windows as they roamed through the streets.

The government issued a statement saying the situation was under control and urged people to return to work.

Hospital sources said five people, including a five-month-old baby were killed in clashes Monday when police fired into the crowd to disperse the protestors. Twelve to 15 people were seriously injured, they said.

Police reported that three people, including the baby and a police officer had died in the incidents.

Some 2,000 people joined the demonstration Monday, apparently encouraged by university students, after the government doubled the price of corn meal, a Zambian staple.

The protest violence was the worst in Zambia since 1986, when 15 people were killed in clashes between police and demonstrators.

-30- 1356
#90177e0031 06/26/1990 ~Latin America New Agency
JERUSALEM (JUNE 26) EFE - Israel's new far-right government is to propose

offering Palestinians in the Occupied Territories "full autonomy" in return for Syria and Jordan opening peace talks with Israel, according to a report in a Tel Aviv daily Tuesday.

The independent Ha'aretz newspaper said Prime Minister Yitzhak Shamir is to renew previous proposals, under which his government would open negotiations with the Palestinians in the West Bank and Gaza Strip.

In a letter he will send this week to U.S. President George Bush, Shamir will suggest that in return for opening talks with the Palestinians, the United States should intervene to persaude Jordan and Syria to begin a simultaneous peace dialogue with Tel Aviv.

Negotiations on autonomy for the Palestinians would begin after democratic elections were held in the West Bank and Gaza Strip, occupied by Israel in 1967.

The "full autonomy" Shamir is to propose would last for five years during which Israeli troops would pull out of Palestine cities.

Ha'aretz said Shamir will propose that talks be held on what will be the future of the territories after the five-year period.

Shamir's proposal comes in response to a letter sent by Bush urging Tel Aviv to accept a peace plan put foward by U.S. Secretary of State James Baker.

Baker suggested that the Israeli government should open negotiations with a team of Palestinians made up of Arabs from East Jerusalem and Palestinian exiles.

The rejection of the Baker proposal three months ago led to the fall of Shamir's National Unity government and soured relations between Tel Aviv and Washington.

East Jerusalem, where most of the city's 140,000 Palestinians live, was occupied by Israel after the 1967 Six Day War and was annexed in 1980.

However, the report in Ha'aretz said that Shamir would not accept the presence of Palestinians from East Jerusalem at the negotiating table, nor would he open dialogue with the Palestine Liberation Organization (PLO).

Israeli Foreign Minister David Levy said Tuesday, "We have to say 'Yes' to Baker's initiative but 'No' to ... having representatives from Jerusalem and exiles (at the talks)."

Washington broke off talks with the PLO last week after the organization failed to specifically condemn an aborted attack on an Israeli beach by a

faction of the movement.

In his letter to Bush, Shamir is also to assure Bush that Soviet Jews emmigrating to Israel will not be settled in the Occupied Territories.

Shamir last week sent a message to Soviet leader Mikhail Gorbachev assuring him on the same matter, according to press reports from Tel Aviv.

Some 56,000 Soviet Jews have left for Israel since the beginning of 1989, Moscow has threatened to curb their exodus unless Israel promised not to resettle them in the Occupied Territories.

#90177e0034 06/26/1990 ~Latin America New Agency

RIO DE JANEIRO (JUNE 26) EFE - Brazil's most popular Evangelist preacher, Edir Macedo, has been charged with +charlatanism and witch doctoring+ and will be arrested if he fails to turn himself in, authorities said Tuesday.

Rio de Janeiro Police Commissioner Irineu Barrozo said he would seek a warrant for Macedo's arrest because the preacher had failed to appear in court and because he was an +unbalanced, opportunist, amoral and psychopathic+ person who enriched himself through the ignorance of the poor.

Macedo, leader of the Universal Church of the Kingdom of God, will be prosecuted along with 67 other preachers of the same organization, Barrozo said.

Macedo, 45, has built 600 churches in Brazil, Argentina, Uruguay, Spain, Portugal and the United States.

He asks his estimated six million worshipers to donate 20 per cent of their earnings to his church.

He also owns 14 radio stations, a construction company and recently bought the Brazilian +Record+ television network for dlrs 45 million.

Critics accuse Macedo of leading hysterical sessions of massive exorcism, such as the gathering of some 150,000 people in Rio's Maracana Stadium in April, when an elderly woman died and 80 people were hospitalized.

#90177e0038 06/26/1990 ~Latin America New Agency

Buenos Aires (JUNE 26) EFE - The Argentine government is to announce new economic austerity measures including a tariff reduction, the liberalization of fuel prices and an early retirement plan for state

workers, officials said Tuesday.

Economy Minister Antonio Erman Gonzalez is to announce the measures Wednesday, which will also include a plan to allow trading of state enterprise shares on the stock market.

President Carlos Menem's government plans to speed the opening of the Argentine market by means of a 40 percent reduction in tariffs. New import tariffs are not to exceed 50 percent of the product price.

Taxes on exports will also be slashed to a maximum of 5 per- cent of the price.

To offset revenue losses, the government will ask parliament to raise value-added taxes and to levy a new tax on financial institutions and exchange dealers.

State enterprises will be required to submit monthly budgets.

The government will also ask Congress to enact a +Law for the Defense of Competition+, criminalizing monopolistic business practices.

The measures are aimed at curbing inflation, which totaled more than 200 percent in the first five months of the year.

-30- 1359

#90177e0040 06/26/1990 ~Latin America New Agency

DUBLIN (JUNE 26) EFE - The 12 European Community (EC) leaders Tuesday instructed the European Commission to thrash out an agreement with Brazil and other Latin American nations on preserving the rapidly disappearing Amazonian rain forests.

The EC leaders said they were willing to consider debt-for- conservation deals whereby EC nations agree to write off a portion of the debt owed by Latin American countries in return for Amazon nations enacting conservation programs in the rain forest regions.

Scientists say the burning of the Amazonian rain forests -- at its most intense in Brazil where the land is being cleared to accomodate people from overcrowded cities -- pumps gases into the atmosphere that contribute to global warming, disrupting world temperatures and causing sea levels to rise.

Other measures designed to help preserve the rain forests include a proposal to draft a code of restrictions on firms importing wood from the Amazon region and a study of resources needed to assist regional governments in conservation programs.

The 12 EC leaders, at the two-day summit that ended Tuesday in the Irish capital, called on other industrialized nations to help in the fight to preserve the rain forests "which can only been confronted within the context of north-south relations."

-30- 1494

#90177e0042 06/26/1990 ~Latin America New Agency

Brasilia (JUNE 26) EFE - Brazilian Economy Minister Zelia Cardoso de Mello Tuesday announced sweeping reforms, scrapping restrictions on imports and ending protectionism in some sectors.

At a press conference in the capital, Cardoso de Mello said that restrictions would be lifted on an extensive list of products which have been subject to import limitations for the last 20 years.

The lifting of import restrictions, which she described as +a decisive step in the modernization of the country+, will go into effect as of July 1, she said.

Protection of Brazil's textile industry is to end with the reduction on Wednesday of tariffs on imported garments, raw materials and textile industry machines and their components, she added.

Businessmen, especially in the textile industry, opposed the plan, complaining that their products would be priced out of the mard she hoped the end of the tariffs would see a reduction in the price of clothes in a few months.

President Fernando Collor de Mello is to present to Congress within two months a bill to reduce protectionism in the computer and pharmaceutical industries, she said.

The minister also announced that the government aimed to end the administration's control over foreign trade and reduce to five days the maximum time limit for processing import licenses.

The government is also to encourage the private sector to set up a foreign trade bank to oversee imports, exports and foreign investment.

The latest moves are part of Collor de Mello's drastic economic austerity plans to cure Brazil's ailing economy which have included thousands of layoffs in the public sector and the privatization of dozens of overbloated state-owned industries.

MADRID (JUNE 26) EFE - The Spanish Supreme Court ruled Tuesday that former business tycoon Jose Maria Ruiz Mateos is entitled to recover two companies expropriated by the government from his 232-company conglomerate.

Ruiz Mateos, 60, can regain control of the "Banco del Norte" and the insurance company, "Atlas," because the Socialist government's 1983 expropriation of his RUMASA private holding company had not been made in the public interest, the court ruled.

The ruling is a landmark victory in the 7-year battle waged by Ruiz Mateos to regain his private business empire, that once included 20 banks, employed more than 60,000 workers and accounted for 2 percent of Spain's gross domestic product.

Legal experts said that the same finding could be made in other related court cases, permitting Ruiz Mateos to recover more companies.

The long-running saga of the RUMASA case has enthralled the Spanish public and chalked up about 130 lawsuits since the Spanish government took over the conglomerate, citing mismanagement.

Ruiz Mateos was charged with fraud, misappropriation of funds, capital flight and slandering King Juan Carlos, whom he accused of taking a bribe.

He has demanded dlrs 3 billion in compensation for the seizure of RUMASA wineries, hotels, banks, department stores, construction firms and their sell-off by the government to private investors at what he claimed were knock down prices.

The ex-RUMASA chief, who has 13 children, built up his business empire from a small sherry-exporting company in his native southern town of Jerez borrowing heavily from banks he later acquired.

Since his 1985 extradition from West Germany, where he had fled to escape arrest, he has been in and out of prison. He has jumped bail and once absconded from court disguised in a wig and sunglasses.

Last year Ruiz Mateos was elected to the European Parliament and thanks to his status as a Euro MP he has been entitled to have the charges against him heard in the Spanish Supreme Court.

CANBERRA (JUNE 26) XINHUA - ABOUT 4,000 OF THE WORLD'S LEADING CONSERVATIONISTS AND ENVIRONMENTAL SCIENTISTS HAVE BEEN INVITED TO A CONFERENCE OF THE INTERNATIONAL UNION FOR THE CONSERVATION OF NATURE AND NATURAL RESOURCES (IUCN) IN PERTH, WESTERN AUSTRALIA, LATER THIS YEAR.

THE IUCN'S 18TH GENERAL ASSEMBLY, TO BE HELD BETWEEN NOVEMBER 28 AND DECEMBER 5, WOULD SET THE AGENDA FOR ENVIRONMENT FOR THE NEXT DECADE, THE AUSTRALIAN OVERSEAS INFORMATION BUREAU QUOTED ENVIRONMENT MINISTER ROS KELLY AS SAYING TODAY.

THE UNION HAD BEEN INVITED TO HOLD ITS ASSEMBLY IN AUSTRALIA BY PRIME MINISTER BOB HAWKE.

IT IS KNOWN THAT THE MOST IMPORTANT ISSUES THAT WILL BE DEBATED AT THE GENERAL ASSEMBLY WILL INCLUDE A CONSERVATION STRATEGY FOR ANTARCTICA, DEVELOPMENT OF A CONVENTION ON BIODIVERSITY AND A REVIEW OF THE WORLD CONSERVATION STRATEGY WHICH HAS SUSTAINABLE DEVELOPMENT AS ITS PRIMARY OBJECTIVE.

THE IUCN IS MADE UP OF MORE THAN 400 GOVERNMENT AND NON-GOVERNMENT ORGANIZATIONS FROM 120 COUNTRIES. THERE ARE THIRTYTHREE AUSTRALIAN MEMBER ORGANIZATION, THE BUREAU SAID.

ISLAMABAD (JUNE 26) XINHUA - THE IRAN-BASED AFGHAN MUJAHIDEEN OF THE NINE-PARTY ALLIANCE HAVE PRESENTED A NEW FORMULA FOR ELECTIONS IN AFGHANISTAN IN A BID TO FIND A SOLUTION TO THE AFGHANISTAN ISSUE.

ACCORDING TO "THE MUSLIM" TODAY, A DELEGATION FROM THE NINE-PARTY ALLIANCE IS DISCUSSING THE NEW FORMULA WITH THE MUJAHIDEEN GROUPS BASED IN PESHAWAR PAKISTAN.

ALI MAZAI, LEADER OF THE DELEGATION, OUTLINED AT A PRESS CONFERENCE IN PESHAWAR ON SUNDAY THE FORMULA OF THE ELECTION FOR ESTABLISHING A SHOORA (ASSEMBLY).

THE ELECTION, MAZAI SUGGESTED, SHOULD BE HELD UNDER THE SUPERVISION OF AN ELECTION COMMISSION AND CREDIBLE AND UNBIASED MONITORS, WHICH HE EXPLAINED COULD BE FROM PAKISTAN, IRAN OR THE UNITED NATIONS.

ALL CITIZENS OF AFGHANISTAN, BOTH MALE AND FEMALE, WITHOUT DISCRIMINATION, SHALL BE ENTITLED TO PARTICIPATE IN THE ELECTION ON THE BASIS OF ONE MAN ONE VOTE, HE SAID.

BUT HE TOLD REPORTERS THAT THE KABUL RULER NAJIBULLAH AND HIS PARTY, BEING UN-ISLAMIC, ARE NOT QUALIFIED TO TAKE PART IN THE ELECTION. THE FORMER AFGHAN KING ZAHIR SHAH, WHO IS IN EXILE IN ROME, CAN SEEK ELECTION AND IT WILL BE UP TO THE PEOPLE TO ELECT OR REJECT HIM, HE SAID.

HE SAID ISLAMIC PARTIES AND INDEPENDENT PERSONS CAN CONTEST IN THE ELECTION AND EVERY PARTY WILL BE ALLOWED TO SEND ONE MEMBER TO THE SHOORA FOR EVERY 70,000 VOTES.

HE SAID THE ELECTED SHOORA WILL APPOINT THE PRESIDENT AND PRIME MINISTER OF THE INTERIM GOVERNMENT OF AFGHANISTAN FROM AMONG ITS MEMBERS BY A MAJORITY OF VOTES.

THE ELECTION WILL BE OPEN TO ALL THOSE PARTIES WHICH BELIEVE IN AN ISLAMIC INDEPENDENT AND NON-ALIGNED AFGHANISTAN, HE SAID.

ALI MAZAI SAID THAT HIS DELEGATION HAS ALREADY MET SOME OF THE PAKISTAN-BASED MUJAHIDEEN LEADERS AND IS LOOKING FORWARD TO MEET OTHERS.

HE SAID THE OUTCOME OF THESE DISCUSSIONS DEPENDS ON THE ACCEPTANCE OF A WORKABLE FORMULA BY OTHER PARTIES.

NEW DELHI (JUNE 26) XINHUA - ALMOST THE WHOLE OF WEST BENGAL STATE AND

PARTS OF EASTERN REGION OF INDIA WERE HIT BY AN UNPRECEDENTED POWER FAILURE SINCE 0100 HOURS TODAY, ACCORDING TO PRESS TRUST OF INDIA (PTI).

THE CAUSE IS REPORTED TO BE A TOTAL TRANSMISSION BREAKDOWN IN THE SYSTEM OF WEST BENGAL STATE ELECTRICITY BOARD.

THE STATE'S HOME SECRETARY MANISH GUPTA TOLD PTI THAT ONLY CALCUTTA ELECTRIC SUPPLY CORPORATION SYSTEM HAD BEEN FUNCTIONING BUT ITS GENERATION "IS NOT ENOUGH TO FEED THE WHOLE CITY. ONLY THE NORTHERN AND PARTS OF CENTRAL CALCUTTA ARE HAVING LIMPING POWER SUPPLY."

GUPTA SAID THAT THOUGH POWER SUPPLY SOMEHOW COULD BE MAINTAINED IN HOSPITALS AND THE METRO RAILWAY SYSTEM, WATER SUPPLY COULD NOT BE ARRANGED THROUGHOUT THE SPRAWLING AREAS OF CALCUTTA, THE CITY'S NEIGHBORING DISTRICTS.

THE HOME SECRETARY SAID THAT FOLLOWING THE FAILURE IN TRANSMISSION ALL THE GENERATING UNIT HAD BEEN SHUT DOWN.

POWER FAILURE HAS ALSO AFFECTED THE CALCUTTA TRAMWAYS SERVICE AND THE RUNNING OF ELECTRIC SUBURBAN TRAINS.

GUPTA SAID THAT REPAIR WORK HAD BEEN STARTED AND IT WAS EXPECTED THAT POWER COULD BE RESTORED PARTIALLY BY THIS EVENING.

#90177h0046 06/26/1990 ~Chinese News Agency

ISLAMABAD (JUNE 26) XINHUA - THE GOVERNMENT OF PAKISTAN HAS PLANNED TO INCREASE THE COUNTRY'S EXPORTS BY 15 PERCENT TO 5,494 MILLION U.S. DOLLARS FOR FISCAL YEAR 1990-91 (BEGINNING JULY 1).

THIS WAS STATED BY THE MINISTER OF COMMERCE SALEH HAYAT IN AN ADDRESS ON RADIO AND TELEVISION LAST NIGHT FOLLOWING A CABINET MEETING WHICH TOOK IMPORTANT DECISIONS ON TRADE.

THE MINISTER SAID THAT EXPORTS OF THE 1989-90 FISCAL YEAR (ENDING JUNE 30) IS EXPECTED TO REACH 4,785 MILLION U.S. DOLLARS.

IN THE FIRST 11 MONTHS OF THE CURRENT FISCAL YEAR, EXPORTS TOTALLED 4,336 MILLION DOLLARS WITH A GROWTH RATE OF FOUR PERCENT OVER THE PREVIOUS CORRESPONDING PERIOD, HE SAID.

HAYAT SAID EXPORT EARNINGS DURING 1989-90 WILL BE ABLE TO MEET SEVENTY PERCENT OF THE IMPORT BILL COMPARED WITH 62 PERCENT IN THE PREVIOUS YEAR.

DURING 1990-91, THE MINISTER SAID, IMPORTS ARE ESTIMATED AT 6.9 BILLION U.S. DOLLARS, WHICH IS ALMOST EQUAL TO THE ESTIMATED IMPORT BILL OF THE

CURRENT FISCAL YEAR.

HE SAID THE TRADE IMBALANCE IN 1989-90 HAS BEEN REDUCED TO 2,100 MILLION DOLLARS FROM 2,373 MILLION DOLLARS DURING 1988-89.

ACCORDING TO THE MINISTER, DURING 1990-91, NINETY ITEMS HAVE BEEN MADE FREELY IMPORTABLE AND THESE WILL BE PUBLISHED SEPARATELY.

THE GOVERNMENT HAS ALSO REDUCED THE ITEMS OF RESTRICTED GOODS FROM 52 TO 11 TO ENSURE CHEAPER AVAILABILITY OF IMPORTED RAW MATERIALS, HE SAID.

HAYAT URGED THE TRADING COMMUNITY TO EXTEND THEIR COOPERATION TO THE GOVERNMENT'S DRIVE TO PROMOTE TRADE THROUGH MAJOR POLICY CHANGES IN IMPORT AND EXPORT.

#90177h0047 06/26/1990 ~Chinese News Agency

BEIJING (JUNE 26) XINHUA - CHINESE PREMIER LI PENG TODAY WAS AWARDED THE PERUVIAN "TAVARA GRAND CROSS MEDAL," A MEDAL OF SUPREME HONOR OF PERU'S CHAMBER OF DEPUTIES.

LI ACCEPTED THE MEDAL FROM LUIS ALVARADO CONTRERAS, PRESIDENT OF CHAMBER OF DEPUTIES OF THE REPUBLIC OF PERU, IN THEIR MEETING HERE THIS AFTERNOON.

CHINESE FOREIGN MINISTER QIAN QICHEN WAS ALSO AWARDED A "TAVARA GRAND CROSS MEDAL" ON THE SAME OCCASION.

THE MEDALS SYMBOLIZE THE FRIENDLY FEELINGS HELD BY THE PERUVIAN PARLIAMENT GOVERNMENT AND PEOPLE FOR THE CHINESE GOVERNMENT AND PEOPLE, LI SAID. HE EXPRESSED "HEARTFELT THANKS" FOR THAT.

THE CHINESE GOVERNMENT ATTACHES GREAT IMPORTANCE TO ITS RELATIONS WITH DEVELOPING COUNTRIES, INCLUDING THE LATIN AMERICAN COUNTRIES, LI SAID.

THE RECENT SUCCESSFUL VISIT BY CHINESE PRESIDENT YANG SHANGKUN TO FIVE LATIN AMERICAN COUNTRIES HAS FURTHERED CHINA'S FRIENDLY, COOPERATIVE RELATIONS WITH LATIN AMERICA, LI SAID.

MEANWHILE, HE SAID, "WE ARE DELIGHTED TO SEE THAT THE FRIENDLY, COOPERATIVE RELATIONS BETWEEN CHINA AND PERU ARE DEVELOPING SMOOTHLY." HE EXPRESSED THE CONFIDENCE THAT ALVARADO'S CURRENT VISIT WOULD STRENGTHEN SUCH TIES.

ALVARADO CONVEYED THE CORDIAL REGARDS FROM THE PERUVIAN PEOPLE TO THE CHINESE LEADERS AND PEOPLE, SAYING THE PERUVIAN PARLIAMENT WOULD WORK FOR THE FURTHER EXPANSION OF PERU-CHINA RELATIONS.

DURING THE MEETING, LI BRIEFED ALVARADO ON CHINA'S POLICIES FOR ECONOMIC DEVELOPMENT AND POPULATION. THEY ALSO EXCHANGED VIEWS ON THE CURRENT INTERNATIONAL SITUATION, REGIONAL ISSUES, SOUTH-NORTH RELATIONS AND LATIN AMERICA'S DEBT.

#90177h0050 06/26/1990 ~Chinese News Agency

NAIROBI (JUNE 26) XINHUA - ASSISTANT MINISTER IN THE OFFICE OF THE PRESIDENT MR. JOHN KEEN HAS REAFFIRMED THAT THE VETTING OF PRESS CONFERENCE IS NECESSARY IN KENYA AS STATE SECURITY IS ABOVE EVERYTHING ELSE.

THE LOCAL PRESS TODAY QUOTED MR. JOHN KEEN, WHO IS IN CHARGE OF INTERNAL SECURITY, AS SAYING THAT KENYA IS NOT THE FIRST COUNTRY TO INTRODUCE VETTING IN THE PRESS. HE GAVE INDIA AND NIGERIA AS EXAMPLES.

LAST WEEK, KENYA'S COMMISSIONER OF POLICE MR. PHILIP KILONZO ANNOUNCED THAT THE POLICE WILL VET ALL PRESS CONFERENCES TO DETERMINE WHETHER THEY ARE GENUINE OR ILLEGAL MEETINGS.

THE ANNOUNCEMENT CAME IN THE WAKE OF A CONTROVERSIAL PRESS CONFERENCE HELD BY A NAIROBI LAWYER INVOLVING TWO DISSIDENT MULTI-PARTY ADVOCATES.

THE ASSISTANT MINISTER STRESSED: "THE COMMISSIONER OF POLICE IS IN CHARGE OF PUBLIC SECURITY AND HE IS ENTITLED TO VET ANY MEETING IF HE FEELS THAT THERE ARE ISSUES OF STATE SECURITY AT RISK."

POLICE ARE EMPOWERED TO CONFISCATE JOURNALISTS' CAMERAS, NOTEBOOKS AND CASSETTES IF THEY CONTAIN INFORMATION THAT IS LIKELY TO POISON THE MINDS OF PEOPLE, MR. JOHN KEEN SAID.

BUT HE SAID, "THE PRESS IS FREE AND WE DO NOT IN ANY WAY INTEND TO SUPPRESS THE PRESS. IT IS ONLY THOSE WHOM WE SUSPECT ARE UNDERMINING THE SECURITY OF THE STATE THAT WE WILL DEAL WITH."

#90177h0052 06/26/1990 ~Chinese News Agency

ACCRA (JUNE 26) XINHUA - GHANA HAS EXPRESSED DEEP CONCERN OVER THE CURRENT SITUATION IN LIBERIA AND OFFERED TO WORK WITHIN THE FRAMEWORK OF THE ECONOMIC COMMUNITY OF WEST AFRICAN STATES TO ENSURE A PEACEFUL SETTLEMENT OF THE LIBERIAN CONFLICT.

ACCORDING TO THE "PEOPLE'S DAILY GRAPHIC" TODAY, ON JUNE 20 GHANAIAN HEAD OF STATE JERRY RAWLINGS SENT A HIGH-POWERED DELEGATION TO FREETOWN TO DISCUSS WITH SIERRA LEONEAN PRESIDENT JOSEPH MOMOH THE SITUATION IN LIBERIA.

IN A MESSAGE TO THE SIERRA LEONEAN PRESIDENT, RAWLINGS SAID HIS COUNTRY WILL SUPPORT ANY COLLECTIVE EFFORT LEADERS IN THE SUB-REGION COULD MAKE TO BRING THE SITUATION IN LIBERIA BACK TO NORMALCY.

HE SAID THAT GHANA IS PREPARED TO HELP SOLVE THE REFUGEE PROBLEM THAT HAS PLAGUED GUINEA, COTE D'IVOIRE, SIERRA LEONE AND GHANA SINCE THE ANTI-GOVERNMENT NATIONAL PATRIOTIC FRONT OF LIBERIA LAUNCHED THE ATTACK FROM LIBERIA'S NORTHERN NIMBA COUNTY SIX MONTHS AGO.

#90177h0055 06/26/1990 ~Chinese News Agency

CANBERRA (JUNE 26) XINHUA - AUSTRALIA'S COMMODITY EXPORTS EARNINGS FOR 1990-91 MAY INCREASE BY SOME FIVE PERCENT TO AROUND 41 BILLION AUSTRALIAN DOLLARS (31.9 BILLION U.S. DOLLARS), ACCORDING TO A FORECAST OF THE AUSTRALIAN BUREAU OF AGRICULTURAL AND RESOURCE ECONOMICS (ABARE).

ABARE'S JUNE ISSUE OF THE AGRICULTURE AND RESOURCES QUARTERLY EXPECTS MINERAL RESOURCES EXPORT TO RISE 4 PERCENT TO 25.5 BILLION AUSTRALIAN DOLLARS (19.9 BILLION U.S. DOLLARS) IN 1990-91, COMPARED WITH 20 PERCENT GROWTH IN 1989-90.

THIS REFLECTS A SLOWING IN AUSTRALIAN MINE PRODUCTION IN THE FACE OF WEAKER WORLD DEMAND AND ALSO LOWER WORLD PRICES FOR SOME RESOURCE COMMODITIES, SAID BRIAN FISHER, EXECUTIVE DIRECTOR OF ABARE.

GROWTH IN MINING SECTOR OUTPUT IS EXPECTED TO FALL FROM 11 PERCENT IN 1989-90 TO AROUND 2 PERCENT IN THE YEAR AHEAD.

GOLD MINE OUTPUT IS EXPECTED TO FALL BY 2 PERCENT. THIS IS LARGELY A RESULT OF DECLINING OUTPUT FROM SOME SMALLER, OLDER MINES AS THEY REACH

THE END OF THEIR ECONOMIC LIVES AND A DECREASE IN THE NUMBER OF NEW MINES COMING INTO PRODUCTION, ACCORDING TO THE DIRECTOR.

WHILE TOTAL ENERGY PRODUCTION IS EXPECTED TO REMAIN THE SAME, OUTPUT OF NATURAL GAS IS FORECAST TO RISE 9 PERCENT AS OPERATIONS AT THE NORTH-WEST SHELF PROJECT EXPAND.

FISHER SAID THAT "IN CONTRAST, A TURNAROUND IN RURAL COMMODITY EXPORT PERFORMANCE IS EXPECTED. RURAL EXPORT EARNINGS ARE FORECAST TO RISE 6 PERCENT TO 15.5 BILLION AUSTRALIAN DOLLARS (12.1 BILLION U.S. DOLLARS) IN 1990-91, AFTER AN 8 PERCENT DROP IN 1989-90."

THIS RISE REFLECTS A FORECAST 10 PERCENT GROWTH IN VOLUMES SHIPPED, WHICH WOULD MORE THAN OFFSET A FORECAST 4 PERCENT FALL IN RURAL COMMODITY EXPORT PRICES.

"AN IMPORTANT FEATURE OF THE EXPECTED RECOVERY IN RURAL EXPORT EARNINGS IS A FORECAST 18 PERCENT RISE TO 4.2 BILLION AUSTRALIAN DOLLARS (3.3 BILLION U.S. DOLLARS) IN THE VALUE OF WOOL SHIPPED," FISHER SAID.

THE ALMOST 650 MILLION AUSTRALIAN DOLLARS (507 MILLION U.S. DOLLARS) INCREASE ON ESTIMATED 1989-90 EARNINGS REPRESENTS AN EXPECTED IMPROVEMENT IN WORLD DEMAND FOR AUSTRALIAN WOOL, HE ADDED.

-30- 2303

#90177h0056 06/26/1990 ~Chinese News Agency

BEIJING (JUNE 26) XINHUA - LIU GUANGZHI, HEAD OF A CHINESE DIPLOMATIC AND MILITARY EXPERTS GROUP, AND G.V. KIREEV, HEAD OF THE SOVIET GROUP HELD TALKS WITHIN A SMALL SCOPE IN BEIJING FROM JUNE 15 TO 26.

MAJOR GENERAL TAO ZHI, DEPUTY HEAD OF THE CHINESE GROUP, AND MAJOR GENERAL M. KRIVITSKY, DEPUTY HEAD OF THE SOVIET GROUP, ALSO ATTENDED THE TALKS.

BOTH SIDES EXCHANGED VIEWS ON THE IMPLEMENTATION OF THE AGREEMENT REACHED BETWEEN THE CHINESE AND SOVIET GOVERNMENTS ON THE PRINCIPLES GUIDING THE REDUCTION OF MILITARY FORCES ON THE SINO-SOVIET BORDER AND THE STRENGTHENING OF MUTUAL TRUST IN THE MILITARY FIELD.

THEY AGREED TO HAVE ANOTHER TALKS IN MOSCOW THIS AUTUMN. CHINESE VICE-FOREIGN MINISTER TIAN ZENGPEI AND OFFICIALS FROM THE MINISTRY OF NATIONAL DEFENSE MET THE SOVIET EXPERTS ON SEPARATE OCCASIONS.

BEIJING (JUNE 26) XINHUA - THE CAPITAL HOTEL IN DOWNTOWN BEIJING WILL PROVIDE FAMOUS SICHUAN FOOD FOR VISITORS TO THE FORTHCOMING ASIAN GAMES.

THE FOOD WILL BE JOINTLY PREPARED BY CHEFS OF THE HOTEL AND SPECIALISTS INVITED FROM THE CHONGQING GUESTHOUSE OF SICHUAN PROVINCE IN SOUTHHWEST CHINA.

ZHU MING, DEPUTY GENERAL MANAGER OF THE CAPITAL HOTEL, ANNOUNCED HERE TODAY THAT THE FOOD WILL BE SERVED DURING THE SICHUAN FOOD FESTIVAL, WHICH BEGINS JULY 1 UNTIL OCTOBER 31.

ZHU SAID THAT DURING THAT PERIOD HIS HOTEL WILL PROVIDE ALL SORTS OF FAMOUS SICHUAN DISHES, INCLUDING CASSEROLES, MOUNTAIN CITY HOTPOT FEAST, UNIQUE LOCAL DAINTY AND DELICACIES OF SICHUAN PROVINCE - THE LAND OF ABUNDANCE.

SICHUAN CUISINE, ONE OF THE FOUR PRINCIPAL FAMILIES OF CHINESE CULINARY ART, HAS ITS STRONG LOCAL FEATURES. ITS COOKING DRAWS ON A WIDE RANGE OF SELECTED RAW MATERIALS AND INGREDIENTS AND ITS ASSORTMENT OF DISHES CAN MEET THE MOST DEMANDING TASTES.

THE FOOD IS PARTICULARLY RENOWNED FOR ITS PEPPERY HOT TASTE OF MANY AROMATIC AND SPICY SAUCES, HE ADDED.

ZHU IS A SICHUAN FOOD SPECIALIST HIMSELF WITH MANY YEARS OF EXPERIENCE. HE SAID THAT IT WILL BE A GOOD CHANCE FOR BOTH CHINESE AND FOREIGN VISITORS TO ENJOY SUCH "AN UNFORGETTABLE FOOD."

DHAKA (JUNE 26) XINHUA - BANGLADESH PRESIDENT H.M. ERSHAD TODAY APPROVED THE RATIFICATION OF THE THREE UNITED NATIONS CONVENTIONS FOR CONTROL OF PRODUCTION, TRADE AND USE OF NARCOTIC DRUGS IN OBSERVANCE OF THE INTERNATIONAL DAY AGAINST DRUG ABUSE, WHICH FALLS ON JUNE 26.

ANTI-DRUG OFFICIALS SAID THAT THE DECISION TO BECOME A PARTY TO THE THREE CONVENTIONS IS CONSISTENT WITH THE PRESENT ROLE PLAYED BY BANGLADESH AGAINST THE USE OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES IN DIFFERENT

FORMS.

IT WILL ALSO ENABLE THE COUNTRY TO SHOW ITS SOLIDARITY WITH THE U.N. ANTI-DRUG EFFORTS PARTICULARLY IN VIEW OF THE GENERAL ASSEMBLY'S DECISION TO OBSERVE 1991-2000 A.D. AS U.N. DECADE AGAINST DRUG, THEY ADDED.

IN A MESSAGE TO MARK THE "INTERNATIONAL DAY AGAINST DRUG ABUSE AND ILLICIT TRAFFICKING" TODAY, ERSHAD STRESSED THE NEED FOR WELL-COORDINATED EFFORTS OF THE ENTIRE GLOBAL COMMUNITY FOR EFFECTIVELY CONTAINING DRUG ABUSE AND ILLICIT TRAFFICKING.

AN ANTI-DRUG RALLY PARTICIPATED BY FILM STARS AND PROMINENT FOOTBALLERS WAS HELD IN THE CAPITAL THIS MORNING. THE RALLY WAS SPONSORED BY THE MUKTI LAWRENCE FOUNDATION, AN ORGANIZATION FOR PREVENTION, TREATMENT AND REHABILITATION OF DRUG ADDICTS.

IN SUPPORT OF THE INTERNATIONAL EFFORTS AGAINST DRUG ABUSE AND ILLICIT TRAFFICKING, THE BANGLADESH GOVERNMENT ENACTED A TOUGH LAW IN 1988 TO PROVIDE DRUG TRAFFICKERS AND PRODUCERS WITH MAXIMUM PUNISHMENT OF DEATH SENTENCE.

ACCORDING TO PRESS REPORTS HERE, THERE ARE ABOUT 20,000 DRUG ADDICTS IN THIS SOUTH ASIAN NATION.

#90177h0061 06/26/1990 ~Chinese News Agency

CANBERRA (JUNE 26) XINHUA - AUSTRALIA'S TRADE DEVELOPMENT COUNCIL (TDC) URGED TODAY THE GOVERNMENT TO EXPAND COMMERCIAL RELATIONS WITH THAILAND.

FAILURE TO MAKE SERIOUS ASSESSMENTS OF THE THAI MARKET IS DENYING OPPORTUNITIES TO AUSTRALIAN BUSINESS IN ONE OF ASIA'S FASTEST GROWING ECONOMIES, SAID THE COUNCIL IN A REPORT.

IN RELEASING THE REPORT HERE TODAY, MINISTER FOR TRADE NEGOTIATIONS NEAL BLEWETT SAID IT MADE A VALUABLE CONTRIBUTION TO THE FURTHER DEVELOPMENT OF AUSTRALIA'S BILATERAL COMMERCIAL RELATIONS WITH THAILAND.

AUSTRALIA'S PERFORMANCE IN THE THAI MARKET HAS BEEN IMPRESSIVE, WITH EXPORT GROWTH RATE OF 43 PERCENT IN 1988 AND 45 PERCENT IN 1989.

"HOWEVER, MUCH OF THIS GROWTH HAS OCCURRED IN A NARROW RANGE OF TRADITIONAL COMMODITY EXPORTS AND OUR SHARE OF THAI IMPORTS IS SIGNIFICANTLY LOWER THAN OUR SHARE OF IMPORTS IN INDONESIA, MALAYSIA AND THE PHILIPPINES," BLEWETT SAID.

THE TDC REPORT IDENTIFIED OPPORTUNITIES FOR AUSTRALIA IN THE FIELDS OF RAW AND PROCESSED MATERIALS, INFRASTRUCTURE DEVELOPMENT, AGRI-BUSINESS,

SERVICES, AND CONSUMER GOODS.

THE REPORT STATED THAT AUSTRALIAN FIRMS HAVE NOT POSITIONED THEMSELVES TO TAKE ADVANTAGE OF THE FAST GROWTH IN THAILAND AND HAVE TENDED NOT TO GIVE SERIOUS THOUGHT TO THIS MARKET BEYOND ITS ATTRACTIVENESS AS A TOURIST DESTINATION.

THE TDC CALLED FOR HIGH LEVEL BUSINESS REPRESENTATION FROM AUSTRALIA AT THE NEXT ANNUAL CONFERENCE OF THE AUSTRALIA-THAILAND BUSINESS COUNCIL TO BE HELD IN THAILAND IN AUGUST THIS YEAR.

BEIJING (JUNE 26) XINHUA - FOREIGN MINISTER QIAN QICHEN, IN A WRITTEN REPORT TO THE ONGOING 14TH SESSION OF THE NATIONAL PEOPLE'S CONGRESS STANDING COMMITTEE, SAID THAT PREMIER LI PENG'S APRIL VISIT TO THE SOVIET UNION GAVE "A NEW IMPETUS TO THE DEVELOPMENT OF SINO-SOVIET RELATIONS ON THE BASIS OF THE FIVE PRINCIPLES OF PEACEFUL CO-EXISTENCE."

DURING THE VISIT, HE SAID, PREMIER LI PENG AND TOP SOVIET LEADERS ALL EXPRESSED SATISFACTION WITH THE DEVELOPMENT OF SINO-SOVIET RELATIONS OVER THE PAST YEAR AND EXPRESSED A DESIRE FOR THE STABLE, HEALTHY DEVELOPMENT OF BILATERAL RELATIONS THROUGH PRACTICAL EXCHANGES AND COOPERATION.

THE FOREIGN MINISTER, WHILE ADMITTING THAT THE TWO SIDES HELD DIFFERENT VIEWS ON SOME ISSUES, SAID THAT THE DIFFERENCES WOULD NOT INFLUENCE THE DEVELOPMENT OF NORMAL RELATIONS BETWEEN THE TWO COUNTRIES.

HE SAID THE TWO SIDES SIGNED SIX DOCUMENTS TO PROMOTE BILATERAL RELATIONS AND FOUR OTHERS ON ECONOMIC AND SCIENTIFIC COOPERATION.

HE SAID THE TWO SIDES AGREED TO FURTHER COOPERATE IN SUCH FIELDS AS ENERGY TRANSPORTATION, AGRICULTURE, FORESTRY, CONSUMER GOODS AND JOINT DEVELOPMENT OF SPECIAL ECONOMIC ZONES.

PREMIER LI PENG'S VISIT ALSO PROMOTED THE SIGNING OF AN AGREEMENT ON THE

GUIDING PRINCIPLES FOR MUTUAL DISARMAMENT ALONG SINO-SOVIET BORDERS, WHICH QIAN CALLED BENEFICIAL, NOT ONLY TO BILATERAL RELATIONS AND MUTUAL TRUST, BUT ALSO TO STRENGTHENING PEACE AND SECURITY IN THE FAR EAST AND THE ASIAN AND PACIFIC REGION.

BEIJING (JUNE 26) XINHUA - CHINESE PREMIER LI PENG MET HERE TODAY WITH HASNI OULD DIDI, MAURITANIAN MINISTER OF FOREIGN AFFAIRS AND COOPERATION, AND HIS PARTY.

LI SAID THAT UNDER THE CURRENT INTERNATIONAL SITUATION, THE THIRD WORLD COUNTRIES SHOULD STRENGTHEN THEIR UNITY, DEVELOP THEIR NATIONAL ECONOMIES AND OPPOSE VARIOUS KINDS OF UNJUST TREATMENT IMPOSED ON THEM BY POWER POLITICS. HE ADDED THAT THEY SHOULD ALSO MAKE UNREMITTING EFFORTS TO SET UP A NEW WORLD POLITICAL AND ECONOMIC ORDER ON THE BASIS OF THE FIVE PRINCIPLES OF PEACEFUL COEXISTENCE.

THOUGH CHINA IS ALSO A DEVELOPING COUNTRY WITH LIMITED ECONOMIC STRENGTH, LI SAID, IT IS STILL WILLING TO DO ITS BEST TO SUPPORT AND HELP THE AFRICAN COUNTRIES TO SHOW THE CHINESE PEOPLE'S FRIENDSHIP TOWARD THE AFRICAN PEOPLE.

BRIEFING THE GUESTS ON CHINA'S INTERNAL SITUATION, LI SAID CHINA'S PRESENT POLITICAL AND ECONOMIC SITUATION IS GOOD AND THE CHINESE PEOPLE ARE STRIVING TO FULFILL THE FOUR MODERNIZATIONS. HE ADDED THAT THE CHINESE PEOPLE WILL NEVER GIVE UP THE SOCIALIST ROAD.

DIDI THANKED CHINA FOR ITS DISINTERESTED SUPPORT OF HIS COUNTRY AND SPOKE HIGHLY OF THE SMOOTH BILATERAL ECONOMIC COOPERATION.

DIDI ALSO EXPRESSED DELIGHT OVER CHINA'S ACHIEVEMENTS.

HANOI (JUNE 26) XINHUA - VIETNAM'S FOREST AREA HAS BEEN RAPIDLY REDUCED BY SOME FOUR FIFTHS OVER THE PAST 40 YEARS, ACCORDING TO THE LATEST ISSUE OF THE ENGLISH-LANGUAGE "VIETNAM WEEKLY".

THE WEEKLY SAID WAR DESTRUCTION AND IRRESPONSIBLE EXPLOITATION IN THE PERIOD UNDER SURVEY HAD WIPED OUT ABOUT SEVEN MILLION HECTARES OF FOREST, LEAVING ONLY 22 PERCENT OF THE ORIGINAL FOREST COVER IN THE COUNTRY INTACT. THE AREA OF WASTELAND AND BARREN HILLS NOW TOTALS NEARLY 14 MILLION HECTARES.

IN THE NORTHWESTERN REGION, THE WEEKLY SAID, THERE USED TO BE ABOUT 2.6 MILLION HECTARES OF FOREST. NOW ONLY 0.26 MILLION HECTARES ARE LEFT. AROUND THE HYDRO-ELECTRIC POWER PLANT AT HOA BINH, FOREST COVER HAS BEEN REDUCED TO 9 PERCENT OF WHAT IT WAS IN THE OLD DAYS. OF THE WIND-BREAKS ALONG THE CENTRAL COAST, ONLY 22 PERCENT STILL STAND.

NO LESS ALARMING IS THE POLLUTION OF THE ENVIRONMENT, THE WEEKLY STRESSED. DURING A RECENT SURVEY, 72.6 PERCENT OF THE SAMPLES ON POISONOUS GAS, 75.4 PERCENT OF THE SAMPLES ON DUST, AND 76.2 PERCENT OF THE SAMPLES ON NOISE WERE FOUND EXCEEDING PERMISSIBLE RATES.

#90177h0073 06/26/1990 ~Chinese News Agency

BEIJING (JUNE 26) XINHUA - THE SIXTH MEETING OF THE 21ST CENTURY COMMITTEE FOR SINO-JAPANESE FRIENDSHIP OPENED TODAY AT THE CAPITAL HOTEL IN DOWNTOWN BEIJING WITH A SPEECH BY CHINESE PREMIER LI PENG AND A LETTER OF CONGRATULATIONS FROM JAPANESE PRIME MINISTER TOSHIKI KAIFU.

AFTER EXTENDING WARM CONGRATULATIONS ON BEHALF OF THE CHINESE GOVERNMENT AND PEOPLE, LI SAID THE CHINESE GOVERNMENT HAS ALWAYS ATTACHED GREAT IMPORTANCE TO SINO-JAPANESE RELATIONS, AND HAS MADE UNREMITTING EFFORTS TO SAFEGUARD AND EXPAND THE LONG, STABLE, NEIGHBORLY RELATIONS BETWEEN CHINA AND JAPAN.

SINO-JAPANESE FRIENDSHIP IS THE COMMON DESIRE OF THE TWO PEOPLES, HE SAID. IT IS IN KEEPING WITH THE FUNDAMENTAL INTERESTS OF THE TWO COUNTRIES AND IS CONDUCIVE TO THE MAINTENANCE OF PEACE AND STABILITY IN THE ASIAN-PACIFIC REGION AND THE WORLD AS A WHOLE. THIS HAS BEEN FULLY PROVED

BY THE 18 YEARS OF PRACTICE SINCE THE NORMALIZATION OF SINO-JAPANESE DIPLOMATIC RELATIONS, HE ADDED.

LI MENTIONED RECENT DIFFICULTIES IN BILATERAL RELATIONS, SAYING HE HOPES THE SITUATION WILL END AS SOON AS POSSIBLE.

LI SAID HE BELIEVES THAT AS LONG AS THE TWO SIDES STRICTLY ABIDE BY THE VARIOUS PRINCIPLES GUIDING THE BILATERAL RELATIONS, TREASURE THE EXISTING FRIENDSHIP AND PROPERLY SOLVE THE PROBLEMS, SINO-JAPANESE FRIENDSHIP WILL MOVE SMOOTHLY INTO THE 21ST CENTURY.

IN CONCLUSION, LI SAID HE HOPES THE COMMITTEE MEMBERS WILL CONSULT EARNESTLY AND FRANKLY, MAKE POSITIVE SUGGESTIONS AND GIVE FULL PLAY TO THE COMMITTEE'S ROLE OF SERVING AS A CONSULTATIVE BODY FOR THE CHINESE AND JAPANESE GOVERNMENTS.

IN A MESSAGE READ AT THE OPENING CEREMONY BY JAPANESE AMBASSADOR HIROSHI HASHIMOTO, KAIFU SAID STRENGTHENING AND DEVELOPING NEIGHBORLY AND FRIENDLY RELATIONS BETWEEN JAPAN AND CHINA IS THE CONSISTENT DESIRE OF THE TWO PEOPLES.

IN VIEW OF THE SCALE AND WEIGHT OF SINO-JAPANESE RELATIONS, THE MAINTENANCE OF THE TWO COUNTRIES' LONG AND STABLE RELATIONS IS INDISPENSABLE TO PEACE AND PROSPERITY IN THE ASIAN-PACIFIC REGION AND THE WORLD AS A WHOLE, HE ADDED.

AS THE PRIME MINISTER OF JAPAN, HE SAID, HE IS WILLING TO DO HIS BEST TO ENABLE BILATERAL RELATIONS TO MAKE STILL GREATER PROGRESS IN THE 21ST CENTURY.

KAIFU SPOKE HIGHLY OF THE IMPORTANT ROLE OF THE FRIENDSHIP COMMITTEE IN EXPANDING BILATERAL RELATIONS.

HE SAID THE CURRENT MEETING HAS MORE ARDUOUS TASKS THAN BEFORE, ADDING THAT HE EXPECTS COMMITTEE MEMBERS OF BOTH SIDES TO EXCHANGE VIEWS IN A FRANK AND CONSTRUCTIVE WAY SO AS TO INCREASE MUTUAL UNDERSTANDING AND ACHIEVE GREATER RESULTS.

CHINESE FOREIGN MINISTER QIAN QICHEN WAS ALSO PRESENT AT THE OPENING CEREMONY.

ZHANG XIANGSHAN, CHINA'S CHIEF REPRESENTATIVE ON THE COMMITTEE, AND TADAO ISHIKAWA, JAPAN'S CHIEF REPRESENTATIVE ON THE COMMITTEE, MADE KEY-NOTE SPEECHES AT THE MEETING, WHICH WILL RUN THROUGH JUNE 29.

CANBERRA (JUNE 26) XINHUA - THE AUSTRALIAN FEDERAL POLICE (AFP) AND THE AUSTRALIAN CUSTOMS SERVICE TODAY REITERATED THEIR TOTAL COMMITMENT TO ADDRESSING THE ILLEGAL IMPORTATION OF PROHIBITED DRUGS INTO AUSTRALIA.

IN MARKING THE UNITED NATIONS' INTERNATIONAL DAY AGAINST DRUG ABUSE AND DRUG TRAFFICKING TODAY, BOTH OF THE TWO LAW ENFORCEMENT AGENCIES SAID 1989-90 HAD CONCLUDED A POSITIVE YEAR OF COOPERATION TO DETECT ILLICIT DRUGS AND APPREHEND AND PROSECUTE THOSE PEOPLE RESPONSIBLE.

THE AGENCIES SAID IN A JOINT STATEMENT THAT "WE ARE ACUTELY AWARE OF THE EFFECTS OF DRUG ABUSE AND THE CONTRIBUTION DRUG TRAFFICKING MAKES TO CRIMINAL ACTIVITY IN AUSTRALIA."

WHILE DETECTIONS OVERALL INCREASED IN THE PAST YEAR, THE AGENCIES HAVE BEEN PARTICULARLY SUCCESSFUL IN THE QUANTITY AND NUMBER OF SEIZURES OF COCAINE. A TOTAL OF 66.9 KILOGRAMS HAVE BEEN FOUND, AN INCREASE OF MORE THAN 200 PERCENT OVER THE TOTAL OF 19.2 KILOGRAMS IN 1988-89.

THE STATEMENT SAID "THE AFP AND CUSTOMS ARE CONSTANTLY WORKING TOGETHER TO FIND MORE EFFECTIVE WAYS OF PREVENTING AND INTERDICTING DRUG TRAFFICKING."

IN ADDITION TO COOPERATION AT THE OPERATIONAL LEVEL, THE AGENCIES HAVE DECIDED TO UNDERTAKE JOINT STRATEGIC INTELLIGENCE ASSESSMENTS ON A NUMBER OF PROJECTS WITH RELEVANCE TO DRUG INTERDICTION.

LIAISON OFFICERS HAD BEEN APPOINTED TO EACH AGENCY, AND OVERSEAS LIAISON CHANNELS CONTINUED TO BE DEVELOPED FOR THE BENEFIT OF ALL AUSTRALIAN ANTI-DRUG ENFORCEMENT AGENCIES, THE STATEMENT ADDED.

#90177h0076 06/26/1990 ~Chinese News Agency

LONDON (JUNE 26) XINHUA - BRITAIN STARTS TODAY INSTALLING ITS TRAFFICMASTER SYSTEM UNDER A LICENCE FROM THE TRANSPORT DEPARTMENT.

THE INSTALLATION OF THE SYSTEM IS A NATIONWIDE SCHEME TO FIT INFRA-RED SENSORS TO MOTORWAY BRIDGES TO FEED MESSAGES ABOUT TRAFFIC JAMS TO SCREENS ON VEHICLE DASHBOARDS.

A TOTAL OF 230 SENSORS WILL BE FITTED IN THE NEXT 6 WEEKS ON MOTORWAYS WITHIN A 35-MILE RADIUS OF LONDON.

THE SYSTEM WORKS BY THE SENSORS RADIOING INFORMATION TO A CONTROL ROOM AT LUTON, WHICH TRANSMITS DATA BY RADIO TO A UNIT ON THE VEHICLE DASHBOARD.

THE DRIVER INSTRUCTS THE UNIT TO DISPLAY ON A SMALL SCREEN A MAP OF WHICHEVER SECTION OF THE MOTORWAY HE IS USING. THE SCREEN RESPONDS TO THE CONTROL CENTRE DATA BY SHOWING PROBLEM SPOTS ON THE MAP AS A FLASHING BLOB

ZOOMING IN TO GIVE A CLOSE-UP, INDICATING JUNCTIONS AFFECTED, TRAFFIC SPEED AND DIRECTION OF THE BACKLOG.

SENSORS WILL BE SPACED ABOUT 2 MILES APART. A 10-MILE TRAFFIC JAM WOULD THEREFORE LIGHT 5 FLASHING SPOTS ON THE SCREEN.

IT IS PLANNED TO EXPAND THE NETWORK IN 1992 TO COVER A LARGE PART OF THE MIDLANDS, THE WEST COUNTRY AND SOUTH WALES AS WELL AS THE SOUTHEAST. IN 1993, IT WILL BE EXTENDED TO THE NORTH AND SCOTLAND.

LIKE A MOBILE TELEPHONE, THE UNIT CAN BE TAKEN FROM THE CAR AND USED TO OBTAIN INFORMATION WHILE AT HOME OR IN THE OFFICE.

#90177h0077 06/26/1990 ~Chinese News Agency

NICOSIA (JUNE 26) XINHUA - THE CYPRUS GOVERNMENT HAS CALLED ON THE TURKISH CYPRIOT SIDE TO ACCEPT ALL THE PROVISIONS OF U.N. SECURITY COUNCIL RESOLUTION 649 OF MARCH 1990 ON THE CYPRUS ISSUE.

IN A WRITTEN STATEMENT ISSUED ON MONDAY EVENING, GOVERNMENT SPOKESMAN AKIS FANTIS SAID TURKISH CYPRIOT LEADER RAUF DENKTASH'S OFFER TO RESUME INTERCOMMUNAL TALKS BASED ON RESOLUTION 649 IS NOT ENOUGH UNLESS HE "CLEARLY DROPS DEMANDS TO SELF-DETERMINATION AND CEASES TO REFER TO TWO PEOPLES."

DENKTASH SAID LAST FRIDAY THAT THE TURKISH CYPRIOT SIDE IS READY TO PROMOTE THE NEGOTIATION PROCESS IN COOPERATION WITH U.N. SECRETARY-GENERAL JAVIER PEREZ DE CUELLAR TO WORK OUT A COMPREHENSIVE SETTLEMENT OF THE CYPRUS PROBLEM."

THE TURKISH CYPRIOT SIDE WELCOMES SECURITY COUNCIL RESOLUTION 649 ON THE CYPRUS PROBLEM AND CONSIDERS THE RESOLUTION AS A "STEP IN THE RIGHT DIRECTION" TOWARD FUTURE NEGOTIATIONS, SAID DENKTASH.

COMMENTING ON DENKTASH'S STATEMENT, THE SPOKESMAN SAID DENKTASH "SUGGESTS IN A MANNER WHICH LACKS ANY SERIOUSNESS" THAT THE DIAGNOSIS OF AN IMPASSE IN THE NEGOTIATING PROCESS IS "CONTRARY TO THE U.N. SECRETARY-GENERAL'S ASSESSMENT OF THE SITUATION'."

FANTIS SAID DENKTASH'S STATEMENT WAS "AN ATTEMPT TO CREATE CONFUSION BY GIVING THE IMPRESSION THAT THE TURKISH CYPRIOT SIDE ACCEPTED SOMETHING WHICH IN REALITY IT DID NOT."

HE CHALLENGED THE TURKISH CYPRIOT LEADER BY ASKING HIM IF HE IS READY TO RENOUNCE THE CLAIM OF "SELF-DETERMINATION" FOR THE TURKISH CYPRIOT COMMUNITY AND IF HE IS READY TO AFFIRM THAT IN CYPRUS THERE ARE NOT TWO PEOPLES, BUT ONE PEOPLE COMPOSED OF TWO COMMUNITIES.

DENKTASH HAS REPEATEDLY SAID THAT THE CONDITION FOR A FEDERATION WITH THE GREEK CYPRIOTS RESTS ON THE RECOGNITION OF THE TURKISH CYPRIOT'S RIGHT TO SELF-DETERMINATION.

THE GREEK CYPRIOTS DEMAND THE WITHDRAWAL OF TURKISH TROOPS FROM THE ISLAND INTERNATIONAL GUARANTEES AND THE RIGHTS OF ALL CITIZENS TO LIVE, WORK AND BUY PROPERTIES ANYWHERE ON THE ISLAND.

FOUR ROUNDS OF U.N.-SPONSORED TALKS BETWEEN THE TWO SIDES SINCE 1988 HAD FAILED TO MAKE ANY PROGRESS IN SOLVING THE CYPRUS ISSUE.

CYPRUS HAS BEEN DIVIDED SINCE 1974 WHEN THE TURKISH TROOPS LANDED ON THE ISLAND IN THE WAKE OF A COUP ENGINEERED BY ATHENS. SINCE THEN THE ISLAND HAS BEEN DIVIDED INTO THE TURKISH CYPRIOT NORTH AND GREEK CYPRIOT SOUTH. IN 1983 THE TURKISH CYPRIOTS PROCLAIMED A BREAKAWAY "TURKISH REPUBLIC OF NORTHERN CYPRUS" WHICH IS RECOGNIZED ONLY BY TURKEY.

BEIJING (JUNE 26) XINHUA - CHINA'S FIRST PRODUCTION LINE FOR MANUFACTURING SPHERICAL ALUMINUM POWDER--A NEW SOLID ROCKET PROPELLANT--HAS BEEN COMPLETED, RESEARCHERS FROM THE CHINESE ACADEMY OF SCIENCES (CAS) ANNOUNCED HERE TODAY.

THE METAL FUEL CAN ALSO BE USED IN THE BOOSTER ROCKETS OF SPACE SHUTTLES, ACCORDING TO THE RESEARCHERS.

IN RECENT YEARS, LABORATORIES IN THE UNITED STATES AND THE SOVIET UNION HAVE BEEN STRIVING TO BUILD A SAFE, RELIABLE AND EASILY-OPERATED SPHERICAL ALUMINIUM POWDER PRODUCTION LINE.

THE PRODUCTION LINE, THE FIRST OF ITS KIND IN THE WORLD, WAS DESIGNED AND CONSTRUCTED BY A RESEARCH GROUP OF THE ACADEMY'S INSTITUTE OF MECHANICS. THE LINE CAN PRODUCE 30 TO 60 KILOGRAMS OF THE METAL POWDER PER HOUR, RESEARCHERS SAID.

THE POWDER IS PRODUCED USING ULTRASONIC ATOMIZING. SCIENTISTS BELIEVE THE ATOMIZER DEVELOPED BY THE CHINESE RESEARCHERS IS SUPERIOR TO THAT MADE ABROAD.

ALUMINUM POWDER ALSO HAS WIDE APPLICATIONS IN CIVILIAN INDUSTRIES. IT CAN BE USED AS A COATING FOR CARS, HOME APPLIANCES, BUILDINGS AND HIGH-QUALITY PRINTING MATERIALS, THE RESEARCHERS SAID.

THE POWDER CAN ALSO BE USED AS A RAW MATERIAL FOR CEMENT AND FIREWORKS.

HANOI (JUNE 26) XINHUA - HO CHI MINH CITY, THE LARGEST CITY IN VIETNAM, IS BESET WITH GRAVE PROBLEMS IN EDUCATION, MEDICAL AND HEALTH SERVICES, AND EMPLOYMENT, ACCORDING TO A REPORT CARRIED IN THE VIETNAMESE OFFICIAL DAILY "NHAN DAN".

THE REPORT SAID THAT MORE AND MORE TEACHERS IN HO CHI MINH CITY HAVE QUIT THEIR JOBS, AND NOT A FEW OF THEM WERE FINE VETERAN TEACHERS. DURING THE 1989-1990 SCHOOL YEAR, OVER 6,000 TEACHERS LEFT THE EDUCATIONAL OCCUPATION THREE TIMES THE NUMBER IN THE PREVIOUS YEAR. MEANWHILE, THE NUMBER OF STUDENTS IN ORDINARY SCHOOLS HAS BEEN REDUCED BY 35,000, ABOUT 10 PERCENT OF THE TOTAL. THERE ARE MORE THAN 300,000 ILLITERATES, ABOUT 9 TO 10 PERCENT OF THE CITY POPULATION.

THE REPORT SAID THAT THE CITY'S FINANCIAL ALLOCATION FOR MEDICAL AND HEALTH SERVICES CAN ONLY MEET 60 PERCENT OF THE NEEDS.

THE REPORT OF "NHAN DAN" SAID THAT UNEMPLOYMENT HAS BEEN INCREASING. THERE ARE ABOUT 230,000 UNEMPLOYED IN THE CITY; AMONG THEM 80 TO 90 PERCENT ARE YOUTHS.

#90177h0084 06/26/1990 ~Chinese News Agency

CAIRO (JUNE 26) XINHUA - EGYPTIAN ARCHAEOLOGISTS HAVE RECENTLY DISCOVERED FOUR CEMETERIES FOR PYRAMID BUILDERS OR FOREMEN IN THE ANCIENT PHARAONIC KINGDOM (2815-2050 B.C.), EGYPTIAN NEWSPAPER "AL-AHRAM" REPORTED TODAY.

THE DISCOVERY OF THIS GROUP OF CEMETERIES BROUGHT TO SIX THE TOTAL NUMBER OF SUCH CEMETERIES DISCOVERED IN EGYPT SO FAR.

THESE FOUR CEMETERIES, "AL-AHRAM" EXPLAINED, WERE FOUND SOUTHEAST OF THE STATUE OF SPHINX AMID A GROUP OF 10-METER-HIGH SAND DUNES NOT FAR AWAY FROM THE THREE MAIN PYRAMIDS IN GIZA, NEAR CAIRO.

THE PAPER SAID THAT THE CEMETERIES, BUILT WITH EARTHEN BRICKS, ARE VAULT-SHAPED, A UNIQUE ARCHITECTURAL STYLE PECULIAR TO THE ANCIENT PHARAONIC KINGDOM.

ONE OF THESE CEMETERIES IS 14 METERS LONG AND 10 METERS WIDE, AND CONTAINS REMNANTS OF POTTERY VESSELS AND A SKELETON AND A SKULL THAT WERE BELIEVED TO BELONG TO THE CEMETERY OWNER.

THE NAME OF THE CEMETERY OWNER "PTAH KU" WAS INSCRIBED ON ONE OF THE CEMETERY DOORS, THE PAPER ADDED.

THE IMPORTANCE OF THIS FIND LIES IN THE FACT THAT IT WILL SHED LIGHT ON THE SOCIAL STATUS OF EGYPTIAN FOREMEN, AN IMPORTANT SOCIAL CLASS IN THE ANCIENT PHARAONIC KINGDOM.

#90177h0093 06/26/1990 ~Chinese News Agency

BEIJING (JUNE 26) XINHUA - A FORUM TO OBSERVE THE INTERNATIONAL DAY AGAINST DRUG ABUSE AND ILLICIT TRAFFICKING WAS HELD HERE TODAY.

ABOUT 50 HIGH-RANKING OFFICIALS FROM MINISTRY OF PUBLIC HEALTH, MINISTRY OF FOREIGN AFFAIRS, MINISTRY OF PUBLIC SECURITY AND THE GENERAL ADMINISTRATION OF CUSTOMS AS WELL AS DR. B. P. KEAN, REPRESENTATIVE OF WORLD HEALTH ORGANIZATION IN CHINA, AND MR. DAVID E. LOCKWOOD, DEPUTY RESIDENT REPRESENTATIVE OF THE UNITED NATIONS DEVELOPMENT PROGRAM IN CHINA WERE AMONG THOSE ATTENDING THE FORUM, SPONSORED BY CHINA'S MINISTRY OF PUBLIC HEALTH.

VICE-MINISTER OF PUBLIC HEALTH GU YINGQI SAID AT THE FORUM THAT THE DESIGNATION OF JUNE 26 EVERY YEAR AS INTERNATIONAL DAY AGAINST DRUG ABUSE AND ILLICIT TRAFFICKING BY THE 42ND SESSION OF THE UNITED NATIONS IN 1987 INDICATES THE CONCERN OF THE INTERNATIONAL COMMUNITY ABOUT THE WORSENING SITUATION OF DRUG ABUSE AND ILLICIT TRAFFICKING IN THE WORLD.

GU SAID SOME INTERNATIONAL TRAFFICKING ORGANIZATIONS TRANSPORT NARCOTICS VIA CERTAIN CHINESE PROVINCES, CAUSING PROBLEMS FOR CHINA. IN 1989, CHINESE CUSTOMS SEIZED 289 KILOGRAMS OF OPIUM AND 559 KILOGRAMS OF HEROIN, AND 146 HEROIN ADDICTS IN YUNNAN PROVINCE HAVE BEEN FOUND TO BE HIV CARRIERS, HE SAID.

GU SAID CHINA HAS TAKEN A SERIES OF STEPS TO FIGHT DRUG ABUSE AND TRAFFICKING. THEY INCLUDE STRENGTHENING THE LEGAL CODE, IMPROVING TECHNICAL EQUIPMENT, AND CONDUCTING RESEARCH ON DRUG DEPENDENCE.

YU LEI, VICE-MINISTER OF PUBLIC SECURITY, SAID THAT IN 1989, CHINA'S PUBLIC SECURITY ORGANS FERRETED OUT 547 CASES OF NARCOTICS TRAFFICKING, ARRESTED 749 TRAFFICKERS, AND SEIZED 269 KILOGRAMS OF OPIUM AND 488 KILOGRAMS OF HEROIN.

WU NAIWEN, DEPUTY DIRECTOR OF THE GENERAL ADMINISTRATION OF CUSDTOMS, SAID THAT, IN ORDER TO CURB THE MORE COVERT AND CLEVER ACTIVITIES OF THE INTERNATIONAL TRAFFICKING ORGANIZATIONS, CHINESE CUSTOMS IS TAKING MEASURES TO IMPROVE ITS EQUIPMENT, ADDING PERSONNEL AND CONDUCTING TRAINING.

#90177h0094 06/26/1990 ~Chinese News Agency

SHENZHEN (JUNE 26) XINHUA - AN AUTOMATIC TRAFFIC CONTROL SYSTEM FOR 257 KM OF HIGHWAY IN SHENZHEN'S SHANGBU AND LUOHU DISTRICTS WENT INTO USE HERE TODAY.

THE SYSTEM'S MAIN EQUIPMENT AND SOFTWARE WERE IMPORTED FROM JAPAN AND THE UNITED STATES.

THE SYSTEM, BUILT AT A COST OF 15 MILLION YUAN, WILL REDUCE THE IDLING TIME OF VEHICLES BY 20 PERCENT, AND INCREASE SPEEDS BY 15 PERCENT.

AUTHORITIES ESTIMATE THE SYSTEM WILL SAVE FIVE MILLION YUAN EACH YEAR BY REDUCING FUEL CONSUMPTION AND IMPROVING TRANSPORT EFFICIENCY.

ABOUT 80,000 VEHICLES OPERATE EVERY DAY IN URBAN AREAS OF SHENZHEN, AN AVERAGE OF 270 VEHICLES PER KM.

-30- 805

#90177h0098 06/26/1990 ~Chinese News Agency

NICOSIA (JUNE 26) XINHUA - THE CYPRUS GOVERNMENT HAS PROTESTED TO THE UNITED STATES FOR A PRESIDENTIAL REPORT TO CONGRESS WITH REGARD TO REELECTION OF TURKISH CYPRIOT LEADER RAUF DENKTASH AS "PRESIDENT" OF THE TURKISH CYPRIOT-CONTROLLED SIDE.

GOVERNMENT SPOKESMAN AKIS FANTIS TOLD REPORTERS TODAY THAT CYPRUS HAS MADE "STRONG DIPLOMATIC DEMARCHES" TO WASHINGTON ABOUT THE CONTENT OF THE BUSH REPORT AND "SPECIFICALLY WITH REGARD TO CERTAIN TERMS AND EVALUATIONS IT CONTAINED."

PRESIDENT GEORGE VASSILIOU MONDAY EVENING SUMMONED JOHN NIX, CHARGE D'AFFAIRES OF THE U.S. EMBASSY IN NICOSIA, TO PROTEST AGAINST U.S. PRESIDENT GEORGE BUSH'S REMARKS IN HIS BI-MONTHLY REPORT TO CONGRESS "ON PROGRESS TOWARD A NEGOTIATED SETTLEMENT OF THE CYPRUS QUESTION."

THE SPOKESMAN SAID THE CYPRUS GOVERNMENT DISAGREES WITH BUSH'S EVALUATION REGARDING THE "SO CALLED ELECTIONS IN THE OCCUPIED PART OF THE ISLAND."

IN HIS REPORT COVERING THE PERIOD FROM MID-MARCH TO MID-MAY 1990, BUSH SAID DENKTASH'S APRIL REELECTION AS THE "PRESIDENT" OF THE BREAKAWAY "TURKISH CYPRIOT REPUBLIC" "RECONFIRMED THE POSITION OF LEADERSHIP AND AUTHORITY LONG HELD BY DENKTASH AND HIS TURKISH CYPRIOT NATIONAL UNITY PARTY."

BUSH ALSO QUOTED "OBSERVERS" AS HAVING INTERPRETED THESE "ELECTORAL SUCCESSES" AS "ENDORSEMENTS BY THE TURKISH CYPRIOT COMMUNITY OF EXISTING TURKISH CYPRIOT POLICIES AND INTERCOMMUNAL NEGOTIATING POSITIONS."

BUSH'S REPORT ALSO MENTIONED SEIZURE OF FIVE GREEK CYPRIOT YOUTHS BY THE TURKISH CYPRIOT POLICE. ON THIS ISSUE, FANTIS SAID THOSE WHO DRAFTED THE BUSH REPORT HAD IGNORED A BASIC FACT: "IT IS THE TURKISH OCCUPATION ARMY THAT HINDERS THE FREEDOM OF MOVEMENT AND THE PRACTICE OF HUMAN RIGHTS."

THE FIVE GREEK CYPRIOT YOUTHS WERE DETAINED BY TURKISH CYPRIOT POLICE BETWEEN FEBRUARY 16 AND MARCH 9 FOR "ILLEGAL" ENTRY AND PULLING DOWN A TURKISH FLAG. THREE OF THEM WERE RELEASED LATER.

IN HIS REPORT, BUSH SAID "A HANDFUL OF YOUNG GREEK CYPRIOTS MANAGED TO DART THROUGH THE LINES AND COMMIT SMALL ACTS OF VANDALISM, LEADING TO FURTHER ARRESTS AND JAILINGS BY TURKISH CYPRIOT AUTHORITIES."

-30- 2308

#90177h0100 06/26/1990 ~Chinese News Agency

NICOSIA (JUNE 26) XINHUA - CYPRIOT MARINE POLICE TODAY SEIZED 250 KILOGRAMS OF HASHISH DROPPED IN THE SEA OFF LIMASSOL COAST BY A TURKISH FISHING BOAT, ACCORDING TO A REPORT FROM THE SOUTHERN CITY BY THE CYPRUS NEWS AGENCY.

THE BOAT'S CREW, SEVEN TURKISH NATIONALS AND ONE EYPTIAN WERE ARRESTED BY THE POLICE, SAID THE REPORT.

THEY WILL APPEAR BEFORE THE LOCAL DISTRICT COURT WEDNESDAY FOR A REMAND.

THE POLICE LAUNCH "APHRODITE" INTERCEPTED THE BOAT NEAR THE LEGENDARY BIRTHPLACE OF APHRODITE, THE GODDESS OF LOVE IN GREEK MYTHOLOGY, WHICH ATTRACTS THOUSANDS OF TOURISTS EVERY YEAR.

THE TURKISH FISHING BOAT WAS TOWED TO OLD LIMASSOL PORT. THE NARCOTICS WILL BE KEPT BY POLICE UNTIL THE END OF THE TRIAL. THEY WILL BE BURNT LATER IN LINE WITH REGULATIONS.

THE SEIZURE OF HASHISH COINCIDED TODAY WITH THE INTERNATIONAL DAY AGAINST THE ILLEGAL USE AND TRAFFICKING OF NARCOTICS.

IN A MESSAGE ON THE OCCASION, CYPRIOT PRESIDENT GEORGE VASSILIOU SAID THE GEOGRAPHICAL POSITION OF CYPRUS ALLURES INTERNATIONAL DRUG TRAFFICKERS TO USE THE ISLAND AS A TRANSIT PLACE.

FOR THIS REASON, HE ADDED, CYPRUS IS PLAYING A STRENGTHENED ROLE IN THE FIGHT AGAINST INTERNATIONAL DRUG TRAFFICKING.

TOKYO, JUNE 26 KYODO -VICTOR CO. OF JAPAN (JVC) SAID TUESDAY IT HAS BEGUN TO ASSEMBLE HOME-USE COLOR TELEVISION SETS IN VIETNAM USING PARTS IMPORTED

FROM JAPAN.

JVC SENT ENGINEERS TO HELP VIETNAMESE EMPLOYEES PRODUCE 14 TO 20-INCH TV SETS AT 10 FACTORIES IN HANOI AND HO CHI MINH CITY, A COMPANY SPOKESMAN SAID.

THE COMPANY HAD BEEN EXPORTING TV SETS TO VIETNAM FOR FOUR YEARS, BUT STARTED KNOCKDOWN PRODUCTION TO AVOID THE 40 PERCENT IMPORT TAX BY VIETNAM ON COMPLETED PRODUCTS.

#90177k0025 06/26/1990 ~Japanese News Agency

EXHANGES FELL FOR THE FIRST TIME IN SEVEN WEEKS LAST WEEK, THE TOKYO STOCK EXCHANGE (TSE) SAID TUESDAY.

THE MARGIN TRADING BALANCE FOR THE TOKYO, OSAKA, AND NAGOYA EXCHANGES FELL 50.7 BILLION YEN TO 8,978.9 BILLION YEN.

ANALYSTS ATTRIBUTED THE DECLINE TO THE EXPIRATION OF THE MARGIN AGREEMENTS FOR STOCKS BOUGHT LAST DECEMBER AS THE MARKET SURGED TO NEW HIGHS.

OVER THE SAME PERIOD THE BALANCE OF STOCKS SOLD SHORT FELL 32 BILLION YEN TO 590.7 BILLION YEN.

#90177k0068 06/26/1990 ~Japanese News Agency

TOKYO (JUNE 26) KYODO - JAPAN'S ANNUAL SPRING WAGE NEGOTIATIONS HAVE ENDED WITHOUT ANY MAJOR STRIKES, AND HAVE RESULTED IN AVERAGE WAGE HIKES OF 5.95 PERCENT.

OFFICIALS AT JAPAN'S LARGEST LABOR ORGANIZATION, RENGO, SAID MOST OF THE 1,378 UNIONS UNDER ITS CONTROL ACCEPTED MONTHLY WAGE HIKES AVERAGING 14,629 YEN OR 5.95 PERCENT, UP FROM 12,249 YEN OR 5.13 PERCENT LAST YEAR.

THE EIGHT MILLION STRONG RENGO DECLARED AN END TO ITS FIRST ANNUAL WAGE TALKS SINCE PUBLIC- AND PRIVATE-SECTOR LABOR UNIONS MERGED INTO THE GROUP, RENGO, LAST NOVEMBER.

THE LABOR ORGANIZATION ALSO PRESSED FOR SHORTER WORKING HOURS AND 1,319 OF THE UNIONS UNDER RENGO'S CONTROL GOT THEM.

"THIS YEAR'S RATE OF WAGE HIKES IS THE HIGHEST IN THE PAST SEVERAL YEARS BUT THE REAL DISPOSABLE INCOME OF WORKERS HAS DROPPED DUE TO RISING CONSUMER PRICES," RENGO GENERAL SECRETARY SEIGO YAMADA SAID,

HE SAID HE IS PESSIMISTIC WORKERS WILL ACHIEVE THEIR TARGET OF 1,800 ANNUAL WORKING HOURS BY 1994.

"THE BUSINESS BOOM HAS TRIGGERED LONGER WORKING HOURS, MAKING IT DIFFICULT TO REACH THE TARGET," HE SAID.

IN THE FISCAL YEAR TO MARCH 31, JAPAN'S ANNUAL AVERAGE WORKING HOURS TOTALED 2,076 HOURS, ABOUT 400 HOURS LONGER THAN THOSE IN THE UNITED STATES AND WESTERN EUROPE, LABOR MINISTRY OFFICIALS SAID.

TAKUJI YAMAHARA, A SENIOR OFFICIAL OF THE JAPAN FEDERATION OF EMPLOYERS ASSOCIATIONS (NIKKEIREN), SAID THE 5.95 PERCENT WAGE HIKE WAS HIGHER THAN EXPECTED BY NIKKEIREN. HE SAID THE WAGE HIKE COULD HAVE AN ADVERSE IMPACT ON THE JAPANESE ECONOMY LATER THIS YEAR.

TAKASHI SAKUMA, A SENIOR DOMESTIC ECONOMIC ANALYST AT THE ECONOMIC PLANNING AGENCY, DISAGREED WITH THE NIKKEIREN ASSESSMENT, SAYING THE 5.95 PERCENT WAGE HIKE "IS NOT A FACTOR FOR SPIRALING INFLATION."

HE SAID THIS LEVEL OF WAGE INCREASE WILL BOOST CONSUMER SPENDING, WHICH IN TURN COULD LEAD TO STEADY ECONOMIC GROWTH.

"IT IS A MATTER OF IMPORTANCE FOR LABOR UNIONS AND MANAGEMENT TO CONSIDER THE DISTRIBUTION OF WAGE HIKES AND SHORTER WORKING HOURS IN FUTURE WAGE NEGOTIATIONS TO IMPROVE THE STANDARD OF LIVING FOR THE WORKERS," SAKUMA SAID.

RENGO OFFICIALS SAID THEY WILL SEEK WAGE HIKES, SHORTER WORKING HOURS, REDUCED, TAXES AND BETTER HOUSING POLICIES IN NEXT YEAR'S ROUND OF WAGE TALKS.

#90177k0070 06/26/1990 ~Japanese News Agency

SAN FRANCISCO (JUNE 26) KYODO - FORMER FOREIGN MINISTER SHINTARO ABE SAID MONDAY A FREEZE ON JAPAN'S FINANCIAL AID TO CHINA IS LIKELY TO BE LIFTED AFTER THE JULY 9-11 SUMMIT MEETING OF SEVEN INDUSTRIALIZED NATIONS IN HOUSTON.

ABE TOLD REPORTERS ACCOMPANYING HIM ON HIS NINE-DAY VISIT TO THE UNITED STATES THAT THE U.S. GOVERNMENT REACTED FAVORABLY TO THE DEPARTURE FROM CHINA OF NOTED DISSIDENT FANG LIZHI, WHO HAS BEEN HOLED UP AT THE U.S. EMBASSY IN BEIJING AFTER THE JUNE 1989 CRACKDOWN ON THE PRO-DEMOCRACY DEMONSTRATORS.

ABE, A FORMER SECRETARY GENERAL OF THE RULING LIBERAL DEMOCRATIC PARTY AND HEAD OF THE PARTY'S SECOND-LARGEST FACTION, PREDICTED THAT JAPAN'S PLAN TO RESUME LOANS TO CHINA WILL BE ENDORSED BY OTHER SUMMIT MEMBER COUNTRIES, SAYING FANG'S RELEASE HAS MARKED A STEP FORWARD IN THE OPINION OF WESTERN COUNTRIES.

JAPAN PROMISED TO EXTEND 810 BILLION YEN IN LOANS TO CHINA FOR 1990-95 BUT HAS FROZEN IMPLEMENTING THE LOAN PACKAGE SINCE THE MILITARY CRACKDOWN ON THE PRO-DEMOCRACY MOVEMENT.

ABE, WHO REPRESENTED JAPAN IN WASHINGTON LAST WEEK AT EVENTS MARKING THE 30TH ANNIVERSARY OF THE REVISED JAPAN-U.S. SECURITY TREATY, LEFT SAN FRANCISCO THE SAME DAY FOR HOME.

WHILE IN WASHINGTON, ABE MET PRESIDENT GEORGE BUSH AND OTHER U.S. LEADERS.

#90177k0076 06/26/1990 ~Japanese News Agency

TOKYO (JUNE 26) KYODO - DAI-ICHI MUTUAL LIFE INSURANCE CO. SAID TUESDAY IT WILL ACQUIRE A 9.6 PERCENT EQUITY SHARE IN LINCOLN NATIONAL CO., SEVENTH-LARGEST LIFE INSURANCE FIRM IN THE UNITED STATES.

BY NEXT YEAR, DAI-ICHI PLANS TO BUY SOME 22.7 BILLION YEN WORTH OF PREFERRED STOCK, WHICH CAN BE CHANGED TO COMMON STOCK, WITHIN THIS YEAR. OFFICIALS SAID THE FIRM PLANS TO BUY ANOTHER 24 BILLION YEN WORTH NEXT YEAR.

UNDER THE TERMS OF THE PURCHASE, DAI-ICHI ALSO WILL SEND FOUR WORKERS PER YEAR TO LINCOLN NATIONAL FOR TRAINING.

LINCOLN NATIONAL, BASED IN FORT WAYNE, INDIANA, HAS INSURANCE SUBSIDIARIES IN BOTH THE LIFE AND NONLIFE INSURANCE FIELDS, AND DAI-ICHI HOPES TO LEARN MORE ABOUT EACH, THE OFFICIALS SAID.

#90177k0078 06/26/1990 ~Japanese News Agency

TOKYO (JUNE 26) KYODO - FOUR JAPANESE BANKS HAVE OFFERED TO PROVIDE LOANS TOTALING 1.2 BILLION DOLLARS TO RJR NABISCO HOLDINGS TO HELP REALIZE THE LARGEST TAKEOVER BID EVER INVOLVING THE FOOD AND CIGARETTE CONGLOMERATE, BANKING SOURCES SAID TUESDAY.

LONG-TERM CREDIT BANK OF JAPAN AND FUJI BANK ARE WILLING TO LOAN 350 MILLION DOLLARS EACH, WITH THE OTHER TWO UNIDENTIFIED BANKS OFFERING TO PROVIDE 250 MILLION DOLLARS EACH.

THE MOVE IS IN RESPONSE TO A REQUEST BY RJR NABISCO FOR ABOUT 20 WESTERN AND JAPANESE BANKS TO LOAN IT 2.25 BILLION DOLLARS IN ORDER TO HELP IT REPURCHASE ITS JUNK BONDS ISSUED TO FINANCE A FRIENDLY 20.3 BILLION DOLLAR LEVERAGED BUYOUT BY A PRIVATE INVESTMENT FIRM, KOHLBERG, KRAVIS, ROBERTS INC. IN EARLY 1988.

ELEVEN BANKS, INCLUDING THE FOUR JAPANESE INSTITUTIONS, HAVE EXPRESSED THEIR INTENTION OF LENDING A TOTAL OF 3.45 BILLION DOLLARS SO FAR, THE SOURCES SAID.

EVENTUALLY JAPANESE BANKS WILL ACCOUNT FOR NEARLY HALF OF THE LOANS TO RJR NABISCO AS OTHER JAPANESE BANKS, SUCH AS SUMITOMO BANK, ARE ALSO WILLING TO BE LENDERS, THEY ADDED.

-30- 1265

#90177k0083 06/26/1990 ~Japanese News Agency

TOKYO (JUNE 26) KYODO - A COSMETICS RETAILER FILED A COMPLAINT TUESDAY WITH THE FAIR TRADE COMMISSION (FTC) AGAINST SHISEIDO CO., A LEADING COSMETICS MANUFACTURER, AND ITS SALES AFFILIATE FOR ALLEGED UNFAIR TRADING PRACTICES BANNED BY THE ANTIMONOPOLY LAW.

OFFICIALS AT FUJIKI-HONTEN, A TOKYO-BASED COSMETIC RETAILER, SAID THE COMPANY HAS BEEN SELLING COSMETICS MANUFACTURED BY SHISEIDO OVER THE COUNTER SINCE 1962 BASED ON A CONTRACT WITH SHISEIDO'S SALES SUBSIDIARY IN TOKYO. THE RETAILER ALSO COLLECTED ORDERS FROM FEMALE EMPLOYEES OF BIG COMPANIES AND DELIVERED COSMETICS TO THEM AT 20 PERCENT DISCOUNT.

FUJIKI-HONTEN PRESIDENT KEN FUJISAWA SAID SHISEIDO AND ITS SALES ARM REPEATEDLY URGED HIS COMPANY TO ABANDON THE ORDER-DELIVER PRACTICE, SAYING SUCH SALES CONTRAVENED THE CONTRACT. ON APRIL 25, THEY INFORMED FUJIKI-HONTEN OF THE CANCELLATION OF THE SALES CONTRACT AND HAVE REFUSED TO SUPPLY COSMETICS SINCE THEN.

FUJISAWA SAID HIS COMPANY HAD ASKED THE FTC FOR A THOROUGH INVESTIGATION OF THE CASE, SAYING SHISEIDO UNILATERALLY CANCELED THE CONTRACT IN ORDER TO CIRCUMVENT ITS DISCOUNT SALES.

A SPOKESMAN FOR SHISEIDO'S SALES SUBSIDIARY DENIED FUJISAWA'S CHARGES, SAYING THAT THE CONTRACT WAS DISCONTINUED FOR THE SAKE OF MAINTAINING QUALITY CONTROL THROUGH COUNTER SALES.

#90177k0118 06/26/1990 ~Japanese News Agency

TOKYO (JUNE 27) KYODO - THE BANK OF JAPAN PUMPED LIQUIDITY INTO THE SHORT-TERM MONEY MARKET WEDNESDAY THROUGH THE PURCHASE OF 1 TRILLION YEN WORTH OF TWO-WEEK DISCOUNT BILLS.

THE BILLS WERE BOUGHT AT A RATE VIRTUALLY UNCHANGED FROM THE PREVAILING MARKET RATE OF 7.4375 PERCENT.

THE CENTRAL BANK ALSO IS CALLING IN 330 BILLION YEN OF ITS LOANS TO BANKS, BROKERS SAID.

''THE OPERATION COMES AS NO SURPRISE SINCE THE AMOUNT LEFT OVER FROM THE TWO OPERATIONS IS JUST ABOUT EQUAL TO THE FUND SHORTFALL EXPECTED FOR THE DAY,'' SAID A BROKER WITH A MAJOR COMMERCIAL BANK.

#90177m0001 06/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The Nikkei average was up 447.58, to 31,571.77, on light volume. ... The FT 100 is up 13.2 this morning, to 2411.7. ... Profit taking has dropped the DAX index 3.05 points to 1893.16. ... MELVILLE CORP., which owns the successful CVS drugstore chain, buys PEOPLES DRUG STORES INC. for $330 million. ... DAYTON HUDSON announces that about 850 employees working in MARSHALL FIELD's central organization will be dismissed in the next six months. ... MOTOROLA INC. and HITACHI LTD. agreed to settle disputes over patents for computer chips. ... AMERICAN INTERNATIONAL is buying LEASE FINANCE, and aircraft-leasing firm, for cash and stock valued at about $1.3 billion. ... RJR NABISCO has budgeted $250 million in fees for its debt refinancing, suggesting that patching up leveraged firms may be the financial community's next big moneymaker.

WHAT'S AHEAD:

BRUCE NOBLES, president of the TRUMP SHUTTLE, will speak before the AEROCLUB OF WASHINGTON about the future of the airline at 12:30 p.m. reauthorization of the Strategic Petroleum Reserve at 1:30. ... Beginning with today's issue "MCS Market Comments" takes on a slightly new look, becoming "Market Consensus".

FROM THE BULLS:

"My prediction for the year was that the Dow would not break below 2500," says HEIKO THIEME, a consultant strategist at DEUTSCHE BANK. "At this very moment, the market is marking time," says Thieme, who is sticking by previous predictions of a high of 3200, and who thinks we have already seen the lows for the year. Despite the recent woes, he says, "I'll stick with that scenario." (CNBC "Market Wrap-Up", 6/25)

FROM THE BEARS:

"Bears, man your battle stations." The stock market is in position for a major downfall, according to PETER GRANDICH of the "Grandich Letter."

"Investors should lower their equity position to the 'bear- est' minimum," says Grandich who advises no more than 10% in stocks. He sees a 500-1000 point decline in the Dow and says, "The herd on Wall Street has managed to ignore the alarm clock." (CNBC "World Business", 6/26) 1

"The plain fact is that the stock market is entering the danger zone. It isn't time yet to sell every share you own, but the outlook for stock market profits over the next five years or so is getting dimmer," says MICHAEL SIVY, senior editor at "Money" magazine. He says that yields on long-term Treasuries could drop to 8.25% by early next year. "But there's a catch: rates are declining primarily because the economy is slowing. The stock market is rising on weakness, not on strength." Sivy suggests cutting the equity portion of your portfolio back to 25% while keeping 25% in cash and "increasing high-quality bonds to as much as half of your portfolio." He adds, "If it's driving you crazy to watch the stock market surge while you have money sitting in a bank, go buy a nice high-quality

electric utility with a yield of 6% to 7%. It should do about as well as top-grade bonds." ("Money", July 1990)

STOCK MARKET:

"After the huge [stock market] run-up in May and early June, I think we're in a corrective phase and that it's almost over," says MICHAEL METZ of OPPENHEIMER & COMPANY. "The most recent news - interest rates, fear of reacceleration in the economy and heightened inflationary pressures - has all been bad. And yet the market has shown a tenacious ability to hold most of its gains. The market still acts as if most investors are still out and are looking for an entry rather than a exit point. When [the Dow] gets around 2800, I think you'll see more aggressive demand." This might happen in a few days according to Metz. (NYT, 6/26)

RAO CHALASANI, market strategist at PRESCOTT BALL & TURBEN, believes the stock market's fall from grace has much to do with overbuilt expectations about corporate earnings and interest rates. "The market was expecting too much, and now it's paying a price," he says. GENE JAY SEAGLE, director of technical research at GRUNTAL & CO., adds, "It'll take a while for this market to shake off fears generated by the drop on Friday. Investors are just staying out of the way." Seagle says the market's weakness was compounded by a breakdown in the Dow below a key support level at 2850. He believes the next crucial level is 2820. (Reuters, 6/25)

"Interest rates will be the key to the market over the short term," says technical analyst GAIL DUDACK at S.G. WARBURG. She notes that the Dow utility index slumped more than a full point yesterday - a bad omen for the long-term interest rate picture. ("The Washington Post", 6/26)

"If Friday was an aberration, the market should have rebounded today,"

says FRANK GRETZ, market analyst at SHIELDS & CO. "It's disturbing that it didn't." ("USA Today", 6/26)

"The decline in stocks did not reflect so much what happened Friday, but instead weakness in bonds and the increased feeling among investors that the Federal Reserve will not ease," says STEVEN EINHORN of GOLDMAN, SACHS & CO. Einhorn believes that "notwithstanding all the pyrotechnics so far " stocks will be outperformed by cash and bonds. He is quick to point out that while he sees no crash, with the current fundamentals for the stock market, "we just don't see where the upside will come from." ("Investor's Daily", 6/26)

"There are still some concerns looking out over the months ahead on what rates will be doing," says RON DORAN of C.L. KING & ASSOCIATES. "It looks like rates are going to remain stable for the time being, which has prompted a wait-and-see attitude as far as the [stock] market is concerned. And, as we start to see a slew of earnings that could be lower than expectations, there's no real rush to be in the market. Investors are taking a low profile and reacting to individual companies based on how they report." (UPI, 6/25)

ERIC MILLER, chief investment officer at DONALDSON, LUFKIN & JENRETTE, says that while the Dow will be strong short-term, he has "concerns later on in the summer." He thinks that the economy will be increasingly "worrisome," and that "doubts may creep in when we see some of the July and August data." Despite his perception of weakness, Miller thinks that the Fed will not ease its monetary policy. (CNBC "Market Wrap-Up", 6/25)

E.E. "BUZZY" GEDULD of HERZOG, HEINE, GEDULD says the OTC market had "a very sleepy day, almost like a holiday." Geduld says the market is likely to remain that way until after the Fourth of July. (WSJ, 6/26)

"So far the earnings have not been as disappointing as the worst pessimists had thought," says JIM AWAD of BMI CAPITAL. "While certain stocks will get hurt if they report disappointing earnings, I don't think it will be widespread." He believes that the worst is over, and that stocks will advance from here. (FNN "Marketwrap", 6/25)

The early advance "was artificial just as Friday's trading between 3:00 and 4:00 was artificial," says GEORGE PIRRONE, senior trader at DREYFUS CORP. "The bond market turned sour and consequently, stocks turned sour." (Reuters, 6/25)

STOCK TIPS:

Analysts believe that some health-care stocks can prosper even in the face of cost cutting. ANDREW OFFIT, portfolio manager of the FIDELITY SELECT HEALTH CARE FUND, likes ST. JUDE MEDICAL which produces an inexpensive

mechanical heart valve. "The valve has little competition, and its patent is good till 1998." Analyst HERMAN SAFTLAS at STANDARD & POOR'S recommends WESTMARK INTERNATIONAL because of its ultrasound equipment which provides a service that is cheaper than alternative techniques and is acceptable to Medicare and private insurers. As for a more diversified company Saftlas recommends ELI LILLY. Aside from pharmaceuticals, he says "the company is strong in cardiovascular devices such as the one that stabilizes irregular heartbeats." He also believes that Lilly's antidepressant, Prozac, is promising. "Pharmacists are filling an estimated 700,000 prescriptions a month and that could easily double." ("Money", July 1990)

The curtain hasn't even risen on the last act of the bull market, according to STEPHEN LEEB. The editor of the "Indicator Digest" believes low inflation and higher productivity will lead to at least six months of rising stock prices. His favorites: HARCOURT BRACE, INTERIM SYSTEMS and FORD SCORES. (CNBC "World Business", 6/26)

DONALDSON, LUFKIN & JENRETTE chief investment officer ERIC MILLER says investors should "keep some powder dry," and look for secondary growth stocks which have yet to take part in the rally. He mentions INTERGRAPH, AUGAT and DSC COMMUNICATIONS. Miller also recommends APPLE. (CNBC "Market Wrap-Up", 6/25)

PAINEWEBBER's ELI LUSTGARTEN was bearish on CATERPILLAR stock even before the announcement yesterday the second-quarter earnings would be less than half its first-quarter earnings. He says, "This will be a dead stock for a while." PRUDENTIAL-BACHE SECURITIES' STEVEN COLBERT agrees. Colbert issued a short-term sell recommendation on Caterpillar yesterday after having issued a hold recommendation last week. Colbert says, "The losses are far worse than expected. I don't think earnings will get better before the second quarter of 1991." ("USA Today", 6/26)

-30- 9709

#90177m0002 06/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The market probably had anticipated problems and was positioned for a big move, and when that didn't happen it led to position squaring," says IAN SPENCE of MANUFACTURERS HANOVER TRUST, concerning the dollar's mixed closing yesterday. (Reuters, 6/25)

In currency trading, the dollar gained against the mark, primarily because

traders were dumping marks to buy Swiss francs, attracted by higher Swiss interest rates, says ERIC LEHTIS, senior dealer at MITSUI TAIYO KOBE BANK. Against the yen, the dollar rose because Japanese investors are worried about signs of rising inflation in Japan, not because they want to own dollars long-term, according to Mr. Lehtis. Buying dollars is an easy to get out of the yen on the way to other currencies. (WSJ, 6/26)

"One thing we all like to do is buy something cheap," says CNN's DAN DORFMAN, regarding gold's declining value. Dorfman notes the market consensus is that gold has found some support at current levels, but he says gold may fall as low as $300 an ounce or another 15% depreciation due largely to Soviet selling. Therefore, investors should be cautious and wait to purchase gold until the price falls even more. (CNN "Moneyline", 6/25)

DAVID JONES, chief economist for AUBREY G. LANSTON notes the Treasury sold a record $47 billion of short-term issues this week, which rattled the bond market. "There is just an unending supply or even an avalanche of new issues coming into the market. Obviously the Treasury needs to borrow not only to finance a still very large deficit, but it also faces a huge financial need in connection with the savings and loan bailout." (CNN "Moneyline", 6/25)

The bond market may be in trouble according to CHARLES LIEBERMAN of MANUFACTURERS HANOVER SECURITIES. "The auctions are coming up and there's not much buying. The net result is prices go lower." (WSJ, 6/26)

"At current yield levels, I think the two-year sale will be a fairly strong auction," says JOE LIRO, a vice president and money market economist at S.G. WARBURG SECURITIES INC. "But the reality of all the new supply staring us in the face gave the [bond] market a very sour tone." (NYT, 6/26)

The bond market was "weighted down by this week's [volume] of new 1 Treasury bills," says MOODY'S senior economist JOHN LONSKI. He thinks the bond market may be ready to move, explaining, "Signs of a weaker economy, as well as a steep plunge by equities, could reignite investor interest in bonds." He thinks stocks are too pricey for many investors. ("Investor's Daily", 6/26)

"We're very optimistic right now about the near-term direction of the high-yield market," says KINGMANN PENNIMAN, of McCARTHY, CRISANTI & MAFFEI a bond rating agency. "Don't be surprised to see a brand new junk-bond issue come to market in the near future - something not thought possible only a few months back." ("USA Today", 6/26)

THE ECONOMY:

"Housing has been the weakest part of the economy for the past 2 1/2 years and its even more depressed this year," says MERRILL LYNCH analyst JONATHAN GOLDFARB. Sales of existing homes in May fell 1.2% from April, creating the biggest backlog of homes for sale in more than two years, according to the NATIONAL ASSOCIATION OF REALTORS. ("USA Today", 6/26)

"What we're seeing is a car market that is basically lackluster," says MARYANN KELLER of FURMAN SELZ. "And there's no reason, in the short run, to expect any significant improvement." (FNN "Marketwrap", 6/25)

"Growth has perked up, but it won't get much better," says "Money" magazine senior editor MICHAEL SIVY. He predicts that inflation will be a maximum of 5%, but will probably be lower. "While a recession doesn't seem likely in the next three months, it remains a distinct possibility over the next three years," says Sivy. ("Money", July 1990)

IN WASHINGTON:

"We think the 1990s will not be as laissez-faire as the 1980s, but hopefully not as interventionist as the 1970s," says KENNETH CHILTON, associate director at the CENTER FOR THE STUDY OF AMERICAN BUSINESS at WASHINGTON UNIVERSITY. PRESIDENT BUSH's proposed budget for 1991 has spending at regulatory agencies rising 9% to a record $12.25 billion. "It's clear the Bush administration does not have the evangelistic fervor of getting the government off the backs of people that the Reagan administration exhibited in its first term," says Chilton. ("Investor's Daily", 6/26)

#90177p0003 06/26/1990 ~PR Newswire

SCOTTSDALE, AZ (JUNE 26) PR NEWSWIRE - Photocomm Inc. (NASDAQ: PCOM) today announced the acquisition of Solar SignAge Inc., a manufacturer of solar electric products located near Houston.

Solar SignAge was incorporated in 1986 to commercialize solar electric lighting technology for architectural signs. The company has expanded its product line to include a complete line of solar electric generators trademarked SUN PAK. SUN PAK generators are used in a wide range of industrial power applications such as offshore oil platforms, remote pipeline monitoring and telecommunications. Solar SignAge also manufactures a complete line of solar lighting systems, custom electrical equipment enclosures and battery enclosures.

As a wholly owned subsidiary of Photocomm Inc., Solar SignAge will now be known as Photocomm Inc. of Texas. Former President Kevin L. Conlin has been appointed general manager, and Robert Spotts, formerly sales manager, will be responsible for both sales and operations.

Photocomm Inc. is a publicly-owned, solar electric systems manufacturing and marketing company with corporate headquarters in Scottsdale. The company's common stock is listed on the NASDAQ stock quotation system under the symbol PCOM.

CONTACT: Thomas LaVoy, CFO of Photocomm Inc., 602-948-8003.

#90177p0004 06/26/1990 ~PR Newswire

MINNEAPOLIS (JUNE 26) PR NEWSWIRE - Washington Scientific Industries, Inc. (NASDAQ: WSCI) today reported a net loss on increased sales for its 12 week third quarter ended June 3, 1990.

The net loss for the quarter was $346,000, or 15 cents per share, compared with net earnings of $409,000, or 17 cents per share, from continuing operations for the comparable 12 week period of fiscal 1989. Sales for the 12 weeks ended June 3, 1990, were $16,236,000, compared with $14,366,000 from continuing operations for the comparable period in fiscal 1989, an increase of 13 percent. Including discontinued operations, net earnings for the third quarter of 1989 were $442,000, or 19 cents per share.

Net earnings for the 40 weeks ended June 3, 1990 were $914,000, or 38 cents per share, compared with $1,717,000, or 72 cents per share, from continuing operations for the comparable 40-week period of fiscal 1989. Net sales for the period were $58,319,000, compared with $44,630,000 from continuing operations, an increase of 31 percent. Including discontinued operations, net earnings for the first 40 weeks of 1989 were $1,976,000, or 83 cents per share.

Clifford W. Dinsmore, president and CEO, said that the company continues to experience margin pressures. "We are still being affected by start-up costs on several of our new machining projects and by lower gross margins in our plastic injection molding business. While we expect fourth quarter results to be somewhat better, it is likely that we will have an overall net loss for our second half.

"However, these anticipated results are not indicative of where Washington Scientific is headed. We are in the midst of planned strategic changes in the mix of our business which will make us a stronger and more consistent company in the longer term. Our computer peripherals business is as strong as ever, and we have a number of new customers in other industries. We expect to make progress over the next several months toward resolving the margin pressures we have experienced as the result of these changes."

Washington Scientific Industries is a Minnesota-based provider of high precision manufacturing services for a variety of industries. The

company's Contract Manufacturing Division produces machined metal components and subassemblies in three plants located in Minnesota and California, and its Advanced Custom Molders subsidiary produces thermoplastic injection molded components in two Texas plants.

BROOKLYN, NY (JUNE 26) PR NEWSWIRE - Private Brands, Inc. (NASDAQ: PRIB), a leading designer and manufacturer of knitted contemporary leisure wear and, through its Bali subsidiary, of gold jewelry products, today reported a decline in sales and earnings in the three and six months periods ended March 31, 1990, from comparable periods ended March 31, 1989. Ronnie Gross, chairman of the board, attributed the decline to sluggish sales of apparel and to a decline in the price of gold during the quarter which impacted on jewelry inventory valuations.

PRIVATE BRANDS, INC.

Periods ended	Three months		Six months	
March 31:	1990	1989	1990	1989
Total sales	$7,605,612	$10,147,407	$17,833,371	$19,954,539

OAK BROOK, IL (JUNE 26) PR NEWSWIRE - GTE Airfone today announced a new program that will provide special prices for frequent users of its Airfone(R) In-flight Telephone Service. The GTE Airfone Business Calling Card program will allow passengers to pay a service fee, and then pay reduced per-minute rates for the calls they make on the Airfone service.

Participants of the program may choose from two subscription options for domestic calls. One is to pay a per-minute fee of 30 cents and a charge of $399 for each six months of service. The second option is to pay a per-minute fee of 50 cents and $50 per month. Current rates are $2 per minute, plus a $2 set-up fee per call for domestic calls, including Alaska Hawaii, Puerto Rico, the Virgin Islands and Canada.

"The GTE Airfone Business Calling Card program is an attractive alternative for our customers who use the Airfone service frequently," said Mark Schneider, GTE Airfone's vice president of marketing. "The rate structure offers customers a subscription package that is consistent with other services provided in the mobile-communications industry. It allows our customers a more economical way of using the Airfone service as part of their normal business routine."

Airline passengers may subscribe to the program by completing an application provided by GTE Airfone. Consumers may obtain an application

from a customer service representative by dialing "0" while in-flight, or 800-AIRFONE while on the ground. Once an application has been approved, GTE Airfone will provide the participant with a GTE Airfone Business Calling Card.

Travelers on aircraft equipped with the GTE Airfone service may make calls while flying over the United States, including Alaska, Hawaii, the southern regions of Canada and within 200 miles of the U.S. coastline. Calls also can be placed while an aircraft is on the ground at most major airports.

The new rates apply to calls placed to anywhere in the United States (including Alaska, Hawaii, Puerto Rico and the Virgin Islands) or Canada. Fractions of minutes are billed at the full-minute rate on all calls, and certain taxes may apply. International calls remain at $4 per minute, plus a $4 set-up fee per call.

WASHINGTON (JUNE 26) PR NEWSWIRE - Joseph L. Aston Sr., chairman, chief executive officer and president, United National Bank of Washington (UNB), a $90 million subsidiary of the Washington-based bank holding company James Madison Limited (JML) (AMEX: JML) (NASDAQ-NMS: JMLC), announced the bank's participation as a Certified Bank Lender (CBL) for the National Minority Supplier Development Council (NMSDC)/Business Consortium Fund, Inc. (BCF).

Established in 1964, UNB is the first bank in the Washington metropolitan area to participate in the program. The Business Consortium Fund, Inc. is comprised of a group of corporations nationwide committed to promoting

business development to minority enterprises. The consortium provides minority businesses with greater access to obtaining lines of credit as well as marketing and selling their products in the corporate arena.

Commenting on this new business agreement, Aston stated: "We are pleased to be the first bank in the Washington area to participate as a Certified Bank Lender in providing BCF funds to minority businesses. We look forward to working with and developing longstanding relationships with area minority businesses."

In addition to United National Bank of Washington, the James Madison Limited financial family of banking subsidiaries includes: Madison National Bank located in Washington, Madison National Bank of Virginia, and Madison Bank of Maryland. Non-bank subsidiaries include: James Madison Mortgage Company, James Madison Financial Corporation, and JML Systems Management, Inc. James Madison Limited's Class A common stock is listed on the American Stock Exchange, and its common stock is traded on the NASDAQ National Market System.

WASHINGTON (JUNE 26) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today announced an applicable dividend rate of 5 percent per annum on its adjustable rate cumulative preferred stock, Series A, for the period July 1, 1990, through Sept. 30, 1990.

At Mar. 31, 1990, Sallie Mae had 4,277,650 shares of such stock outstanding. Dividends are computed quarterly, at 4.5 percentage points below the highest yield on certain long-term and short-term U.S. Treasury obligations, but they are never less than 5 percent nor more than 14 percent per annum.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

LOS ANGELES (JUNE 26) PR NEWSWIRE - Davidson & Associates Inc., Jostens Learning Corporation, and Longman Publishing Group announced today that they are working together to develop and market a new interactive, multimedia English as a Second Language (ESL) program.

Chief Executive Officer Bob Davidson indicated that Davidson & Associates is taking the lead development role. Using licensed materials from the popular Longman Photo Dictionary, Davidson will create two versions of the program: a videodisc accompanied by computer software and a CD-ROM version. Jostens Learning will assist in creation of the networked CD-ROM version and will be evaluating the possibility of developing a more extensive ESL curriculum to surround this product.

Dr. Jan Davidson, president of Davidson & Associates, said the program utilizes the "natural approach to language acquisition" and is designed to be used in a variety of instructional settings from the classroom to the computer lab.

Each version will include an interactive version of the Photo Dictionary, editing, accountability, speech input, a wide variety of computer activities and a comprehensive set of correlated print and audio materials.

Longman President Bruce Butterfield noted that sales of the Longman Photo Dictionary have been increasing, reflecting the rapidly growing demand for quality ESL solutions. "Creating an interactive version of our Photo Dictionary is a natural," said Butterfield. "The videodisc and CD-ROM technology will really bring the book to life."

Joe Potts, vice president of Product Development for Jostens Learning, indicated that the program is part of their long-range goal of providing solutions for special student populations. "The language models, speech input capability, graphics and interactivity of this technology will allow us to reach the ESL student as never before. This new system will be a 'must have' for ESL instruction."

Jostens Learning will use its extensive national sales force and network of consultants to sell all versions of the product. Davidson will also market several versions of the program through selected dealers. Longman will be working with Davidson to develop international markets. Initial versions of the product are targeted for release by year end.

#90177p0026 06/26/1990 ~PR Newswire

COLUMBUS, OH (JUNE 26) PR NEWSWIRE - J. David Huber, chief operating officer of The Winsbury Co., Columbus, today announced that Winsbury has filed a Registration Statement for the American Plus Funds, a family of mutual funds for which BancOklahoma Trust Co., Tulsa, and AMR Investment Services Inc., Dallas, will serve as investment advisers and for which Winsbury will serve as manager, administrator and distributor. As advisers, BancOklahoma Trust and AMR Investment Services, an affiliate of American Airlines, will manage the day-to-day investments of the Fund's assets.

According to Huber, BancOklahoma Trust was selected to advise the funds because of its long history and proven performance in the financial service arena. "BancOklahoma is recognized as a committed, market-driven trust and investment management service provider," he said. "Coupled with its strong market presence, this makes BancOklahoma Trust ideally suited for its role in advising the Funds."

Huber also said AMR Investment Services has a very successful track record in managing short-term money. "Its institutional money market fund is consistently one of the top performers when compared to all money market funds," he said. "Together, BancOklahoma Trust and AMR Investment Services will make a great team."

The Funds consist of seven separate and diversified portfolios, including the Cash Management Fund, the U.S. Government Fund (both money market funds), the Performance Equity Fund, the Tax-Free Intermediate Bond Fund, the Intermediate Fund, the Performance Bond Fund, and the Aggressive Growth Fund. According to Huber, each portfolio is designated to meet a specific investment objective and to offer customers relatively low risk, competitive rates and daily access.

Phillips Owings, BancOklahoma Trust senior vice president, said the bank is pleased to be extending its line of products and services with the American Plus Funds to better serve its entire customer base. "While we view our customers individually and strive to serve their personal situations," he said, "there are certain needs they all have in common -- including service, stability, liquidity and convenience -- which are in increasingly greater demand. Making this product available is a further indication of our commitment to meeting those needs while enabling us to sharpen our competitive edge."

Since reorganizing its Investment Management Group in early 1988, BancOklahoma Trust has become recognized as one of the country's leading money managers with several of its pooled funds consistently outperforming standard industry indices.

BancOklahoma Trust has 19 pooled trust funds serving a wide range of individual and institutional investors. Rudy Thomas, BancOklahoma Trust

senior vice president and chief investment officer, said the management style of these funds will be the model for the various investment objectives of the American Plus Funds. "Our selection as investment advisor to the American Plus Funds is welcomed recognition of the capabilities of our relatively new investment team," Thomas said. "We are excited about our new association."

AMR Investment Services will serve as investment adviser to the Cash Management and U.S. Government Funds. Its experience in guiding the investments of the employee benefit trust funds and short-term portfolios of its affiliate, American Airlines, and other clients will also serve to strengthen the Fund. Bart Roberson, AMR Investment Services vice president, said, "We believe our track record, management resources and experience will serve to enhance both the performance and credibility of the Fund. At AMR Investment Services we manage approximately $6 billion, including $1.8 billion of short-term cash. This gives us considerable expertise."

BancOklahoma Trust is the largest trust company in the state of Oklahoma and is a subsidiary of Bank of Oklahoma, N.A., the state's largest bank. BancOklahoma Trust oversees approximately $6 billion in trust assets, of which one third is under direct management. AMR Investment Services is an investment service company which is a wholly owned affiliate of American Airlines.

Winsbury acts as manager, administrator, distributor and principal underwriter to the American Plus Funds, and is the country's largest provider of such services.

DETROIT (JUNE 26) PR NEWSWIRE - Quest BioTechnology, Inc. (NASDAQ: QBIO) ("Quest") today announced results of its second quarter and six months ended April 30, 1990.

During the quarter, Quest realized net income of $86,960 while incurring a net loss of $100,805 for the six-month period. The net income for the quarter and the reduced net loss for the six-month period were primarily attributable to income recognition amounting to $122,995 relating to approval by the United States Bankruptcy Court of the reimbursement to Quest by American Monitor Corporation of costs incurred by Quest during the period of September 1987 through October 1989. Also during the quarter and the six-month period, Quest realized $153,750 and $253,750,

respectively, in sublicense fees in relation to Quest's technology.

In March 1990, Quest's wholly owned subsidiary, PolyCell, Inc. announced that a QUADROMA(TM) CENTER was formed in conjunction with MCA Development BV in Groningen, the Netherlands. The QUADROMA CENTER will perform fusion of hybridoma cell lines to make bispecific monoclonal antibodies and hybrid hybridoma cells available on a fee-for-service basis.

PLANT CITY, FL (JUNE 26) PR NEWSWIRE - Paradise Plastics, a division of Paradise Fruit Company, Inc. (NASDAQ: PARF), announced that it had agreed in principle to acquire the assets of JAF Plastics Company, a plastics thermoformer located in Oldsmar, Fla.

JAF is a molder of several proprietary plumbing products, as well as a number of custom products for other customers. Paradise Plastics is an

injection molder and thermoformer which, in addition to manufacturing all of the packaging used by its parent company, molds a wide variety of food packaging, horticulture trays, plastic pails, and custom products for others. These outside sales accounted for approximately 20 percent of Paradise Fruit's $21.3M revenues, recorded during the year ended Dec. 31, 1989.

Paradise management stated that the addition of the JAF assets, which will continue to be operated as before, will add versatility in equipment and molding technology to both operations, enabling each to offer to its existing and potential customers a new variety of products and services.

Paradise Fruit Company, Inc. is regarded as the world's largest producer of glace (candied) fruits and peels, a primary ingredient of fruitcakes and other confections, which are sold both to commercial users, and retailed in supermarkets for home use. The company has over 350,000 square feet of office and manufacturing facilities at its 12-acre headquarters complex located in Plant City, Fla.

HOUSTON (JUNE 26) PR NEWSWIRE - Paul J. Varello has been named as chairman and chief executive officer of American Ref-Fuel Co., succeeding Bruce I. Hendrickson.

Varello comes to the Houston-based waste-to-energy company from Fluor Daniel Inc., where he served as President of its Process Sector in Irvine, Calif. Hendrickson, who has served as American Ref-Fuel's chairman since the company's inception in 1983, returns to assume duties within Browning-Ferris Industries Inc. Hendrickson will continue as a member of the American Ref-Fuel Company Management Committee.

An 18-year veteran within the Fluor Daniel organization, Varello held a number of senior management positions including Executive Vice President of Worldwide Marketing and Sales. He holds a Bachelor of Science degree in Civil Engineering from Villanova University and is a graduate of Harvard's Advanced Management Program.

American Ref-Fuel Co. is a partnership formed by subsidiaries of Browning-Ferris Industries Inc. and Air Products and Chemicals Inc. to market waste-to-energy facilities. American Ref-Fuel is a full service (design, construction and operation) systems contractor for the development of waste disposal systems featuring the Deutsche Babcock Anlagen mass burning technology.

The company currently operates a 2,319 tons-per-day (TPD) facility for the Town of Hempstead, N.Y. and is nearing completion of a 2,277 TPD plant in Newark, N.J. Other facilities are under construction or under development in Preston, Conn.; Bergen County, N.J.; Oyster Bay, N.Y.; East Bridgewater, Mass., and Bethlehem (Albany area), N.Y.

MELBOURNE, FL (JUNE 26) PR NEWSWIRE - DBA Systems, Inc. (NASDAQ: DBAS) a Melbourne, Fla. based defense electronics company, announced today that it has settled all pending litigation with E.I. du Pont de Nemours & Co. and John S. Scott, a former DBA employee.

The settlement with Du Pont included the execution by DBA and Du Pont of long term development, manufacturing and maintenance agreements for work to be performed by DBA for Du Pont using DBA's proprietary technology.

The settlement achieved with Scott was on terms satisfactory to the company, at a cost believed to be less than the cost of successfully defending the claims and will not have a material adverse effect on the company's assets or business.

PITTSBURGH (JUNE 26) PR NEWSWIRE - The DQE (NYSE: DQE) board of directors amended the corporation's bylaws today to exempt DQE from the control shares provision and the disgorgement provisions of the Pennsylvania Business Corporation Law enacted in March of this year.

In certain circumstances, the control shares provision limits the voting rights of shareholders owning 20 percent or more of the voting stock of a Pennsylvania corporation, and the disgorgement provision permits a corporation to require 20 percent shareholders to give up the profits on the sale of their shares.

The DQE board took no action on the law's provision relating to the exercise of the board's fiduciary duty. Under the terms of the law, the provisions automatically apply to Pennsylvania corporations unless their bylaws are amended to exclude them.

Wesley W. von Schack, chairman and chief executive officer of DQE, said that the board of directors felt that the provisions of the law which take away the shareholders' voting rights and profits were counter to the emphasis that the company places on increasing shareholder value.

In regard to the fiduciary provisions, he added that the company's statutory obligation to provide safe and reliable electric service to its customers has always been in harmony with the long-term interests of the shareholders.

DQE is a a registered energy services holding company headquartered in Pittsburgh. Its main subsidiary, Duquesne Light Co., provides electric service to 573,000 customers in Allegheny and Beaver counties.

#90177p0063 06/26/1990 ~PR Newswire

PHOENIXVILLE, PA. (JUNE 26) PR NEWSWIRE - The West Co. Inc. (NYSE: WST) announced today that earnings for the second quarter of 1990 will decline significantly from the second quarter of 1989, a quarter in which record sales and earnings were reported due to extraordinary demand for pharmaceutical packaging components.

West cited two unrelated events which are primarily responsible for the lower-than-expected second quarter results. First, the company found that raw material which had been used in the production of a single product line had not met West's standards and production was halted. Production of replacement product was suspended until additional raw material was received and new testing and incoming inspection procedures were developed. Second, the significant changes in monetary and fiscal policy imposed by the Brazilian government in recent months, which substantially curtailed all business activity in that country, reduced demand for and sales of the company's products there.

Rene L. Guerster, president and chief executive officer, stated, "These one-time events will result in a decline in earnings for the quarter which could be greater than 50 percent. Those results will include a reserve for anticipated expenses arising from the raw material issue. We are now back in production and believe that most of the lost sales of this product will be made up in the third and fourth quarters of 1990. Our operation in Brazil, after three months of substantially reduced sales, is returning to normal."

Guerster added, "These unanticipated events have only temporarily slowed the progress we are making in improving our financial performance. We fully expect to achieve favorable earnings growth for the balance of 1990 and beyond."

The West Co. Inc. is the premier supplier of specialized packaging systems and components for the worldwide pharmaceutical and hospital supply/medical device industries and the domestic consumer products industry, with more than 85 percent of its revenue generated by the health care markets. West's products include stoppers, closures, containers, medical device components and assemblies made from elastomers, metal, plastic, glass and combinations thereof, plus related packaging machinery.

PORTLAND, OR (JUNE 26) PR NEWSWIRE - Oregon Steel Mills Inc. (NYSE: OS) announced today that it signed a letter of intent with Corporacion Venezolana De Guayana (C.V.G.) to construct a hot iron metal briquette plant in the State of Bolivar, Republic of Venezuela.

The plant, which would require an investment of approximately $165 million is expected to produce 750,000 metric tons of product per year. The agreement calls for the project to be carried out through a joint venture between Oregon Steel and C.V.G. Initially, C.V.G. would have an equity interest of up to 20 percent with Oregon Steel having the remaining interest.

This letter of intent contemplates the execution of definitive contracts within the next 12 months.

Oregon Steel is a producer of steel plate and large-diameter steel pipe with facilities in Portland, Ore., Napa, Calif., and Fontana, Calif.

CLEVELAND (JUNE 26) PR NEWSWIRE - M. Ann Harsh has been appointed senior vice president, finance, for The MetroHealth System, announced Henry E.

Manning, president and chief executive officer.

Harsh, a partner at Ernst and Young, will join MetroHealth Aug. 1. With 18 years experience at Ernst and Young, she will bring a set of skills which are important in today's highly competitive health care financial environment, according to Manning.

"Ms. Harsh has a unique health care financial background. She is skilled in the intricacies of changing health care financial systems," Manning said. "With her extensive health care background she is especially suited to lead MetroHealth's financial management in today's stricter financial climate for hospitals."

She joined Ernst and Young in 1972 after earning a B.S. in accounting at Case Western Reserve University. As a lead partner for six years, she developed specialized experience in health care issues including third party reimbursement, prospective payment arrangements, and revenue bond financing.

Harsh is actively involved in civic and community organizations, including the Bratenahl Community Foundation and Womenspace, of which she is president.

"I'm pleased to be joining an organization which is on the leading edge of health care delivery," Harsh said. "MetroHealth has a significant mission to serve all Cuyahoga County residents and yet has remained a dynamic force in a very competitive market," she said.

Harsh lives with her husband, Ralph Nehrig, in Bratenahl.

#90177p0088 06/26/1990 ~PR Newswire

ST. PAUL, MN (JUNE 26) PR NEWSWIRE - H.B. Fuller Co. (NASDAQ: FULL) today reported net sales of $204.7 million for its second quarter ended May 31, 1990, an increase of 4 percent over the $196.3 million for the same quarter a year ago. Net earnings were $6.5 million for the quarter, up 33 percent from $4.9 million for the period a year ago. Earnings per share were 70 cents, up 38 percent from 51 cents in second quarter 1989.

The results include a second-quarter tax benefit of $0.2 million, or 2 cents per share, on income generated by the company in Panama during the quarter. This benefit allowed by the Panamanian government partially offsets the company's first-quarter extraordinary charge of $1.4 million, or 15 cents per share, relating to looting losses and property destruction in that country. This benefit is expected to recur as future income is

generated in Panama.

Net sales for the first six months of 1990 were $386.2 million, up 3 percent from $373.9 million in the first half of 1989. Year-to-date earnings before the extraordinary item totalled $7.9 million, up 16 percent from $6.8 million in the first six months of 1989. Earnings per share were 85 cents, up 19 percent from 71 cents in the first half of 1989.

The company completed its planned repurchase of 500,000 shares of common stock during the second quarter of 1990.

Overall, international operations achieved a moderate increase in sales and a significant increase in operating income in the second quarter compared with the same three months in 1989.

European operations recorded significant increases in sales and operating income for the quarter, compared with the same period in 1989, largely as a result of a weakening U.S. dollar. Gross margins from European operations have shown a slight improvement through the first half of the year.

Second-quarter sales and operating income from Latin American operations were moderately above those of second quarter 1989. Currency fluctuations were equal to currency influences in the same period a year ago.

Sales from Asia/Pacific and Canada operations were even with those of the previous year's quarter and six months.

U.S. sales for the quarter were approximately the same as those for the period a year ago, resulting in a moderate year-to-date sales increase. Earnings from operations were up significantly due to aggressive cost control measures and an increase in gross margins.

ASC Division sales for the quarter and half were down slightly from those of the previous year's second quarter and first six months. Even so, operating income was up marginally for the first half because of continued attention to cost and census control and a slight decline in raw material costs. Although gross margins as a percent of ASC sales were up from the margins generated in the first quarter of 1990, they were below those generated in the second quarter of 1989. Limited growth of the U.S. economy has hindered growth of the Division's core businesses. The automotive industry is operating at levels below earlier projections and so continues to adversely affect Fuller sales to that industry.

The U.S. Specialty Divisions and Subsidiaries recorded a moderate sales increase and substantial operating income growth for the quarter, primarily due to improved gross margins. Sales were particularly strong in the Industrial Coatings and Linear Products divisions. TEC Inc.

continued to lag due to a slowing construction market.

"At our annual meeting in April, we reviewed decisions and plans made in the past 18 months to improve our company's performance. Our second-quarter results are early indicators of progress made against those plans," said Tony Andersen, president and chief executive officer. "We still have more to do, but we remain confident in our ability to show continued improvement."

H.B. Fuller Co. is a worldwide manufacturer and marketer of specialty chemical products, including adhesives, sealants, coatings, paints, waxes and sanitation chemicals, with Fiscal 1989 sales of $753 million.

BURBANK, CA (JUNE 26) PR NEWSWIRE - Silgan Containers Corp. has announced that James D. Beam will replace Ralph S. Ausburn as president and chief operating officer effective July 1, 1990.

Beam joined Silgan as vice president of Marketing and Sales in 1987, when the company was purchased from Carnation Company by R. Philip Silver and D. Greg Horrigan, both former executives with Conti nental Can Company, and the New York-based investment firm of Morgan Stanley.

Beam has over 20 years of experience in the can industry, most of which has been with Continental Can Company. While at Continental, he held a variety of positions including vice president of the Western Division, general manager of Marketing, and director of Business Planning.

Silgan Containers is one of the leading producers of steel and aluminum cans for the food industry with facilities throughout the United States.

According to Horrigan, chairman of the board, "Ralph Ausburn has been a contributor to the success of Silgan Containers and we wish him all the best as he pursues new endeavors."

SOUTH BEND, IN (JUNE 26) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) Chairman, President and Chief Executive Officer Leo J. McKernan said today the company's Brazilian operations are expected to be profitable by the third quarter of the current fiscal year.

McKernan noted that he expects no more than a $3 million loss in Brazil for the second quarter, and that the company on a worldwide basis remains "solidly profitable." He added that in Brazil "order rates are good, and we are back to full-time, full-shift employment."

McKernan's comments were in response to recent investor concerns about the volatile economic climate in Brazil and its potential impact on overall corporate results. He added, "Our view as presented in our first-quarter report to stockholders has not changed."

McKernan noted, "Our Brazilian operations are well-positioned to minimize financial and accounting losses that can occur in an economy struggling to contain high inflation. We have almost no cash frozen in bank accounts, and the nature of our business permits us to operate with high asset turnover that reduces economic exposure."

Clark Equipment Co.'s business is the design, manufacture and sale of forklift trucks, construction machinery, transmissions for on-highway vehicles, and axles and transmissions for off-highway equipment.

ROCKVILLE, MD (JUNE 26) PR NEWSWIRE - SAGE Software, Inc. (NASDAQ-NMS: SGSI) today reported operating results for the fiscal year ended April 30, 1990.

Revenues for the year were $26.5 million, a new high for the company, and a 26 percent increase over last year. Net income increased 108 percent to $3,489,000 (55 cents per share) compared to $1,680,000 (28 cents per share) for the prior year.

For the quarter ended April 30, 1990, revenues increased 47 percent to $8 million from $5.4 million for the same period last year. Net income for the quarter rose from $259,000 to $1,422,000 (22 cents per share).

Kevin J. Burns, SAGE's president and chief executive officer, said: "It was a great year for SAGE Software. The company is proud that we achieved

record high earnings, while adding new products, gaining market share in the rapidly growing market for PC-based development tools and integrating several acquisitions."

SAGE specializes in software products which enable customers to build information systems faster and more cost effectively. SAGE's products operate on IBM Mainframes, PCs and Local Area Networks (LANs). SAGE's corporate offices are located at 3200 Tower Oaks Blvd. in Rockville, a suburb of Washington.

HOUSTON (JUNE 26) PR NEWSWIRE - Continental Airlines today announced it will begin seasonal jet service to Yampa Valley Regional Airport in Hayden Colo. from Cleveland, Denver, Houston and Newark, N.J. The service will supplement existing year-round service on Continental Express to the nearby resort of Steamboat Springs.

The service will consist of a Saturday nonstop flight from Houston as well as a Saturday flight originating in Newark with a stop in Cleveland. In addition, there will be a daily nonstop flight from Denver.

The new service will begin December 15 and end March 31, 1991. "This service, combined with the existing Continental Express service to Steamboat, strengthens this growing marketplace" said John Nelson, Continental's executive vice president of marketing.

Continental Express currently operates five daily round-trip flights between Denver and Steamboat. During the ski season the service increases up to 10 departures.

"The addition of jet service is evidence of the ongoing commitment that Continental and Continental Express have to this community, primarily through Steamboat Springs Airport and now through Yampa Valley Regional Airport," said Don Smith, president of Continental Express-Western Region. "This will help meet the demand for badly needed additional service during the ski season."

The weekly nonstop flight between Houston and Hayden will operate on Saturdays. The flight will depart Houston at 10 a.m. and arrive in Hayden at 11:45 a.m. The return flight departs Hayden at 1:05 p.m. and arrives in Houston at 4:25 p.m.

Newark service will consist of a weekly Saturday flight. The flight will depart Newark at 7:15 a.m. and stop in Cleveland before continuing on to Hayden, arriving at 11:15 a.m. The return flight departs Hayden at 12:15 p.m., arrives in Cleveland at 5:10 p.m. and Newark at 7:54 p.m.

The Denver flight will depart daily at 12:30 p.m. and arrive in Hayden at 1:15 p.m. The return flight will depart Hayden at 2:15 p.m. and arrive in Denver at 3:00 p.m.

Nelson indicated that portions of the service were being guaranteed by the resort, which for years has had similar agreements with other airlines.

Continental is the Official Airline of Colorado and operates 162 daily departures from Denver.

Beginning June 28 Continental Express will operate 103 daily departures from Denver and serves 10 Colorado communities.

#90177p9709 06/26/1990 ~PR Newswire

MACON, GA (JUNE 26) PR NEWSWIRE - The Bibb Company announced today that it has extended its previously announced offer to exchange $992.50 principal amount of its 14 percent senior subordinated notes due 1999 for each $1,000 principal amount of its 13 7/8 percent senior subordinated notes due 1999 and its solicitation of consents of the holders of the 13 7/8 percent notes to certain proposed amendments to the indenture relating to the 13 7/8 percent notes. The exchange offer and solicitation which were previously scheduled to expire yesterday at 5:00 p.m., are now scheduled to expire at 5:00 p.m., New York City time, on June 29, 1990.

The company said that it was extending the exchange offer and solicitation to accommodate those holders of the 13 7/8 percent notes who had not had the opportunity to tender their notes and deliver their consents prior to the expiration time. The exchange offer and solicitation are conditioned upon, among other things, the receipt of tenders by and consents from holders of at least 66 2/3 percent of the aggregate outstanding principal amount of the 13 7/8 percent notes.

The company announced that, based upon a preliminary count, as of 5:00 p.m. yesterday, of the $40,000,000 aggregate principal amount required to complete the exchange offer, an aggregate principal amount of approximately $29,227,000 of 13 7/8 percent notes had been tendered and related consents delivered.

#90177p9710 06/26/1990 ~PR Newswire

LOS ANGELES (JUNE 26) PR NEWSWIRE - Kaufman and Broad Home Corp. (NYSE: KBH), a major home builder and commercial real estate developer, today reported lower earnings for its second quarter ended May 31, 1990, on a sharp increase in revenues and an improving trend for housing orders.

Revenues rose to $349.8 million, up 35 percent from $259.9 million in the prior year's period. Net income totaled $15.1 million, down 24 percent from $19.9 million in the second quarter of 1989. Primary earnings per share decreased 19 percent, to $.46 from $.57.

The company's 1989 second quarter earnings included a pretax gain of $5.5 million from the sale of land, compared to $300,000 in the current year's quarter. Excluding the effect of land sales, Kaufman and Broad's current quarter net income would have decreased 10 percent from the prior year's period.

Bruce Karatz, president and chief executive officer of Kaufman and Broad, said the company's anticipated decrease in second quarter earnings reflected lower profit margins in California's weaker housing environment, partially offset by a strong contribution from commercial and residential development activities in metropolitan Paris. He noted that current earnings represent the second best financial performance in the company's history for this early spring selling period.

For the first six months of 1990, the company's revenues increased nearly 50 percent, to $665.8 million, from $445.9 million in the first six months of 1989. Net income for the period totaled $28.5 million, a 10 percent decrease from $31.5 million. Primary earnings per share decreased to $.86 from $.98.

Los Angeles-based Kaufman and Broad Home Corp. is the largest producer of single-family housing in California and the largest builder in metropolitan Paris, where the company develops commercial office properties and a variety of residential investment properties in addition to single-family homes.

CHATSWORTH, CA (JUNE 26) PR NEWSWIRE - Diodes Incorporated (AMEX: DIO), a full-line semiconductor rectifier supplier, today announced recent changes

in its board of directors and the addition of several new executives. These changes have followed the acquisition by Silitek Corp., a Taiwan semiconductor manufacturer, of 42 percent of the Diodes voting stock.

Thomas Hurley, Dr. Shing Mao and Michael R. Giordano have joined the Diodes board. Hurley, who has been named chairman, was previously corporate vice president of Microsemi Corp. in Santa Ana, Calif., and was formerly vice president of sales and marketing worldwide at General Instruments Company. He is currently president and chief executive officer of Siltek Inc., a U.S. subsidiary of Silitek Corp. and manufacturer of semiconductor wafers for rectifier applications. Hurley has in excess of 20 years experience in the semiconductor component business.

Mao is chairman of the board if Lite-On Inc., a semiconductor component marketing company in northern California. Lite-On is a subsidiary of Liton Taiwan, an electronic component manufacturer and member of the Liton Group in Taiwan which includes Silitek Corp. Both Liton and Silitek have stock listed on the Taipei stock exchange.

Giordano is a senior vice president in the Los Angeles office of Kidder Peabody, a securities company.

The other two directors on the five-director Diodes board are David M. Lloyd, who has been chief executive officer of Diodes for the past five and one half years, and Michael A. Rosenberg, chief operations officer of SFE Technologies, a capacitor manufacturer in San Fernando, Calif.

Joseph Liu and Chris Jensen have joined the company as vice president administration and treasurer respectively. Liu was previously strategy systems manager of Texas Instruments' Asia Pacific Division. He has formerly held positions with Texas Instruments as Financial Planning Manager of the Latin America division and as controller of the TI Asia LTD. branch offices in Hong Kong and in Singapore. Jensen was formerly chief financial officer of Distributed Microtechnology Inc., a subsidiary of Microsemi Corp. in Calif.

In addition to these new executive appointments, three professional area sales managers have joined the sales division. Marvin Zidel, with over 35 years experience in electronic component sales and marketing, has been named corporate marketing director, reporting to the president.

MINNEAPOLIS (JUNE 26) PR NEWSWIRE - International Broadcasting Corporation (NASDAQ: IBCA) announced yesterday at the company's annual

meeting here that it had reached an agreement with Paris Enterprises to settle a May 3 $2.9 million jury verdict for Paris Enterprises and against IBC's Harlem Globetrotters property, for $1.5 million plus $25,000 in court costs.

IBC simultaneously announced that it had filed a breach of contract action to enforce its indemnity rights against Metromedia Inc., which owned the Globetrotters when the events surrounding the dispute between that property and Paris Enterprises occurred.

The jury in the case involving IBC and Paris Enterprises had found that the Globetrotters breached an oral pact to extend a merchandising agreement with Paris Enterprises for a period of one year and, subsequently, awarded Paris Enterprises the compensatory damages of $2.9 million.

However, said IBC President Thomas K. Scallen, at the time his company acquired the Globetrotters from Metromedia, the dispute between Paris Enterprises and Metromedia regarding this merchandising agreement had already begun.

"Not only had this dispute come to the attention of Metromedia when we began with them to acquire the Globetrotters, but Metromedia never informed us of this dispute at any time prior to our closing that acquisition," said Scallen.

"Therefore," he added, "we are pursuing our indemnity claim against Metromedia with utmost vigor."

IBC, headquartered in Minneapolis, is a leading family entertainment company which owns and/or operates touring shows, family-oriented amusement parks and attractions, and other entertainment facilities. The company's properties include the Harlem Globetrotters, the Ice Capades, the Ice Capades Chalets skating centers and Chanhassen Dinner Theatres.

CHICAGO (JUNE 26) PR NEWSWIRE - IBM's new PS/1 computer will be available today in 45 Sears locations in Chicago, Dallas and Minneapolis-St. Paul metropolitan areas.

The retailer's more than 840 Brand Central superstores-within-Sears-stores will offer the computer when it is introduced nationally this

August. Sears Brand Central became the only nationwide appliance and home electronics superstore last week with the opening of 198 stores, completing a national rollout in 15 months.

"When IBM approached Sears last year, we immediately saw the PS/1's appeal for our huge customer base," said Edward J. Hearne, head of buying and merchandising for home electronics and home office products in Sears retail stores across the country. "Sears has a business relationship with 70 percent of America's households," he noted.

In addition, the computer and selected IBM accessories will be sold nationally through 60 Sears Business Systems Centers and in Sears' Christmas catalog being distributed to 11.5 million homes beginning in September.

In its Brand Centrals, Sears initially will offer an expansion box, 3-1/2 and 5-1/4 inch disk drives and a 512K RAM memory upgrade, with additional acessories in September. It also offers IBM-compatible printers and software.

GREEN BAY, WI (JUNE 26) PR NEWSWIRE - Terex Corporation (NASDAQ: TERX) announced today that Arthur E. Rowe has been appointed president and chief executive officer of its Fruehauf Trailers Division, based in Detroit. Rowe previously held the positions of president and managing director of Terex Equipment Limited, based in Motherwell, Scotland, and president of Terex Division of Terex Corporation, based in Hudson, Ohio.

Woodward K. Baldus, who had previously been president and chief operating officer of Fruehauf Trailers on an interim basis since March 1990, will remain as vice chairman of Fruehauf Trailers Division.

Commenting on Rowe's appointment, Baldus, president of Terex Corporation, said, "Art Rowe has made a major contribution in marketing and manufacturing at the helm of both Terex Division and Terex Equipment Limited. He successfully guided the restructuring of Terex's heavy equipment business, and has restored it to its position as a profitable and efficient manufacturer of heavy equipment. We recognize Art's achievements, and look forward to similar accomplishments from him as president and chief executive officer of Fruehauf Trailers."

Replacing Rowe will be Don M. Schleuter. Schleuter's experience includes bottom-line responsibility as president and general manager of a number of companies in the mining machinery, construction equipment and truck

components industries. In those positions, he has had direct responsibility for the supervision of marketing, manufacturing, finance and engineering.

Baldus continued, "Mr. Schleuter is a talented executive with a wealth of experience in heavy equipment manufacturing and marketing. He has experience in every aspect of Terex's business, and he is well- qualified to continue the successful operations of Terex's worldwide heavy equipment business."

In another executive change, Terex promoted Robert H. Armstrong from executive vice president to president of Terex Division of Terex Corporation. Armstrong will report to Schleuter, who will be based in Motherwell.

Baldus concluded, "Mr. Armstrong's many years of senior management experience in the heavy equipment industry has served Terex well for the past three years. We look forward to his continued success as president of Terex Division."

Terex Corporation's Fruehauf Trailers Division is the world's leading manufacturer of truck trailers, making a wide range of van, refrigerated, platform, tank, dump trailer and other models. Terex's heavy equipment group -- which includes Terex Equipment Limited, Koehring Cranes & Excavators, Unit Rig, and Northwest Engineering -- designs, manufactures and markets heavy-duty, off-highway, earthmoving, construction, and materials handling equipment for the mining, construction, logging and other industries.

FORT WORTH, TX (JUNE 26) PR NEWSWIRE - CF Ocean Service, an international ocean freight transportation company, announced today it has established a new National Documentation and Cargo Control Center for customer service and centralized management of import/export shipments in the U.S. and overseas.

The new facility, based in Fort Worth, will utilize some of the most advanced transportation management, electronic data interchange and telecommunications technology in the industry, according to James R. Hertwig, president of the company.

"We're excited about this new center because it will make our services more efficient, while at the same time providing a competitive product

that is very convenient and easy to use for any shipper moving goods internationally," Hertwig explained.

The new facility becomes the management center for a sales and service network encompassing 60 CF Ocean offices and agents throughout the world, Hertwig noted. CFOS also utilizes the sales efforts of Con-Way Transportation Services and its network of five regional truck lines with more than 300 offices in the U.S.

He added that even though Fort Worth becomes the primary information and service center, customers still can make import/export shipment arrangements through their local Con-Way Transportation sales representatives. Prior to bringing the Fort Worth complex on-line, CFOS customers obtained shipping information through regional service centers in the same locations as Con-Way facilities. CF Ocean Service and CF Truckload Service, a rail piggyback company, are the intermodal subsidiaries of Con-Way Transportation Services.

The Fort Worth office will provide centralized communications, document processing and cargo routing control nationwide, improving service and streamlining movement of import/export shipments among the company's gateway receiving stations at major U.S. ports and inland metropolitan points.

Con-Way Transportation Services is a $600 million regional trucking and intermodal services company based in Palo Alto, Calif. CTS operates CF Ocean Service, CF Truckload Service, an intermodal rail piggyback and stack train company; and five short-haul regional trucking companies: Con-Way Western Express, Santa Fe Springs, Calif.; Con-Way Central Express Ann Arbor, Mich.; Con-Way Eastern Express, Rutherford, N.J.; Con-Way Southern Express, Charlotte, N.C.; and Con-Way Southwest Express, Fort Worth, Texas.

LOS ANGELES (JUNE 26) PR NEWSWIRE - Thrifty Tel Inc. (OTC: TTEL) a long distance telephone service company, today announced the introduction of its Major Account Division which offers products and service specially designed for large corporations and businesses with a minimum of $240,000 in long distance telephone service charges annually.

The Major Account market is the fastest growing sector of the telecommunications industry today according to published reports. Thrifty Tel recently introduced Digital Direct Access (DDA) to the marketplace a

DS1 private line product which competes with AT&T Megacom, MCI Prism1 and US Sprint Ultra WATS. The company's DDA offers drastically reduced rates to the high volume user compared to Thrifty Tel's competitors while maintaining digital fiber optic quality.

Terry A. Jackson, vice president of the company's Major Accounts Division, stated that with the development of Thrifty Tel's Digital Direct Access product and expanded service areas, the company has an opportunity for tremendous rapid growth. Jackson projects between $7 and $8 million in gross revenue for the Major Accounts Division within 12 months.

Thrifty Tel Inc., is a long distance telephone service company headquartered in Garden Grove, Calif., with additional sales and marketing facilities located in Sherman Oaks and San Bernardino, Calif. Thrifty offers digital fiber optic quality long distance telephone service at reduced rates.

BAKERSFIELD, CA (JUNE 26) PR NEWSWIRE - Nahama & Weagant Energy Co. (NASDAQ: NAWE) plans to drill 15 to 20 prospects by year end, Rodney Nahama, president and chief executive officer, told shareholders at the company's annual meeting.

He said: "The wells will be drilled in the Sacramento Valley and in Oregon. While our primary strategy at present is to concentrate on gas exploration, we plan to drill two significant oil prospects with large reserve potential in the San Joaquin Valley this year, with the first at Jewetta Avenue slated to start drilling next month.

"Fifteen wells are expected to be drilled in California this year. We also should drill at least two at the Mist Field in northwest Oregon which we have just acquired in a farmout agreement with ARCO, in partnership with Oregon Natural Gas Development Corp. The field has produced 36 billion cubic feet of gas to date, and we are optimistic that we will be able to find at least that much in our current program.

"Also under the agreement, we have acquired 700 miles of high quality seismic date which, when evaluated with the sophisticated techniques that have supported our high success ratio in California, should greatly enhance our prospects. The zones being addressed are relatively shallow, and our wells will be approximately 2,000 feet with high potential. Twenty-five wells are planned to be drilled in Oregon under the program by the end of 1993 with total expenditures expected to approximate more than $10 million.

"Our partner, John Hancock Mutual Life Insurance Company, has authorized $9 million to fund its share of this year's exploration, development and acquisition programs."

Nahama concluded: "This year is off to a fine start. We just successfully completed the second well at our South Putah Sink field which should begin producing at the rate of 4 million cubic feet per day in early July. We have a 38 percent interest in the prospect.

"Drilling 15-20 prospects by year end should provide us with the necessary exposure to continue our reserves and cash flow growth, given any reasonable level of success such as we have enjoyed in the past."

The Bakersfield independent is engaged in oil and gas exploration and production, primarily in California.

PHILADELPHIA (JUNE 26) PR NEWSWIRE - Hunt Manufacturing Co. (NYSE: HUN), a leading manufacturer and distributor of office and art/craft products headquartered in Philadelphia and incorporated in Pennsylvania, announced today that it intends to opt-out of all of the so-called anti-takeover amendments to the Pennsylvania Business Corporation law enacted in April 1990, and at the same time adopt a shareholders' rights ("poison pill") plan.

Ronald J. Naples, chairman and chief executive officer of the company, commented, "Hunt has long been committed to remaining independent, since the Board of Directors has always believed independence to be the best way to assure the company the opportunity to pursue its long-term strategy and deliver value to shareholders. The Board of Directors has concluded that both as a matter of principle and as a practical matter, the scope and uncertain effect of the new Pennsylvania anti-takeover amendments make them undesirable. We believe the company's legitimate interest in controlling its own destiny can be protected in ways more consistent with shareholder rights."

CHICAGO (JUNE 26) PR NEWSWIRE - Continental Bank Corporation (NYSE: CBK) today announced that it will establish a special pretax reserve of $50 million to cover the cost of eliminating certain product lines that will result in a staff reduction of approximately 900 employees. The establishment of a reserve will result in a loss for the second quarter.

"Continental's product review reflects the realities of the marketplace," Chairman Thomas C. Theobald said. "It's a market reality that client needs change over time. We aren't altering our corporate and institutional strategy. All we're doing is aligning our services with the customers' changing demands. Unlike conventional cost-cutting exercises, we're not making arbitrary, across-the-board reductions. Instead, we're adjusting the composition and capacity of our product mix."

The corporation expects to realize a net cost savings of $25 million from the product review in the second half of this year. The full benefit, a projected annual net cost savings of approximately $75 million, is expected to be seen beginning in 1991.

Continental is determined to evaluate its businesses continually to increase revenues and reduce expenses so that the corporation achieves its

longstanding financial goals of a 30 percent operating margin and return on common equity of 15 percent.

Under the program, every product is evaluated against four guiding principles: Does it still fit Continental's business strategy? Is it achieving its performance objectives? Does the product have long-term viability? Are there ways to improve results?

KWK/l continues to emphasize its financial risk-management, debt distribution and customized corporate finance activities, as well as its private banking and treasury management businesses.

PALATKA, FLA. (JUNE 26) PR NEWSWIRE - Parkridge Electronic Manufacturing, Inc. will begin assembly operations in Northeast Florida when the new company opens in Palatka with 12 employees by the end of July, according to Bill Parks, company co-owner and president. The company expects to grow 300 percent with 35 to 40 employees by the end of the first year, Parks said.

Focusing its marketing efforts toward commercial aviation and military products, Parkridge will manufacture and assemble electro-mechanical assemblies, produce harness cables and perform chassis assembly operations.

Putnam County was chosen as the manufacturing site "because of the availability of an already established and trained work force pool that became available when Armtec closed," Parks said.

The Job Service of Florida will be used to screen applicants for employment. Parks said, "We are pleased to have the new Putnam County votech extension campus available for local training of employees."

Parks added that the Putnam County Chamber of Commerce "has been extremely helpful" throughout the year-and-a-half he and his partners, Bob and Jacqueline Poland of Jacksonville, worked to organize the company.

Utilizing the talents of local professionals, Bud Eskridge of Interlachen will be responsible for marketing and sales; Vivian Parlin of Palatka will direct manufacturing operations, Parks said.

DALLAS (JUNE 26) PR NEWSWIRE - Future Communications, Inc. (NASDAQ: FCMI), today announced its earnings for the three and six months ended April 30, 1990.

Net income for the second quarter ending April 30, 1990, was $394,694 or an increase of $90,467 (29.74 percent) over the same quarter in 1989. Similarly, operating profits of $348,121 for the quarter are $30,035 (9.44 percent) higher than the same quarter in 1989. Six months to date, net income was $495,715 compared to $501,983 during the same six months to date for 1989.

Commenting on the interim results, Sergio Bosco, president and chief executive officer, stated, "Despite a 36 percent decrease in gross revenues, our net income increased $90,467 or approximately 30 percent over results for the similar period in 1989.

"These results are positive proof of the efficacy of our recently (Oct. 1, 1989) revised operating concept whereby we divested ourselves of cable system operating responsibility and attendant overhead in return of a fixed revenue interest of $10,000 per month.

"We are confident that this concept will enable us to continue to increase earnings by concentrating on programming sales; and the location, acquisition, construction and sale of SMATV cable systems."

Future Communications, Inc., is engaged in the development, implementation

marketing, and sales of innovative nostalgic programming; the acquisition construction and sales of SMATV cable systems; the management of cable system investments; and the furnishing of specialized telecommunications consulting services.

#90177p9753 06/26/1990 ~PR Newswire

IRVINE, CA (JUNE 26) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ: GWAY) today announced its introduction of a new UTP Ethernet Micro Channel LAN adapter product. The new G/Ether-Twist MC adapter is designed for use in IBM Personal System/2 computer and compatibles implementing the Micro Channel bus architecture. G/EtherTwist MC adds to the popular G/EtherTwist family of high- performance unshielded twisted-pair (UTP) Ethernet local area network adapters and hubs. G/Ethernet is fully compatible with the IEEE 802.3 10BASE-T Draft 10 proposal for Ethernet LANs.

G/EtherTwist MC has a 16-bit MCA bus interface and is designed for use in both workstations and servers. The adapter provides fast and efficient data transfer between the PC and the Ethernet LAN, operating continuously at the maximum sustained Ethernet rate. Using streamlined software and simple bus interface, G/EtherTwist MC squeezes the highest performance out of PS/2s in any application without the complexities of bus mastering.

Bert R. Ott, vice president of sales of Gateway said, "G/EtherTwist MC is one of the industry's first 10BASE-T adapters available for Micro Channel, and as such, it brings together the processing power of the PS/2 and the low-cost wire flexibility of UTP. The result is a very high-performance, cost-effective network solution."

An on-board UTP filter allows simple and easy direct RJ-45 connection between the G/EtherTwist MC adapter and the UTP wall outlet. G/EtherTwist networks can be used in many buildings with existing telephone wiring that meets 10BASE-T specifications, including AT&T's Premises Distribution System, so users avoid the expense of installing coaxial cable for an Ethernet network.

Existing coaxial cable Ethernet installations can also be integrated into a G/EtherTwist network by using an external UTP Medium Attachment Unit attached to the AUI port of an Ethernet adapter.

G/EtherTwist MC features 64K extended on-board memory for further enhanced performance during the I/O-intensive tasks such as database, accounting and CAD/CAM applications.

Using the PS/2 Programmable Option Select (POS) feature, G/EtherTwist MC is configured automatically at startup to select appropriate I/O addressing and hardware interrupts, simplifying installation and configuration.

Four built-in external diagnostic LEDs indicate link test, transmit, receive and jabber conditions on the G/EtherTwist MC adapter. As a result problem areas in network configurations and operation can be identified more easily and downtime is minimized.

G/EtherTwist MC comes standard with operating system drivers for Novell's NetWare 286, 386 and OS/2 Requestor for NetWare, NDIS drivers for Microsoft OS/2 LAN Manager, Banyan Vines and compatibles, as well as support for the TCP/IP protocol.

G/EtherTwist MC is available now and comes with full one-year warranty. Suggested U.S. retail is $460.

In addition to the new Micro Channel adapter, Gateway's G/EtherTwist family of high-performance UTP Ethernet products includes the G/EtherTwist PC and G/EtherTwist PC-WS, G/EtherTwist AT and G/EtherTwist AT-WS, and the G/EtherTwist Hub System.

Gateway Communications Inc. has been an active participant in all 10BASE-T proceedings since 1988. The company is a leading designer, manufacturer, and marketer of a full range of networking and communications products for IBM and compatible PCs.

Gateway products are sold in more than 70 countries worldwide. Corporate and international headquarters are located at 2941 Alton Ave., Irvine, Calif., 92714; telephone, 714-553-1555; fax, 714-553-1616.

#90177p9754 06/26/1990 ~PR Newswire

MIAMI (JUNE 26) PR NEWSWIRE - A $14.5 million credit facility has been approved for General Development Utilities by a consortium of banks led by

the Bank of New York, NCNB and Barclays. The funds will be used for corporate operations and new capital expenditures and will meet GDU's needs for the next 18 months.

The financing includes a rollover of the utility company's $105 million in debt obligations.

The new credit facility will include $2.5 million in working capital and $12 million for new capital expenditures in the eight communities around Florida in which GDU operates water and wastewater facilities.

An important result of the new facility will be GDU's ability to pay approximately $2.5 million in property taxes to various counties where its plants are located.

The money allocated for new capital expenditures will include plant expansion and extension of utility lines. Some major projects anticipated under this program are an expansion of a water plant in Port Malabar, expansion of the West Port Waste Water Treatment Plant in the Gulf Cove area of Port Charlotte, expansion of utility lines in PM 7 and 8 in Port Malabar and expansion of water service to the Peachland area of Port Charlotte.

In another action, St. Lucie County today took over operation of GDU's St. Lucie County facilities after depositing $45 million with St. Lucie Circuit Court as a deposit on the ultimate price of the utility facilities in a condemnation action. The county retained existing GDU employees to operate the facilities. Approximately $38 million of the amount will be used to pay off existing bank debt, $23 million of which applied to the St. Lucie utilities; another $780,000 will go to St. Lucie County for payment of delinquent property taxes and the remaining money will be disbursed against other obligations.

General Development Utilities is Florida's largest water and wastewater utility company. It is a wholly owned subsidiary of General Development Corporation (NYSE: GDV) which filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 6. GDU did not file for bankruptcy protection and a spokesman for the utility said the new credit facility makes it possible for the utility to continue to operate outside of bankruptcy.

TAMPA, FLA. (JUNE 26) PR NEWSWIRE - Kimmins Environmental Service Corp. (Kimmins) (NYSE: KVN) announced today that its subsidiary, Kimmins Thermal

Corp., has been awarded an $18 million on-site incineration contract by the Illinois Environmental Protection Agency.

Kimmins will provide on-site incineration, contaminated soils excavation, facility decontamination, asbestos abatement, building demolition, contaminated sewer clean-out, groundwater collection and treatment, environmental construction, and site restoration services at the LaSalle Electric Utilities Superfund site in LaSalle County, Ill., as successor to a subsidiary of Westinghouse. The project will commence immediately and is expected to be completed in the fall of 1992.

"Our ability to provide single-source responsibility for the wide variety of environmental services required to complete this contract gave us a distinct advantage over our competitors," stated Francis M. Williams, president and CEO of Kimmins Environmental Service Corp. "The integration of our environmental service group enabled us to bid this project without the use of multiple subcontractors."

In addition, Kimmins has recently been awarded various projects including jobs from Bethelem Steel, O'Hare Airport Authority, Sterling Organics, Occidental Petroleum, city of Tampa, Niagara Mohawk Power Corp., and the town of Amherst amounting to over $25.5 million.

Kimmins Environmental Service Corp. and its subsidiaries provide solid waste management services including transportation, recycling and disposal; environmental contracting services including hazardous waste remediation and incineration, demolition and dismantling of industrial facilities, asbestos abatement and containment services, and environmental surety bonds.

Kimmins Environmental Service Corp. is headquartered in Tampa, Fla.; and has regional offices in Niagara Falls, N.Y.; and Houston.

Kimmins Environmental Service Corp.'s common stock is traded on the New York Stock Exchange under the symbol "KVN."

JACKSON, MI (JUNE 26) PR NEWSWIRE - What began as a diving expedition to examine a Great Lakes schooner wreck ended with a heroic action that saved the life of a fellow diver, earning Fred G. Vos Consumers Power Company's exceptional service award.

Vos, 32, a systems analyst in the utility's customer services department in Jackson, was honored today by Consumers Power President and Chief Operating Officer Frederick W. Buckman for his prompt action in saving the life of diving partner Lyn Compau last August.

While diving off the Straits of Mackinac on Aug. 26, 1989, Vos came to the assistance of Compau who was struggling with her equipment. Vos helped Compau by filling her buoyancy compensator and immediately calling for assistance upon reaching the surface. Other divers started in-water resuscitation and CPR. Compau was treated at a hospital and returned to work five days after the incident.

Vos is the 50th Consumers Power employee to receive the exceptional service award since the utility began participating in the recognition program in 1975. Vos is a 14-year employee of Consumers Power. He resides in Michigan Center.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

EATONTOWN, NJ (JUNE 26) PR NEWSWIRE - At the annual meeting of Monmouth Real Estate Investment Trust (NASDAQ-NMS: MNRTS) held on June 20, 1990, the shareholders voted their overwhelming approval to change the trust's form of organization from an unincorporated business trust to a Delaware corporation and to change the trust's name to Monmouth Real Estate Investment Corporation. These changes will become effective on Oct. 1, 1990.

Eugene W. Landy, president of the trust, stated that changes in the federal tax laws in 1976 and changes in the New Jersey state tax laws in 1989 enable the trust to qualify as a real estate investment trust under federal and state laws while operating as a conventional Delaware corporation. Currently, the trust operates as an unincorporated business trust.

Landy stated that the principal reason for the change is that the trust prefers to operate under the established Delaware corporate law. Landy further stated that the change to corporate status will not involve any substantial change in the operation of the trust.

The trust's shares will continue to be listed on the NASDAQ National Market System. The old certificates of beneficial interest will automatically become shares of common stock in the new corporation under the terms of the merger agreement.

ATLANTA (JUNE 26) PR NEWSWIRE - BellSouth (NYSE: BLS) announced today its international unit, BellSouth International, has been awarded a license to

provide cellular telephone service in New Zealand by that country's Ministry of Commerce.

"The agreement enhances BellSouth's international presence in wireless communication and particularly in this region," said Charles B. Coe, president of BellSouth International. "We currently serve 140,000 paging customers in Australia through our Link and SkyPage companies, and hold 43 percent of the Australian paging market."

The New Zealand market has 3.5 million potential customers. BellSouth is a leader in the provision of wireless communications services with more than 500,000 cellular telephone customers and approximately 850,000 paging customers. BellSouth provides wireless services in the United States, Australia, Europe, Argentina and Mexico.

#90177p9773 06/26/1990 ~PR Newswire

DALLAS (JUNE 26) PR NEWSWIRE - Richmont Corporation today announced that Avon Products, Inc. (NYSE: AVP) has terminated discussions with its chairman, John P. Rochon, concerning Rochon's acting as a consultant to

Avon's special committee.

Richmont Corporation, an entity owned by current and former officers of Mary Kay Cosmetics, Inc., including John P. Rochon, entered into a services agreement effective April 1, 1990, pursuant to which Richmont will manage Mary Kay's investment in Avon.

Earlier this year, Chartwell Associates waged a proxy contest with respect to Avon's 1990 election of directors. Chartwell Associates L.P. is an investor group formed for the single purpose of pursuing investments in Avon Products, Inc. Its principal partners include members of the Fisher real estate family of New York, investor Gordon P. Getty, and the investment arm of Mary Kay Corporation.

Avon and Chartwell settled the proxy contest by Avon's agreeing to nominate two of Chartwell's executives to the Avon board, and to enter into a consulting arrangement with John Rochon. As part of the settlement, Avon established a special committee consisting of the two Chartwell executives and four other Avon board members for purpose of maximizing shareholder value.

The discussions which Avon has terminated were those relating to the consulting arrangement with Rochon. Rochon, through Argonaut Partners, remains a managing partner of Chartwell.

Richmont noted that one of the primary areas of disagreement between Avon and Rochon was Avon's unwillingness to agree that Rochon could report to and act as a consultant to the special committee, rather than to James Preston, Avon's chief executive officer.

Rochon had previously announced that he would resign his position as vice chairman of Mary Kay Corporation upon signing the consulting agreement with Avon. In light of Avon's termination of discussions with Rochon and Avon's failure to enter into the previously announced consulting arrangement, Rochon has agreed to continue as vice chairman of Mary Kay.

#90177p9774 06/26/1990 ~PR Newswire

BURLINGTON, MA (JUNE 26) PR NEWSWIRE - A pair of Massachusetts high-technology companies - one a software tools developer, the other an object database firm - have created a toolkit that automates code generation, allowing users to design, change, and store real-world models without the need for upfront program procedures.

The tool producer is Associative Design Technology (ADT), of Westborough,

an object-oriented methods education and consulting firm. The object database developer is Ontologic, Inc., of Burlington.

Their two products - Ptech software and ONTOS object database - together create a system that reduces the need for programming through automatic code generation, enables users to alter concepts and designs in real time, and creates new tools on demand.

"Tools will be available at the beginning of a program, rather than at the end, and any flaws or mistakes can be fixed immediately at any point in the design process," said Seaforth M. Lyle, president of Ontologic, Inc.

John C. Edwards, president of ADT, said that Ptech and ONTOS provide the first system ever to provide design tools, automatic code generation, and database management.

"Joining Ptech to ONTOS is like placing a turbocharger on a race car," Edwards said. "It simply will be the most powerful, high-performance system ever to support conceptual modeling, analysis, design, prototyping, and code generation in concert with object databases."

Ptech/ONTOS, which generates C plus plus version 2.0 application code, will have valuable uses in concurrent engineering, making it far easier to build and manipulate data-intensive applications, Edwards said.

"As a concept schema for design processes, the system allows users to perform multiple tasks simultaneously and to detect when a proposed product is non-manufacturable," he noted. "It also enables them to graphically display concepts and interact at all levels to ensure that models and blueprints are consistently accurate."

Ptech/ONTOS initially will be UNIX-based and run on SUN III and IV workstations. Other platforms will be added according to market needs, Lyle said.

Prices for the system range between $32,500 and $50,000. Test sites are using the software now, and first customer shipments are in December. For more information, contact: Ontologic, Inc., Three Burlington Woods, Burlington, Mass. 01803, (617) 272-7110; Associative Design Technology, Two Westborough Business Park, Westborough, Mass. 01581-3199, (508) 366-9166.

#90177p9777 06/26/1990 ~PR Newswire

NORWOOD, MA (JUNE 26) PR NEWSWIRE - Microcom (NASDAQ: MNPI) today announced the availability of the Microcom MNP Cellular(TM) Modems -- a new family of MNP(R) modems designed specifically for the challenges of communicating in a cellular environment.

"The MNP Cellular family offers an unbeatable combination of performance, price and portability," stated Richard Sterry, the vice president of Product Marketing, "and opens the door to an array of exciting applications in areas such as insurance appraisals, delivery services, medical records and public safety."

The new MNP Cellular Modems include the C96(TM) and the M96(TM). Both models rely on MNP Class 10 -- the most recent addition to the Microcom Networking Protocol(TM) (MNP) -- to attain throughputs exceding 9600 bits per second (bps) over cellular telephone circuits. MNP 10 is designed to optimize data transmissions over poor lines including cellular, international, rural and other types of adverse channels.

Added Sterry: "The performance benefits of the MNP Cellular Modems are optimized in applications where the M96 and C96 are used in tandem. However, one of the primary advantages of MNP Cellular is that it is fully compatible with existing land-line technology. This means that users don't need to purchase separate modem products for their cellular and land-line applications."

AC-powered, the C96 is designed for use in central sites with a fixed land-line connection on one end of the transmission. For example, traveling professionals, such as salespersons, journalists or service personnel, alternate dialing in over land-line technology (from the home or remote office) and from the road. Use of the C96 at the central site enables the salesperson or other professional to obtain maximum performance in either scenario.

The DC power interface makes the M96 ideal for mobile environments. The M96 connects to a 12 volt power source such as the cigarette lighter in a commercial vehicle. For example, using the M96 to enhance cellular connections, a paramedic may be able to check a patient's medical history en route to the hospital.

Microcom is a workstation connectivity company headquartered in Norwood, Mass.; with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas, Puerto Rico; and international offices in France, Hong Kong, and the U.K. Principal product lines include Protocom Modems(TM); LAN Bridging products; Carbon Copy(TM); RELAY Gold(R) and Virex(R) communications software packages, and ISDN products.

BURLINGTON, MA (JUNE 26) PR NEWSWIRE - Ontologic, Inc., an object-oriented database firm headquartered here, has raised $4 million in additional financing by a prominent group of investors.

At the same time, Seaforth M. Lyle was named chairman of the board of Ontologic, and will retain his title as president and chief executive officer of the firm. Lyle joined Ontologic in 1986, coming from Banyan Systems, Inc., of Westborough, Mass., where he was executive vice president.

"The new financing will enable us to continue to expand our sales and distribution channels, as well as accelerate our software partnerships," Lyle said.

"The combination of Ontologic's steadily growing revenue stream and this injection of capital puts the company in a very strong financial position," he said. "It also will help us significantly expand our consulting and application engineering services."

Investors include Alan Patricof Associates, the Phoenix Partners, Kleiner, Perkins, Caufield & Byers, First Century Partners, and Wolfensohn Associates.

ONTOS, Ontologics' second-generation object database, began shipments last October and is installed in over 125 sites in the United States, Europe, Canada, Australia and Japan.

WAUKEGAN, IL (JUNE 26) PR NEWSWIRE - Outboard Marine Corp. (OMC) (NYSE: OM) announced today that its Canadian subsidiary, Outboard Marine Corporation of Canada, Ltd., has purchased Altra Marine Products Inc., a privately held aluminum boat manufacturing company based in Princeville, Quebec.

Altra builds Princecraft/Springbok boats. The company's product line includes aluminum fishing, runabout and utility boats from 12 to 23 feet in length and pontoon boats up to 32 feet in length. The acquired assets include two boat manufacturing plants in Princeville and a third plant in

Plessisville, Quebec. OMC said manufacturing operations would continue in those locations.

"Altra's products are highly respected by Canadian boaters and currently enjoy strong sales throughout Canada," said OMC President and Chief Executive Officer James C. Chapman. "In the longer term, we look forward to expanding sales of these high-quality boats in other markets," he added.

Chapman said Altra's operations will be part of OMC's international group headed by OMC Vice President and International Group President Dennis L. Jacobson. According to Jacobson, Altra's present management team, including President Marcel Dubois, will continue to manage the company. Dubois will report to OMC Canada President and General Manager Dennis L. Koster.

Altra is the second boat manufacturer outside the United States to be acquired by OMC. The first was RYDS Batindustri AB of Sweden, which was purchased in October 1988.

Outboard Marine Corp. is a leading international marketer of marine engines, boats, accessories and services.

TOMS RIVER, NJ (JUNE 26) PR NEWSWIRE - Grayhound Electronics, Inc. (NASDAQ: GRAY), today announced it signed an agreement with EnviroMonde Malone International Inc. of Ottawa to distribute "No Fire"(R) products in Canada. An initial order of 12,000 gallons has been recieved and a minimum of 100,000 gallons for the year has been agreed upon. The initial applications will be in the area of mining. Many other areas of use have been discussed.

"The first major order has been a long time coming," stated Thomas Ricci, president. "But as we have predicted we are right on schedule. As in every new product line there is always initial testing and continued testing to be done, manufacturing to be considered, and marketing to be developed. All of these areas of development have taken a great deal of time. Grayhound has moved forward very cautiously and sometimes too slowly for some people. However, I feel Grayhound has done the right thing for the product No Fire and the company."

PRINCETON, NJ (JUNE 26) PR NEWSWIRE - The Liposome Company, Inc. (NASDAQ: LIPO) announced today that Stephen L. Saletan, M.D., has been appointed to the newly created position of vice president, medical affairs, to direct the company's growing clinical testing program.

Saletan has extensive experience in clinical research with a specific focus on oncology. Prior to joining the Liposome Company, Saletan spent five years at Lederle Laboratories, a division of American Cyanamid in their medical research division, most recently as director- clinical research, oncology. He was responsible for managing the global clinical trials program for a variety of anti-cancer drugs, including Novantrone(R) as well as a monoclonal antibody program directed at various types of cancer.

Saletan will be responsible for all the Liposome Company's medical activities including the design and execution of all clinical trials. He will also play a key role in communications with the FDA, the National Cancer Institute, and all worldwide regulatory authorities. Presently, the Liposome Company has three products in clinical trials:

-- TLC D-99 (liposomal doxorubicin) an anti-cancer drug in Phase II. --
TLC G-65 (gentamicin liposome injection) for the treatment of MAI (mycobacterium avium intracellulare), an opportunistic infection that affect 30-50 percent of AIDS patients.

-- TLC ABLC (amphotericin B lipid complex), an antifungal drug licensed to Bristol-Myers Squibb in Phase II.

Commenting on Saletan's appointment, the company's chairman. Charles A. Baker, said, "We are extremely pleased to have someone of Dr. Saletan's experience and expertise join the Liposome Company management team at this time. Dr. Saletan is exactly what this company needs, given the fact that three of our products are being tested in the clinic and are well on the road to eventual commercialization."

Saletan received his undergraduate degree from Harvard University in 1972, and his M.D. degree from Harvard Medical School in 1976. Thereafter, he interned and completed his residency and hematology/oncology fellowship at Cornell Medical Center, followed by a research fellowship at Sloan-Kettering Institute. He later was an assistant professor of medicine at the State University of New York at Stony Brook. Saletan is board certified in internal medicine, oncology and hematology.

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, the Liposome Company is developing pharmaceutical products designed to enhance the therapeutic benefit of existing drugs. The company is primarily focused on developing advanced liposomal drugs for the treatment of cancer and serious infectious diseases.

NEW YORK (JUNE 26) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced the completion of a three-year, $32.5 million revolving credit facility with a bank group led by Morgan Guaranty Trust Company as agent. In addition to Morgan Guaranty Trust Company, participating banks include Bank of New York, Manufacturers Hanover Trust Company and Harris Trust and Savings Bank.

Alfred T. McNeill, chairman of Turner, said "This new committed credit facility represents an important element of our broad capital program to strengthen the company financially and assure short term liquidity."

Based in New York City, the Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, the Turner Corporation completed $3.6 billion of construction.

MINNEAPOLIS (JUNE 26) PR NEWSWIRE - First Team Sports, Inc. (NASDAQ: FTSP), makers of Ultra-Wheels and related products, has entered into a promotional agreement with USA Hockey, Inc. First Team Sports will be the official supplier of in-line skates used for training by Team USA hockey players. The agreement will allow FTSP exclusive use of the Team USA logo in its marketing of in-line skates, and will offer other various promotional opportunities. Team USA will be allowed to market Ultra-Wheels through USA Hockey. The agreement extends through the 1994 Olympics.

David Soderquist, president of Ultra-Wheels, said, "We are very pleased to continue the relationship begun in 1988 with USA Hockey. The extension of the agreement with Team USA will be very beneficial from a marketing standpoint as we approach the 1992 Olympics."

Walter L. Bush, Jr., president of USA Hockey, said, "We're excited about continuing our relationship with FTSP. Their Ultra-Wheels product will give our Team USA members the competitive edge they'll need as they go for the gold in 1992."

First Team Sports, Inc., which is publicly owned and traded under the symbol FTSP, is a five-year-old company based in Minneapolis.

DEARBORN, MI (JUNE 26) PR NEWSWIRE - Richard Haupt, who has played a key role with Ford Motor Company's Purchasing and Supply Staff as director of the Transportation and Traffic Office, will retire on July 1 after 40 years with the company.

Charles F. Wilkins, who presently is manager of the Staff's Transportation

Analysis and Procurement Department, will succeed Haupt. In his new position, Wilkins will direct the company's worldwide traffic and transportation activities.

"During his 40 years with the company, Dick Haupt has made significant contributions to the company's transportation and traffic activities through innovative plans and programs," said Clint Lauer, Ford vice president - Purchasing and Supply. "His unique stature in the industry has earned him top recognition from various worldwide traffic clubs and societies."

Haupt joined Ford in 1950 as a trainee in the Traffic Department of the company's Manufacturing Staff and served in several traffic assignments before being named manager of the International Traffic Department in 1963. He has been director of the Transportation and Traffic Office since February 1964.

Wilkins joined Ford in 1960 as an analyst on the Purchasing Staff. He held a number of traffic and purchasing positions with various company components before becoming manager of traffic and transportation for Ford of Europe in 1972.

He became transportation manager for Automotive Assembly Division in 1974 and manager of the Transportation Analysis and Procurement Department for Purchasing and Supply Staff in 1981.

NORCROSS, GA (JUNE 26) PR NEWSWIRE - Immucor Inc. (NASDAQ-NMS: BLUD), maker of blood bank reagent systems and related products, announced today the company has received approval from the U.S. Food and Drug Administration to market two additional solid phase blood tests, Capture-R Ready-Screen(TM) and Capture-R Ready-ID(TM).

Based upon proprietary, cell drying technology, and other patented technology, Capture-R Ready-Screen is a second generation diagnostic test for the detection of unexpected antibodies to red blood cells.

Screening for red cell antibodies is performed on all blood samples from patients and donors selected for transfusion therapy, and Ready-Screen provides increased sensitivity, a further reduction in technologist time, and preloaded, dried, Capture plates.

Capture-R Ready-ID is a new solid phase, antibody identification test. Ready-ID will be prepackaged with specially selected, dried red cells. If

a screening test is positive, a laboratory will be able to easily determine which antibody is present in patient or donor serum.

Commenting on the FDA approval, Edward L. Gallup, president of Immucor Inc., stated: "These two product releases add significantly to our growing solid phase product offerings.

"In fact, FDA clearance was received earlier than anticipated, and manufacturing scale-up will not be completed until the fall of this year. However, we will be in a position to actively promote the products and anticipate sales revenue in the second half of our current fiscal year."

Founded in 1982, Immucor manufactures and sells a complete line of reagents and systems used primarily by hospitals and blood banks in a number of tests performed to detect and identify certain properties of the cell and serum components of human blood prior to blood transfusion.

RESTON, VA (JUNE 26) PR NEWSWIRE - Robert L. Stephens has been named president of Lucas Weinschel Inc., Gaithersburg, Md.

The announcement was made by Wayne Coffin, president and chief executive officer of the communications and electronics division of Lucas Aerospace.

Lucas Weinschel designs and produces microwave components, microwave test and calibration equipment. They produce these components for primary and secondary laboratories, quality control centers, maintenance depots, and production lines.

Stephens joined the company in 1988 as financial controller and has been acting president since October, 1989. He has had experience with various companies including 11 years with Xerox Corp., where he received outstanding employee awards on two occasions.

Stephens grew up in Ovid, N.Y., and attended Ovid Central High School. He holds a bachelor of science degree from Rochester Institute of Technology and has more than 20 years in a variety of technical management positions. He lives in Ellicott City, Md., with his wife and two children.

With annual sales approaching half a billion, Lucas Aerospace's North American presence now involves more than 4,300 employees based in 16 operating locations in the United States and Canada. Lucas Aerospace Ltd. with 12,000 employees and sales of $1 billion, has operations in North

America, the United Kingdom and France, and marketing facilities in many other countries. Lucas Industries plc, with more than 56,000 employees and revenues of more than $3.5 billion, has international interests in aerospace, automotive and industrial markets throughout the world.

MIAMI (JUNE 26) PR NEWSWIRE - Eastern Airlines has realigned its flight operations division and named Donald C. Davidson vice president.

The company also appointed Paul A. Richardson, staff vice president-program development and administration; Todd Jennings, staff vice president-flying; and Lee P. Steele, staff vice president-system operations.

Bill Stephens remains as staff vice president-technical services and FAA Liaison.

The changes were announced by Joseph B. Leonard, executive vice president and chief operating officer. He described the moves as "strengthening an already superbly functioning unit with veteran line pilots who bring a total of 120 years flight experience to their assignments."

Capt. Davidson has been a pilot with Eastern for 27 years on the DC-9, Boeing 727 and L-1011, while also serving as a check airman on South American routes. He has been active with the airline's Pilot Communications Group and Office of Pilot Relations.

Capt. Richardson is also a 27-year veteran who had been director of safety and standards. Previously, he was DC-9 fleet manager and manager of cockpit resource management training, assistant chief pilot, check airman and flight instructor.

Capt. Jennings joined Eastern in 1963 and most recently was director and chief pilot in Atlanta, hub of the airline's operations. He also serves as manager of pilot support after being a check airman for 10 years.

Capt. Steele was assistant chief pilot in Atlanta. Earlier, he was assistant to the system chief pilot and second officer supervisor. Before joining Eastern 10 years ago, he was a U.S. Air Force pilot.

Capt. Stephens has had several major assignments during his 29-year Eastern career, including staff vice president-flying, system chief pilot, vice president-flying operations, director flight training and manager of

flight standards.

#90177p9823 06/26/1990 ~PR Newswire

NEW YORK (JUNE 26) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL), operator of the Negev Venture 2, announced today that testing has been concluded in the exploratory Yam 2 well drilled off the coast of Israel. Testing of the perforated interval 12,902-12,922 feet was non-productive.

The high-quality 47 degree API oil which flowed from the deeper zone from perforations at 17,414-17,440 feet at an initial rate of 800 barrels a day are the first hydrocarbons discovered offshore Israel and indicate the possibility of a major development project. The flow rate was obtained on a drill stem test, without the planned acidization, a procedure often used to increase the flow in limestone formations.

The Yam 2 was drilled on a very large anticlinal structure paralleling the coast line extending over 11,500 acres with 1,500 feet of vertical relief. It is therefore feasible to drill additional wells to determine the lateral extent of the producing reservoirs of oil across the Yam structure.

The size of the Yam structure and its close proximity of ten miles to the port of Ashdod, which is Israel's second largest sea port and the relatively shallow water (less than 300 feet) indicate that should the decision be made to develop it, the cost would be significantly less than is usually associated with offshore fields.

Further contributing to the cost effectiveness of developing this field is the fact that once on shore the oil will be distributed through Israel's already existing infrastructure. It would not be necessary to build expensive facilities to refine and deliver the oil.

Of even greater importance, Israel is a ready market since the country imports about 150,000 barrels of oil per day. Because the oil produced from the Yam structure is likely to be consumed in Israel, rather than exported, it would not be necessary to undertake the huge costs of constructing storage and port facilities.

Adding to the attractiveness of the economics bringing the Yam structure into development, is the existence of several similar geologic structures within the Negev Venture 2's present exploration license areas, which have been seismically mapped and are also potential candidates for drilling now that oil has been discovered.

In addition, the possibility remains for oil or gas reservoirs on the Yam structure deeper than was reached in the Yam 2. This will be investigated in the future.

At this stage, now that the tests have been completed, the necessary work is proceeding to release the drilling equipment from the site and activities at the Yam 2 well will be temporarily suspended. After a decision has been made concerning future development, it will be possible to return to the Yam 2 for further exploration and/or production.

WASHINGTON (JUNE 26) PR NEWSWIRE - American Mobile Satellite Corporation (AMSC) has signed a memorandum of understanding (MOU) with Motorola Inc. (NYSE: MOT) of Schaumburg, Ill., to explore jointly the potential of Motorola's proposed Iridium satellite communications system.

Iridium is planned as a network of 77 small satellites in low-earth orbit that will allow portable personal communications between mobile users anywhere in the world. In the MOU, AMSC and Motorola agree to cooperate in studying the potential of the Iridium satellite network, including an analysis of the technical and business issues involved.

"AMSC, as the premier U.S. mobile satellite carrier, is intrigued by the Iridium concept," said George Tellmann, chief executive officer of AMSC. "If the concept can be brought to fruition, it could enable AMSC's North American customers to access a global system for personal satellite communications. The MOU is an opportunity for AMSC to explore applications that are suited for low-earth orbit as we continue to develop applications that can best be provided through AMSC's geosynchronous satellites such as aviation safety, resource monitoring, high-speed data, and both message and voice broadcasting."

Motorola Inc. is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include two-way radios, pagers, cellular telephones and systems, semiconductors, defense and aerospace electronics, automotive and industrial electronics, computers, data communications and information processing and handling equipment.

AMSC was licensed by the Federal Communications Commission a year ago to launch and operate the mobile satellite system for the entire U.S., including the continental United States, Hawaii, Alaska, Puerto Rico, the U.S. Virgin Islands and 200 miles of coastal waters. AMSC will begin

providing mobile data services late this year via leased capacity on an existing satellite; full voice and high-speed data services will begin with the launch of AMSC's first satellite in 1993. The current projection for the introduction of the Iridium system fits well with AMSC's strategic planning for future system enhancements.

WILMINGTON, DE (JUNE 26) PR NEWSWIRE - Aqualon, a wholly owned subsidiary of Hercules Inc. (NYSE: HPC), today announced it has been informed that the International Trade Commission (ITC) has completed its investigation of a nitrocellulose antidumping petition initiated in September 1989 by the company with respect to imports of nitrocellulose from Brazil, the People's Republic of China, Korea, the United Kingdom, West Germany, Japan and Yugoslavia.

With a 5-0 unanimous vote, the ITC found that dumping of industrial nitrocellulose in the United States by six of the countries listed as respondents had resulted in injury to the domestic industry. The final decision on Yugoslavia is due in August.

As part of the same antidumping case, the Department of Commerce had independently found dumping margins varying among the seven countries from 3.84 to 78.4 percent.

According to an Aqualon spokesman, "As part of its ongoing commitment to its nitrocellulose customers, Aqualon will continue to support the industry with a complete line of products and services, which includes the broadest product line offering, a technically trained sales organization, safety services, and a full-service coatings application lab and development staff.

"Our objective all along was to ensure that we be given the opportunity to compete on a level playing field and be in a position to support the industry and our customers as we have for over 50 years," he noted.

HOUSTON (JUNE 26) PR NEWSWIRE - St. George Metals, Inc., a Houston-based gold exploration company, and joint venture partner, Reynolds Metals Exploration Co., Richmond, Va., announced acquisition of additional

properties for their Fisher Gold and Carlin joint ventures in Nevada.

St. George Metals and Luning Gold, Inc., a subsidiary of Amax Gold (NYSE: AU), reached agreement under which St. George will purchase approximately 2,200 acres in the Lewis Mountain Mining District near Battle Mountain, Nevada. The northern portion of the property is contiguous with Metals' Lucky Rock, Whisky Canyon and southern Betty O'Neal claims. These claims along with the Red Cap claims, form the Reynolds Metals/St. George Metals Fisher Gold joint venture. The new acquisition, when completed, will become part of the joint venture.

Neal O'Wade Jr., St. George's chairman, president and chief executive officer, said acquisition of the Luning property is particularly meaningful to the Fisher Gold joint venture because ore bodies previously classified by Reynolds Metals and St. George on the Lucky Rock and Whisky Canyon claims as resources warranting continued investigation extend east and southward into the Draco ground.

The joint venture's current drilling program is designed to further investigate and evaluate these resources to determine whether or not the ore bodies are commercial.

Reynolds Metals Exploration Co. announced it has acquired a lease on Section 16 T34N, R50E (640 acres) in Nevada's Carlin trend, which will be added to its Carlin joint venture with St. George Metals. These new Richmond claims are located midway (north/south) between the venture's current VEK/Andrus claims and are surrounded by Newmont Gold claims.

Several select surface samples from the property assayed between .18 and .25 ounce gold per ton. Exploration of the Richmond claims will be integrated into the Carlin joint venture drilling program.

The Vancouver Stock Exchange, on which St. George Minerals Inc. is listed, has neither approved nor disapproved the content of this release. St. George Minerals is also approved for trading in the United States under the 12-G exemption number 82-1358.

Several select surface samples from the property assayed between .18 and .25 ounce gold per ton. Exploration of the Richmond claims will be integrated into the Carlin joint venture drilling program.

St. George Metals, Inc., currently the U.S. operating subsidiary of St. George Minerals Inc., announced earlier that Minerals shareholders, at its May 31 annual meeting in Vancouver, B.C., voted to consolidate with Metals and to liquidate Minerals, a Canadian company. With today's announced acquisitions, St. George Metals now controls or owns some 35,000 acres in the Battle Mountain and Carlin trends in northern Nevada. The company is actively exploring this acreage for its own account and through three joint ventures with Reynolds Metals Co. of Richmond, Va., and a venture with Billiton Minerals U.S.A., a division of Shell Oil Company.

The Vancouver Stock Exchange, on which St. George Minerals Inc. is listed, has neither approved nor disapproved the content of this release. St. George Minerals is also approved for trading in the United States under the 12-G exemption number 82-1358.

#90177p9836 06/26/1990 ~PR Newswire

PITTSBURGH (JUNE 26) PR NEWSWIRE - Paul H. O'Neill, chairman and CEO of the Aluminum Company of America (Alcoa) (NYSE: AA), called for a national energy tax as the only viable way to address the mounting environmental problems of the United States, the Air & Waste Management Association said Monday.

Speaking at the 83rd Annual Meeting & Exhibition of the Air & Waste Management Association at the David L. Lawrence Convention Center in Pittsburgh, O'Neill challenged the Bush administration to reduce the federal deficit with the energy tax revenues in order to promote the investment that will generate the necessary environmental dollars.

"As I think about the environment," said O'Neill, "nothing seems clearer to me than the seemingly unseverable connection between the condition of the environment and energy utilization. In fact, if we were limited to only one policy intervention to improve the environmental condition and future in the United States, I would choose a policy aimed at energy productivity and conservation.

"And because I think our economic system does a great job of translating general incentives into specific actions, my choice of a policy instrument would be a federal tax on energy."

When asked how he felt Congress would respond to such a tax, U.S. Rep. Doug Walgren (D-Pa.), also speaking at the meeting, said that it would only succeed if it were a truly bi-partisan effort, or if the president took the lead.

Michael R. Deland, chairman of the president's Council on Environmental Quality, stressed that the real answer to pollution control is to eliminate it at the source. "We must shift our focus to pollution prevention," he said, "rather than spending millions or billions to clean up a mess at the end of the pipe."

According to Deland, "Pollution prevention -- not pollution control -- will be the centerpiece of the Bush administration's environmental agenda."

The Air & Waste Management Association speaks for more than 10,000 environmental professionals throughout the world, many of whom have been instrumental in shaping the environmental advances that comprise the nation's environmental agenda. A primary topic at the meeting, attended by more than 5,000 environmental professionals, has been the impending passage of the new Clean Air Act. Since a major concern centers on how to afford the implications of such legislation, reaction to O'Neill's recommendation that energy tax revenues be applied to the federal deficit

were mixed. Many members countered that a more direct application of the funds to the energy programs might be more beneficial.

Walgren stressed, however, that unless the deficit was brought under control, the United States would lose its ability to be competitive as an economy. When asked whether, in the face of this deficit, the United States would support a Marshall-type plan for Eastern Europe, Walgren answered hesitantly that there would be support but it wasn't clear how the funds would be identified.

SAN FRANCISCO (JUNE 26) PR NEWSWIRE - Media Express, a 60-minute video magazine specifically designed for broadcast executives, will debut via satellite on tomorrow, June 27.

The magazine, a compilation of video news releases, P.I. advertisements, and PSA's will feature Mike Hughes, president of Media Express and former correspondent for CNN in Los Angeles, and Laura Washburn, TV newcomer and former newspaper reporter. The innovative video magazine will be broadcast Wednesday, June 27, 10 a.m.- 11 a.m. (PDT) via satellite Westar 5-9 Direct.

Highlighted in the broadcast will be a video news release and PSA narrated by Dick Cavett for Making Medicine Work, a non-profit medical foundation based in Chicago. Also included in the broadcast will be direct-response venture advertisements for Arnold Schwarzenegger's Workout Video, and products from acclaimed inventor Billy Styles as well as station promotions and air-talent video resumes.

"I see the video magazine as a way for broadcast executives to fill their many different programming and personnel needs. It's extremely watchable and easy to use," explained Hughes.

Media Express is a division of Publicity Express, a seven-year- old San Francisco-based company that represents authors, experts, inventors, services, and entrpreneurs in all media.

#90177p9841 06/26/1990 ~PR Newswire

SAN JOSE, CALIF. (JUNE 26) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations, today introduced Radius DirectColor/GX(TM), a 24-bit interface card with on-board acceleration which can display up to 16.7 million colors, providing a cost-effective way for users to work with photographic quality images.

In announcing Radius DirectColor/GX, Michael Boich, president of Radius said, "DirectColor/GX provides the best price/performance of any 24-bit display interface card. DirectColor/GX is another example of Radius' modular design approach, and is an integral part of the new RadiusTV(TM) environment." DirectColor/GX Overview

DirectColor/GX can display up to 16.7 million colors on an Apple 13" RGB display using any of the Macintosh II family computers. In addition to the full spectrum of colors, DirectColor/GX offers on-board acceleration for 32-Bit QuickDraw operations, providing a six times speed improvement over unaccelerated QuickDraw operations.

DirectColor/GX is designed as an integral component of Radius' Professional Color Systems offering. DirectColor/GX is fully compatible with the Radius PrecisionColor(TM) Calibrator, providing the ability to adjust screen output for color accuracy and offering complete PANTONE(R) color matching capability. DirectColor/GX is also fully compatible with the RadiusTV system, providing a cost-effective display option for interactive media applications, and Radius QuickCAD, a display processing engine for CAD on the Macintosh. Additionally, DirectColor/GX provides full NTSC timing rate video output. Integrated Graphics Acceleration

DirectColor/GX includes a high speed 32-bit QuickDraw graphics engine. Graphics functions such as scrolling, moving and sizing windows, drawing 32-bit PICTS and drawing horizontal and vertical lines are accelerated by up to 600 percent. DirectColor/GX is completely compatible with applications running in the 32-bit QuickDraw environment. RadiusTV Video Compatibility

Radius Inc. is the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations. Radius products are available through a worldwide network of Radius Authorized Resellers.

#90177p9842 06/26/1990 ~PR Newswire

SAN JOSE, CA (JUNE 26) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics

engines for personal workstations, today introduced RadiusTV(TM), an integrated computer/television subsystem for Macintosh II personal computers.

RadiusTV represents a complete merging of television functionality into the Macintosh environment, and features a powerful new development environment designed to facilitate the porting and development of application software solutions to this feature-rich integrated media platform.

In announcing RadiusTV, Michael Boich, president of Radius said, "With the introduction of RadiusTV, we see a collision happening between computers and television which will result in an explosion of new applications that none of us can even imagine today.

"The addition of television to our systems will provide a significant increase in the kind and volume of information available to the user and will pave the way for great improvements in the way computers tackle conventional problems."

RadiusTV features a video processing engine, an external audio video input processor and television tuner that bring complete television functionality into the Macintosh environment.

RadiusTV is capable of displaying and digitizing live 16-bit video images in real-time (30 frames/sec.) in a resizable window of up to 640 x 480 pixels. RadiusTV also digitizes sound in real-time, and provides access to information included in the television signal's vertical interval, such as closed captions and calibration settings, making complete control and processing by the Macintosh possible.

"RadiusTV represents the broadest, most complete integration of television into the computer environment. Unlike video products available for personal computers, RadiusTV incorporates not just the video image but all the elements of the television signal," said Andrew Singer, Radius vice president of engineering.

"This broad set of television functions, combined with the most comprehensive set of developer tools, effectively provides a complete platform for applications such as business television, image capture, interactive training and education and presentations."

RadiusTV includes an integrated, cable-ready television tuning system that can receive live broadcasts. Many different video and television devices can be used as sources with RadiusTV, including TV/Cable broadcasts, RGB and still video cameras, video laserdisc players, VCRs, and VTRs. The Radius Audio Video Input Processor permits several devices to be software controlled and selected without switching cables.

VIENNA, VA (JUNE 26) PR NEWSWIRE - Quantum Computer Services, Inc., today introduced Promenade, an online service that will be offered with the IBM PS/1 computer.

The announcement of the PS/1 marks the first time that a home computer has been introduced with a built-in modem (a telecommunications device) and online services to provide families immediate access to live, interactive education and entertainment services.

"We developed Promenade based on what consumers said they were looking for in a new computer for the home according to IBM's research," said Steve Case, executive vice president of Quantum Computer Services. The results revealed that educational benefits were highly valued. To meet this need professional teachers will provide live online classes to help family members learn how to use and expand the PS/1 computer. Personal and professional growth opportunities are made available through subjects such as foreign languages, accounting, gourmet cuisine and more.

Additionally, a complete online encyclopedia enables users to tap in to continually updated reference information. Nightly homework help tutoring sessions are available on many subjects, including English, algebra and history.

Family members can discover new software in Promenade libraries that feature more than 7,000 software titles. PS/1 owners can scan the software descriptions in the libraries, then in a simple, single-step procedure, "download" or transfer these software programs to their PS/1, for just pennies, where they can be used immediately.

To offer help with new software, Promenade provides online meeting places, or "forums," where PS/1 owners can communicate directly with computing experts and leading software publishers. Forums offer computing tips and fast answers to individual questions from PS/1 owners.

Multi-player games on Promenade feature stimulating graphics and animation and offer a "human touch," since users play against other people, not just their machines. Families can share their hobbies with others from around the country in special interest clubs including sports, genealogy and science fiction. Nightly events feature comedy routines, trivia contests, game shows and more.

Promenade's easy-to-use services are accessed through graphic, "mouse"-controlled software developed by Quantum especially for the IBM

PS/1 computer. "The Promenade interface makes it easy for all family members to use the services, without dealing with the frustrations of complicated commands and functions. Yet the software is advanced enough to satisfy experienced users of online services," according to Case.

Promenade's interactive education and entertainment services will complement the services offered by the PRODIGY service, also included with the PS/1 computer.

Quantum Computer Services, Inc., founded in 1985, provides three online services for the consumer market: American Online, PC-Link, and Q-Link.

BRENTWOOD, N.Y. (JUNE 26) PR NEWSWIRE - Allou Health & Beauty Care, Inc. (AMEX: ALU), one of the largest distributors of branded nationally advertised health and beauty aids, prestige fragrances and cosmetics in the Northeast, today announced record revenues and earnings for the fiscal year ended March 31, 1990.

"By extending the geographic scope of our operations, adding new accounts, and expanding our product mix, we were able to achieve record revenues of $71 million in fiscal 1990 compared to $59 million in the previous year. This growth trend is continuing into the first quarter and we anticipate another year of record revenues and earnings," Herman Jacobs, president, said.

"We are now selling as far south as Florida and have added the Philadelphia metropolitan area. In addition, we sell our cosmetics and prestige fragrances nationwide by catalog. We are expanding our chain store business through K-Mart, Thrifty Drugs and others, recently added food products to our line and we are giving more emphasis to prestige fragrances and cosmetics and Allou brands which have higher margins," Jacobs explained.

"The company's national mail order business, which is growing rapidly, will add about $4 million in sales this fiscal year and is expected to surpass $8 million by 1993," Jacobs added.

For the fiscal year ended March 31, 1990, Allou had revenues of $71,341,928 compared to revenues of $59,193,832 for the previous year. Net income was $860,964, or 40 cents per share, against $809,171, or 37 cents per share last year. (Per share earnings have been adjusted to reflect an initial public offering in July 1989 which substantially increased the shares outstanding.)

#90177p9846 06/26/1990 ~PR Newswire

GREENSBORO, NC (JUNE 26) PR NEWSWIRE - The Harris-Teeter grocery chain is being sued by a former grocery manager at one of its Greensboro stores who claims he was forced to resign in September 1988 after complaining about unpaid overtime work.

Total damages could exceed $100,000, the plaintiff's attorneys believe. The suit, filed Friday in U.S. District Court here, alleges that Michael L. Hall of Ruffin was demoted to stocker, directed to take a polygraph examination, and forced to quit after protesting unpaid overtime work averaging 12-16 hours per week over a nearly three-month period.

Hall is seeking $1,620 in uncompensated overtime plus interest in lost wages as well as benefits for being forced to resign, an action he believes was a "wrongful discharge." Federal law prohibits discrimination against employees who complain about violations of the Fair Labor Standards Act, and North Carolina common law bars the discharge of employees in violation of "public policy," such as laws requiring employers to pay time-and-one-half for all overtime hours.

The suit alleges that Harris-Teeter acted in "bad faith" toward Hall after his complaint by demoting him from manager of its Summit Avenue store to a stocking position at the High Point Road and Adams Farm store and forcing his resignation.

Hall also contends that he was not offered the opportunity to purchase continuation health insurance at the company's group rate as required under the 1985 COBRA law. Employers who violate COBRA are liable for a $100 per day fine, payable to the employee, for failing to notify employees of their right to elect continuation coverage for up to 18 months, plus a potential $200 a day excise tax for not providing the coverage to an employee with eligible dependents.

Attorneys from the United Food & Commercial Workers Union are assisting Hall in the suit, which is the second brought by the union in recent months against a Carolina grocery chain. In March, union attorneys helped a former Food Lion employee file a class action suit alleging a scheme to terminate employees to restrict eligibility for profit-sharing benefits and a failure to offer COBRA coverage to terminated workers.

UFCW Local 204 represents Harris-Teeter warehouse employees, but Hall, like all of the company's store workers, is not a union member. No Food

Lion employees are union members.

The suit filed Friday contends other Harris-Teeter employees have been forced to work unpaid overtime. Last fall, union representatives handbilled Harris-Teeter stores with information about violations of wage-and-hour laws and other federal labor laws.

Other Harris-Teeter employees have contacted the union about similar violations, attorneys said, and the cases are being investigated to determine if they should be added to this suit.

SPRINGFIELD, IL (JUNE 26) PR NEWSWIRE - United Trust, Inc. today announced that the company's application to the National Association of Securities Dealers has been approved and its common stock, listed on the NASDAQ Exchange, trades under the symbol UTIN.

In a statement about the new listing, Larry E. Ryherd, chairman and president, said, "Our NASDAQ listing is one component in United Trust's plan to maintain the phenomenal growth rate that the company has achieved since it was founded in 1984. By listing on the exchange, we can expand our shareholder base in terms of numbers and regions, thereby increasing the audience to which we market our insurance products."

The company's stock can be found in the supplement listing section of NASDAQ quotation reports.

United Trust, Inc., based in Springfield, is an insurance holding company for United Trust Assurance Co. and its subsidiary companies, Cimarron Life Insurance Co. and United Trust Life Insurance Co., and maintains a 32.2 percent interest in United Income.

DALLAS (JUNE 26) PR NEWSWIRE - Retirement Living Communities, L.P., the general partner of Retirement Living Tax-Exempt Mortgage Fund Limited Partnership, announced today that it is commencing a cash tender offer for up to 60 percent of the outstanding beneficial unit certificates (BUC) of

the partnership at $8.00 net per BUC. According to the partnership's most recent published quarterly report, the partnership has 1,264,000 BUCs outstanding; therefore, the offer is for up to 758,400 BUCs. The offer, withdrawal rights and the proration period will expire at midnight, EDT, on Wednesday, July 25, 1990, unless the offer is extended.

The tender offer is subject to certain conditions, including that at least a majority of the outstanding BUCs are validly tendered prior to the expiration date and not withdrawn and that at least 300 BUC holders remain after the transactions contemplated by the tender offer are completed.

The terms and conditions of the offer are set forth in tender offer materials to be filed later today with the Securities and Exchange Commission. The tender offer materials will also be mailed to the BUC holders of the partnership. Georgeson and Company Inc. is the information agent (1-800-223-2064).

The partnership holds a portfolio of five federally tax exempt, participating, non-recourse first mortgage bonds issued by governmental issuers to finance the construction and/or ownership of real estate projects, each of which is secured by a non-recourse note from the owner of the project and a mortgage on such project.

The general partner has stated that it has obtained financing commitments sufficient to purchase the BUCs sought.

ANAHEIM, CA (JUNE 26) PR NEWSWIRE - In a move that reflects the company's focus upon dominating the broadcast industry's large library storage marketplace, it was announced today that Odetics (AMEX: OA, OB) Broadcast Division has named Ray Baldock director of product development and northeastern regional sales manager. Working out of the company's New Jersey office, he will focus on new product development within the company's broadcast cart product family, as 'well as servicing accounts in the northeastern United States. He replaces Jesse Nickels, who is retiring from the broadcast industry after a 43-year career.

"This announcement is a very significant and exciting one," says David Lewis, vice president of Broadcast. "Ray approaches product development from a marketing point of view, and is very customer oriented. This combined with his extensive technical background makes him a very significant addition to our staff."

Formerly responsible for product management of Sony's Automated Systems

product line, Baldock brings to Odetics 16 years of experience in the development and marketing of broadcast equipment. Baldock is a member of SMPTE and is actively involved in establishing standards for television automation.

Prior to joining Sony, Baldock was with RCA, first as a field engineer at RCA International and then as a member of the company's Camden, N.J. engineering staff.

He also served as a member of the engineering staff at ATV-10, Melbourne, Australia.

Baldock has a bachelor's degree in engineering from Caulfield Institute of Technology, Melbourne, Australia. Married, with one child, he resides in New Jersey.

NEW YORK (JUNE 26) PR NEWSWIRE - Citibank, the largest issuer of credit cards in the U.S., said today that it will provide its 14.6 million Visa cardholders nationally with a long distance telephone service offered through MCI Communications Corporation.

The "Citibank Calling Service" is now available to all Citibank Classic and Preferred Visa cardholders at no charge. After registering, consumers can use their Citibank Visa cards as long distance calling cards with savings of up to 22 percent over AT&T's standard calling card rates.

"We've built a reputation as a leader among credit card issuers throughout the U.S., and this program reflects our commitment to providing still another great service to our cardmembers," Richard Srednicki, business manager for Citibank Visa and MasterCard. "The Citibank Calling Service combines all the advantages of Citibank credit cards with the convenience, savings, and service quality of MCI."

Citibank Visa customers can activate the long distance calling card feature -- at no charge -- by calling a special 24-hour, toll-free telephone number, or through enrollment forms included with their account statements this month. Then by using their Citibank Visa account number plus a confidential four-digit code, cardholders can charge calls throughout the U.S. and to more than 170 countries at significant savings.

On signing up, cardholders will receive 30 bonus minutes of long distance calling.

"In the few weeks we've been testing the calling card service, we've received a tremendously positive response from our customers," Srednicki said.

He noted that consumers have been particularly attracted by four major benefits of the new service: first, the simplicity of using their Citibank Visa account number, plus a personal code, as the new calling card number; second, MCI's low rates and a special 24-hour customer service phone number (1-800-876-1100); third, the convenience of long distance calling billed directly to their Citibank Visa account; and fourth, no charge for activating the feature.

An additional feature available through the service is MCI's Premier Calling Plans, which allow customers to buy long distance service by the hour, rather than the distance of the call. Premier Calling Plans permit customers to make domestic and international calls to selected foreign countries and pay a single, flat hourly rate, regardless of the distance or number of calls made, during convenient times when they most often make calls.

Srednicki noted that the Citibank Calling Service will soon be available to MasterCard customers.

Citibank is the largest issuer of Visa and MasterCard in the U.S., with more than 27 million cards outstanding.

MILPITAS, CA (JUNE 26) PR NEWSWIRE - Atari Games Corp., one of the world's leading developers and manufacturers of coin-operated video games, today announced the signing of an agreement to repurchase its stock presently held by Namco America Inc., the wholly owned subsidiary of Namco Ltd., Japan.

While complete details are confidential, part of the agreement calls for Namco Ltd., one of Japan's largest manufacturers of video games and a major shareholder in Atari Games, to sell all of the shares it owns back to Atari Games, along with cash and other consideration. In turn, Namco will receive ownership in Atari Operations Inc. which operates approximately 40 video game arcades in the Western and Southeastern United States.

According to Atari Games, the company will benefit greatly from this transaction. The repurchase of the stock and subsequent sale of Atari Operations will provide Atari Games with new opportunities to conduct business in Japan and the Far East.

Closure of the transaction is subject to the approval of both parties' board of directors.

Atari Games Corp. is one of the world's leading developers and manufacturers of coin-operated video games and is headquartered at 675 Sycamore Drive, Milpitas, Calif., 93505, 408-434-3700. Atari Games is a privately held company whose majority shareholder after the transaction will be Time-Warner Inc. Atari Games is not affiliated with Atari Corp. and should be referred to as Atari Games.

ATLANTA, (JUNE 26) PR NEWSWIRE - KFF Corp., which presently operates 51 Arby's restaurants in the Los Angeles and Sacramento markets, recently signed a five store market development agreement for the island of Oahu, Hawaii.

William Brusslan, president of KFF Management Inc., plans to open his first Arby's restaurant in Waipahu in November, and a second restaurant site is located on Kalakaua Avenue in Waikiki. KFF will add the other three Arby's stores at a rate of one per year through 1994.

Upon KFF's acquisition of the Arby's in Los Angeles only one year ago, the organization is expanding to a total of 51 restaurants to become a key franchisee in the Arby's system. KFF is a division of Kyotaru International, which operates Japanese-style restaurants in Oahu.

"Hawaii is a very viable market for Arby's and we have aggressively targeted the state for further expansion," stated Brusslan.

"With two Arby's restaurants already operating on the island of Oahu, we will continue to grow and expand our presence in the 50th state," said

Brusslan. "By the end of the 1990s, we hope to have a total of 15 stores on Oahu," he added.

Steve Gibbons, regional vice president of Arby's western region based in Phoenix, concurs that the agreement will substantially increase Arby's presence in Oahu. "The agreement is evidence of the strength of the Arby's concept in Hawaii, and it will allow us to expand upon Arby's marketing efforts in the area," said Gibbons. He explained that the additional five restaurants will provide a fast-food alternative to an area where Arby's is already popular.

Arby's Inc. is headquartered in Atlanta, and presently serves more than 1 million people daily in its more than 2,300 restaurants located throughout the United States, Canada, Asia, the Middle East and the Caribbean. In 1989, the chain added a record 239 new restaurants and surpassed the $1.3 billion mark in system-wide sales.

OLD TOWN, ME (JUNE 26) PR NEWSWIRE - Penobscot Shoe Company (AMEX: PSO) net sales for the second quarter ended May 25, 1990, were $2,745,000 up, 11.5 percent from $2,462,000 for the comparable quarter in 1989. Earnings for the quarter were $38,000, or three cents per share, compared to a loss of $183,000, or 12 cents per share, a year ago.

For the first half of fiscal 1990, net sales were $5,946,000, down 11.1 percent from $6,692,000 in the first six months of last year. The loss for the first six months was $298,000 or 20 cents per share, compared to a loss of $106,000, or 7 cents per share, a year ago.

For the quarter currently being reported, income from sources other than operations contributed 22 cents per share. Without the benefit of such gains we would be reporting a second quarter loss of 19 cents per share versus a loss of 16 cents per share a year ago. On this same adjusted basis, a net operating loss of 42 cents per share was sustained during the first half of 1990, compared to a loss of 16 cents per share last year.

The footwear component of the retail market remains unusually sluggish, and is primarily responsible for the low sales level. The markdown and disposition of slow-moving and excess inventories has continued, and will continue, to create losses during fiscal 1990. Despite market conditions our updated product lines bearing the new TROTTERS(R) logo are being well received, and, upon year-end completion of our inventory conversion and

cleanout, we look forward to profitability and growth in fiscal 1991.

At a scheduled meeting of the board of directors held on June 26, 1990, the directors voted to pay a dividend of 5 cents per share on Sept. 14, 1990 to all stockholders of record August 24, 1990.

LOS ANGELES (JUNE 26) PR NEWSWIRE - Mattel Inc. (NYSE: MAT) has promoted Glenn Bozarth to vice president-corporate communications, and has named Donna Gibbs director-media relations.

Gibbs, 30, joins Mattel from Apple Computer Inc. where she served as public relations manager for southwestern operations. She was a vice president and account supervisor in the Los Angeles office of Ketchum Public Relations from 1987 to 1989. Other previous experience includes positions with Gelman & Gray Communications in Los Angeles and Doyle Dane Bernbach Advertising in Denver.

Born in San Angelo, Texas, Gibbs received a bachelor's degree in Journalism from Michican State University in 1982.

Previously director-public relations, Bozarth joined Mattel in 1988. He moved to Mattel from the headquarters office of Hilton Hotels Corporation, where he also served as director-public relations. He was employed in the corporate public relations office of Western Airlines for nine previous years, and was the airline's director-press relations prior to accepting the Hilton position in 1987.

Born in Los Angeles, Bozarth, 36, received a bachelor's degree from the University of California-Santa Barbara in 1975, and a Master of Public Relations degree conferred by the University of Southern California's School of Journalism in 1977.

Mattel Inc., which reported annual revenues of $1.2 billion in 1989, is a worldwide leader in the design, manufacture and marketing of children's toys. With headquarters in Hawthorne, Calif., Mattel has offices and facilities in 19 foreign countries and sells its products in more than 100 nations throughout the world.

WASHINGTON (JUNE 26) PR NEWSWIRE - Responding to overwhelming, positive customer response, Trump Shuttle President Bruce R. Nobles announced today that the airline will extend its all-inclusive service guarantee through Sept. 30, 1990.

Making the announcement before several hundred industry executives at the joint Aero Club and Regional Airlines Association Spring Meeting here, Nobles said the Trump Shuttle will continue its unprecedented program of guaranteeing seats, service and on-time arrivals to passengers on all Trump Shuttle flights. The service guarantee program began April 1 and was to have ended June 30. It will now run through Sept. 30, 1990.

Every day on every flight the Trump Shuttle comprehensive service guarantee program will continue to include:

1) a guaranteed seat, without a reservation, to all customers arriving at the gate prior to scheduled departure;
2) guaranteed satisfaction with Trump Shuttle service; and
3) a guaranteed on-time arrival (at the gate less than 15 minutes after scheduled arrival, as defined by the U.S. Department of Transportation).

If the airline fails to deliver as promised on any of its guarantees, they will give customers a choice of:

1) 2,000 bonus miles in the worldwide OnePass frequent flier program on their next Trump Shuttle flight, or
2) 50 percent off a companion's one-way ticket on weekends; or
3) a restaurant certificate good for $20 off participating, upscale restaurants in Boston, Washington and New York.

As in the current comprehensive service guarantee program, the Trump Shuttle guarantees on-time arrivals even if flights are late as a result of weather or other conditions not under the airline's control.

The Trump Shuttle provides every-hour-on-the-hour, all-jet service between New York City's LaGuardia Airport and both Boston and Washington, D.C. (National Airport) Monday through Friday, with weekend shuttle service also available. All Trump Shuttle customers arriving at the gate prior to scheduled departure are guaranteed a seat without prior reservation; the airline has additional aircraft and crews on standby at each airport to meet demand. Trump Shuttle customers are offered complimentary snacks and beverages, access to air-to-ground phones and generous mileage in the worldwide OnePass frequent flier program on every flight.

For information on Trump Shuttle flights, customers should ask their travel professional, corporate travel department, the Trump Shuttle ticket counter, or may call 1-800-247-8786.

CONTACT: Bruce R. Nobles, president of the Trump Shuttle, 718-397-6055.

HOUSTON (JUNE 26) PR NEWSWIRE - Sponsors of the proposed Empire State Pipeline today announced that a New York State administrative law judge has handed down a recommended decision that the Empire State Pipeline be approved by the New York State Public Service Commission.

A 155-mile intrastate natural gas pipeline that will run between Grand Island and Syracuse, N.Y., Empire is sponsored by subsidiaries of The Coastal Corporation (NYSE: CGP) and Union Enterprises Ltd. (Toronto, Montreal: UEL) and by Rochester Gas and Electric Corporation (NYSE: RGS).

"We're pleased with the judge's recommended decision on our Empire proposal," said James F. Cordes, executive vice president of The Coastal Corporation.

"We feel confident this recommendation will speed other approvals we need from various regulatory agencies in both the U.S. and Canada, and we look forward to an expeditious, final decision from the New York Public Service Commission.

"With prompt approval of the remaining regulatory authorizations, construction of the new pipeline will start this fall for a spring 1991 in-service date," said Cordes.

Designed to move an average daily volume of 150 million cubic feet of natural gas, the Empire State Pipeline will offer natural gas users in western and central New York state competitively priced transportation, as well as access to every major supply basin in the North American continent.

Rochester Gas and Electric supplies electric and natural gas service wholly within the state of New York and is engaged in the production, transmission, distribution and sale of these services in a nine-county area centering around the city of Rochester.

Union Enterprises is a Toronto-based integrated natural gas firm with $2 billion in assets and operations in natural gas production, marketing, transportation, storage and distribution.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

NEW YORK (JUNE 26) PR NEWSWIRE - Pursuant to resolutions adopted at its general meeting of shareholders on June 23, 1990, the board of directors of Banco Central, S.A. (NYSE: BCM), declared a payment of supplemental dividend, no. 122, payable commencing July 6, 1990, to all holders of outstanding shares on account of the profits of the bank for the fiscal year 1989, as follows:

Gross Amount Payable		Withholding Tax		Net Amount Payable	
(dollars)	(ptas)	(dollars)	(ptas)	(dollars)	(ptas)
1.01	110	.25	27.50	.76	82.50

With this supplemental dividend and the interim dividend of $.83 (90 pesetas) paid in October 1989, the total dividend paid on account of profits for 1989 amounts to $1.84 (200 pesetas).

Established in 1919, Banco Central, S.A., together with its subsidiaries and affiliated companies, is engaged in a wide range of banking, financial and related activities in Spain and throughout the world. The bank is the second largest banking group in Spain and among the 100 largest in the world.

NOTE: All conversions are at the Dec. 31, 1989, exchange rate of 108.53 Spanish pesetas to $1.00.

#90177p9889 06/26/1990 ~PR Newswire

HOUSTON (JUNE 26) PR NEWSWIRE - Zapata Corp. (NYSE: ZOS) will soon announce the details of a three-point proposal to restructure the company's financial obligations, Zapata chairman and chief executive officer R.C. Lassiter said at Zapata's annual stockholders meeting today.

"There are three interdependent components of the proposed restructuring that must all take place for this effort to succeed, and I define success as reducing Zapata's overall financial obligations to the point where remaining debt can be adequately serviced from operational cash flow and the company will be profitable again," Lassiter said.

The three components are: -- Sale of Zapata's fleet of 12 offshore

drilling rigs for cash. -- Use of cash and additional equity to reduce outstanding
bank debt to a manageable level. -- Acceptance by bondholders of an offer for the company's subordinated debt.

The Zapata chairman said that discussions have been held with a number of potential buyers for the rig fleet, but Zapata has no definitive commitments at this time. Lassiter said negotiations with the company's bank group were proceeding well, but he could not yet provide details of the restructuring proposal.

"These discussions are at a very advanced stage. I am hopeful that within a matter of weeks we will have reached agreement on the most important terms," he said.

The Zapata chairman emphasized that all three components of the restructuring proposal -- the rig sale, bank acceptance of cash and equity for debt, and approval by bondholders of an offer for subdebt -- would all have to fall into place for the restructuring to take place. The proposed restructuring must also be approved by Zapata stockholders.

Zapata would also continue to receive significant cash contributions from its natural gas division, which has already produced nearly $120 million in cash flow since 1985. In addition, Zapata remains the nation's leading producer of fish meal and edible oil, a business that has the potential to change its product mix to more sophisticated products with higher profit margins.

Zapata Corp. is a Houston-based international company that operates a fleet of offshore drilling rigs, produces oil and natural gas, and conducts commercial fishing operations that produce fish meal and edible oil. Zapata is also the principal shareholder in Zapata Gulf Marine Corp., which operates the largest fleet of marine service vessels in the world.

#90177p9894 06/26/1990 ~PR Newswire

DALLAS, (JUNE 26) PR NEWSWIRE - Start-up of a new subsidiary company to test storage tanks for leakage, using patented advanced technology, was announced today by Kaneb Service, Inc. at its annual stockholders' meeting in New York.

Kaneb Metering Corporation's new underground storage tank precision testing service is marketed under the registered trade name LaserTite(TM), the process developed by the company based on three years of research and an investment of $4 million. With a detection accuracy rate of 98 percent the EPA-approved system exceeds EPA and state standards for precision of testing.

The computerized system uses Doppler laser technology and state-of-the-art optics to measure changes in product mass; hence, measurements are not affected by temperature changes, tank deformation or vapor pockets. The LaserTite technology is currently under further development by Kaneb Metering Corporation for use in above-ground storage tanks and ocean-going tankers.

With five service centers now operational, Kaneb is in the process of opening eight more to complete the roll-out of nationwide service by late August.

A relatively new industry, the underground storage testing business has been spurred by recent Environmental Protection Agency (EPA) regulations that mandate the testing of all the nation's estimated 1.4 million

underground fuel storage tanks by December 1993.

"We believe Kaneb Metering Corporation will capture a major portion of the market," said John Barnes, president and CEO of Kaneb Services, Inc. (NYSE: KAB). "The company's timely entry into this fast-growing industry offers tank owners a unique, patented technology that addresses their need for precision testing with minimum down time."

"Because it measures mass and not volume, it is one of the most accurate testing services available," said Jay Chaffee, president of Kaneb Metering Corporation. "Data is produced in two to three hours. Information is analyzed at our regional data reduction centers, eliminating the possibility of individual operator error on-site. Furthermore, LaserTite avoids fuel waste and the ground pollution hazards of testing systems that require overfilling."

The new technology offers additional cost-saving advantages to tank owners because it is faster than conventional methods. This reduces lost sales of product. If a problem does exist, LaserTite can determine in which part of the system -- product, ullage or lines -- it is located. This minimizes the possibility of excavating a good tank.

By August 1990 Kaneb Metering Corporation will own and operate a fleet of 30 fully equipped vans operating out of the 13 service centers. In addition, a national mobile unit will serve locations outside the regional markets and will augment individual service center capabilities as needed. The service will be fully company-owned and operated.

The five service centers now in operation are in Dallas, Houston, Los Angeles, Philadelphia and Chicago. Others will be located in Columbus, Durham, New York City, Detroit, Tampa, Nashville, Atlanta and San Francisco.

Executive and administrative offices of Kaneb Metering Corporation are in Grand Prairie, between Dallas and Fort Worth. The headquarter facilities also house a central assembly center where Kaneb's fleet of vehicles are fitted, equipped and maintained, and a fully equipped data reduction center.

Kaneb Metering Corporation has sole ownership of the U.S. patent for the LaserTite system; foreign patents are pending.

SAN FRANCISCO (JUNE 26) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today announced temporary approval, for a period of 180 days, of permit modifications to operate the Johnston Atoll Chemical Agent Disposal System (JACADS). The authorization allows the U.S. Army to begin destruction of chemical agents, including nerve and mustard gas, stored at the facility.

The temporary authorization only pertains to materials currently stored on the atoll. It does not provide for the transport of any additional hazardous stockpiles to Johnston Atoll.

Operation of the JACADS facility lessens the danger posed by a deteriorating stockpile of munitions. The Army contends that these munitions should be destroyed before there is any accidental release of wastes into the environment.

EPA issued the JACADS facility a hazardous waste permit under the federal Resource Conservation and Recovery Act on Aug. 30, 1985. During the past five years, the Army has made design changes to improve the operation of the facility. EPA reviewed and evaluated these changes and determined that they meet all federal requirements.

The Army has announced its intention to apply to EPA for permanent modifications to its permit. Under federal regulations, these modifications will require a comprehensive schedule of public interaction, including the acceptance of written and oral comments.

Johnston Atoll is located in the central Pacific Ocean, approximately 700 nautical miles southwest of Hawaii. The JACADS facility consists of a munitions disassembly system and four incinerators designed to destroy chemical agents stored at the atoll.

PITTSBURGH (JUNE 26) PR NEWSWIRE - WPXI-TV/Channel 11 has secured the rights to two prime-time Pittsburgh Steelers' games.

The announcement was made today by John Howell, vice president and general manager for WPXI-TV/Channel 11.

The two games added to the roster are: Cincinnati Bengals, Sunday, Nov. 18 1990, along with the Steelers vs. the Houston Oilers, Sunday, Dec. 30, 1990. Both games are away games for the Steelers.

"This brings the total number of pre-season and regular season Steelers' games to 17 and extends our tradition of carrying the Steelers on WPXI-TV/Channel 11," said program director Mark Barash.

WPXI-TV/Channel 11 was awarded the Steeler pre-season games earlier this year.

BOISE, ID (JUNE 26) PR NEWSWIRE - Morrison Knudsen Corp. (NYSE: MRN) today announced receipt of a multimillion-dollar, long-term contract to perform operations and maintenance services for IBM at a worldwide distribution center located in Pennsylvania.

The contract, to be performed at IBM's facility at Mechanicsburg, near Harrisburg, covers a three-year base period with two one-year options. The work will be carried out by MK's Operations & Maintenance Group.

Included in the work will be maintenance of buildings, utility systems, roads and grounds, as well as administrative services that include procurement support for inventory replenishment.

The Mechanicsburg operation serves as IBM's international distribution point for all spare parts for computers.

Morrison Knudsen, already at work on the projet, expects to employ more than 60 people, including subcontractors.

This new contract further expands MK into operations and maintenance of high-tech facilities for private clients. The company is at work for IBM on operations and maintenance of a manufacturing complex in Tucson, Arizona. Private sector contracts are also being performed for Exxon in California and Texas. MK's Operations & Maintenance Group provides similar services at military bases in Arizona, California and Nevada.

ARLINGTON, VA (JUNE 26) PR NEWSWIRE - The board of directors of Gannett Co., Inc. (NYSE: GCI), today elected Carl T. Rowan, a distinguished journalist, to the board.

Rowan's election brings the number of Gannett board members to 15. The board met in regular session today in San Francisco.

Gannett chairman John J. Curley said, "Gannett is pleased to have someone with Carl Rowan's outstanding journalistic credentials on its board."

Gannett's directors serve staggered terms, with one-third of the board standing for election each year. Rowan joins the class of directors whose terms expire in 1991.

Rowan, 64, is the only journalist ever to win the Society of Professional Journalists' medallion for newspaper reporting in three successive years. He received the George Foster Peabody Award for his television special, "Race War in Rhodesia," and was awarded an Emmy for his documentary, "Drug Abuse: America's $64 Billion Curse."

Rowan is a panelist on "Inside Washington," the popular public affairs television program aired in 50 of the nation's largest cities.

His syndicated column is carried by newspapers that reach nearly half the households in the United States.

In 1964 and 1965, Rowan served as director of the U.S. Information Agency. He also has served as deputy assistant secretary of state for public affairs, as a member of the U.S. delegation to the United Nations and as U.S. Ambassador to Finland.

Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 54 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and Gannett Outdoor, the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

DALLAS (JUNE 26) PR NEWSWIRE - Endevco Inc. (AMEX: EI) announced today the signing of an agreement by Mississippi Fuel Co., a wholly- owned subsidiary of Endevco Inc., to purchase gas from producers of three major

discoveries in Smith and Simpson Counties, Miss. Endevco will construct approximately 19 miles of 12 inch and eight inch pipeline and purchase gas in the Trimble, Hot Coffee Deep and Hot Coffee Shallow fields. Expected initial purchase volumes are anticipated at 50 million cubic feet of gas per day with the pipeline construction scheduled for completion by Oct. 1, 1990. The gas supply will significantly increase Endevco's gas throughputs and gross margins.

Endevco is a rapidly growing, natural gas company built around a core business -- gas transportation, consisting of gathering, transmission, storage and marketing of natural gas. The company is also engaged in the closely related and complementary business of treating and processing natural gas and natural gas liquids.

LEXINGTON, KY. (JUNE 26) PR NEWSWIRE - Hughes Aircraft Company today revealed plans to build a 130,000-square-foot manufacturing plant in the new University of Kentucky Coldstream Research Campus to be developed in the northern part of the city of Lexington.

The Hughes facility will produce various types of cathode-ray tubes and other image display devices. Groundbreaking for the new plant is scheduled for next month, with completion set for mid-1991.

Initial employment is expected to be between 200 and 250 people. The one-story structure will be situated on a 20-acre site on the west side of Newtown Pike. It will provide both factory and office space, and will include some 12,000 square feet of clean room. James N. Gray Construction Company, of Lexington, has been selected as contractor for the project.

Los Angeles-based Hughes will be the first occupant of UK's new Coldstream center, located on land that was previously the university's Coldstream livestock research farm. The campus-like industrial park, designed for research and light manufacturing operations, is aimed at attracting high-technology companies to the area.

Hughes plans to combine operations from four different parts of the company -- each involved in manufacturing different types of image and display components and devices -- into the Lexington operation. When completed, the new facility will be operated as part of the Hughes industrial products division, Carlsbad, Calif.

One operation will come from the Carlsbad division, which has for many

years been a leading manufacturer of special purpose cathode-ray tubes. The division has produced more than 200,000 units of various types for military, avionics and high-performance commercial applications, ranging from 1/2-inch miniature tubes for helmet- mounted displays to 13-inch diagonal tubes for shipboard radars.

CYPRESS, CA (JUNE 26) PR NEWSWIRE - Mitsubishi Motor Sales of America Inc. (MMSA) has announced the completion of the company's majority investment in Value Rent-A-Car Inc. of Deerfield, Fla. The final transaction gives MMSA control of the daily rental company, its 25 rental facilities and all Value-owned real estate.

Mitsubishi is the first automotive importer to purchase a daily rental company, and expects the acquisition to provide further consumer awareness of the company's products while providing an additional source of low-mileage Mitsubishi vehicles for used car operations at authorized dealers.

Richard D. Recchia, executive vice president and chief operating officer, says the Value acquisition is the second phase in an agressive investment program launched to support Mitsubishi dealer operations nationwide. The first phase was a recently instituted dealer facility investment program which provides a variety of less capital-intensive alternatives for existing and prospective Mitsubishi dealers to operate their businesses in high-cost geographic areas.

"The new car business is increasingly competitive, especially for retail dealers," said Recchia. "The acquisition of Value and the implementation of our dealer facility investment program are important efforts to help our growing dealer network succeed in this very challenging and capital intensive business."

Mitsubishi's dealer facility investment program offers a selection of "build/lease," "buy/lease" financial relationships between the dealer and MMSA, reducing the financial risks and capital requirements of retail dealer operations. The objective is to enhance the long-term stability of Mitsubishi dealerships, especially in markets with high real estate values.

Mitsubishi Motor Sales of America Inc., Cypress, Calif., was established in 1982 by Mitsubishi Motors Corp., Tokyo, and markets a full line of subcompacts, compacts, sports coupes, luxury cars, vans, light trucks and sport/utility vehicles.

ENGLEWOOD, CO (JUNE 26) PR NEWSWIRE - Jones Spacelink Ltd. (NASDAQ: SPLKA) announced today it has acquired an 81 percent interest in Galactic Radio Inc.(TM) from its principal shareholder, Jones International Ltd. Galactic Radio is a programmer of satellite-delivered audio services.

Directly or through its subsidiaries, Galactic Radio is a partner in two joint ventures: Galactic/Tempo Sound(TM) and Drake-Chenault/Jones Satellite Services(TM). Galactic/Tempo Sound, a venture with International Cablecasting Technologies Inc. (ICT) offers a nine-channel, 24-hour-a-day FM stereo audio service which is available as part of basic cable television service to more than 10 million subscribers in approximately 250 cable systems. The joint venture, announced in May 1990, united Galactic Radio and Tempo Sound into the nation's largest cable music network.

Drake-Chenault/Jones Satellite Services provides three commercial-free, satellite-delivered music formats to broadcast radio stations across the U.S. Launched in May 1989, Drake-Chenault/Jones now provides programming

for approximately 120 radio stations.

The 81 percent interest in Galactic Radio was acquired from Jones International by Jones Spacelink for approximately 13,580,000 shares of Spacelink's Class A common stock. The remaining 19 percent interest in Galactic Radio is held by Glenn R. Jones, who is chairman and chief executive officer of both Jones International and Jones Spacelink.

Jones Spacelink is a publicly held subsidiary of Jones International, and is the corporate parent of The Jones Group Ltd., a cable television system brokerage firm; and Jones Intercable Inc. (NASDAQ: JOIN), one of the nation's largest cable television operators, which serves more than 1.4 million subscribers throughout the U.S.

HARTFORD, CONN. (JUNE 26) PR NEWSWIRE - Energy Networks Inc. (ENI), a non-regulated subsidiary of Connecticut Natural Gas Corporation (CNG) (NYSE: CTG), and Agway Energy Products today announced the sale of ENI's propane distribution business, Fuels, to Agway. All assets of Fuels' Hartford and Greenwich, Conn., operations are included in the agreement.

Fuels currently serves approximately 6,000 customers. Agway Energy Products is the marketing arm of Agway Petroleum Corporation, a wholly owned subsidiary of Agway, Inc. of Syracuse, N.Y. Agway Energy Products is engaged in the sale and distribution of propane and other energy products and services in the Northeast, including Connecticut.

Agway Energy Products will be maintaining offices in Fuels' current Hartford and Greenwich locations. According to Agway, customers will not experience any changes in service as a result of the new ownership.

The sale is part of CNG's overall strategy to divest of some non-regulated subsidiaries and focus its business efforts on the natural gas distribution business and the operation of ENI's district heating and cooling system.

#90177p9940 06/26/1990 ~PR Newswire

ATLANTA, (JUNE 26) PR NEWSWIRE - Crawford & Co. (NYSE: CFD) announced today that its board of directors approved an amendment to the company's Restated Articles of Incorporation that will effect a recapitalization of the company.

The proposed amendment will be submitted for approval by the shareholders of the company at a special meeting to be held on July 24.

The amendment authorizes two classes of common stock: Class A Common Stock and Class B Common Stock. If the proposed amendment is approved, the company's outstanding common stock will be reclassified as Class B common stock and the company will issue one new share of Class A common stock for each outstanding share of Class B common stock as a stock dividend. The board of directors has set July 24, the date of the special meeting, as the record date for determining entitlement to the stock dividend. The two classes of stock will have substantially identical rights; except that shares of Class A common stock generally will not have any voting rights. In addition, the proposed amendment permits the company's board of directors to pay higher (but not lower) cash dividends on the nonvoting Class A common stock than on the voting Class B common stock. The board of directors of the company has indicated that its current intention is to pay a quarterly dividend of $0.095 per share on the Class A common stock and a quarterly dividend of $0.08 per share on the Class B common stock, effective for the third quarter of 1990.

After the proposed recapitalization, the company's Class B common stock will continue to be listed for trading on the New York Stock Exchange (the "NYSE") and, upon issuance by the company, the Class A common stock also will be listed for trading on the NYSE. With the intended payment of a dividend premium on the Class A common stock and the inclusion in the proposed amendment of a provision designed to ensure that holders of Class A common stock receive consideration equal to that offered to holders of Class B common stock in the event of certain extraordinary transactions (unless such transactions are approved by the holders of at least 75 percent of the Class A common stock), the company expects that the Class A

common stock will trade at or near parity with the Class B common stock.

F.L. Minix, chairman, president and chief executive officer of Crawford & Co., stated, "The board of directors is pursuing this plan because it believes that the recapitalization will afford the company increased flexibility to issue common equity in acquisitions, to fund employee benefit plans and to raise equity capital as a means to finance future growth, in each case without diluting the voting power of the company's existing stockholders."

Approximately 70 percent of the company's common stock is owned, directly or indirectly, by the family of James H. Crawford, founder of the company.

The company has prepared proxy materials for distribution to shareholders in connection with the board of directors' solicitation of proxies for the special meeting. It is expected that such materials will be mailed to shareholders on or about July 3.

WHITE PLAINS, NY (JUNE 26) PR NEWSWIRE - The United Kingdom Cable Authority has awarded the cable franchise for the Darlington district as well as the cable franchise for North East Surrey and North Surrey to Britannia Cablesystems Group Limited, a company whose application was backed by NYNEX Corporation (NYSE: NYN).

Located in the south of Durham County, the Darlington district includes the towns of Darlington, Middleton St. George and Hurworth-on-Tees. The Darlington franchise area contains 34,000 homes and 1,800 businesses.

Located south of London, the Surrey franchises include the towns of Egham, Sunbury, Chertsey, Addlestone, Walton-on-Thames, Weybridge, Esher, Claygate, Oxshott, Cobham, Ewell, Epsom, Ashtead, Leatherhead, Fetcham, Great Bookham, Banstead, Tadworth, Dorking, Reigate, Redhill, Warlingham, Caterham and Oxted. The Surrey franchise area contains 185,000 homes and 9,000 businesses.

NYNEX has now participated in six successful cable franchise applications in the United Kingdom containing more than 800,000 households. "We are extremely pleased with the Cable Authority's decision with regard to the CATV and telecommunications franchises for Darlington and North and North East Surrey," said Gregory McLean, director-United Kingdom CATV. "The awards bring NYNEX closer to our goal of attaining 1,200,000 potential CATV and telephone customers in the United Kingdom."

NYNEX Corporation, based in New York, is the fourth largest telecommunications company in the United States ranking in sales. The company provides information products and systems to a diverse base of customers from offices in 13 countries and across the United States. Through New England Telephone and New York Telephone, NYNEX delivers quality telecommunications services to the Northeastern United States.

NILES, MI (JUNE 26) PR NEWSWIRE - National-Standard Company (NYSE: NSD) announced the completion of an agreement regarding the sale of its operation in Uitenhage, South Africa, according to Michael B. Savitske, president and chief executive officer.

The facility in Uitenhage was sold to Natstan Manufacturing, Ltd., a new, privately held South African company formed by members of the management group of the former National-Standard subsidiary. The Uitenhage operation

manufactures tire bead wire and carbon steel welding wire.

The sale will result in a $2.8 million charge to third-quarter earnings. This charge represents the cumulative decline in the value of National-Standard's investment in the South African company due to the effects of foreign exchange rates.

This decline has previously been reported in National-Standard's net equity and now must be included in the statement of earnings. Other than this $2.8 million charge, there is no gain or loss on this sale.

This transaction has no effect on the net equity of National-Standard. All proceeds will be used to reduce National-Standard's level of borrowing. Terms of the sale were not disclosed.

Founded in 1907, National-Standard is a Niles-based company manufacturing a broad range of wire, metal-related products and machinery systems in 16 facilities throughout the world.

WHITE PLAINS, NY (JUNE 26) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) announced today that it has been awarded two contracts by the Philippines Long Distance Telephone Company (PLDT) to provide project management services in conjunction with current PLDT network plans, and to develop a baseline strategic marketing plan.

Under the terms of the first contract, NYNEX will provide project management services in conjunction with the ongoing X-5 program. Phase I covers a three year period and will concentrate on engineering-related activities.

According to Paul Duffy, vice president of international operations for NYNEX International Company, "The NYNEX team's overall objective will be to assist PLDT with a variety of project management and operational issues in order to ensure that PLDT resources are optimally utilized."

Enrique Perez, a senior executive vice president of PLDT said "We believe that the addition of NYNEX to our team will enhance our project management capabilities in conjunction with the rollout of our X-5 program."

Under the terms of the second contract, the baseline strategic marketing plan will focus on three specific areas: direct distance dialing, people in motion, and the provision of value-added services for data networks.

NYNEX will form a team of network marketing experts to address such critical areas as service definition, market environment analysis, market segmentation, target market identification, and sales channel and price strategies.

"We are pleased to be able to share our marketing experience with PLDT," said Duffy. "NYNEX has benefited from having a diverse customer base including the large New York and Boston metropolitan areas. This knowledge and experience makes NYNEX a leader in the development of strategic marketing plans."

"We look forward to working with NYNEX," said Perez. "We hope these contracts are just the beginning of a long and fruitful relationship between our two companies."

NYNEX Corporation, a U.S.-based provider of information products and telecommunications services had 1989 operating revenues of US$13.2 billion and assets of US$25.9 billion. From its offices in Manila, Hong Kong, Singapore, London, Geneva, Frankfurt and New York, NYNEX International Company represents the NYNEX family of companies in markets outside the United States.

PLDT is the largest among 56 entities providing telephone service in the Philippines. It serves 94% of all telephones in the country. The company is the principal supplier of long distance service in the Philippines.

NEW YORK (JUNE 26) PR NEWSWIRE - Diesel U.S.A., a division of Russ Togs, Inc. (NYSE: RTS), has announced the appointment of its major sales and

merchandising executives. The announcement was made today by Marshall Lester, president of Diesel U.S.A.

Joining the team of the newly formed American division of the Italian men's and women's jeans, casual sportswear and accessories company are Tony Barra as vice president of sales, Christine Rucci as vice president of merchandising, Anthony Stellato as production manager, Monique Buzy-Pucheu as product manager and Anita LePage as shop program director. Each of the new Diesel executives brings substantial experience to the company.

For the past four years, Barra was national sales manager for Guess? Inc. where he reported to Georges Marciano and was responsible for formulating corporate policy and directing marketing and sales. At Guess, he was instrumental in the planning and development of more than 150 shops in major department stores throughout the country. He also has held sales positions at Union Bay, New Man Yves Saint Laurent.

Rucci was the former head of merchandising for Simint USA Inc., a division of Sim Spa, the worldwide manufacturer and distributor of Giorgio Armani and Moschino Jeans and Krizia, Versace, Moschino and Armani couture childrenswear. At the company, she was responsible for the American merchandising of Armani and Moschino Jeans. Prior to this post, she was employed by Calvin Klein Sport in denim research and development, and Marithe & Francois Girbuad N.A. as a textile development specialist.

As a member of the Genius Group, Rucci served as liaison between American companies and a number of European design companies including Diesel.

For the past three years, Stellato has been Calvin Klein Jeans' director of engineering and assistant production manager. In the six prior years he worked for the International Ladies Garment Workers Union as an industrial engineering consultant. At Diesel, he will plan and oversee all aspects of the company's domestic manufacturing.

#90177p9955 06/26/1990 ~PR Newswire

PITTSBURGH (JUNE 26) PR NEWSWIRE - National Steel Corp. today announced a restructuring of its board of directors and the election of a new chairman and president.

The actions followed the completion of the purchase of an additional 20 percent of the firm by NKK Corp. (NKK), through its wholly-owned subsidiary, NKK U.S.A. Corp., which was finalized earlier in the day.

The size of National Steel's board was reduced from six members to five, including three new board members. The new board of directors then appointed Kokichi Hagiwara, formerly president and chief operating officer as chairman and chief executive officer. Ronald H. Doerr, formerly executive vice president, was elected president and chief operating officer.

Howard M. Love, chairman of National Steel since 1981, was named honorary chairman and continues as a member of the board. As honorary chairman, he will serve as a consultant to National Steel's management.

Other members of the board include Hagiwara and the three newly elected members, Doerr; Osamu Sawaragi, who will be appointed executive vice president of NKK, in charge of its Iron & Steel Division; and Yoshito Tokumitsu, National's vice president-distribution and services. Sawaragi will serve as vice chairman.

Leaving the board are Sachio Hatori, currently executive vice president of NKK, who had served as vice chairman; James S. Pasman Jr. and Stanley C. Ellspermann, president and senior vice president-administration of National Intergroup Inc. (NII) (NYSE: NII), respectively; and Masaharu Ito executive vice president of National Steel. Ito is returning to NKK as a managing director.

National Steel Corp. is the nation's fifth largest steelmaker with production facilities in Ecorse, Mich., near Detroit; Portage, Ind., near Chicago; and Granite City, Ill., near St. Louis. The company is headquartered in Pittsburgh and employs about 12,000 people. It operates as a joint venture owned 70 percent by NKK Corp. of Japan and 30 percent by National Intergroup Inc. In 1989, National Steel shipped 4,957,000 tons of steel and had sales in excess of $2.6 billion.

BOSTON (JUNE 26) PR NEWSWIRE - Bank of Boston Corporation (NYSE: BKB) announced today the election of John T. Ewing as president of its Vermont subsidiary, Bank of Vermont. The announcement was made today by Robert E. Boardman, chairman of the board of directors of Bank of Vermont.

Ewing succeeds Paul R. McConnell as president. McConnell, after a short transition period, will move on the head Private Banking in Massachusetts for Bank of Boston, the parent corporation of Bank of Vermont.

Prior to being named president, Ewing was an executive vice president and

director of Bank of Vermont. Ewing was also in charge of the bank's retail financial services group and, as president, he will continue in this capacity.

Bank of Vermont is a subsidiary of Bank of Boston Corporation, a New England-based superregional bank holding company with assets of $37 billion at March 31, 1990. The corporation's major banking subsidiaries are The First National Bank of Boston, with headquarters in Massachusetts; Casco Northern Bank, N.A., in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank; and Bank of Vermont, totaling 262 branches throughout New England. The corporation and its subsidiaries provide a broad range of financial services to individual, corporate, institutional and governmental customers, as well as to other banks. The corporation's common and preferred stocks are listed on the New York and Boston stock exchanges.

NEW YORK (JUNE 26) PR NEWSWIRE - The Quick & Reilly Group, Inc. (NYSE: BQR), today reported earnings of 35 cents a share or $3,301,197 for the first quarter ending May 25, 1990, vs. 31 cents a share or $2,920,199 in the previous fiscal year. Revenues increased 17 percent to $28,536,060 from $24,365,204.

A spokesman for the firm indicated that with market averages at record levels, retail investors were returning to the market, though not at the level of activity preceding the October '87 Crash.

Quick & Reilly, Inc., opened an office in Palo Alto, Calif., and purchased the accounts of a discount broker in Columbus, Ohio. U.S. Clearing Corp. will be transferring the accounts of Josephthal & Co., a correspondent broker, to their new owner, Jesup & Lamont, in July. U.S. Clearing signed two new correspondents this quarter -- Gallagher Equities based in Larchmont, N.Y., and Reliance Life Distributors, Inc., based in Philadelphia.

JJC Specialist was allocated two stocks -- Merry-Go-Round Enterprises, Inc., and Sturm & Ruger, Inc. The acquisition of Drexel Burnham Lambert Specialists Co. contributed significantly to the increase in Specialist Trading & Commission income.

The company also announced the following appointments:

Quick & Reilly, Inc.

-- William A. Coppel, vice president - marketing
-- Robert J. Rabinoff, vice president - controller

U.S. Clearing Corp.

-- Pascal J. Mercurio, chairman of the board and chief executive officer
-- Peter Quick, president
-- Joel L. Hirstreet, senior vice president and chief financial officer
-- Charles LaBella, vice president -- Robert E. Pisani, vice president
-- Anthony J. Bellotti, assistant vice president
-- Vincent E. Bolger, assistant vice president

#90177p9966 06/26/1990 ~PR Newswire

NEW YORK (JUNE 26) PR NEWSWIRE - Waterhouse Investor Services, Inc. (NASDAQ-NMS: WHOO) today reported net income of $265,400, or 11 cents a share, for the company's third quarter vs. $345,800, or 14 cents a share, for the same period the previous year. Nine-month earnings were $603,100, or 25 cents a share, vs. $672,000, or 27 cents a share.

WATERHOUSE INVESTOR SERVICES, INC.

Quarter to May:	1990	1989
Revenues	$5,503,000	$5,173,200
Net income	265,400	345,800
Share earnings	$.11	$.14
Average shares outstanding	2,408,473	2,451,586
Nine months to May:	1990	1989
Revenues	$16,535,100	$14,051,400
Net income	603,100	672,000
Share earnings	$.25	$.27
Average shares outstanding	2,425,451	2,469,777

The company stated that during the third quarter market activity slowed down from the second quarter which resulted in a decrease in revenues of more than $100,000 while expenses increased approximately a like amount. As a result, earnings were down from the second quarter, however, the company noted that market activity has picked up since the end of May.

Nine-month earnings were 25 cents per share vs. 27 cents a share the previous year. Nine-month earnings for the current fiscal year a 15 cents a share write-down of the company's entire investment in a bank. This write-off occurred during the second quarter of this fiscal year.

Nine-month operating results excluding this one-time write-down were 40 cents a share vs. 27 cents the previous year -- a 48 percent increase.

During this fiscal year branch offices have been opened in Cleveland and Houston and a small discount brokerage operation was acquired in Kansas City, Kan. Plans are under way to open another New York City office as

well as offices in Tampa, Fla., and Phoenix, Ariz.

The company's principal subsidiary, Waterhouse Securities, Inc., currently provides discount brokerage to the individual investor through 17 branch offices in major cities throughout the United States.

#90177p9970 06/26/1990 ~PR Newswire

OTTAWA, ONTARIO (JUNE 26) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ: SHKIF) of Ottawa today released financial results for its third quarter ended May 31, 1990.

Revenues for the three months were $180.3 million with net income of $2.3 million or 6 cents per share. This compares with revenues of $176.8 million and net income of $6.1 million or 23 cents per share for the same period one year ago. (All figures expressed in Canadian dollars.)

Net income before interest and taxes for the third quarter was $5.1 million compared with $11.8 million for the quarter one year ago. Net interest expense for the three months was $1.5 million and provision for taxes was $1.2 million compared with net interest expense of $3.9 million and tax provisions of $1.9 million for the period one year ago.

Revenues for the nine months were $527.9 million with net income before interest, tax and unusual items of $10.5 million. This compares with revenues of $488.1 million and net income before interest and taxes of $26.7 million for the nine month period one year ago.

In the second quarter of the current year the company recorded unusual items of $31.9 million. This results in a net loss for the nine month period ended May 31, 1990, of $28.5 million or 78 cents per share compared with net income of $12 million or 45 cents per share for the period one year ago. There were no unusual items one year ago.

Despite somewhat uncertain economic conditions in the company's Canadian markets which comprise the principal component of its operations, it is estimated that the fourth quarter will result in revenue growth in the area of 15 percent over the same quarter a year ago with a modest profit for the period.

The company continues to have a strong financial base with working capital totalling $129.1 million of which $74.6 million is held in cash or marketable securities and net equity at the end of May of approximately

$260 million. Net book value at the end of the quarter was $6.96 per share.

JACKSONVILLE, FL (JUNE 26) PR NEWSWIRE - BFGoodrich Aerospace has chosen the name Engineered Polymer Products for the business unit formed from the merger of Marine Products and Services and Dynamic Polymer Products. In announcing the new name, General Manager John Foulk said, "With product lines running across the marine, transportation and office furniture industries, we looked for a name that carried a common theme. We didn't have to look very far: we primarily work with polymers, engineered to the needs of our customers."

The unit designs and manufactures a range of products including sonar domes and acoustic windows for the U.S. and allied navies, TORSILASTIC(r) suspensions and seating components for trucks, buses, military vehicles, and office furniture, and CUTLESS(r) water-lubricated marine bearings.

Concurrently, Foulk announced the appointment of William Poulin as director of marketing, effective immediately. "Bill has a solid background of more than 22 years in aerospace and high-tech marketing," he said, "including experience in the international marketplace." In addition Poulin is a recent graduate of the U.S. Department of Defense, Defense Systems Management College.

Engineered Polymer Products is based in Jacksonville, Fla., with additional manufacturing facilities in Wilmington, N.C. BFGoodrich Aerospace, a diversified supplier of aerospace and specialty products and services, is a division of the BFGoodrich Company (NYSE: GR), headquartered in Akron, Ohio.

NEWPORT NEWS, VA. (JUNE 26) PR NEWSWIRE - The Actuators and Fuel Systems Components Division of Siemens Automotive broke ground here today for a new addition to its high technology automotive electronics manufacturing facility. The 61,000-square-foot addition will allow the company to meet increased worldwide demand for fuel injector systems.

"Our European and Asian customers have significantly stepped up their orders for fuel injector systems," said George Perry, division vice president and general manager. "This addition will let us increase our current 6.4 million injector production capability by over 4 million injectors annually."

When completed in mid-winter of 1991, the $2.5 million expansion of the computer integrated manufacturing facility will be used to increase the production of electronic fuel injectors, fuel rails and pressure regulators, the primary components in Siemens' DEKA fuel injector systems. In addition, the highly automated plant will house $27.5 million in new equipment and increase the number of employees from approximately 850 to more than 1,000.

Located on a 60-acre site on Bland Boulevard in Newport News, the expansion will add approximately 1.0 acre to the manufacturing facility, for a total of 7.8 acres.

"This addition affirms the world-class quality and production standards the Actuators and Fuel Systems Components Division has achieved and confirms Siemens' commitment to our Virginia business," Perry said.

Siemens Automotive, with headquarters in Troy, Mich., and Regensburg, West

Germany, is an operating unit of Munich, West Germany- based Siemens AG. Worldwide, Siemens AG employs approximately 360,000 people in some 127 countries and maintains 177 manufacturing facilities in 41 nations. With annual sales of more than $34 billion, Siemens AG ranks as the sixth-largest electrical/electronics concern, and the 16th- largest industrial company on the Fortune International 500 list.

SEATTLE (JUNE 26) PR NEWSWIRE - A healthy backlog of Boeing commercial airplane orders continues to spur modernization of the Boeing Fabrication Division in Auburn, Wash.

Construction began recently on a $43 million Welded Duct Center. Designed to facilitate manufacturing of hard metal and aluminum ducts, the building will enclose 270,000 square feet of factory floor space.

The Welded Duct Center will house 700 employees, including factory and support personnel, all of whom will move from outdated facilities currently located in Auburn.

The center is scheduled for completion in April 1991. Additional expansion at Auburn will occur this fall as the division consolidates its tooling operations.

The existing tooling building, located just north of where the new Sheet Metal Center is located, will gain 57,600 square feet of work space. This phase of the tooling expansion will be completed by the fourth quarter of 1991. The total capital cost of expansion is $9 million.

CLAREMONT, NC (JUNE 26) PR NEWSWIRE - WSMP, Inc. (NASDAQ: WSMP) reported revenues of $14,868,000 for the first quarter ended May 18, 1990 down from $15,015,000 reported in the first quarter of the prior year. A pretax operating loss of $335,000 was reported for the first quarter of the current year compared to a pretax operating income of $281,000 for the same period of the previous year. The current year loss was partially offset by a one-time pretax gain from the disposal of certain restaurant assets of approximately $284,000. The resulting net loss for the first quarter ended May 18, 1990 was $34,000 compared to net earnings of $161,000 for the first quarter of the prior year. The net loss was $.02 cents per share for the first quarter of the current year compared to net earnings of $.07 cents per share in the same period of the prior year based on 2,086,934 and 2,209,040 weighted average shares outstanding respectively.

WSMP, Inc. now operates 47 restaurants in seven southeastern states, 41 of which are Western Steer Family Steakhouse units. The Company also franchises 122 Western Steer Family Steakhouse restaurants in 11 states and 10 Prime Sirloin Steak & Seafood restaurants in three states. In addition, the Company operates a ham-curing and bakery products division in Claremont.

ATLANTIC CITY, NJ (JUNE 26) UPI - Bo Kimble, the nation's leading division I college basketball scorer last season, added another title Monday night when he captured the first One-On-One National Collegiate Challenge.

Kimble, from Loyola Marymount, defeated Oregon State's Gary Payton 30-23 for the championship at Trump Plaza, garnering the $100,000 first prize

In reaching the finals, Kimble defeated Texas's Travis Mays 31-18 in the first round, then held off his former Philadelphia school boy opponent, La Salle's Lionel Simmons 34-30.

Payton, who received $50,000 as runner-up, ousted Virginia Tech's Bimbo Coles 40-36 and Louisina State's Chris Jackson 23-19 to reach the championship contest.

The 6-foot-5 Kimble, who scored 2,350 points during his college career, concentrated on outside shooting.

''He (Payton) was challenging my jumpshot which was a mistake. I felt coming in that the person who played the smartest and played with strategy would win,'' Kimble said.

Kimble and Simmons had practiced against each other in preparation for the event and both players acknowledged that Simmons, the consensus college player-of-the-year, had won a vast majority of those match ups.

''I know Lionel is more dominant in the inside, so I mixed up my game,'' Kimble said.

Each of the eight entrants received a $10,000 appearance fee.

The players played eight-minute games and used the college three-point line of 19 feet, 9 inches with a 20-second shot clock.

#90177u0159 06/26/1990 ~United Press International
MANILA, Philippines (JUNE 26) UPI - An American model who skipped bail on gun smuggling charges and fled to the United States was found guilty by a criminal court Tuesday and sentenced to 17 to 20 years in jail.

Judge Fermin Martin said, however, the punishment imposed against Dominique Adams, 23, a commercial model from Provo, Utah, ''could only be implemented if she makes the mistake of coming back to the Philippines.''

The Philippines has no extradition treaty with the United States.

''She stood a good chance of being acquitted,'' Martin said. ''But you know when you jump bail that is an indication of guilt. It shows an awareness that you think that your defense is not tenable.''

The 12-page decision was read to Adams' lawyer, Renon Cruz, in an empty courtroom in suburban Pasay City.

Martin declared Adams guilty of attempting to smuggle 70 handguns in six metal containers on her arrival from Los Angeles last Aug. 20. He sentenced her to a prison term of 17 to 20 years and immediately issued a warrant for her arrest in the event she returns to the Philippines.

Cruz said Adams was ''somewhere in Nevada under the care of a doctor.'' He said he might file an appeal within 15 days but will wait for instructions from Adams' lawyers in the United States.

Adams escaped from the Philippines early this month with the help of three men who were planning to turn her nine-month ordeal into a movie.

A copyright story in the Salt Lake Tribune said independent journalist Scott Osborne, producer Ed Artis and writer Bill O'Hagen spirited Adams on a flight to Sri Lanka, then Hong Kong and Los Angeles.

A convicted gunrunner, Richard Pedroili, of Modesto, Calif., had said he sent Adams to the Philippines with the boxes. Pedroili, serving a 64-month sentence in a California jail, said he did not tell Adams about the contents of the containers.

Adams has claimed she was asked to carry the boxes to Manila but did not know the contents. She said she was promised a job if she carried the shipment.

(JUNE 26) UPI - A Hackettstown, New Jersey, woman was freed Monday on a 50-thousand-dollar bail. Rosemary Scorp faces federal and state charges for allegedly enslaving four elderly psychiatric patients for more than one decade. Federal prosecutors say Scorp used physical intimidation to force the quartet to do household chores at investment properties she owned. New Jersey officials removed the four women from Scorp's care in 1985.

Israel has offered NO response to a letter reportedly sent to Prime Minister Yitzhak Shamir Monday by U-N Secretary-General Javier Perez de Cuellar. Israeli Radio said the letter made Israel a U-N offer to help ease tension in the Middle East. Officials sources said the letter was brief and did NOT provide details as to how the U-N chief would follow through with his offer.

#90177u0243 06/26/1990 ~United Press International

BOSTON (JUNE 26) UPI - The owners of Italy's Il Messaggero basketball team have filed suit in federal court to keep guard Brian Shaw from returning to the Boston Celtics.

The suit, filed Monday in U.S. District Court in Boston by Gruppo Ferruzzi accuses the Celtics of tampering by signing Shaw to a five-year, $6.2 million deal in January while he was still under contract to the Italian team.

Shaw, who played in Italy last season after signing a two-year, $1.8 million pact with Il Messaggero, filed an affidavit Monday, saying he wants to get out of his Celtics contract and return to Italy next season.

Shaw said he reached agreement with the Celtics without consulting an attorney and was therefore unaware that he would become a free agent in the NBA in 1991 if he played in Italy again next season.

''I was unaware, and had not been told, that I had forfeited this valuable right when I signed the Celtics contract,'' Shaw said in his affidavit.

Shaw, who signed the pact during a losing and personally disappointing season in Italy, called his decision to return to Boston ''a major mistake'' and blamed it on ''naivete, weakened emotional state and lack of independent legal counsel or an agent.''

On June 14, NBA arbiter Daniel Collins ordered Shaw to rescind the second year of his Italian contract and honor his new pact with the Celtics.

The Celtics went to court the next day in hopes of winning an injunction to bolster Collins' order.

But Shaw and his attorneys claim Collins' ruling is invalid because Shaw was not represented by a lawyer at the arbitration hearing and was not given official notice of the proceeding until after it started.

A hearing on the Celtics' request was scheduled Tuesday before U.S. District Judge A. David Mazzone in Boston.

Legally, Shaw has the right to revoke his Il Messaggero contract any time between June 23 and July 23, but his affidavit clearly indicated that he prefers to play in Rome again next season.

In fact, Shaw offered to refund the $450,000 signing bonus he received from the Celtics if Il Messaggero wins the right to his services.

#90177u0291 06/26/1990 ~United Press International
(JUNE 26) UPI - U-N mediated peace talks between the Salvadoran government and leftist rebels broke off Monday after the two sides failed to reach a middleground on the issue of reform of the armed services. The sticking point is a guerrilla demand that the military purge 200 officers allegedly involved in human rights violations and to decrease the size of the armed forces. Despite the lack of progress, the U-N mediator says both sides promised to reach an accord ''very soon.''

London authorities are continuing their investigation into Monday evening's explosion at a posh club frequented by Conservative members of Parliament. NO one has claimed responsibility for the blast, NOR are authorities speculating as to who the culprits might be. Seven people were injured... one seriously... when between 10 and 15 pounds of explosives were detonated at the Carlton Club.

A banking source says Donald Trump made little progress Monday as he tried to straighten his teetering business empire. The apparent glitch stems from the refusal of a West German and French bank to give Trump the leeway he needs to come up with 43-Million dollars by midnight Tuesday. Some sources close to the negotiations expressed frustration with the lack of progress, saying everybody is better off if Trump remains financially solvent.

Los Angeles Deputy District Attorney Steve Barshop said Monday he plans to proceed with the murder trial of Marlon Brando's son, Christian, despite the absence of the event's key witness. Missing is Cheyenne Brando, Christian's half-sister. It was Cheyenne's boyfriend who Christian allegedly killed. However, Barshop said she fled to Tahiti a week and a half ago to avoid testifying against Christian.

(JUNE 26) UPI - Rebels threw a wrench into efforts to resolve Liberia's six-month-old civil war by refusing to attend peace talks with government negotiators. Instead, the guerrillas pledged to march on the capital Monrovia in a NO-holds-barred push to topple President Samuel Doe. Also calling for Doe's resignation Monday was the Liberian People's Party. The group said the nation would be best served if Doe stepped down.

A report on Soviet television Monday quoted a K-G-B official as saying workers at a gun plant northeast of Moscow have taken to converting simple firearms into automatic weapons and trading them on the black market. In some instances, the altered weapons are sold for as little as a liter of vodka. The K-G-B reportedly seized a cache of converted hunting rifles and signal guns.

#90177u0349 06/26/1990 ~United Press International
(JUNE 26) UPI - While Dave Stieb's wild streak in the first inning helped put an end to his night, Jody Reed helped Boston end another streak.

Reed's solo homer in the sixth inning snapped a 7-7 tie to halt Boston's 15-game Fenway losing streak against Toronto and lifted the Red Sox Tuesday night into first place in the American League East with a 10-8 victory over the Blue Jays.

Boston, which entered the four-game series between the AL East front-runners 1-2 game out of first, had not won a game against Toronto in Fenway Park since August 10, 1987.

''I feel better that the streak was stopped here,'' Boston Manager Joe Morgan said. ''Reed was dynamite as usual.''

With the score tied 7-7 and one out in the sixth, the 5-foot-9-inch Reed lined a pitch from Willie Blair, 0-5, just over the left field wall for his third homer.

Lamp, 1-2, worked 5 1-3 innings to gain the win.

Asked if it was a fastball from Blair, Reed said with a smile, ''Of course the ball has to provide some of the power.''

But Steib, the ace of Toronto's staff couldn't power his way past the first inning.

Trailing 3-0 in the first, Boston rallied for six runs in the bottom of the inning against Stieb.

Stieb didn't retire any of the seven hitters he faced and allowed six runs after yielding four walks and three hits.

''It was a fluke that Stieb was that wild,'' Lamp said. ''Now we don't have to answer all those questions about the streak.''

Stieb offered an explanation on his short outing. ''Walks, balls hit in the right place and getting behind in the count (hurt) me,'' Stieb said.

''We never talked about the streak,'' said Toronto manager Cito Gaston. ''In the past, before the streak, we haven't played that well here.''

The two teams battled to a 7-7 tie after three innings before pitching took over.

''When you looked up on the scoreboard after three, it looked like an area code for both teams,'' Reed said. ''We got guys on base early against Stieb and we capitalized.''

Elsewhere in the American League, Minnesota ripped Texas 9-1, Cleveland scapled Milwaukee 10-5, Oakland edged Detroit 4-3 and Chicago zipped California 2-0.

In the NL, it was: New York 3, St. Louis 2; Cincinnati 5, San Francisco 2; Pittsburgh 5, Philadelphia 0; Los Angeles 5, Atlanta 2; Montreal 7, Chicago 3 and Houston 5, San Diego 3.

-- AROUND THE AL --

Twins 9, Rangers 1

At Minneapolis, Scott Erickson, making his first major league appearance, pitched six strong innings and Kirby Puckett belted a three-run homer to lift Minnesota. Erickson, 1-0, scattered four hits for his first major league win. John Candelaria notched his third save. Mike Jeffcoat, 1-3, allowed eight runs on seven hits, in 5 1-3 innings to take the loss.

Indians 10, Brewers 5

At Milwaukee, Brook Jacoby drove in a career-high five runs with a homer and three singles to power Cleveland from a 3-0 deficit. Tom Candiotti, 8-3, allowed five runs and eight hits in 8 1-3 innings. Chris Bosio, 4-6, allowed eight runs to absorb the loss. Bosio, who was 3-0 in April, has won just once in his last 11 starts dating back to May 5.

Athletics 4, Detroit 3

At Oakland, Bob Welch became the major league's first 12-game winner notching his ninth straight win to lead Oakland. Welch, 12-2, hasn't lost since May 5. Dennis Eckersley worked the ninth for his 23rd save. Rickey Henderson, homered, tripled and singled and drove in two runs for the A's, who snapped a three-game losing streak. Dan Petry, 5-5, took the loss.

White Sox 2, Angels 0

At Anaheim, Greg Hibbard combined with Bobby Thigpen on a shutout and Carlton Fisk belted a home run to spark Chicago. Hibbard, 6-4, scattered eight hits over 8 1-3 inings. Thigpen recorded the final two outs for his major-league leading 24th save. Mark Langston, 4-8, worked eight innings, gave up both runs to take the loss. Fisk's sixth homer of the year moved him within six of Johnny Bench's all-time record for catchers.

#90177u0386 06/26/1990 ~United Press International
(JUNE 26) UPI - Rick Reed may have passed the audition, but he still hasn't won the part.

Reed, just trying to impress enough to land a spot on the Pittsburgh Pirates' injury-depleted staff, ended up hurling a four-hit shutout of the Philadelphia Phillies Monday for his first win of the year.

The 5-0 victory kept the Pirates atop the National League East by 1-2 game and was the the first shutout of Reed's 10-start, 23-appearance career - as well as the first by a Pirate this season. He's now 0-1 on the season and 3-4 for his career.

But Reed may not have time to savor his gem.

He's scheduled to take the mound in San Francisco Saturday, but his place in the rotation, not to mention on the roster, is not secure as injured left-handed starter John Smiley and right-handed reliever Ted Power both are due to come off the disabled list this weekend.

''If we get good enough that we can't get a guy like that into the rotation, if he has to be a long man, we must have a pretty good stable,'' Pirate Manager Jim Leyland said.

If this was Reed's only start he certainly made the most of it, though.

He struggled in the second, loading the basess with two out, but got Phillies starter Jose DeJesus, 0-1, on a called third strike.

''The whole day I was just saying 'seven good innings,' and when I got into that second inning, I said 'You're not going to make it to the third if you keep this up,''' the 25-year-old Reed said.

After the inning, Reed said pitching coach Ray Miller told him to ''quit rushing, settle down and throw one pitch at a time instead of trying to end the game in the second inning.''

After giving up a single to Len Dykstra leading off the third Reed proceeded to retire 20 straight batters before Charlie Hayes singled with two out in the ninth.

''That crowd got to me at the end,'' Reed said. ''I wanted to end the game on three pitches (to Hayes). I got two strikes on him, and I figured it was a great time to end the game. Spanky (catcher Mike LaValliere) called a curveball and I left it over the plate.''

Reed then ended the game by fanning John Kruk on a 3-2 count.

''I let out a yell, smacked my glove and then I said, 'It's about time. It's about time to throw a strike to Kruk,''' Reed said. ''I fell behind on him, and you shouldn't do that.''

Phillies Manager Nick Leyva held off thought his hitters did a pretty good job of making Reed look good.

''We're struggling,'' Levya said. ''We're a little off offensively, and that's surprising because we've got a pretty good hitting ballclub.''

''You've got to give him (Reed) credit. He threw a pretty good ballgame, but we're not going up there and doing the things we're capable of. We're not being aggressive. When you're aggressive, things happen.''

The Pirates got their first run on a wild pitch by DeJesus. Jose Lind drove in two runs with a triple, Reed added a sacrifice fly and Sid Bream had a second-inning RBI single.

Elsewhere in the NL: Cincinnati downed San Francisco 5-2, Los Angeles bounced Atlanta 5-2, Montreal blasted Chicago 7-3, Houston nipped San Diego 5-3 and New York edged St. Louis 3-2.

In the American League it was: Boston 10, Toronto 8; Minnesota 9, Texas 1; Cleveland 10, Milwaukee 5; Oakland 4, Detroit 3; Chicago 2, California 0.

-- AROUND THE NL --

Reds 5, Giants 2

At Cincinnati, Jack Armstrong improved to 10-3 and Todd Benzinger hit a three-run homer to pace Cincinnati. Randy Myers pitched the ninth for his 14th save. Loser John Burkett, 7-2, allowed four runs and six hits in five innings. The Reds now lead the NL West by 10 games.

Dodgers 5, Braves 2

At Atlanta, NL strikeout leader Ramon Martinez fanned nine and fired an eight-hitter to pace Los Angeles. Martinez, 9-3, raised his strikeout total to 121 and didn't walk a batter in notching his league-leading sixth complete game of the season. Braves starter Charlie Leibrandt, 2-1, took the loss.

Expos 7, Cubs 3

At Chicago, Nelson Santovenia drove in three runs and Tim Wallach's two-run single sparked a five-run seventh inning to power Montreal. Winner

Mark Gardner, 4-3, gave up five hits over six innings. Bill Sampen worked the final three innings for his first save. Shawn Boskie, 2-4, absorbed the loss.

Astros 5, Padres 3

At Houston, Mike Scott combined with three relievers for a seven-hitter to lift Houston. Scott, 5-7, allowed five hits over 5 2-3 innings. Dave Smith pitched the ninth to record his league-leading 15th save. Andy Benes suffered the loss and fell to 6-5.

Mets 3, Cardinals 2

At St. Louis, Milt Thompson's error on Dave Magadan's ninth inning double allowed the winning run to score and lift the Mets to their seventh straight victory. David Cone, 4-4, worked eight innings for the win. John Franco notched his 13th save. Lee Smith fell to 1-2.

#90177u0476 06/26/1990 ~United Press International

DETROIT (JUNE 26) UPI - Detroit is America's first Third World city, a fearsome place where decay is everywhere, a new book says.

The trappings of the world's pooorest nations ''are all there - showcase projects, black-fisted symbols, an external enemy and the cult of personality,'' asserts author Ze'ev Chafets in ''Devil's Night and Other True Tales of Detroit.'' The book is to be published by Random House this fall.

A review of the book in Tuesday's Detroit Free Press said the Pontiac, Mich.-born author's view of the Motor City and its suburbs is alternately funny, poignant, provocative and sad.

Chafets lauds Mayor Coleman Young as a leader who has provided blacks with power, but deplores the city as a ''fearsome-looking place'' where many neighborhoods ''appear to be the victim of a sadistic aerial bombardment ... the decay is everywhere.'' He calls Detroit America's ''first Third World City.''

Young, Chafets said, has failed to provide Detroiters with ''the safest streets or most efficient services, nor has he been able to raise their standard of living. But he has given ... a feeling of empowerment and personal worth. Detroit is one of the few places in the country where blacks can live in a sympathetic, black-oriented milieu.''

''Devil's Night'' is the first book to deal with Detroit and its suburbs since Young was elected the city's first black mayor in 1973. It gives

readers glimpses of local life.

Some of Chafets' observations include:

- Detroiters and suburbanites are a friendly bunch, and superficial relationships between blacks and whites are mostly cordial. But the more abstract ''tribal rivalries, fears and hatreds'' he saw reminded him of the Middle East.

- The white suburbanite view of Detroit's tranformation during the past 25 years is that blacks, especially black violence, drove people out of their homes.

- Blacks, who recall the white-dominated city as a repressive place, refute the white view that Detroit is dying. Instead, they feel a new, black metropolis is actually being born.

#90177u0481 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - A new survey has concluded blacks are now less pessimistic about New York City's future than are whites or Hispanics, a published report said Tuesday.

A survey of 1,047 black, white and Hispanic New Yorkers conducted by The New York Times and WCBS-TV six months after Mayor David Dinkins took office shows that many blacks now expect the condition of the city to improve by the year 2000, the Times reported.

Surveys have not revealed such a high level of optimism among blacks about the fate of New York since the administration of John Lindsay in the early 1970s, the newspaper said.

By contrast, when the results of the survey were compared with previous polls, it appeared white and Hispanic residents have begun to feel more pessimistic about the city's future, the Times said.

Broken down by ethnic groups, 17 percent of whites, 31 percent of blacks, and 16 percent of Hispanics told the pollsters they expect New York to be an improved place to live in 10 or 15 years.

At the same time, 55 percent of whites, 39 percent of blacks, and 60 percent of Hispanics said they expect the city to have deteriorated by the time the next century begins, the newspaper said.

Among all respondents, the mayor had a 56 percent approval rating.

More than three-fourths of blacks, half of the Hispanic residents and

slightly less than half of whites surveyed gave Dinkins a favorable review for his first six months on the job, it said.

While the pollsters were unable to conclusively link the switch in attitudes to the Dinkins administration, there were indications that the general attitudes of the three ethnic groups may be linked to the administration of Dinkins - the city's first black mayor.

(JUNE 26) UPI - Around the world... around the clock, U-P-I has the latest news.

Capitol Hill lawmakers hosted a dinner for Nelson Mandela last night. The South African black nationalist thanked Congress for its support and said the U-S-imposed sanctions have been what he called a ''tremendous source of inspiration.'' Mandela also said his meeting with President Bush was successful.

President Bush is to meet with congressional leaders later this morning amid fears that bi-partisan budget talks are breaking down. The White House says the meeting will be ''just a little review of the negotiations to this point.'' Both Republicans and Democrats are pessimistic about a compromise being reached any time soon.

A man who killed 14 members of his family and two others during a 1987 Christmas holiday shooting rampage was executed last night in Arkansas. Ronald Gene Simmons was put to death by lethal injection. He refused to appeal his sentence, saying he wanted his ''torture and suffering'' to end.

In Huntsville, Texas, early this morning, convicted killer James Edward Smith also was executed by lethal injection. Smith- a former voodoo priest- was executed shortly after the U-S Supreme Court denied two appeals brought by his mother. Smith said he wanted to die so he could be reincarnated.

The search for more quake survivors in northwestern Iran is nearing the end, but search teams still have the grim task of pulling perhaps thousands of bodies from beneath the rubble. An Iranian official says at least 50-thousand people died in last Thursday's quake. Some 15-hundred towns and villages were hit by the temblor.

#90177u0517 06/26/1990 ~United Press International

(JUNE 26) UPI - Strong thunderstorms accompanied by hail and winds peaking at 78 mph pounded the Plains states Tuesday causing power outages,

downing trees and prompting forecasters to issue tornado warnings for south central Nebraska.

The storm system moved through Nebraska and Kansas early Tuesday and thunderstorms also were reported from the Dakotas to Minnesota and Wisconsin.

The tornado warning was issued for south central Nebraska by the National Weather Service about midnight after winds gusted to 78 mph at the weather service office in Hamilton, and there were reports of downed trees and power lines.

Storms with winds up to 70 mph raced across northeast and north central Kansas at speeds of up to 50 mph and forecasters warned residents to enter reinforced shelters in preparation for large hail, heavy rain and dangerous lightning.

The storm system cut a path 55 miles wide from southeast of Lincoln, Neb., to just north of Russell, Kan.

Thunderstorms were reported in North Dakota through Minnesota and into central Wisconsin. Dime-size hail was reported in Eau Claire, Wis., in the northwestern part of the state.

Sunny skies and warm temperatures were expected to dominate the Southeast Tuesday, except for portions of south Georgia and most of Florida, where scattered thunderstorms were expected along a a warm front.

Temperatures across the Southeast at 2 a.m. ranged from a high of 77 degrees in Miami and Tampa, Fla., to a low of 63 degrees in Chattanooga, Tenn.

Showers and thunderstorms near eastern Texas and northwest Louisiana threatened to cause flooding in creeks, streams and bayous during the morning hours, the NWS said.

Scattered clouds covered eastern Pennsylvania and southern New Jersey Tuesday morning while the rest of the middle Atlantic from West Virginia to Maryland had clear skies.

Temperatures ranged from the 40s in the Appalachians to the 60s along the Atlantic Coast.

Clear skies were reported over most of New England early Tuesday, with temperatures ranging from the upper 50s in Maine, New Hampshire and Vermont to 68 in Boston.

In the West, hot early summer weather continued in Southern California,

and joined with heavy smog and high fire danger.

The afternoon high temperature Monday in Los Angeles hit 93 degrees, 15 degrees above the normal early summer high. Temperatures in Las Vegas were expected to climb to 112 Tuesday.

About 150 Los Angeles firefighters battled the heat and a 500-acre brush fire in the hills between Mulholland Highway and Topanga Canyon Boulevard. Two firefighters were injured.

The South Coast Air Quality Management District called several stage-one smog alerts, meaning the concentration of air pollutants had reached the hazardous level.

Oppressive heat transformed much of the Plains and desert Southwest into a blast furnace again Monday, driving Texas thermometers to triple-digit readings for the 16th time this month and cracking the century mark in at least four other states.

The National Weather Service reported temperatures from 100 to 108 degrees in portions of Texas, Nebraska, Arizona, New Mexico and desert areas of southern California.

''It's been horrible for a while, because we just haven't had a break from this,'' said Brenda Pate, a bookkeeper in Lubbock, where it hit 103. It was the city's 16th 100-degree-plus day this month, one day shy of the record.

#90177u0524 06/26/1990 ~United Press International

(JUNE 26) UPI - Chinese dissidents Fang Lizhi and his wife, Li Shuxian, are now in Britain after being released by the Chinese government. The United States is praising their release yesterday, which came one year after they sought refuge in the U-S Embassy in Beijing

The Lithuanian Parliament is set to decide today whether to postpone implementing an independence declaration. Soviet television reports most Lithuanian lawmakers oppose suspending the document- a necessary move to facilitate negotiations with Moscow and a lifting of some economic sanctions imposed by the Kremlin.

The U-S Supreme Court has upheld a restrictive abortion law, further undoing the landmark Roe versus Wade ruling. The high court voted 6-3 yesterday to uphold the constitutionality of two tough parental notification laws limiting a minor's access to abortion in Ohio. A second ruling upheld a similar law from Minnesota.

The woman who lured Washington, D-C, Mayor Marion Barry into an F-B-I sting operation at a hotel is expected to take the witness stand sometime soon in Barry's drug and perjury trial. One of four women who testified yesterday at the trial said she saw Barry use marijuana in the Virgin Islands in 1986.

A preliminary study by the Environmental Protection Agency finds about 38-hundred non-smoking Americans die each year from lung cancer caused by ''secondhand'' cigarette smoke. The study also indicates infants whose mothers smoke have a higher incidence of respiratory illnesses.

#90177u0581 06/26/1990 ~United Press International

BANGKOK, Thailand (JUNE 26) UPI - Rainy season fighting escalated in Cambodia last week with more than 200 fighters reported killed on both sides as the resistance claimed the capture of another district capital and the government reported effective counterattacks.

''At 5 a.m. on June 19, our national resistance forces attacked and completely destroyed and swept the township of Prek Prasap District,'' rebel Khmer Rouge radio said.

It said the Chinese-backed guerrilla force also captured two government battalion outposts and a series of villages along the Mekong River about 95 miles northeast of the Cambodian capital of Phnom Penh.

''After a one-hour battle, our national resistance forces killed 37 enemy soldiers, including three district officials, and wounded 30 and captured four others,'' it said.

The Khmer Rouge report said a large amount of weapons were destroyed in the raid along with barracks motorboats and the district office building.

The report did not say whether the guerrillas intended to hold the town, but the pattern of past attacks has been that, except for areas near the Thai border, the resistance quickly withdraws to avoid a government counterattack.

The radio said the attack on the district, only 12 miles from the province capital of Kratie and 36 miles from the Vietnamese border, ''completely removed the roof from the house of Puppet (Prime Minister) Hun Sen's regime.''

On the same day, Khmer Rouge forces ''liberated'' 25 villages in Kong Pisei district, about 28 miles southwest of Phnom Penh, the radio said.

It said five government soldiers were killed in the fighting.

The government news agency SPK also reported an upsurge in fighting and said a total of 168 rebels had been killed recently in three different areas.

The agency said 72 resistance troops were killed around the strategic crossroads town of Svay Chek, about 20 miles from the Thai border. Another 15 guerrillas were killed in smaller clashes near the provincial capital of Battambang, it said. And in what the agency called ''a mopping-up operation'' following a resistance attack on the provincial capital of Kompong Thom, government troops reportedly killed 81 resistance soldiers.

Western diplomats have said the battle reports of both sides are frequently exaggerated, but the reports indicated an upsurge in the fighting.

Resistance sources said they were stepping up the attacks to take advantage of the rainy season and of apparent infighting in the Vietnamese-backed government.

The government last week announced it had foiled a ''reactionary coup d'etat'' by arresting at least six government officials including a cabinet minister.

Khmer Rouge radio has gleefully reported on the dissension, adding unconfirmed accounts of squabbles between Hun Sen and Defense Minister Tie Banh. The radio said Heng Samkai, a province governor and the brother of President Heng Samrin was under investigation. It has also reported that 2,000 people have been arrested.

The government was installed in 1979 following the Vietnamese invasion that swept the Chinese-backed Khmer Rouge from power after 3 1/2 years of brutal rule that killed an estimated 1 million Cambodians.

#90177u0589 06/26/1990 ~United Press International

SARASOTA, Fla. (JUNE 26) UPI - A housing developer has become the first person in Florida sentenced to jail for illegally cutting protected mangrove trees.

Frank Miller, 50, of Englewood, was sentenced Monday to 20 days in the Sarasota County Jail and fined $10,000. He pleaded guilty to 75 misdemeanor counts of cutting mangroves last year on a site where he and his associate William Burke planned to build expensive homes.

Burke, 65, of Sarasota, pleaded no contest to five counts but County Judge Alan Dakan withheld a finding of guilt and imposed no punishment.

Miller and Burke had been scheduled for trial Tuesday in Fort Myers, where Dakan had ordered the case moved because of publicity in Sarasota.

When county environmental officials warned Miller in March 1989 that 2,000 trees on the property had been illegally cut, they reported that he replied: ''Go ahead, fine me. It's the cost of doing business.''

Then, prosecutors said, Miller had 75 more trees cut, resulting in the charges.

State law enforcement and environmental officials said the case is the first of its kind in which prosecutors have sought jail time. Miller and Burke were charged under a 1983 county tree protection ordinance.

Mangroves serve several ecologically important functions. Their intricate root systems help prevent shoreline erosion, and their branches provide nesting areas and shelter for birds and other wildlife.

Dakan also ordered Miller to perform 250 hours of community service work with the county Parks and Recreation Department and placed him on probation for two years. The fine is to be paid to the parks department.

(JUNE 26) UPI - The latest news details and developments... from the wires of United Press International.

Abortion rights activists expressed dissatisfaction with yesterday's U-S Supreme Court decisions upholding parental notification laws for minors.

Anti-abortion forces declared the rulings a ''victory for family unity.''

In a 6-3 ruling, the court upheld the Ohio parental notification law... and in a second ruling, the court upheld portions of a similar law from Minnesota.

Anti-abortion advocate Robert McFadden applauded the rulings, saying they put abortion ''on an equal footing'' with other surgical procedures. In his words... ''I don't know of any other medical procedure on a child that is performed without parental consent.''

However, Bill Baird... a birth control and abortion rights advocate... called the rulings privacy violation. He noted that minors may give birth without parental involvement and even put a child up for adoption.

Statistics show that more than one-Million teens between the ages of 15 and 19 become pregnant each year... about 40 percent of which end in abortion. About half of all states require some parental involvement in the abortion decision of minors.

Nelson Mandela is scheduled to address a joint session of Congress today... one day after a White House meeting with President Bush and dinner on Capitol Hill.

The black South African nationalist leader is on a 12-day, eight-city U-S tour that's part of his larger world tour on behalf of the struggle to end the South African government's racial policy of apartheid.

During his three-hour meeting with Bush, Mandela said he and Bush

''reached a broad agreement'' on most issues and ''narrowed the gaps that previously existed'' on others. Bush assured Mandela that U-S economic sanctions would remain in place against South Africa until more political reforms are enacted.

Mandela asked for financial aid for his African National Congress... but was refused. Bush also turned down a request from Mandela that Washington consult with the A-N-C before making any policy changes toward South Africa.

Last night on Capitol Hill, Mandela recognized the effort of U-S lawmakers at a dinner in his honor given by members of the Senate.

In brief remarks, Mandela called congressional support in the fight against apartheid- quote- ''a tremendous source of inspiration.''

#90177u0611 06/26/1990 ~United Press International

(JUNE 26) UPI - President Bush will meet with congressional leaders at the White House later this morning to discuss the on-going bi-partisan budget talks which have NOT produced any agreements.

Republican Senator Phil Gramm of Texas says Republicans are ''very perplexed'' about negotiations. He says the G-O-P does NOT understand what the Democrats expect from the talks.

Fellow Republican Senator Bob Packwood of Oregon adds that the Democrats need to come up with their own plan. He says if some kind of breakthrough is NOT achieved by the end of this week, it NOT likely there will be any substantive agreement by the time Congress begins its month-long recess in August.

There have been five weeks of preliminary budget talks. Last week, Bush started the negotiating phase by submitting a plan that cut 51-BILLION dollars from the deficit in 1991 and 444-BILLION dollars during the next five years.

Democrats attacked the budget plan as inadequate.

James Edward Smith was executed by lethal injection early this morning after the U-S Supreme Court denied two appeals from his mother. Smith, a former voodoo priest, proclaimed his innocence until the end and muttered ''Hare Krishna'' as his last words.

37-year-old Smith was convicted of the 1983 murder of a robbery victim who had turned over his money and begged for his life. Smith refused to appeal his sentence because he felt he would be reincarnated upon his death.

In a final statement Smith said- ''I go to my death without begging for my life. I will NOT humiliate myself.''

Three hours before Smith was put to death, Arkansas carried out its second execution in one week. Ronald Gene Simmons also was executed by lethal injection, and like Smith, chose NOT to appeal his sentence.

Simmons was convicted of killing 14 family members and two others during the 1987 Christmas holiday season. Prosecutors believe Simmons' primary motivation was to kill his daughter who had ended their incestuous relationship.

Quoting Simmons- ''I only ask for what I deserve. Let the torture and suffering in me end.'' His body had NOT been claimed hours after the execution and, if it remains unclaimed, the killer will be buried in a pauper's grave in Arkansas.

#90177u0615 06/26/1990 ~United Press International

MANILA, Philippines (JUNE 26) UPI - American Peace Corps volunteers assigned to remote villages in the Philippines have been recalled to Manila because of threats from communist guerrillas, U.S. officials said Tuesday.

U.S. Embassy spokeswoman Victoria Middleton said an advisory was issued to 261 Peace Corps volunteers in remote areas to leave their posts and stay in the capital ''until further notice.''

''It's based on the information we got that the rebels have targeted the Peace Corps for political violence,'' Middleton said.

At least 10 Americans have been killed in the Philippines in the past three years in attacks blamed on the communist New People's Army, which has been battling the Manila government for 21 years.

The fatalities included airmen John Raven of Delta Junction, Alaska, and James Green of Craig, Colo., killed last month outside the U.S. Clark Air Base, 50 miles north of Manila.

The 19,000-member NPA has taken responsibility for killing Raven and Green and said it will continue attacking Americans until the United States dismantles its six military bases in the Philippines. U.S. basing rights expire in 1991.

Initial talks on the bases were held last month and a second round of discussions is scheduled for late August in Manila.

Stanley Schrager, director of the U.S. Information Service, said he regretted the recall of the volunteers to Manila, but added ''we're taking such (rebel) threats seriously.''

''We're bringing them all back even as we speak,'' Schrager said in a radio interview. He said the volunteers were working in remote villages and that it was ''very difficult'' to protect them against attacks.

Schrager said U.S. officials were assessing the situation and would decide on what further steps would be taken.

President Corazon Aquino's deputy press secretary, Horacio Paredes, expressed regret at the recall of the volunteers.

''The Philippine government supports 100 percent the Peace Corps programs '' Paredes said. ''I don't know what kind of people these NPAs are. This is terrorism.''

Peace Corps volunteers have been working in the Philippines since 1961, initially as teachers in math, English and science. During the mid-1960s, Peace Corps strength averaged 900 volunteers.

The number of volunteers has been reduced drastically in recent years. Most of those in the Philippines now are involved in a broad range of programs, including health and nutritution, agriculture, agro-forestry, fisheries, water systems and deaf education.

The U.S. government spends an average of $2.8 million annually to support the activities of the volunteers.

In 1985, volunteers were withdrawn from the southern island of Mindanao, where the government was fighting not only communist guerrillas but also a Moslem separatist insurgency.

#90177u0618 06/26/1990 ~United Press International

(JUNE 26) UPI - Search and rescue operations in Iran are coming to an end as hope dwindles that anyone could still be alive under rubble caused by last week's devastating earthquake.

Iran's ambassador to the United Nations says the quake killed more than 50-thousand people, but he adds this figure is only ''an estimation'' as many towns remain cut off to emergency teams. Speaking in New York, the ambassador said a swift rescue operation did save about 100-thousand people from the rubble.

Iran's official news agency says the total number of casualties- the dead and injured- numbers 80-thousand. 500-thousand are homeless. Panic and fear pervades the stricken Iran's northwestern region as aftershocks continue to shake the area.

Some 400 temblors have struck since last Thursday's initial quake. The most recent measured four-point-seven on the Richter scale. An aftershock of five-point-seven hit Sunday.

Relief from 86 countries is pouring into Iran, which says it will accept help from all nations except Israel or South Africa.

Authorities in London say a bomb explosion injured at least seven people last night in a private club frequented by Conservative members of Parliament.

Police say the bomb apparently blew up on the ground floor of the three-story building housing the 158-year-old Carlton Club. A fire followed the blast.

One person- a porter at the club- was seriously hurt and underwent emergency surgery for unspecified injuries.

Scotland Yard says the front of the building on London's historic St. James Street was extensively damaged... and that some of its floors had collapsed.

Police say there have been NO claims of responsibility.

Police Anti-Terrorist Squad Commander George Churchill-Coleman says the investigation into the blast is under way... and he refused to speculate about those responsible.

The Irish Republican Army has in recent months claimed responsibility for the increased number of bombings in central London and elsewhere in England.

#90177u0686 06/26/1990 ~United Press International

(JUNE 26) UPI - Amnesty International says Salvadoran military-backed death squads continue to torture and kill political enemies. This, despite a pledge from Salvadoran President Cristiani that he would check human rights abuses in the Central American country. The London-based human rights organization says so-called ''death squads'' have killed at least 17 people since the beginning of the year.

The New York trial of three youths accused of taking part in a brutal

attack against a Central Park jogger resumes in New York City this morning. During opening remarks yesterday, Assistant District Attorney Elizabeth Lederer said the youths went on a rampage through the park and randomly attacked people. Lawyers for the defendants say the prosection's case is based almost exclusivley on statements their clients made under duress.

A New York Times poll indicates blacks in New York City are less pessimistic than whites and Hispanics regarding the future of the city. The survey, taken six months after Mayor David Dinkins took office, shows blacks now expect conditions to improve by the year 2000. The newspaper says polls have NOT shown such optimism among blacks since former Mayor John Lindsay was in office in the early 1970's.

Official Soviet television reports workers at a gun plant northeast of Moscow have been converting simple firearms into more dangerous automatic weapons and trading them on the black market. The workers' asking price... sometimes just a bottle of vodka. Quoting a K-G-B official- ''Blood is shed and here for a bottle of vodka they are ready to give formidable fighting arms to the first person they meet.''

#90177u0693 06/26/1990 ~United Press International

TOKYO (JUNE 26) UPI - The United States told Japan it will try to put its budget into the black as its part of the bargain in trade talks, U.S. officials said Tuesday on the second day of negotations.

The U.S. plan involves amending budget-balancing legislation to provide for budget surpluses after 1993, said a senior Bush administration official participating in the negotiations.

It will also involve using surplus funds from the Social Security fund to pay off federal debt, said the official, who briefed reporters on condition of anonymity.

The plan was presented to Japan during the second day of talks in Tokyo on broad measures to correct the $45 billion trade imbalance between the two nations. The talks make up the last round of a yearlong effort called the Structural Impediments Initiative.

In April, the two sides produced an interim report on the initiative in which Japan pledged to reform its distribution system and take other market-opening measures and the United States promised to cut its budget deficit and attack its low savings and investment rates to rebuild its competitiveness.

The talks were supposed to finish Tuesday but they will continue for at

least one extra day and possibly longer as the two sides seek agreement on terms for a final report in time for the Economic Summit of Industrial Nations next month in Houston, the official said.

He questioned whether negotiations would end in time for the the report to be ready for the summit's opening July 9, but characterized the talks as good exchanges in which progress was being made.

Tuesday's discussions largely concerned America's efforts to strengthen its competitiveness, he said.

''We focused on the actions which the U.S. government has taken to continue to reduce the budget deficit of the United States, which is our part of the SII process,'' the official said.

The U.S. side tried to impress upon Japan the Bush administration's effort to gain a bipartisan consensus on the budget deficit, he said.

''We describe how the intention of the administration is to extend the Gramm-Rudman-Hollings Act beyond 1993, after which we would reduce outstanding goverment debt by the amount equal to the Social Security surplus,'' he said.

The act contemplates a balanced budget by 1993 but the United States will now aim at a budget surplus in succeeding years, he said.

U.S. anti-trust and product liability laws also figured in the discussions he said, along with deregulation of U.S. export controls.

He said there was progess made on a number of issues, including the U.S. budget proposals and Japan's plans to deregulate its distribution system.

Disagreements, he said, were mainly confined to matters of timing.

But Japanese news reports said the two sides still differed on the level of Japanese public works spending. The United States has been pressing Japan to commit itself to a massive infrastructure spending program to boost domestic demand and reduce savings.

The U.S. side sees public spending as a way to stimulate all types of spending in Japan that would theoretically lead to more imports of foreign goods.

News reports said Japan was ready to offer to spend about $2.7 trillion, or about 8 percent of its gross national product, on infrastructure improvements over the next 10 years. The United States has asked up to 10 percent of Japan's GNP.

#90177u0703 06/26/1990 ~United Press International
VATICAN CITY (JUNE 26) UPI - The Vatican warned theologians Tuesday they have no right to dissent from church teaching and should refrain from using the mass media to propagate their views.

''To succumb to the temptation of dissent is to allow the leaven of infidelity to the Holy Spirit to start to work,'' it said.

The Vatican laid down its rulings in a 23-page document addressed to all bishops under the title, ''Instruction on the ecclesial vocation of the theologian.'' It was issued on the orders of Pope John Paul II by Cardinal Josef Ratzinger, prefect of the Congregation for the Doctrine of the Faith once known as the Inquisition.

The document was the Vatican's response to growing dissent among theologians and some ordinary Catholics, particularly against the church's rigid teaching on sexual matters such as its ban on artificial methods of birth control.

In early 1989, 163 European theologians signed a ''Cologne Declaration'' challenging the pope's stand on a wide range of moral issues and protesting against the Church's ''persecution'' of dissenters.

Several prominent American theologians have been censured in recent years for dissent, mainly on sexual issues.

''By virtue of the divine mandate given to it in the church, the Magisterium has the mission to set forth the Gospel's teaching, guard its integrity and thereby protect the faith of the people of God,'' the document said.

The Magisterium is described in the Catholic Dictionary as ''the church's divinely appointed authority to teach the truths of religion.''

The Vatican document said the theologian must work ''in communion with the Magisterium, which has been charged with the responsibility of preserving the deposit of faith.''

''Even if the doctrine of faith is not in question, the theologian will not present his own opinions or divergent hypotheses as though they were non-arguable conclusions ... in any case there should never be a diminishment of that fundamental openness loyally to accept the teaching of the Magisterium,'' it said.

''Standards of conduct appropriate to civil society or the working of a democracy cannot be purely and simply applied to the church,'' the

document said. ''Polling public opinion to determine the proper thing to think or do, opposing the Magisterium by exerting the pressure of public opinion, making the excuse of a consensus among theologians ... all this indicates a grave loss of the sense of truth and of the sense of the church.''

''The theologian should avoid turning to the mass media, but have recourse to responsible authority, for it is not by seeking to exert the pressure of public opinion that one contributes to the clarification of doctrinal issues and renders service to the truth,'' it said.

''The freedom of the act of faith canot justify a right to dissent,'' the Vatican ''instruction'' said. It cited arguments used by theologians to justify dissent in certain cases and said none of them were valid.

Among the causes of the ''phenomenon of dissent'' it cited ''the ideology of philosophical liberalism, which permeates the thinking of our age.''

''Here arises the tendency to regard a judgment as having all the more validity to the extent that it proceeds from the individual relying upon his own powers,'' it said.

Hinting that theologians and others who disagree with church teaching should leave the church, it said, ''the church has always held that nobody is forced to embrace the faith against his will.''

#90177u0741 06/26/1990 ~United Press International
(JUNE 26) UPI - Convicted killer and ex-voodoo priest James Smith was

executed by lethal injection last night in Huntsville, Texas. Smith was executed shortly after midnight... after the U-S Supreme Court refused to delay the execution.

Smith's execution came three hours after Ronald Simmons was put to death by lethal injection at Cummins Prison in Pine Bluff, Arkansas. Simmons killed 14 family members and two other people in a 1987 Christmas murder spree.

Nelson Mandela begins his second full day in Washington at a breakfast with the congressional black caucus. Later, the black South African nationalist leader is expected to address a joint session of Congress.

Yesterday, Mandela held talks with President Bush for three hours at the White House. Their talks failed to produce firm agreement on how long U-S economic sanctions should remain in place against South Africa.

A symbolic vote is expected in the Senate this evening on the constitutional amendment to ban flag desecration. Although House action has rendered the vote moot... its results will play a factor in this November's elections.

International relief officials in Iran say the search for survivors from last week's earthquake is winding down today. Officials believe it's unlikely that many more survivors will be found buried in the tons of rubble.

Authorities in London say NO one has claimed responsibility for last night's bombing of a private club frequented by Conservative members of Parliament. Officials say at least seven people were injured in the blast.

-30- 1738

#90177u0757 06/26/1990 ~United Press International

(JUNE 26) UPI - European Community leaders conclude their two-day summit in Dublin today. Yesterday, the leaders endorsed the principle of financial aid for the Soviet Union... but put off providing the emergency assistance package.

The Navy says the U-S-S Midway will return to sea Friday for routine flight operations. The Navy's oldest aircraft carrier suffered an explosion nine days ago that killed two sailors and injured 16. The blast is under investigation.

The latest round of peace talks between the Salvadoran government and leftist rebels ended yesterday in Mexico without an accord. Officials say negotiators failed to reach agreement over the issue of reform of the armed forces.

The London-based human rights organization Amnesty International says death squads in El Salvador still are responsible for the torture, killing and ''disappearances'' of their political foes.

A survey published yesterday by a New York consulting firm recommends putting limits on costly medical care to the elderly or the hopelessly ill becasue it's crippling the nation's healthcare system.

Reform rabbis meeting in Seattle overwhelmingly adopted a statement allowing the ordaining of homosexuals and lesbians as religious leaders. There are an estimated one-Million 300-thousand American Jews in reform congregations.

A 24-year-old woman in Washington state gave birth yesterday to quadruplets... three boys and a girl. They were the first quadruplets born in the University of Washington Medical Center's in-vitro fertilization program.

-30- 1726

#90177u0804 06/26/1990 ~United Press International

(JUNE 26) UPI - Nelson Mandela will deliver a historic speech before a joint session of Congress this morning. The South African black nationalist will be one of the few non-heads of state to address Congress. Yesterday, Mandela received assurances from President Bush that U-S sanctions will remain in place until the South African government enacts more reforms.

Congressional leaders will go to the White House this morning for a breakfast meeting with President Bush concerning bi-partisan budget negotiations. Five weeks of preliminary talks have produced NO agreements and both Republicans and Democrats are pessimisstic about reaching a compromise soon.

British authorities say NO one has claimed responsibility for an explosion that injured at least seven people last night. The device ripped through a posh London private club that is frequented by Conservative members of Parliament. During the past few months, the Irish Republican Army has waged a bomb campaign in England.

The leaders of the 12-nation European Community have turned down an appeal from France and West Germany to provide immediate financial assistance to the Soviet Union. But they did agree in principle on a Western aid package for the Soviet Union. The leaders are closing out a two-day meeting in Dublin, Ireland, today.

Lithuanian lawmakers will decide today whether to suspend a document

proclaiming their country's sovereignty. Soviet television reports most lawmakers oppose a moratorium on the measure. But Soviet President Gorbachev has made it clear such a step is necessary before negotiations can begin.

-30- 1779

#90177u0821 06/26/1990 ~United Press International

SEATTLE (JUNE 26) UPI - Rabbis representing 1.3 million American Jews in reform congregations have overwhelmingly adopted a statement allowing the ordaining of homosexuals of both sexes as religious leaders.

The endorsement Monday was followed by a standing ovation from the 500 rabbis for the committee that conducted a four-year study leading to the statement that congregation leaders acknowledged will undoubtedly draw criticism from the Orthodox and Conservative branches of Judaism.

''It was wonderful,'' said Rabbi Joseph B. Glaser, executive vice president of the group. ''It meant that we probably put it (the issue) to bed.''

The report ''strongly endorses'' the view that all Jews are religously equal regardless of their sexual orientation. It also urges all rabbis, regardless of their sexual orientation, ''be accorded the opportunity to fulfill the sacred vocation which they have chosen.''

However, the statement also emphasizes the importance of a ''heterosexual, monogamous, procreative marriage'' as the ideal human relationship.

For that reason, Glaser said those who believe in total ''gay liberation'' may not be satisfied.

''It's not from anybody's standpoint a perfect document, which makes it all the more workable,'' Glaser said. ''There will be reactions from congregations. They will ask questions - we warned them of that - more questions about the sexual orientation of candidates for their pulpits.''

The statement calls upon ''all rabbis - without regard to sexual orientation - to conduct their private lives with discretion and with full regard for the mores and sensibilities of their communities'' and to ''abide by the highest moral values of our relgion: the virtues of family life, integrity and honorable social relationships.''

Glaser predicted other branches of Judaism may react strongly to the statement's acceptance.

''There may be severe criticism from the Orthodox, who feel that this is a most radical violation of Jewish tradition,'' Glaser said, adding he hopes

his good relations with leaders of other Jewish congregations will help avoid too much ill will.

''What I've been saying is, 'Hey, get off my back. We have homosexual rabbis and I'm sure you do too. All we're doing is making a statement about it that's modest enough and please don't make an issue of it,''' he said.

''Hopefully we can handle it this way, but they might get tough on us,'' Glaser said, adding, ''I have no objection to homosexual rabbis as long as they behave themselves and don't flaunt it.''

The statement said homosexuality is predetermined for some and chosen by others. It acknowledges the work and contributions of gay rabbis in the Reform movement, but warns against putting their careers at risk by ''coming out'' to congregations.

''It is a starting point,'' said Rabbi Selig Salkowitz of the Union Temple in Brooklyn, N.Y., chairman of the ad hoc committee that authored the report. ''This report deals with the tension that exists between individual rights and society's norms.''

''It essentially means we will ordain some homosexuals as rabbis, and it recognizes the religious rights of homosexuals in a significant way,'' said Rabbi Norman Hirsch of Seattle's Temple Beth Am.

The 500 representatives attending the 101st annual conference of the Central Conference of American Rabbis later this week will consider a host of other issues in Reform Judaism, considered the most liberal of Jewish congregations.

The issues include dealing with domestic violence; the physican's moral obligation to treat AIDS patients; China's subjugation of Tibet; the right of Native Americans to their ancestors' remains; the current status of Ethiopian Jewry; the right of women to pray at Israel's Western Wall; and a proposed boycott of meeting in states that have failed to recognize Dr. Martin Luther King Jr. with a holiday.

In addition, the rabbis are scheduled to vote on resolutions dealing with Soviet Jewish emigration; the status of Jerusalem as the rightful capital of Israel; electoral reform itism around the world, and violence against women.

#90177u0846 06/26/1990 ~United Press International

(JUNE 26) UPI - Stock prices rebounded sharply on the Tokyo Stock Exchange Tuesday spurred by rebounding yen prices and a stabilization of

short-term interest rates.

The key Nikkei Average of 225 selected issues, which plunged 570.38 yen the previous day, rose 447.58 yen to close at 31,571.77 yen.

The broader Tokyo Stock Price Index, or TOPIX, soared 22.33 points to 2,323.35.

An estimated 400 million shares changed hands, up from 292.35 million shares Monday.

Stock prices in Hong Kong posted moderate gains Tuesday in the heaviest trading in more than a year, fueled by renewed confidence in China's tolerance of dissent.

The Hang Seng index rose 15.91 points to close at 3,292.35. The rise came after a surge of 26.00 points Monday.

Utilities gained 30.40, Financials added 6.67, Industrials increased 8.07.

Properties climbed 33.92

Prices edged up in light trading Tuesday on the Singapore Stock Exchange, bolstered by spurts of bargain hunting.

The Straits Times Industrial Index rose 0.97 to 1523.59.

The All Singapore Index rose 1.05 to 430.62.

Prices closed almost unchanged on the Sydney Stock Exchange Tuesday despite continued weakness on Wall Street.

At the close, the All Ordinaries index was up a mere 0.3 to 1513.1.

Brokers said the modest rise was satisfactory given 'Wall Street's weakness and the prevailing pessimism on interest rates.

There were few highlights in lackluster trading.

Only 86.3 million shares changed hands.

-30- 1669

#90177u0854 06/26/1990 ~United Press International

MIAMI (JUNE 26) UPI - Five Cuban-American mayors in Florida, including the mayor of Miami, jointly denounced Nelson Mandela for refusing to condemn human-rights violations in Cuba.

The South African anti-apartheid leader is to arrive in Miami Wednesday evening, speaking Thursday to a Miami Beach convention of the American Federation of State, County and Municipal Employees.

The mayors of Miami, Hialeah, West Miami, Sweetwater and Hialeah Gardens released a four-paragraph declaration Monday denouncing Mandela.

''We, Cuban Americans, find it beyond reasonable comprehension that Mr. Nelson Mandela, a victim of oppression by his own government, not only fails to condemn the Cuban government for its human-rights violations but rather praises virtues of the tyrannical Castro regime,'' it said.

The declaration came amid a growing political rift over whether community leaders should applaud Mandela's work against apartheid or rebuke him for his support of Cuban President Fidel Castro, Palestine Liberation Organization leader Yasser Arafat and Libyan President Moammar Gadhafi.

Miami city commissioners said last week they were reconsidering a controversial June 7 resolution officially welcoming Mandela. The resolution was originally signed by Mayor Xavier Suarez and all but one of the commissioners, Miriam Alonso.

It remained in limbo because Suarez and Commissioner Victor De Yurre withdrew their support after Mandela appeared on national television last week and defended his support for Castro, Gadhafi and Arafat.

That in turn angered black leaders.

''I would like to see when Mandela steps off that plane that he gets the red carpet treatment,'' said Johnnie McMillian, Miami-Dade chapter president of the NAACP. She called the commission's waffling ''a slap in the face'' to Miami's black community.

The mayors' statement also congratulated Mandela ''on his newly acquired freedom'' and asked for his help in releasing anti-Castro militant Orlando Bosch.

Bosch, 62, is jailed in Miami pending deportation for violating parole. He was convicted in 1968 of attacking a Polish freighter with a bazooka at the Port of Miami and plotting to bomb other ships trading with Cuba. He was paroled after four years but violated parole by fleeing to Venezuela, prosecutors said.

Bosch was charged in Venezuela with the 1976 bombing of a Cuban jetliner, which killed 73 people, but was acquitted.

Monday's declaration was signed by Suarez, Hialeah Mayor Julio Martinez, West Miami Mayor Pedro Reboredo, Sweetwater Mayor Jose Rivero and Hialeah

Gardens Mayor Gilda Oliveros.

#90177u0874 06/26/1990 ~United Press International

HUNTSVILLE, TX (JUNE 26) UPI - A former voodoo priest convicted of slaying a robbery victim smiled early Tuesday as he received his wish to be executed, but not before denying his guilt and uttering the words, ''Hare Krishna.''

James Edward Smith, 37, was pronounced dead at 12:31 a.m. Tuesday. He ended his statement with a wink, a smile and the Krishna blessing before the drugs were administered at 12:19 a.m.

''I've already spoken the truth but because it was spoken by someone accused, the truth was not respected,'' Smith said in a final statement as thunder rumbled outside the prison. ''It must come from the man who spoke the lie.

''I am not the killer. I myself did not kill anyone. I go to my death without begging for my life. I will not humiliate myself. I will let no man break me. It just can't be done.

''There is a price to be paid. I want the people to wake up to the reality of executions. The price to be paid will be a dear one.''

Smith said he wrote his last statement for all death row inmates upon the request of the editor of the prison newsletter.

The Texas execution came more than three hours after the execution by lethal injection of Ronald Gene Simmons, 49, in Pine Bluff, Ark., at 9:19 p.m. CDT.

Smith, the third Texas inmate to die by injection in the last three months was the 132nd person to be executed in the United States since the Supreme Court reinstated the death penalty in 1976.

Smith was convicted of killing Missouri City insurance agent Larry Rohus, 44, who turned over his money and begged for his life during a 1983 robbery at the Union National Life Insurance Co. in Houston.

A former Hare Krishna follower who also claims to be a former voodoo priest, Smith two years ago asked prison officials for dirt to enable him to perform a voodoo ritual marking of his body which would assist what he believed would be his reincarnation.

Smith had refused to allow appeals to be filed on his behalf, contending that continued incarceration was cruel and unusual punishment, and that he

would be reincarnated after execution.

After the execution, Assistant Attorney General Bob Walt told reporters he considered it cruel that Smith's fate was uncertain while the Supreme Court debated two last-second appeals filed over Smith's objections.

''This probably was cruel and unusual punishment - the manner in which it was carried out because of the delay and making the person wait until the last minute to find out,'' Walt said.

Walt, who said he understood that the dissenting justices had written a five-page opinion on the procedure to decide an inmate's competency, indicated that justice had been served.

Smith remained calm Monday, spending most of his time spent watching television and sleeping, prison officials said.

He ate his final meal of plain yogurt at 6:20 p.m. and wore the standard prison uniform of white pants and shirt for the execution.

Earlier Monday, psychologist Jerome Brown of Houston ruled Smith was mentally competent to make the decision to not appeal.

The evaluation was set up after attorneys for Smith's mother, Alexine Hamilton of Indianapolis, brought up psychological evaluations conducted in 1978 in Miami. Smith at that time was found innocent by reason of insanity in a Dade County, Fla., robbery.

Brown previously had examined Smith and found him competent but sought the new evaluation after reviewing the Florida case.

Attorneys for the state and Harris County submitted Brown's latest findings to Smith's trial court, the Texas Court of Criminal Appeals, U.S. 5th Circuit Court of Appeals and the Supreme Court without success.

Hamilton's attorneys also filed a second appeal before the Supreme Court questioning the grounds of the conviction.

Smith complained bitterly after his mother won a stay of his May 11, 1988, execution date.

''Time is all I have,'' Smith once said in criticizing the previous stay. ''I could already be 2 years old in another body, a 2-year-old prodigy.''

Shortly after his first execution date was stayed, Smith claimed to have been involved in ritualistic killings in Orangeburg, S.C., New York City and Miami. But authorities in those areas said they were unable to substantiate any of Smith's claims that human sacrifices were offered to

voodoo gods, and Smith admitted last week that he had lied.

LONDON (JUNE 26) UPI - Writer Salman Rushdie, who has been sentenced to die by Iranian zealots, has donated $8,600 to victims of last week's devastating earthquake in Iran.

He donated the money on Monday to The Independent Iranian Earthquake Appeal, organized by The Independent newspaper to help survivors of the earthquake that Iranian officials said left at least 50,000 people dead.

''I wanted to join The Independent and the hostage families and many other other people in their appeal for contributions toward the needs of the Iranian earthquake victims,'' Rushdie said in a message delivered from his hiding place.

''It's quite clear that at the moment we should be thinking only of the humanitarian issue, which transcends all other discussion,'' said Rusdhie, 42.

The Indian-born writer has been out of public view since Feb. 14, 1989, when the late Iranian spiritual leader, Ayatollah Ruhollah Khomeini, sentenced him to death for writing ''The Satanic Verses,'' a novel many Moslems regard as blasphemous. Subsequent Iranian leaders have endorsed the death order.

A charity started and chaired by Terry Waite, the Church of England envoy believed held hostage by a pro-Iranian group in Lebanon, has also provided aid to quake victims.

(JUNE 26) UPI - Nelson Mandela is expected to press for continued U-S economic sanctions against South Africa during his address this morning to a joint session of Congress. At a dinner in his honor last night, the black South African nationalist told members of Congress that their support of economic sanctions against South Africa- quote- ''has been a tremendous source of inspiration.''

Two convicted killers became the 131st and the 132nd persons to be executed in the last 14 years in the United States last night and early today. In Texas, James Smith was executed by lethal injection at the state prison in Huntsville shortly after midnight. And Ronald Simmons was put to death last night by lethal injection at Cummins Prison in Pine Bluff, Arkansas.

U-S officials in the Philippines are recalling Peace Corps workers assigned to remote villages to Manila because of threats from communist guerrillas. The U-S Embassy in Manila says the advisory was issued to 261 volunteers to leave their posts and stay in the capital ''until further notice.'' The embassy says the rebels have targeted the Peace Corps for political violence.

Last week's vote by the House effectively killed any chance this year for a constitutional amendment against desecration of the American flag. But the Senate is holding a symbolic vote late this afternoon on the measure. Many senators fear the results of the vote will resurface in campaign ads, in particular 30-second commercials... in the November elections.

LONDON (JUNE 26) UPI - A British-owned supertanker sailed slowly toward port Tuesday with investigators trying to find the cause of an explosion that sparked a fire that killed two seamen and left one other missing and presumed dead.

Transport Department officials and a spokesman for Shell U.K., which owns the 227,400-ton Rapana, said there were no indications of any oil spillage but a Marine Pollution Control aircraft had been dispatched to survey the area with sensing equipment.

The officials said investigators had not yet discovered what sparked the Monday blast in the main pump room of the vessel, about 40 miles southwest of the Norwegian coastal city of Stavanger.

The explosion started a fire that swept through the area, where pumps are run to bring oil on and off the ship, and between various compartments. The flames spread toward the rear of the vessel but were controlled by Norwegian firefighters shortly after midnight, they said.

Fire personnel stayed aboard until the ship reached international waters, from where they were lifted by helicopter back to Norway, the officials said.

Officials reported the fire killed two members of the 42-man crew, who were mostly from the Philippines and the Bahamas. A third seaman was missing in the gutted pump room and is presumed dead, they said.

Another member was severely injured and 21 crew members were transported to Norway while a skeleton staff of 18 guided the massive ship to Scotland for repairs.

The officials said the vessel was steaming under its own power at 11 mph and would arrive Wednesday morning at the Firth of Forth.

Shell Oil said it would conduct a full investigation once the ship docked.

(JUNE 26) UPI - Lithuanian lawmakers are meeting today to discuss a moratorium on their republic's declaration of independence from Moscow. Soviet television reports that most Lithuanian lawmakers oppose suspending the declaration. Soviet President Gorbachev received Lithuanian President Landsbergis today in Moscow and discussed the possibility of secession if Lithuania freezes the declaration.

New York real estate developer Donald Trump has until midnight tonight to come up with 43-Million dollars overdue on two casino bonds or else work out a 20-Million-dollar bridge loan to stave off bankruptcy. A published report says one of the conditions of the bridge loan is that Trump live on 450-thousand dollars a month, a drop from personal expenses in May.

In the Philippines, a 23-year-old American model who skipped bail on gun smuggling charges and fled to the United States... was found guilty by a criminal court today and sentenced to 17 to 20 years in jail. The judge says the sentence against Dominique Adams will be implemented- in his words- ''if she makes the mistake of coming back to the Philippines.''

Fisher-Price Toys has agreed to warn parents its ''Little People'' figures can choke children who put them in their mouths. Under the agreement, Fisher-Price will place warning stickers on ''Little People'' boxes. New York Attorney General Robert Abrams says the company will print the warning label directly onto the package beginning next year.

TOKYO (JUNE 26) UPI - Texas oilman T. Boone Pickens said Tuesday he will take his fight for access to investments in Japan to the Houston economic summit in July and make his case a test of Japan's promise to open its markets.

''I may not know my way around Tokyo, but I know how to get things done in Houston,'' Pickens said at a news conference.

Pickens has been trying for 16 months to gain representation on the board of Koito Manufacturing Co., Japan's largest auto parts maker, Koito Manufacturing Co.

He is the company's major shareholder with 26 percent of the stock but has been denied seats on the board, a fact Pickens said exemplifies Japan's closed-door policy on foreign investment.

Pickens will press his case at Koito's annual shareholders meeting Thursday, but admitted he expects to be rejected by a majority of shareholders close to Koito management.

He said his next step will be to try to get the issue on the agenda of the Houston economic summit, where the leaders of the top seven industrialized nations meet beginning July 9.

''Prime Minister (Toshiki) Kaifu has indicated he does not want to take any unresolved (trade) issues to the Houston economic summit,'' Pickens said. ''I will have no problem taking the keiretsu (Japan's closed business practices) issue and my experience in corporate Japan to Houston.''

Pickens's visit to Japan coincides with the latest round of U.S.-Japanese trade talks, and he is also seeking help from the U.S. trade negotiators.

U.S. officials said Monday they are pleased with Japan's proposals to open its markets.

''Koito will be a test for those promises,'' Pickens said. ''The way to judge Japan's sincerity is for Koito to put me on the board of directors.''

Pickens has asked to be given four of Koito's 20 board seats.

Koito has refused to give Pickens a voice in running the company because it fears he is after greenmail - an inflated price paid for stock to prevent a hostile takeover.

Pickens has repeatedly said he is not interested in the tactic but has declined to reveal the details of his Koito stock purchase.

Pickens bought his stock from Kitaro Watanabe, a Japanese investor and owner of an auto dealership.

Koito representatives said they believe Watanabe turned over his stock to Pickens in hopes Koito would buy back the stock at inflated prices and the two investors would split the resulting profit.

''I don't think it would be to my advantage to talk about (it),'' Pickens said of his deal with Watanabe.

Pickens indicated he may soon increase his holdings in Koito to 33 percent.

#90177u0994 06/26/1990 ~United Press International
MOSCOW (JUNE 26) UPI - Soviet President Mikhail Gorbachev received Lithuanian President Vytautas Landsbergis Tuesday and discussed the possibility of negotiations if Lithuania freezes its declaration of independence.

It was Landsbergis's first one-on-one meeting with Gorbachev since Lithuania declared itself sovereign more than three months ago. It came as the Lithuanian parliament gathered in the republic's capital of Vilnius to consider declaring a moratorium on the March 11 declaration of independence.

But Landsbergis told Lithuanian Radio it was unlikely there would be a vote Tuesday on a moratorium. ''It is too complicated a question,'' he said. The Tass news agency also reported the interview.

Although indicating progress, Landsbergis said: ''Moscow has also not exhausted its possibilities for compromise.''

Tuesday's meeting came at Gorbachev's invitation and lasted 90 minutes, the official Tass news agency said. Landsbergis previously had met Gorbachev in a joint session with the presidents of the other Baltic republics, Estonia and Latvia.

''The discussions (Tuesday) touched on mutual relations, the possiblity of negotiations, and the suggestions and demands of the U.S.S.R. to Lithuania regarding a moratorium on its declaration of independence,'' Tass said.

Moscow Radio's Interfax news service quoted Landsbergis as saying, ''There was a useful exchange of opinions. The meeting allowed a clarification of the position of two sides.''

The Lithuanian parliament was considering declaring a moratorium to suspend the effect of Lithuania's March 11 declaration of independence from the Soviet Union in order to meet Gorbachev's conditions for talks on secession.

Soviet officials have also pledged to end a partial economic blockade of the republic if it suspends its declaration of independence.

The official Soviet television news show ''Vremya'' said Monday night a majority of the Lithuanian Supreme Soviet, or Parliament, opposed the moratorium and felt the declaration of independence should stay in effect. It did not give a source for the conclusion.

Lithuanian President Vytautas Landsbergis has also hinted he may oppose

the moratorium, and nationalist groups have organized rallies outside the government building urging legislators not to suspend the declaration.

But a poll by the Lithuanian Academy of Sciences, cited by the independent news agency Interfax, Monday showed that more Lithuanians support Prunskiene than Landsbergis or the Parliament.

Sixty-one percent of those polled said they supported Prunskiene while Landsbergis's popularity rating fell to 28 percent from 45 percent in a previous poll by the same organization on an unspecified date.

Prunskiene proposed the moratorium after the possibility of a compromise emerged from a June 11 meeting between Gorbachev and the presidents of the Baltic republics of Lithuania, Latvia and Estonia.

Gorbachev originally had demanded Lithuania rescind its declaration of independence before he would lift the blockade or agree to any talks. But at the meeting two weeks ago he softened his stand and said suspension of the proclamation would be sufficient.

The moratorium proposed June 16 by the Council of Ministers, the equivalent of a Cabinet, would remain in effect for the duration of talks with Soviet officials on full independence for Lithuania, which was annexed by the Soviet Union along with Latvia and Estonia in 1940.

While Gorbachev has offered the Baltic republics ''special status'' in a new, looser Soviet federation of republics, Lithuanian officials have said any negotiations will focus on the process of secession and not a new confederation.

This year, new nationalist-controlled parliaments chosen in free elections in each of the three Baltic republics declared independence from Moscow. The Lithuanian proclamation was the most radical.

Moscow cut off oil, most natural gas and other raw materials to Lithuania two months ago in an effort to force it to back off independence.

The partial blockade forced many Lithuanian businesses to close and an estimated 40,000 people were unemployed. Lithuanian Finance Minister Romualdas Sikorskis said last week the blockade cost the republic more than $160 million.

#90177u1049 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - Senate leaders averted a key vote on a major civil rights bill, originally scheduled Tuesday just before the address of Nelson Mandela to a joint meeting of Congress, by agreeing to act on the measure next month.

Senate Democratic leader George Mitchell said Monday night that the measure, which would reverse Supreme Court decisions that civil rights leaders feel would foster employment discrimination, will be brought up after the July 4 recess.

Senate Republican leader Robert Dole sought to block consideration of the bill, pending completion of negotiations with the White House, and sharply critized Democrats for trying to take preliminary action to coincide with the visit of Mandela to the Capitol.

The vote, which was canceled, was on a motion to limit debate on Mitchell's attempt to bring up the legislation.

Mitchell said ''negotiations have been under way for some time. I hope they will continue during the recess.

''It is my intention to bring up the bill as soon as possible, I hope, following the recess,'' Mitchell said. ''And I hope that during the time between now and then the parties will be able to reach an agreement on this very important measure.''

Dole said negotiators made ''some progress'' Monday and added ''perhaps when we come back from the July 4 recess we will be in position to move very quickly.''

#90177u1101 06/26/1990 ~United Press International

(JUNE 26) UPI - Read his lips. President Bush is saying tax hike. The president this morning issued a brief statement, saying ''it is clear to me'' that the need to reduce the budget requires ''tax revenue increases'' and domestic spending cuts. The announcement came after Bush meet for two hours with Republican and Democratic congressional leaders. He says budget

talks will continue ''with a view toward reaching substantive agreement as quickly as possible.''

A joint meeting of Congress will be the next audience to hear black South African leader Nelson Mandela speak here in America. Mandela was scheduled to address U-S lawmakers this morning on Capitol Hill. The anti-apartheid leader is seeking to gauge how far the United States will go in helping to end the racially discriminatory system.

The first one-on-one meeting between Soviet President Gorbachev and Lithuanian President Vytautas Landsbergis took place today in Moscow. Gorbachev invited the leader of the breakaway Soviet republic to discuss the possibility of talks on Lithuania seceding from the Soviet Union.

U-S negotiators vowed to balance the budget as part of the bargaining in trade talks with Japan. A senior Bush administration official in Tokyo says the U-S plan calls for amending the budget-balancing legislation to provide for budget surpluses after 1993. The official told reporters that the plan involves using surplus funds from the Social Security fund to pay off federal debt.

#90177u1124 06/26/1990 ~United Press International

ATLANTA (JUNE 26) UPI - The latest round of holiday air-fare wars took place without Delta Air Lines and Eastern Airlines.

Atlanta-based Delta, decided Monday not to match the Fourth of July discount fares of up to 51 percent offered by Continental, United, American and Northwest airlines.

Eastern said it was considering the matter, but had no immediate plans to discount fares.

Continental started Monday's fare wars, with special prices of $98, $158, $198 or $238 for round-trip flights during the week of July 4. The price of the non-refundable tickets, which must be bought by Thursday, depends on the distance of the trip.

The carriers slashed their prices in hopes of filling their planes during the holiday week.

That means a traveler can fly to Dallas, Chicago or Houston from Atlanta for just $158 on American, United or Continental. Delta can fly a traveler to Dallas or Houston for $260 and to Chicago for $198.

#90177u1159 06/26/1990 ~United Press International

TAMPA, FL (JUNE 26) UPI - Two Russian men were arrested on charges of trying to smuggle seven semiautomatic shotguns into Moscow, federal agents said Tuesday.

Alexandre Mikouline, 51, of Moscow was arrested at Tampa International Airport by federal investigators as he prepared to board a flight to Washington, D.C., Monday. Authorities confiscated his luggage.

Another Russian, Georgy Kuparadze, 51, was arrested an hour later at a St. Petersburg Beach condominium.

U.S. Bureau of Alcohol, Tobacco and Firearms agents said both men were charged with conspiring to provide false information to a federal gun dealer. Their arrests followed a nine-month investigation.

Investigators said the men intended to sell the guns for personal profit.

''It is my belief that those guns were destined for Russia,'' said ATF Resident Agent James Sadberry.

A search warrant was expected to be issued Tuesday allowing ATF agents to open Mikouline's luggage, where they believe they will find the firearms, Sudberry said.

Both men were scheduled to appear before a U.S. magistrate Tuesday afternoon in Tampa. Sudberry said the charges would carry possible 10-year sentences.

A resident alien of St. Petersburg Beach, Mikouline was in the United States on a visa, while Kuparadze was born in the Soviet Union, emigrated to Canada and is in the United States on a Canadian passport, Sudberry said.

Both men were being held without bail Tuesday at the Hillsborough County Jail.

Sudberry said officials believe the men bought the shotguns at a Tampa area gun shop.

Five of the weapons are pump-style shotguns with pistol grips, while two are ''street sweeper'' models with short barrels capable of holding several shotgun shells in a drum-shaped magazine.

-30- 1984

#90177u1183 06/26/1990 ~United Press International

HOLLYWOOD (JUNE 26) UPI - ''Dick Tracy'' slipped but didn't quite fall during its second week in North America's movie houses, holding onto the No. 1 spot but with 31 percent less business.

''Tracy'' copped $15.5 million at the turnstiles last week, edging out

''RoboCop 2,'' which grossed $14.1 million.

Warren Beatty's highly praised film version of the old Chester Gould comic strip had a per-screen average of $6,667 in 2,332 theaters in its second week. So far it has grossed $50.2 million, halfway to the magic $100 million mark, which it should reach easily.

Its biggest challenge came from ''RoboCop 2,'' a sequel to the hit cyborg thriller of 1987 starring Peter Weller as an alloy cop. In per-screen averages, ''RoboCop 2'' actually outmuscled ''Dick Tracy'' with $7,996 in 1,769 houses.

According to Entertainment Data Inc., the only other new picture of consequence opening last week was ''Betsy's Wedding,'' a coming-of-age romantic comedy starring Molly Ringwald as an unconventional bride and Alley Sheedy as her sister.

''Betsy's Wedding'' made its debut in 1,048 venues and grossed $4.6 million, for a $4,448 per-screen average - good enough to rank No. 6.

Remaining in the third spot for the second straight week was Arnold Schwarzenegger's ''Total Recall,'' which grossed $8.2 million, bringing its four-week total to $81.4 million and a sure bet to go over $100 million before long.

No. 4 was Eddie Murphy's ''Another 48 HRS.,'' tumbling another 29 percent and two clicks in the standings. The loud, profane comedy tipped the tills for $7.6 million in 2,301 situations for a $3,318 per-screen average and a total of $50.5 million.

Rounding out the top five was ''Gremlins 2'' with a take of $7 million in 2,155 houses. In two weeks the adventure-comedy of demented demons on the loose in a Manhattan skyscraper has scared up $21.3 million - not as much as expected.

None of the superbudgeted movies released so far this summer has proved a breakaway hit of the proportions of last year's mega-smash ''Batman'' - including ''Dick Tracy.''

Moreover, two big springtime winners were pushed out of the top 10 for the first time: ''Teenage Mutant Ninja Turtles'' and ''The Hunt for Red October.''

In record-setting 1989 the box-office grosses for the equivalent week in North America's 23,000 theaters was a rip-roaring $145.4 million. Business was off more than $10 million last week with an overall gross of $135 million.

So far this year all movies have brought in $2.1 billion. Last year at this time the tally was $2 billion.

Still, theater owners weren't crying the blues. The top 10 films in release all registered at least $1 million as No. 8 ''Pretty Woman'' still led the pack with a 14-week tally of $144.2.

The top 10, last week's gross, total gross, weeks in release:

1. ''Dick Tracy,'' $15.5 million, $50.2 million, 2 weeks.
2. ''RoboCop 2,'' $14.1 million, 1 week.
3. ''Total Recall,'' $8.2 million, $81.4 million, 4 weeks.
4. ''Another 48 HRS.,'' $7.6 million, $50.5 million, 3 weeks.
5. ''Gremlins 2,'' $7 million, $21.3 million, 2 weeks.
6. ''Betsy's Wedding,'' $4.6 million, 1 week.
7. ''Back to the Future Part III,'' $3.8 million, $64.1 million, 5 weeks.
8. ''Pretty Woman,'' $3.3 million, $144.2 million, 14 weeks.
9. ''Bird on a Wire,'' $2.6 million, $59.4 million, 6 weeks.
10. ''Milo and Otis,'' $1.4 million, $4.5 million, 2 weeks.

#90177u1187 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - The Du Pont Co. announced Tuesday it has received government approval to market the first Soviet drug licensed and clinically developed by an American pharmaceutical company.

The company said the Food and Drug Administration agreed to permit the use of Ethmozine for the treatment for abnormal and life-threatening heart rhythms known as ventricular arrhythmias.

These irregular heartbeats are caused by heart attack, coronary artery blockage and other disorders, and are blamed for hundreds of thousands of deaths each year.

Dr. John Mullane, director of drug development for Du Pont, said the drug was discovered in the late 1960s in Moscow and has been available in the Soviet Union for about 18 years.

Du Pont researchers first learned of the drug on a trip to the Soviet Union in 1974, he said. The company applied for FDA approval for the drug in September 1987.

The main benefit of Ethmozine is its lack of side effects, limited mainly to nausea and dizziness in ten to 15 percent of patients, Mullane said. Quinidine, a popular heart medicine the doctor cited as a comparison, can cause other arrhythmias and lower blood pressure.

The average daily dose of Ethmozine is 600 to 900 milligrams, and costs $2 to $4 a day, about the same price as other heart drugs, Mullane said. Under an agreement with Du Pont, the Soviet government will receive royalties of four percent of sales.

"While our laboratories are discovering important, potentially life-saving compounds, our marketing units continue to pursue worldwide co-licensing agreements," said Joseph Mollica, the company's vice president for pharmaceuticals.

#90177u1193 06/26/1990 ~United Press International

TAMPA, FL (JUNE 26) UPI - Drug-trafficking charges against five international bankers and a Colombian businessman have been thrown out of court - but the defendants still face federal charges of money laundering in a case tied to deposed Panamanian dictator Manuel Noriega. U.S. District Judge William Terrell Hodges ordered the drug charges voided Monday after hearing five months of prosecution testimony.

The former Bank of Credit and Commerce International employees and the Colombian were arrested in Tampa in 1988 following a two-year undercover investigation. A federal grand jury handed down indictments against the men and two divisions of the bank shortly before the arrests.

The BCCI divisions, indicted as a corporation, pleaded guilty to money laundering and forfeited $14 million, the amount of drug money prosecutors said was filtered through BCCI branches. The drug trafficking charges alleged the defendants conspired to possess, with intent to distribute, cocaine and marijuana from 1983 to 1988.

Some of the alleged deals involved convicted drug smuggler Steven Kalish, who tied BCCI to Noriega during U.S. Senate testimony. Noriega's former personal banker, Amjad Awan, is among those on trial.

Hodges struck the testimony from prosecution witness Roberto Baez-Alcanio because prosecutors could not sufficiently link Alcaino to the BCCI bankers on trial. He was on the witness stand for a week.

Alcanio, who had pleaded guilty to drug-trafficking and money-laundering charges in a related indictment, provided the only drug trafficking testimony and exhibits in the trial.

Defense attorneys have argued their clients never knew the money they were handling was the proceeds of cocaine sales, and that they were trying to protect customer confidentiality. Defense testimony began Tuesday and is expected to last two or three weeks.

ROME (JUNE 26) UPI - Riot police arrested 246 British soccer fans Tuesday after running street battles in the city of Rimini between supporters of the English and Italian teams competing in the World Cup championship in Italy.

Twenty supporters of both sides, several other nationalities and two police officers were taken to hospital for treatment of cuts and bruises and other minor injuries. All were released from hospital early Tuesday.

The England fans were to appear before magistrates and expected to be expelled from Italy hours before England was to play its World Cup second-round, knock-out match against Belgium in the city of Bologna.

The behavior of British fans at the current World Cup soccer tournament in Italy is being evaluated by international soccer bodies.

British teams have been banned from some competitions as a result of violence involving their fans.

In Brussels, Belgium, an appeals judge Tuesday increased the sentences of 11 British soccer fans convicted of manslaughter in a 1985 soccer riot in which 39 people were killed. The disturbance in Brussels occurred at a European Cup final match between teams from Liverpool, England, and Turin, Italy.

The latest trouble in Rimini, 150 miles northeast of Rome, started when groups of England supporters poured onto the streets following Italy's victory over Uruguay in a match Monday evening that qualified the Italian team for the quaterfinals.

The British fans began smashing windows and vandalizing vehicles.

Armed Italian gendarmes intervened, arresting small groups of rowdies and taking them back to police stations for identification and questioning.

''But the situation got worse when other groups of English supporters began confronting Italian supporters,'' a Rimini police spokesman said.

In particular, groups of England fans at the Rose and Crown bar on Rimini's waterfront showered abuse, bottles and chairs on local Italians.

The fighting in the city was aggravated when Italian supporters in return began taunting England fans at the Lord Nelson club.

''But we have no indication that the trouble was in any way provoked by

the Italians,'' said local police chief Lorenzo d'Onofrio.

Italian supporters were out in force to celebrate their team's 2-0 win over Uruguay. In traditional Italian glee over their squad's quarterfinal qualification, cars and supporters began a cacophony of hooting and shouting to celebrate.

Tuesday morning's disturbances in Rimini came following the arrest and expulsion of 19 English fans in Bologna Monday. Those supporters were arrested after they were found beating two Tunisian immigrants with bottles.

Italian authorities have clamped down on any form of soccer-related violence, following England, West Germany and Holland supporters in force wherever they go in order to prevent an explosion of violence often related to matches involving the various teams.

Britain's Minister for Sport Colin Moynihan has praised Italian authorities for the efficiency of their anti-hooliganism operations

In Brussels, Belgian Judge Pierre Van De Walle increased the terms of seven of the 11 Britons convicted of manslaughter in the 1985 soccer rioting incident from three to four years, and the sentences of four others from three to five years.

Half of the orginal sentences had been suspended, but the appeals judge canceled the suspensions. He also upheld a fine of $1,700 on each of the 11 defendants.

According to court testimony, the 11 British fans started fights with supporters of the Italian team. A wall collapsed, crushing fans, most of them Italian.

BUENOS AIRES, ARGENTINA (JUNE 26) UPI - A consortium of companies led by Bell Atlantic Corp. and Manufacturers Hanover Trust Co. has won the rights to operate the northern sector of the Argentine telephone company in Argentina's largest privatization program to date, it was announced Monday.

The southern half of the phone company will be operated by a consortium led by Citicorp of New York and Spanish phone company Telefonica de Espana which Monday won the bid for that sector.

Together, the two groups offered to pay over $5 billion in foreign debt for the purchase of the two sectors of Entel, as the Argentine phone company is known, according to Maria del Carmen Llaver of the Public Works Ministry.

It is the largest privatization of a state-run company in Argentina since Austral Airlines was sold in 1987 for $20 million.

The Citicorp-Telefonica group made the best bids for both the northern and southern zones of Entel, but under the rules of the sale the second-highest bidder - Bell Atlantic and Manufacturers Hanover - could equal the offer, according to the ministry.

Citicorp and Telefonica de Espana have pledged to pay $2.720 billion in debt swaps for the southern zone. The winning Bell Atlantic-Manufacturers Hanover bid, in its second offer, offered $2.309 billion in debt swaps for the northern portion.

In addition to offering the debt swaps, Citicorp and telefonica de Espana must make a down payment of $114 million in cash and additional cash payments of $204.430 million over three years, according to the rules of sale.

Bell Atlantic and Manufactuers Hanover must pay $100 million in cash down and $176.570 in cash payments over three years. The Entel privatization plan was designed to split the company into two units to encourage competition between its respective operators.t

Llaver said Citicorp and Telefonica de Espana indicated Monday afternoon they wished to focus on the southern zone of Entel, opening the way for Bell Atlantic and Manufacturers Hanover to equal the bid for the northern zone.

"At 9:15 p.m. Monday night a representative of Bell made a new presentation," Llaver said, explaining the second round of bidding. "They not only equalled the bid of Citicorp-Telefonica for the northern zone, but they surpassed it by $1 million," she said.

The competitive factor in the bidding was based exclusively on which firm buys most of Argentina's foreign debt on the secondary market, where, according to Llaver, there was a rise Monday of from 13 cents to the dollar to slightly over 14 cents to the dollar.

Llaver said the price fluctuations at this moment would not make much difference in the sale. "We can assume that the bidders were already in possession of the debt," she said.

The bids were for 60 percent of the ownership of Entel. The remainder of the company is to be sold to employees, independent investors and independent phone companies. A transfer of ownership of Entel from state to private hands is expected to take place in October.

The Italian company Stet and French Cable and Radio, backed by the U.S.

bank J.P. Morgan, was the only other bidder in the three-way competition for the northern and southern zones.

The winning companies must invest $4.7 billion in both the northern and southern zones combined over the next seven years, according to sale rules. President Carlos Menem is to make a formal award of the bids to the winners Thursday.

NEW YORK (JUNE 26) UPI - The third New York International Ballet Competition ended Monday with Russian, Spanish and Bulgarian dancers winning top honors but no gold medals were awarded.

A panel of 11 judges announced that after four rounds of competition beginning June 19 at Lincoln Center, none of the 30 participants could be singled out ''as being obviously superior, complete and total dancer, one that is both technically excellent and artistically eloquent.'' It was the first time since the competition was established in 1984 that no gold medals were given.

''There was extraordinary talent but no clear cut candidate to award the gold,'' said Igor Youskevitch, world renowned dancer and artistic director of the competition.

Those honored with silver medals at Monday's Tully Hall award ceremonies, which were hosted by actor Tony Randall, were Aidar Akhemetov of Russia, Victor Alvarez of Spain and Dilana Nikiforova of Bulgaria. Bronze medals went to Ventizislav Petroff of Bulgaria, Slawomir Wozniak of Poland, Kathleen Arcieri of Ridgefield, N. J., Sylvina Perillo of Argentina and Valerie Robin of Milwaukee.

Special awards were given to Barry Hughson of Washington, D.C., for excellence in partnering and Anthony Huen of the Netherlands for artistic achievement.

Dance competitors from 16 countries ranging in age from 17 to 23 had been in New York since June 2 preparing for the competition, one of the world's most prestigious. Russia sent a pair of competitors to participate for the first time.

BEAUMONT, TX (JUNE 26) UPI - Gulf States Utilities has agreed to settle its four-year contract dispute with the Southern Co. of Atlanta, Ga., for an estimated $300 million in cash and GSU stock. GSU Chairman Linn Draper said Monday the company's agreement will not mean any increased rates for customers.

Draper said GSU will pay Southern $75 million in cash. Gulf States already has $68 million in an escrow account established by a federal court that can be used for part of the payment. Draper said GSU will pay Southern the

remaining $7 million before Dec. 31. GSU also will sign a promissory note to Southern for $160 million, which will be payable Jan. 1, 1993.

Additionally, GSU will issue six million shares of common stock to the Southern Co. Based on a closing price of $10.25 a share Friday, the GSU stock would be valued at more than $60 million.

Draper said GSU will put up the Lewis Creek Power Plant, near Willis in Montgomery County, and the stock of GSG&T Inc., a Willis-based subsidiary of GSU, to Southern as collateral.

The payment plan must be approved by the board of directors of each company, the court and regulatory agencies such as the Securities and Exchange Commission.

The dispute stemmed from a 1982 deal by four Southern utility subsidiaries to sell electricity to Beaumont-based GSU from 1984 through May 1992. In 1985, GSU said its customers' energy needs had fallen below expected levels and asked Southern to consider suspending or ending the sales. In 1986, according to Southern, GSU discontinued most of the payments. In 1988, Southern stopped all transactions with GSU.

Southern contended that Gulf States was required to continue accepting, and paying for, the electric power. Gulf States argued the contract required good-gaith negotiations whenever changes in capacity purchases were requested.

The case went before the Federal Energy Regulatory Commission, the U.S. Court of Appeals for the District of Columbia Circuit and the Supreme Court. A separate suit is pending in the U.S. District Court in Texas, but when the settlement is approved, that suit will become moot, Draper said. In 1986, GSU filed a suit against Southern. Southern filed a countersuit against GSU for $1 billion for failing to pay for the power.

"The dark cloud has in many ways hampered our ability to look into the future," Draper said. "A $1 billion judgment could have been the demise of the company."

GSU will make several changes in its accounts to charge off the payments, which some financial analysts said may affect shareholders during the next few years.

#90177u1311 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Imelda Marcos's flamboyant country lawyer, foregoing his cowboy clothes and folksy style, made an impassioned plea for her Tuesday, saying she ''has committed no crime but loving a man for

35 years.''

Marcos, 60, also is charged with fraud and obstruction of justice for allegedly plotting with her husband, ousted Philippine President Ferdinand Marcos, to divert more than $200 million stolen from the treasury in Manila into real estate and art investments in New York and around the world.

Her attorney, Gerry Spence of Jackson Hole, Wyo., left behind his Western garb and instead donned a blue suit for his closing argument.

James Linn, attorney for Adnan Khashoggi, Marcos's cod-efendant, was to sum up his case Wednesday.

The jury was expected to start deliberations Thursday.

''There is no crime in being wealthy ... spending money,'' Spence said. ''There's no crime in buying jewelry (and) real estate in New York.

''She has committed no crime but loving a man for 35 years, raising his children, (receiving) his lavish gifts,'' he said.

Spence agreed with Charles LaBella, an assistant U.S. Attorney prosecuting the case, by saying that Marcos should not get a sympathy vote because she became ill three times during the three-month trial.

''Mrs. Marcos does not want your verdict on sympathy,'' he said. ''She fought to stay in this case ... she wants to be vindicated.''

Further recalling LaBella's argument, Spence said, ''It must have been dirty money ... she must have known. It's the other way around under the American system of presumption of innocence.

''She must have been innocent,'' he said. ''If there is a question ... she must be innocent.''

Marcos, in black mourning clothes, stared at a blank page in a book in which she had been writing and sketching during the trial.

''We're here to reach a verdict (even though) we didn't put a single witness on,'' Spence said. ''Reasonable doubt can also arise from lack of evidence.''

The prosecutor's argument Monday saw Marcos from a different angle.

''She was in every sense a partner with Ferdinand Marcos, in fact she was the driving force in transactions Ferdinand Marcos was informed of,'' LaBella said.

''Imelda Marcos was not just the wife of Ferdinand Marcos, but a politician in her own right. She was the governor of metro Manila.''

Khashoggi, 53, at one time one of the world's richest men and also allegedly involved in the Iran-Contra scandal, is charged with obstruction of justice and fraud for allegedly helping the Marcoses hide the purchase of four prime pieces of real estate in Manhattan.

#90177u1319 06/26/1990 ~United Press International

FORT WORTH, Texas (JUNE 26) UPI - A federal district judge granted Burlington Northern Railroad Co.'s request Tuesday for a temporary restraining order, forestalling a brief strike by BN's union whose members maintain the track and right of way.

U.S. District Judge Eldon Mahon issued the order at 2:30 a.m. CDT against the Brotherhood of Maintenance of Way Employees.

The union, representing some 5,500 employees at BN, were set to began the strike at 6 a.m. CDT and some picket lines had gone up in other states, but the strikers were ordered not to establish picket lines or to take them down after the ruling was issued, BN spokesman Roger Campbell said.

BN is headquartered in Fort Worth, Texas.

''Judge Mahon signed the order at 2:30 a.m., about half hour after we filed the motion,'' said Campbell. ''There was some disruption and some train delay as a result of the strike.

''We went to the judge in anticipation of a strike. The strike has ended in some areas while the pickets are still up in some other areas,'' Campbell said.

He said picketing occurred in Nebraska, Missouri, Colorado, Wyoming, Illinois, Wisconsin and Iowa. There were no action in the Dallas-Fort Worth area, he said.

Campbell said he had been informed some pickets were still up in Wisconsin and Colorado, but were soon expected to end.

The dispute between the railroad company and the union is over new equipment the company is testing in Nebraska between Omaha and Lincoln. The equipment is designed to mechanically clip the rails to their concrete ties, instead of manually as it is being done by the union workers.

The union members insist it is their right to operate the equipment.

Campbell said the euipment belongs to the contractor, Herzog Contracting Corp. of St. Joseph, Mo., and only the contractor's employees are authorized to operate it.

He conceded that when the new technology is installed, fewer union employees would be needed to maintain the tracks. However, he said the affected workers would not be laid off but given other assignments.

In his order, Judge Mahon said the strike and picketing was unlawful and beyond the power of the union ''inasmuch as it is in violation of the Railway Labor Act.''

The judge also set July 5 hearing on why the railroad's motion for a preliminary injunction against the union should not be granted.

#90177u1365 06/26/1990 ~United Press International

BANGKOK, THAILAND (JUNE 26) UPI - The Burmese government has rejected evironmentalist charges it is allowing the destruction of Burma's forests, but admitted it has little control over Thai companies logging areas along the border, official radio reported.

Lt. Gen. Chit Swe, the minister for agriculture and forests, reportedly told a forestry department seminar that satellite photographs refuted environmentalist allegations the military government was allowing the wholesale destruction of the country's tropical hardwood forests.

Official radio, in a broadcast Monday night, quoted Chit Swe as saying 57 percent of Burma was covered by forests.

He described the situation as better than in most other countries, but said he wanted to emphasize protection and conservation of forests to gradually expand the forest area.

The minister said Burma's system of selecting only mature trees for logging was working effectively. But he acknowledged timber concessions along the Thai border were largely outside of government control.

Chit Swe said concessions had been granted to Thai logging companies because ethnic insurgents and Thai companies had already been cutting timber in the area without government approval. He denied the concessions were made because of the government's desperate need for foreign exchange.

He said some logging companies had used ''unscrupulous methods'' and encroached up to seven miles inside Burma.

''Authorities concerned recommended that Thai companies be allowed officially to extract timber in these areas as departmental authorities could not extract timber due to insurgency,'' the radio said.

But the minister said the logging along the border would be allowed only for a limited period. He added if the companies involved wanted to continue their activities, they would have to act according to their agreements.

Once government officials were able to enter the insurgent-controlled areas they would carry out surveys on the logging, he said.

There have been persistent reports that Thai companies cut logs outside concession areas and cut smaller trees than allowed under the Burmese selection system.

Chit Swe said the Thai government bore some responsibility for the logging activities of Thai companies in Burma because the firms could not transport timber into Thailand without government approval.

Thai timber companies have already complained about Burmese plans to raise prices charged for Burmese teak by 100 percent.

Both prices and demand for imported timber have soared in Thailand since

the Thai government ordered a halt to all domestic logging to preserve Thailand's fast-dwindling forests.

#90177u1380 06/26/1990 ~United Press International

LONDON (JUNE 26) UPI - Chinese dissident Fang Lizhi and his wife thanked President Bush and the U.S. Embassy staff in Beijing Tuesday for helping them obtain asylum in the West.

They also pledged ''to do whatever we can'' to help China progress and develop, and expressed hope that communist authorities would soon allow their son to come to England, their new exile home.

''The past year has been very difficult for us but we have received strong support from the international scientific community and friends everywhere '' the couple said in a statement released through the Royal Society, a prestigious body of scientists with which the renowned astrophysicist will now work.

The Fangs, who spent more than a year in the U.S. Embassy in Beijing to escape retribution by Chinese officials accusing them of igniting last year's pro-democracy movement, expressed their ''heartfelt appreciation'' to Bush and all embassy personnel.

''We understand that our son will soon be able to study abroad and we are naturally looking forward to a family reunion,'' they said. ''As citizens of China, we hope to do whatever we can in the future to help China's continuing progress and development.''

China's official Xinhua news agency reported Fang and his wife, Li Shuxian both 54, were allowed to leave China to seek medical treatment but there has so far been no confirmation they were ill.

''We look forward in the next few days to a period of quiet, a chance to rest and recuperate, and to have some medical tests,'' said the Fangs, who apparently are staying at the U.S. Air Force base in Upper Heyford, where they landed late Monday aboard a U.S. military plane.

British officials have been low-key about the couple's arrival in England, where Fang will continue his studies at Cambridge University. They said London was anxious not to anger China, with which it wants good relations in the runup to Beijing's assumption of the sovereignty of Hong Kong in 1997.

Xinhua said the Fangs were given ''lenient treatment'' after admitting political errors linked to last year's pro-democracy movement that ended in bloodshed in Beijing's Tiananmen Square.

Their departure from China defused a bitter squabble between Beijing and Washington as their presence inside the U.S. compound had been seen as the major obstacle impeding improvement.

Fang Ke, one son of the dissident couple, said in the United States he doubted his parents ''renounced the movement,'' as China said they did.

''I know they're not afraid to admit what they've done - they're very consistent,'' said the 27-year-old physics student at Detroit's Wayne State University, who added that he received a letter from his father a month ago and there was no mention of health problems.

A statement written by Fang and released Monday by the State Department said he would not participate in ''contrary activities whose motive lies in opposing China.''

His statement described his opposition to the government.

''I am opposed to the four cardinal principles (the tenets underpinning the Chinese communist system) which are contained in the preamble to the Chinese Constitution, because their purpose is to uphold a political system of 'class struggle.'''

State Department spokeswoman Margaret Tutwiler said the release would not end U.S. economic sanctions against China.

China's decision to release Fang, apparently aimed at improving relations with the United States, came a month after President Bush renewed certification of China's most-favored-nation trade status despite calls in Congress to revoke it.

Tutwiler said the United States hopes China will take a ''similarly positive approach'' toward people imprisoned for peaceful pro-democracy protests as that taken toward Fang and Li.

China has freed several hundred dissidents in recent months but is believed to hold thousands more.

There is no credible evidence supporting Chinese claims Fang and Li instigated last year's non-violent demonstrations in Tiananmen Square, although Fang met with protest leaders including Wang Dan, now imprisoned.

China's most prominent critic of one-party Communist rule, Fang has said he sympathized with the students' demands for greater political freedoms but did not approve of the demonstrations.

Fang was expelled from the Communist Party in 1987 after being accused of

inciting student pro-democracy protests in 1986.

#90177u1399 06/26/1990 ~United Press International
WINDER, GA (JUNE 26) UPI - What's a 1 1/2-year-old bear to do when it's mating season and he's just not up to the task? Well, one 150-pound black bear decided to spend a few days cavorting with the community of Winder.

After two days of trying to capture the elusive bear, authorities finally cornered him in a briar thicket Tuesday and shot the animal with a tranquilizer gun.

The bear, which was tagged in Fannin County in 1989, promptly dozed and now will be carried back to the mountains of northeast Georgia, far away from Winder.

State biologist Kent Kammermeyer said the bear likely fled the mountains because older and bigger bears refused to tolerate him during the mating season.

''He's tolerating people a little more than he should be,'' Kammermeyer said.

Winder police began their quest to snare the bear about 7 p.m. Sunday, but it was Tuesday before they completed their task.

''To be honest, I was surprised at how quiet he could be,'' said Police Chief Jimmy Terrell. ''He'd be right near you and the only way you'd know is that you'd see the top of the weeds moving.''

#90177u1436 06/26/1990 ~United Press International

(JUNE 26) UPI - New York City police are circulating a sketch of the man who questioned the Zodiac gunman's latest victim, but police are NOT calling the man a suspect. Police say the man in the sketch approached a homeless man in Central Park, asking about his birthdate last week. A few days later, the homeless man was shot as he slept on a park bench. Police say the gunman stalked four victims whose astrological signs he apparently knew. One of the four victims has died.

Louisana state senators are preparing for a showdown this afternoon in Baton Rouge over what may be the nation's toughest anti-abortion legislation. The Louisiana House has already passed the plan outlawing abortions unless a woman's life is threatened by the pregnancy. The law would make it a felony to perform an abortion, punishable by 10 years in jail and a fine of up to 100-thousand dollars. Louisiana's governor says he will veto the plan unless it includes exceptions for rape and incest.

-30- 1138

#90177u1445 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - The Senate embarked on a futile and symbolic debate about amending the Constitution to ban flag desecration Tuesday, a discussion affecting only politicians eager for an issue in the fall elections.

The Senate faced four alternative proposals to the 20-word amendment backed by President Bush and pushed by Capitol Hill Republicans, with an early evening vote expected.

The first two alternatives were statutes, one to ban flag desecration in cases where the individual knew it was likely to cause a breach of the peace, and the other to remove flag cases from the jurisdiction of the Supreme Court. The other two were alternative constitutional amendment proposals.

Legislatively, the question was a moot point because the House last week not only rejected the amendment approach, 254-177 or 34 short of the two-thirds needed, it refused by a nearly identical margin to pass a statute to ban flag desecration. Flag desecration cases that have prompted

court reviews have involved flag burnings.

And passage by the Senate of a statute to bar flag desecration was unlikely to affect the issue's fate because of the prior House actions and a promise by House leaders to let the issue lie.

The core amendment declared: ''The Congress and the states shall have power to prohibit the physical desecration of the flag of the United States.''

The issue exploded onto the floors of the House and Senate this month when the high court, for the second time in a year, held 5-4 that flag burning was a constitutionally protected form of free speech.

The futility of the debate and the political nature of it was noted by Sen. Howard Metzenbaum, D-Ohio, who recited the comments of GOP strategists expressing delight at how the issue could be used against Democrats in the fall.

''It is unnecessary, unworkable and unwise for Congress to take any action to prevent flag desecration,'' said Metzenbaum.

''So why are we going to vote on a constitutional amendment that cannot possibly be enacted this year? The answer can be summed up (as) ... there are those who would politicize the flag issue. There are those who are anxious to find the material for a 30-second TV spot. There are those politicians who want to exploit the issues of flag burning. So today we will take a meaningless vote so some campaign operative'' can use the results, said Metzenbaum.

Sen. Dan Coats, R-Ind., argued, ''We do care deeply about symbols. ... The support I have seen and heard for such an amendment is undeniable. ... Most of all I can see it in the determination fixed in the faces of our veterans.''

WASHINGTON (JUNE 26) UPI - Jurors hearing drug and perjury charges against Mayor Marion Barry listened Tuesday to tapes of Barry's 1989 grand jury testimony in which he denied being involved in cocaine with one of his chief accusers.

The jury and lawyers used headphones to listen to the tapes of Barry's Jan. 19, 1989, grand jury testimony. On the tapes, Barry characterized his trips to Charles Lewis's Ramada Inn room the month before as innocent visits.

Barry repeatedly denied any knowledge of drug use by Lewis, a former city worker since convicted of drug dealing, and also said he did not receive cocaine from Lewis.

Barry faces 14 counts, including three felony perrjury charges that accuse of him lying to the grand jury when he said that he never knew Lewis was involved with drugs or talked to him about drugs; never gave cocaine to Lewis or received cocaine from Lewis; and did not recieve cocaine from anyone at the Ramada.

Lewis, who reached a plea bargain with prosecutors, testified last week that he and Barry shared crack at the Ramada on Dec. 16, 17, 19 and 22, 1988.

''Have you ever known Mr. Lewis to be involved in drugs,'' Barry was asked by Assistant U.S. Attorney Judith Retchin on the grand jury tape.

''No, I have not,'' Barry said.

He later said: ''I've never given Mr. Lewis any cocaine or any other drugs '' and answered ''no'' when asked if he received cocaine at the Ramada Inn or ever obtained cocaine from Lewis.

Barry said he did not recall even seeing Lewis on Dec. 16.

''I don't remember every day or every hour,'' Barry told the grand jury. ''That is insignificant in the scheme of my life. ... I'm not trying to be evasive, but I just don't remember.''

Barry punctuated most statements with, ''to the best of my recollection.''

Barry said he visited Lewis ''just to see him, to chat.''

Retchin asked Barry if he brought anything with him on the Dec. 17 visit, and Barry replied, ''maybe a folder.''

Lewis testified Barry smuggled crack cocaine into the hotel room that night in the cuffs of his pants.

Barry also said, ''at one point I took him a book.''

Lewis testified that on Dec. 22, Barry brought a duffle bag filled with books, with a crack pipe hidden inside.

Barry also testified before the grand jury Jan. 24, 1989.

The action followed dramatic testimony Monday from four women from the Virgin Islands.

One woman said Barry forced her to have sex with him, two others testified that he used marijuana while in the Virgin Islands, and one simply called him ''a pig'' because of sexual innuendo.

Barry called the allegations of sexual misconduct ''just not believable.''

None of Monday's witnesses said they ever saw Barry use crack or powdered cocaine. Barry is not charged with using marijuana or with any sexual offenses.

Rasheeda Moore, 39, the woman who lured Barry into an FBI-police sting operation five months ago at the Vista International Hotel that led to his cocaine possession arrest, was expected to take the stand soon.

Her testimony would lead to presentation of a videotape of the sting that allegedly shows Barry smoking crack.

Barry has announced he will not seek a fourth term in this year's mayoral election and would be removed from office if convicted of a felony and imprisoned before his term ends next Jan. 2.

He is charged with three felony counts of perjury, 10 misdemeanor counts of cocaine possession and one misdemeanor count of conspiracy to possess cocaine. If convicted he faces a maximum 26 years in prison and $1.85 million in fines.

#90177u1462 06/26/1990 ~United Press International

BOSTON (JUNE 26) UPI - After rising steadily for the past 30 years, the rate of infants born through Caesarean section in the United States remains ''extraordinarily high,'' a government researcher said Tuesday.

A study by the National Center for Health Statistics found the Caesarean rate during 1981 through 1986 to be 23 per 100 hospital deliveries - more than twice the rate in England and the Netherlands and more than three times the rate in Japan.

Only Brazil, with 32 Caesarean sections per 100 deliveries, and Puerto Rico, with 29, had higher rates than the United States out of 21 countries studied, said researcher Francis Notzon in the Journal of the American Medical Association.

A Caesarean section is a surgical procedure in which the abdomen and womb are cut open for childbirth. It is done when conditions exist that could make normal, vaginal birth dangerous for the mother or her baby.

Despite the sharp differences in Caesarean rates from country to country, there exists ''no significant association'' between the frequency of Caesarean deliveries and levels of infant mortality, Notzon said.

In Japan, for instance, infant mortality in 1985 was slightly lower than in the United States, despite the substantially lower Japanese Caesarean rate, Notzon found. While such comparisons are ''imperfect at best, this does indicate that low levels of early infant mortality can be achieved in some populations despite a low rate of Caesarean deliveries,'' he said.

Following two decades of consistent increases in Caesarean sections in Europe, North America and certain Pacific countries prior to 1980, Notzon found the rate slackened after 1980. While the average increase was 8.7 percent annually from 1976 to 1980, it slowed to 4.6 percent from 1981 to 1985.

Nevertheless, if the current annual increase in Caesarean rates continues in the United States, the number of procedures carried out per 100 deliveries will double in 11 years, the study found.

Notzon said the figures raised questions that should be addressed in future studies. He said one question concerns why there was a slight drop between 1980 and 1985 in Caesarean sections performed in the United States because the fetus was in distress, while the proportion of births diagnosed with fetal distress rose from 2 percent to 6 percent during the same period.

Researchers should also look at why less than 7 percent of women in the United States and Canada who have had a prior Caesarean section deliver subsequent babies vaginally, while numerous studies have indicated that about half are capable of vaginal delivery, Notzon said.

In addition, he suggested that researchers study Sweden, where the Caesarean rate leveled off and then declined slightly in the first half of the 1980s after rising rapidly in the mid-1970s. In 1985, the Swedish Caesarean rate was 12 per 100 hospital deliveries - slightly more than half that of the United States and two-thirds that of Canada.

Given the growing medical costs associated with Caesarean procedures, the Swedish experience ''might prove useful to other nations interested in stemming the rise in their own Caesarean rate,'' Notzon said.

#90177u1488 06/26/1990 ~United Press International

COLOMBO, SRI LANKA (JUNE 26) UPI - Government bombing attacks killed about 100 Tamil rebels Tuesday in a military effort to rescue some 400 soldiers and police trapped in a military camp in the north of the country

military sources said.

The attacks came a day after air force helicopters dropped thousands of leaflets asking civilians to evacuate the area and warning them of the dangers of remaining in the area.

Military sources said the bombings took place on the Jaffna Peninsula, 190 miles north of Colombo, where about 400 soldiers and police officers were surrounded in an army camp inside a 200-year-old Dutch fort.

The air force Tuesday, sources said, used fixed-wing aircraft and helicopters to drop bombs and launch rockets on Tiger positions surrounding the fort, which had been under sttack for about two weeks.

At least 100 rebels were killed and 10 bunkers destroyed in the attacks, military sources said. There was no report of civilian casualties or government losses and additional details were not immediately available.

Fighting between government forces and Liberation Tigers of Tamil Eelam guerrillas erupted June 12 when rebels staged simultaneous attacks on four military camps in eastern Sri Lanka, killing at least 66 soldiers.

Since then, more than 600 soldiers, police officers, rebels and civilians have been killed, and more than 183,000 people have been left homeless, sources said.

The Tigers are demanding an independent Tamil homeland in the northern and eastern provinces because they believe the country's mostly Hindu Tamil minority has been discriminated against by the Sinhalese majority, which is predominantly Buddhist and controls the Colombo government.

In other developments, at least five government troops were killed and 20 others injured in separate attacks in the disputed region Monday. Seven Tamil rebels were also killed in fighting near the strategic port town of Trincomalee, 150 miles northeast of the capital, military sources said.

#90177u1496 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - President Bush, in a politically sensitive environmental decision, said Tuesday he would delay all oil drilling off the shores of California for at least six years and defer any development off the Florida Keys until the end of the century.

Bush, citing the need to protect ecologically sensitive coastal areas, also announced he would not allow any federal sales of oil and natural gas leases off the North Atlantic Coast or the shores of Washington and Oregon for the next 10 years to allow time for further environmental study.

Bush said the only areas of offshore California where drilling might be permitted after 1996 were 87 sea floor tracts in Southern California identified as having high potential for significant amounts of oil and gas.

All 87 are located in the Santa Maria Basin and the Santa Barbara Channel. Otherwise, Bush said, all other California offshore lease sales would be delayed until after the year 2000.

State officials and environmentalists have urged Bush to put off planned lease sales off of the California coast and off of southwestern Florida in the Gulf of Mexico.

In both states, opponents said oil and gas development would irreparably damage rich fishing grounds and vital habitat for many rare animals and ecosystems, particularly the coral reefs of the Keys, where Bush often vacations for fishing trips.

In a recent report to Bush, a special administration task force recommended the president delay lease sales off California and Florida so additional studies could be done on the environmental impact of drilling.

In his announcement, Bush said he was accepting those recommendations because''further steps to protect the environment are needed.''

But while he was responding to environmental concerns, Bush said the nation had to accept that offshore drilling was needed to meet U.S. energy demands.

''Americans must recognize that the (offshore) program is a vital source of fuel for our growing economy,'' he said in a statement. ''I continue to believe that there are significant offshore areas where we can and must go forward with resource development.

''My desire is to achieve a balance between the need to provide energy for the American people and the need to protect unique and sensitive coastal and marine environments,'' Bush said.

Politically, Bush's decision shores up his effort to portray himself as the ''environmental president'' and helps Sen. Pete Wilson, R-Calif., in his run for governor this year. Opinion polls have shown that most Californians oppose offshore drilling.

For California, Bush said his plan to allow leasing in the 87 Southern California tracts was contingent on environmental studies showing that drilling operations would not be ecologically damaging.

Bush also announced he was approving a proposal to establish a National

Marine Sanctuary in California's scenic Monterey Bay. He said that would provide a permanent ban on oil and gas drilling in that area.

For Florida, Bush said he was not only deferring any leases for at least a decade but also was ordering the Interior Department to look into buying back leases that already have been sold off southwest Florida near the Keys and the Everglades.

#90177u1498 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - For Nelson Mandela, who spent 27 years of his life in the prisons of South Africa, the single hour he was lionized in the chamber of the House of Representatives must have been a moment of poignant sweetness.

Reviled for decades by the white-only government of his native land, Mandela found only adulation and worship from Congress Tuesday in one of the highlights of his whirlwind tour of the United States.

Now 71, showing a stamina that would shame many much younger, he enthralled and captivated an audience that included not only senators and congressmen, but members of the Cabinet, the diplomatic corps and others.

All this, despite the fact that Mandela was and is a controversial figure not only in South Africa but also in the United States.

Not everyone is unconcerned that Mandela refuses to renounce violence, if all else fails, to end apartheid or that the African leader refuses to turn his back now on those who helped him before - Yasser Arafat, Moammar Gadhafi and Fidel Castro.

But those, and they are in the minority, either did not attend the ceremony like Sen. Jesse Helms, R-N.C., or wandered out of the chamber shortly before Mandela arrived, as did Rep. William Dannemeyer, R-Calif., who called the event a ''national disgrace.''

The much more common reaction to Mandela's address to a joint meeting was that of Rep. Mike Espy, D-Miss., who invited five heroes of the civil rights fight in Mississippi.

''Mr. Mandela and these gentlemen live on separate ends of our Earth, but their struggle has been the same,'' Espy said. ''They struggle for freedom and equality.''

And there appeared to be far more blacks in the audience - especially in the visitor galleries - than normal for a joint meeting of Congress and seemingly a more emotional exuberance.

Mandela gave no notice that several in the chamber voted against every civil rights bill in the 1960s, including Senate President Pro Tem Robert Byrd, or of reports, not confirmed, that the U.S. government set up Mandela for his arrest.

Mandela, average-size, athlete-trim, came to the Capitol under extremely tight security and was escored into the House chamber, evoking the first of several standing ovations.

Beaming, he raised his arms in greeting to the galleries before striding to the podium where he was engulfed in clapping which finally turned rythmic before the House was gaveled into silence.

Mandela, using a text in a departure from normal practice, spoke in a strong voice. But his monologue delivery and his accent made it difficult, at times, to understand his words.

But as he moved into the later parts of his speech, the message came across and Congress began giving him standing ovations. One of those came when he cited black American heroes such as John Brown, Sojourner Truth, Frederick Douglass, W.E.B. DuBois, Marcus Garvey and Martin Luther King.

He ended his speech with a simple ''thank you'' and then worked his way up the center aisle, shaking every hand stretched his way as whistles mixed with cheers.

He stopped one more time, turned around, waved with both hands to the galleries and slipped through the massive doors.

#90177u1538 06/26/1990 ~United Press International

DETROIT (JUNE 26) UPI - General Motors Corp. said Tuesday it is developing plans with Czechoslovakia's government to build up to 250,000 automobile transmissions a year there for export to GM assembly plants throughout Europe.

GM said the transmissions would be destined for its Opel Vauxhall cars and would help satisfy a projected shortage of the components during the next two to three years.

''Under current plans, GM Europe anticipates that foreign exchange would support the company's Opel vehicle distribution system in Czechoslovakia as well as other business initiatives,'' the automaker said in a statement released in Prague and Zurich.

In Detroit, GM spokesman Ron Theis said that an agreement could be reached

within the next several months but that there is currently no financial commitment or partner involved in the feasibility study. Transmission manufacturing could begin about 18 to 24 months after any agreement is reached.

GM Europe and several other Western automakers have so far announced joint ventures or partnerships with Eastern European manufacturers since political and economic reforms in those countries late last year.

In May, GM announced plans to build about 10,000 Opel Vectra cars with Automobilwerk Eisenach in East Germany starting later this year. GM also announced plans last January to build up to 200,000 engines and 15,000 small cars annually in Hungary with the state-owned truckmaker Raba by 1992.

The plans to build automobile transmissions are independent of GM's other potential business ventures in Czechoslovakia, including a possible manufacturing arrangement with Bratislavski Automobilove Zarody, a manufacturer of light commercial trucks.

GM is also involved in discussions with the Czech carmaker Skoda, although sources say it is unlikey any manufacturing agreement will be reached between them.

#90177u1568 06/26/1990 ~United Press International

TEHRAN, IRAN (JUNE 26) UPI - Relief officials, giving up on finding any more survivors from last Thursday's devastating earthquake, said Tuesday rescue efforts were winding down despite reports another 15 people were found alive under tons of rubble.

An Iranian relief worker shuttling between Tehran and the disaster area in northern Iran said the 15 survivors of different ages were found under rubble in the remains of the town of Manjil, about 140 miles northwest of Tehran, as tons of masonry were being removed by bulldozer and hand.

Another report said one of the survivors was a 6-year-old boy.

The earthquake, which measured 7.7 on the Richter scale, devastated scores of towns and villages Thursday between the Caspian Sea and Zanjan in northwestern Iran.

Iran's ambassador to the United Nations said the death toll was at least 50,000, while Iran's Central Relief Headquarters put the figure at 36,907, according to official Islamic Republic News Agency.

The news agency put total casualties at 80,000 with 500,000 left homeless.

But a swift rescue operation was credited at pulling to safety some 100,000 from collapsed buildings.

Tehran radio said helicopters were dropping relief supplies to survivors in high mountain villages still inaccessible by road. Earlier reports said landslides, caused by the original quake and hundreds of aftershocks, had blocked roads in the area.

The Iranian news agency said 39 more military and civilian aircraft carrying relief supplies from 19 countries landed at Tehran's Mehrabad Airport Tuesday, bringing to 171 the planeloads of relief arriving in Iran since Thursday.

Despite its strained relations, the United States was among the donor countries, giving $291,000 in relief supplies to Iran including blankets, tents, water jugs and rescue equipment.

As relief to the survivors poured in, a statement issued in Geneva by the League of Red Cross Societies and the U.N. Disaster Relief Organization said the rescue operation was winding down.

''Search and rescue operations in Iran's five earthquake-stricken provinces are coming to an end,'' said statement said. ''The compact nature of the rubble plus the relative ease of access to it makes it unlikely that there will be many more survivors.''

It was feared hundreds or even thousands of bodies were still in what was left of 1,500 towns and villages hit by the disaster.

''Of the area's 4 million population, 500,000 have been left homeless, but half of these have already been given temporary shelter in tents and another 30,000 to 40,000 tents are still needed,'' the statement said.

Relief officials reported on return to Geneva after visiting three severely damaged towns in the Shahrud River valley said, ''Most casualties have been evacuated from the disaster area, many to Tehran.''

The statement praised the immediate relief response at local and national levels in Iran as ''large-scale, rapid and efficient. There is no need for further international relief personnel in the country.''

The Red Cross continued to appeal for donations and readied to airlift more emergency supplies to quake-stricken areas.

''The Geneva-based League of Red Cross and Red Crescent Societies is readying another flight from Europe carrying medicines, blankets, generators and tents to shelter remaining victims, many of whom are

staying with friends and relatives,'' said a statement issued by the American Red Cross.

It also said an 11-member International Red Cross team is visiting disaster areas with the Iranian Red Crescent Society to assess damage and help coordinate assistance from Red Cross societies worldwide.

An official at the Tehran University Geophysical Center said the aftershocks could continue for two months before abating. Bahram Akkasheh said the quake was along a fault in the Alborz Mountain range that has been sporadically active for at least 2,000 years.

#90177u1582 06/26/1990 ~United Press International

TALLAHASSEE, FL (JUNE 26) UPI - A woman who witnessed an alligator attack upon a 9-year-old boy has lodged a child-abuse complaint against the boy's mother, saying she and others warned the mother about the presence of the alligator.

The boy, Dominic Reeves, was listed Tuesday in fair condition at a local hospital after getting hundreds of stitches to close his wounds. His mother, Summer Reeves, pulled him from the gator's jaws during the attack Sunday at a popular swimming pond south of town.

A witness, Marianne Hightman, said the boy's mother had been warned about the alligator about 10 to 15 minutes prior to the attack. Other adults at the scene had pulled their children and pets out of the water, Hightman said, but the boy's mother refused to take action.

''She ignored our warning. It could easily have been prevented,'' said Hightman. She felt so strongly about the mother's action, Hightman said, that she filed a complaint Monday with the Child Abuse Registry of the Florida Department of Health and Rehabilitative Services.

''At first I thought, 'The poor woman has been through enough,''' said Hightman. ''But the more I thought about it, her response was not normal. She should get the child out of the water and then ask the questions. Had she done that, I'd be more sympathetic.''

Another witness, Joel Williamson, who is an Abuse Registry counselor and a friend of Hightman's, said confidentiality laws would not allow him to confirm that a complaint has been filed.

But Williamson said that what he witnessed at the pond, in his opinion, met the legal criteria for neglect - improper supervision with a caretaker present.

''The bottom line on neglect is if someone does not do something that a reasonable and prudent person would have done. I do think she was neglectful,'' Williamson said.

It was Williamson who warned the boy's mother about the presence of the alligator.

''It shouldn't have happened,'' he said. ''The other people at the pond saw the reasonable risk. The other people took action. ... She was the only one at the lake who didn't listen.''

Williamson and Hightman said while other adults kept their children and pets out of the water, Reeves questioned whether they knew what they were saying.

''The child ran back to the water (after his dog). I yelled, 'Don't be stupid about your kid!' I said, 'I'm serious about the alligator,''' Williamson said.

''I'm watching the alligator's eyes get closer and closer to the child, about 20 feet,'' Hightman said. ''Probably 10 seconds after that, the child started screaming and backpeddling.

Summer Reeves could not be reached for comment. Officials said she has not responded yet to the child-abuse complaint.

Officers of the U.S. Forestry Service killed the alligator after witnesses called them to the scene.

Stan Kirkland, spokesman for the Florida Game and Fresh Water Fish Commission, said Monday the boy's struggles apparently caused the alligator to release its grip on him.

Kirkland said more alligators have been seen in local ponds recently because of low water levels. The presence of the boy's dog may have precipitated the attack, he said.

''You just don't go into the water with an animal,'' he said. ''Alligators are attracted to them.''

#90177u1601 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - The federal government would ''have had difficulty'' justifying in court its decision to allow an observatory to be built on an Arizona mountain peak that is home to an endangered squirrel, the General Accounting Office said Tuesday.

The findings of the GAO, the investigative arm of Congress, were presented to two House subcommittees a day before the University of Arizona was scheduled to open contract bids on the Mount Graham observatory project.

Plans call for building three telescopes on Emerald Peak of Mount Graham, located in the Coronado National Forest in southeastern Arizona. The high elevation and isolation of the site make it a prime location for an astronomical observatory.

But Emerald Peak also lies in an area designated as critical habitat for the Mount Graham red squirrel, listed as an endangered species in 1987.

Despite numerous studies to the contrary, the U.S. Fish and Wildlife Service issued a biological opinion in July 1988 stating the Emerald Peak project could proceed without jeoparding the squirrel's existence as long as certain safeguards were taken.

Environmentalists sued in federal court, winning an injunction to delay construction. But the injunction was lifted after Congress enacted legislation in October 1988 authorizing the project and stating that it satisfied the Endangered Species Act.

Nevertheless, the key Fish and Wildlife Service opinion of July 1988 ''is not supported by prior biological studies,'' which showed any development of Emerald Peak ''posed an unacceptable risk'' to the squirrel, the GAO said.

Since then, the survival of the species has grown more precarious, with the number of squirrels declining from about 215 in 1988 to 146 in May 1990, GAO official James Duffus testified.

Overruling the findings of his own biologists, regional Fish and Wildlife Service Director Michael Spear weighed factors other than biological evidence in rendering his opinion on the observatory project, Duffus said.

The Endangered Species Act requires such decisions to be based soley on ''the best scientific and commercial data available.''

''We believe that the government would have had difficulty in demonstrating to a court that the Emerald Peak development was prepared in accordance with Endangered Species requirements,'' Duffus testified.

GAO officials concluded that a new biological opinion on the squirrel is warranted, but that congressional action may be necessary to trigger a re-evaluation in light of the law passed in 1988.

PORTLAND, OR (JUNE 26) UPI - Rajendra K. Saboo, of Chandigarh, India, was elected president of Rotary International for 1991-92.

Saboo will take over the presidency of the business and service organization July 1, 1991, replacing Paulo V.C. Costa of Sao Paulo, Brazil.

Saboo, who was elected Monday at the 81st convention of Rotary

International in Portland, will be the second president from India since the organization was founded in 1905. The first was Nitish C. Laharry, of Calcutta, in 1962-63.

Saboo is managing director of Groz-Bechert Saboo Ltd., a hosiery machine needle manufacturer based in Chandigarh.

He has received citations and awards from the Rotary Foundation for his support of its humanitarian and education programs.

The Rotary's membership consists of 1.1 million business and professional people in 25,000 clubs in 170 countries.

#90177u1610 06/26/1990 ~United Press International

(JUNE 26) UPI - African National Congress deputy president Nelson Mandela today carried his keep-sanctions-in-place message to a joint meeting of Congress. He thanked the United States for imposing economic sanctions against the white-led South African government. Mandela told lawmakers that he envisions South Africa's future government as a U-S-style democracy.

European Community leaders signaled a willingness to gradually ease sanctions if South Africa continues reforms to end apartheid . The 12 heads of state ended a two-day summit in Dublin, Ireland, with a compromise in a dispute over what level of approval to show South Africa for recent changes. Britain wants to end sanctions, while Ireland and Denmark favor retaining sanctions until the dismantling of apartheid is shown to be ''irreversible.''

Forget ''read my lips''... President Bush today admitted that a tax revenue increase is needed to erase federal red ink. He laid out a new package of proposals, without giving details, after meeting Republican and Democratic leaders over breakfast. Democratic House Speaker Thomas Foley of Washington later told reporters that lawmakers will ''have to do some things that are NOT universally popular.''

ANALYSIS BY JOSEPH MIANOWANY

WASHINGTON (JUNE 26) UPI - President Bush's decision to retreat Tuesday from his ''no new taxes'' campaign pledge is a move forced by fiscal reality and rife with political danger, but also a gamble that could pay dividends for the White House.

Likewise, the maneuver - which on its face would appear to be a sure winner for Democrats - is a double-edged sword for Bush's opponents and the true political fallout may not be known until both sides wrangle over the details of what actually constitutes a ''tax revenue increase.''

There were sure signs Tuesday that it is in those specifics that the heavy fighting is likely to take place, with Democrats immediately trying to paint themselves as the protectors of the working class and force Bush to support tax increases on the wealthy and businesses - a pair of Republican strongholds.

Overall, the stakes tied to Tuesday's tax development are greatest for Bush, who based much of his 1988 campaign on the promise that when Democrats pushed him for new taxes, he would refuse and refuse and eventually tell them: ''Read my lips - no new taxes.''

So when Bush said Tuesday it is now clear new tax revenues would be needed to cut the growing deficit, he invited charges that he was breaking his vow.

In truth, however, the politics of the situation are much more complicated than that.

Working against Bush is the obvious danger that the public will believe he went back on his word.

And while that may not seem to be a huge problem for a president with an approval rating of more than 70 percent, it could be very troublesome for someone, like Bush, who has the ''strong'' backing of only about 20 percent of the public.

A recent survey from Republican pollster Richard Wirthlin illustrated Bush's difficulty. While 71 percent of the public said they approve of his job performance, his level of strong support dipped to 22 percent - representing a fairly steady decline during the last five months.

Curiously, Bush's biggest troubles seemed to be coming from fellow Republicans, whose strong support for the president dropped dramatically from 40 percent to 29 percent.

And, in more bad news for Bush, it is those Republicans who are likely, in this year of midterm elections, to be most upset with Bush's new position on taxes. If their strong support for the president erodes further, it could cause him serious trouble.

There also is no guarantee that Republican House and Senate members are on Bush's new tax team. Most of them, who unlike Bush are facing the voters

this year, will have to first watch for their own survival and be careful about what they support between now and November.

But all is not negative for Bush and, in fact, there are signs that much of the public is willing to let the president back away from his 1988 vow.

A May poll done by Market Opinion Research addressed the question directly and showed that while 51 percent of the public did not want new taxes, 41 percent agreed that ''the country's budget deficit has grown to the point where new taxes are needed and we should not hold George Bush to his promise.''

Also working in Bush's favor is the growing feeling in Washington that the economy is the single area where he would be most vulnerable in 1992.

If Bush's tax decision helps cut the deficit and solidify the economy, it may erase fears of a serious recession. In the process, he may also be able to show strong leadership and strengthen himself for 1992.

Democrats, meanwhile, cannot at this point seriously attack the president simply for saying taxes are needed. After all, they have spent more than a year pushing him to take that very stand.

Democratic National Chairman Ron Brown joined with congressional leaders Tuesday and set the tone for his party. ''It's no time for partisan gloating,'' Brown said.

But that also puts Democrats in a bind. If they help Bush on the deficit, they run the risk of also helping erase his most serious problem. If they fight him, they run the risk of being accused of being obstructionist.

So, they are giving every indication they will wait to see what Bush means by his tax statement and whether the president will support the kind of taxes that they want.

''The whole question of tax revenue increases - that's a pretty broad description,'' said one national Democratic strategist. ''Our view is that working families are already paying more than they did at start of the 1980s. It's not unreasonable to think that those who benefitted from the 1980s be the first to pay.''

#90177u1641 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Theater owners and labor unions joined Tuesday in the first plan to encourage production of plays on Broadway at a modest cost that will allow for a $24 ticket for orchestra seats at three theaters. Most Broadway plays currently charge from $40 to $50 for the

best seats.

The plan which will operate under the name of The Broadway Alliance: A New Plan for Play Production was announced at a press conference sponsored by the League of American Theaters and Producers at the Crowne Plaza hotel.

It will become effective Sept. 1 and will involved the use of three theaters - the Nederlander, Walter Kerr, and Belasco (or Lyceum) - on a rotating basis.

Major participants in the plan are the Shubert, Nederlander, and Jujamcyn theater operating organizations, all unions and guilds active on Broadway, and a number of businesses that supply goods and services to Broadway theaters.

The League will contribute $250,000 for administrative expenses and basic lighting systems in the three theaters, and the Theater Development Fund will contribute money to a separate fund to assist producers in financing their plays if needed.

The plan, evolved over 18 months of discussions, involves salary, royalty, and manpower reductions and concessions from theater operators, producers, and suppliers never before achieved on Broadway, which has suffered from inflationary production costs in recent years.

As a result, TBA hopes to create a climate for one-set plays with small casts that can be produced for $400,000 or less and offered to theater-goers at a top price of $24 for orchestra tickets, with mezzanine and balcony seats selling for $19 and $10.

According to League, key elements in the plan are a profit participation of ten percent of the weekly profit after recoupment to be shared by all personnel working at reduced wages, no rent for theater until the production has been recouped, no payments other than limited office expenses to producers on losing weeks, and reuctions in commissions and fees to independent contractors.

It said the media also will be asked to reduce advertising rates for plays produced under the plan. The project will be in effect through February 1992 and subject to periodic review. Commencing immediately, a producer who wishes to present a play must submit it to the TBA for approval. If approved, it will be presented to a theater operator who has the right of refusal.

The three theater operating organizations involved can till book other attractions into the three theaters designated for the project under standard conditions if they wish, according to the terms of their participation.

MANILA, PHILIPPINES (JUNE 26) UPI - Typhoon Percy and its 115 mph winds moved toward the Philippines Tuesday, and authorities placed wide areas of the main island of Luzon on alert, including its main rice-producing area.

The Manila weather bureau located Percy Tuesday in the Pacific Ocean 250 miles east of central Luzon.

The third storm to affect the Philippines this year and sixth of the monsoon season was moving northwest at 13 mph and was expected to hit the country's rice-producing northern region Wednesday.

Last week, Typhoon Ophelia battered northern Luzon, killing 47 people before it moved on Taiwan, where 7 perished in floods and landslides.

In China, the death toll from Ophelia rose to 22 when torrential rains and flooding from the typhoon hit two southern provinces, authorities said. Rescuers were searching for at least 20 people swept away in a bridge collapse, state-run media reported Tuesday.

Fifteen people were confirmed killed in Fujian province and seven perished in adjacent Zhejiang province, according to separate reports by the official Xinhua News Agency and the China News Service.

Heavy rains associated with Ophelia began pelting coastal China on June 20 and intensified as the leading edge of the powerful, slow-moving storm moved toward shore.

It is no longer classified as a typhoon.

The storm now is lashing Fujian Province with fierce winds and cascades of heavy rain that has destroyed more than 9,000 houses, authorities said.

Rising currents swept away a highway bridge outside the Fujian town of Quanzhou, sweeping at least 30 pedestrians into a swirling torrent. Ten people were rescued but emergency workers turned up no trace of at least 20 others, CNS said.

The storm caused millions of dollars in damage to China, Xinhua and CNS reported.

#90177u1654 06/26/1990 ~United Press International
(JUNE 26) UPI - Hungary wants to withdraw from the Soviet-led Warsaw Pact

by the end of 1991. The Hungarian Parliamant today unanimously approved a motion to leave the pact on a 232-0 vote... with four abstentions. The nation's deputy foreign minister says the Warsaw Pact NO longer has a reason to exist. He adds that the desired goal would be the total dissolution of the group.

The Soviet Union's leading reform politician, Boris Yeltsin, says he thinks it may be a good idea to postpone next week's 28th Communist Party Congress. The Russian Republic president is seeking radical changes in the party... and is wary of its strong conservative bent heading into next week's session. Such a delay would have to be approved by a plenum of the Central Committee.

A New York City police officer testified today in the trial of three youths accused of a crime spree in Central Park that allegedly culminated in the brutal attack on a female jogger. Officer Raymond Alavarez described how he found the first victim of the attack... a homeless man who said he was beaten by the gang. The youths face attempted murder and other charges in the gang-rape and beating of the woman jogger.

#90177u1658 06/26/1990 ~United Press International

LONDON (JUNE 26) UPI - The Irish Republican Army Tuesday boasted Tuesday that it bombed a private club frequented by senior members of the ruling Conservative Party and said it meant to strike ''at the heart of Tory rule'' in the attack that wounded at least seven people, four seriously.

Home Secretary David Waddington in the lower house of Parliament called for ''renewed vigilance on the part of everyone'' because of an ''apparent change of tactics'' by the IRA of hitting soft targets that are difficult to defend.

''Terrorists operate by stealth, surprise and with a callous disregard for life,'' Waddington said. ''We have been here before with the bomb attacks against the public in the 1970s. They did not succeed then. Nor will they now.''

In Dublin, Ireland, the IRA admitted responsibility for the Monday evening bombing, which ripped through the plush central London Carlton Club while about 30 people were inside.

A statement released at the Republican Press Center said the attack ''struck at the heart of Tory (Conservative) rule in Ireland.''

The explosion occurred one night before Chancellor of the Exchequer John Major was scheduled to address a group of Conservative Party members at the club. Officials declined to comment on whether the IRA had intended to

target Britain's highest-ranking monetary official.

The blast from the device planted inside the front door ignited a fire and caused the first floor of the three-story building to collapse into the basement of the 158-year-old club, a favorite haunt of senior Conservative Party members.

The club is located only blocks from the Downing Street residence of Prime Minister Margaret Thatcher, who is an honorary member of the all-male institution.

Thatcher described the attack as ''one more outrage in a catalogue of terrorist inhumanity'' during a visit to the site in St. James Street.

''None of us are on guard 100 percent every hour of the day, and that is the problem,'' she said.

In recent months, the IRA has escalated its bombings in Britain and Europe but has mostly aimed its attacks against the British military as part of its protracted drive to end British rule in Northern Ireland.

Officials said four people remained hospitalized with injuries from the blast, the IRA's seventh assault in Britain in six weeks. The most serious injuries were sustained by a club porter, Charles Henry, 76, who was given emergency surgery.

The others receiving treatment were two policemen and Lord Kaberry of Adel 82, a former Conservative Party vice chairman.

In addition, officials reported at least three pedestrians were hit by flying glass or affected by smoke inhalation, but they were treated at the scene.

Forensic experts pored over the shattered remains of the building for clues about the bombing, which they said involved about 10 to 15 pounds of Czechoslovakian-made Semtex plastics explosive.

George Churchill-Coleman, commander of Scotland Yard's Anti-Terrorist Squad, said the device was probably delivered within an hour of the explosion. Officers were studying a video recorded by the club's video camera mounted on an outside wall, he said.

Officials believe a squad of about 10 militants are behind the slew of recent attacks. The IRA in 1984 tried to wipe out the party leadership by detonating a powerful device in the Grand Hotel in Brighton during a party conference, killing five people.

''Lord Kaberry was in the smoking room of the club and if he had been

sitting on the other side I think he would've been killed,'' Conservative Party Chairman Kenneth Baker said. ''I think Charles Henry is also very fortunate.''

Leaders of the 12-nation European Community issued a statement of condemnation at the conclusion of a two-day summit in Dublin.

''Following the most recent bombing outrage in London, the European Council renewed its categorical condemnation of all forms of terrorism and expressed its deep sympathy for the victims and their families,'' it said.

#90177u1659 06/26/1990 ~United Press International

CAPE CANAVERAL, FLA (JUNE 26) UPI - A boxy robot probe that cost NASA and the European Space Agency nearly a million dollars a pound is finally ready for launch in October on a historic flight over the poles of the sun officials said Tuesday.

The nuclear-powered 800-pound Ulysses probe, built in Europe in a joint NASA-ESA venture, is scheduled for launch aboard the shuttle Discovery at 6:35 a.m. EDT Oct. 5.

Once released from the shuttle's cargo bay, the probe will be fired to Jupiter so it can utilize the giant planet's gravity for a slingshot boost down and out of the plane of the solar system onto a trajectory carrying it over the sun's south and north poles.

No other spacecraft has ever flown over the poles of the sun and no other such craft are planned after Ulysses, which will need five years to complete its unprecedented mission.

Peter Wenzel, Ulysses project scientist with the European Space Agency, said at a news conference the small spacecraft will revolutionize man's knowledge of the sun, the closest of the 100 billion or so stars in Earth's galaxy and the only one that can be easily studied.

''Ulysses is a mission bound for a region of space never explored before, namely, the region above the poles of the sun,'' Wenzel said. ''Previous space missions that investigated the fields and particles generated by the sun were confined to a narrow disk in which all the planets move around the sun.

''Ulysses will take us a step further. It will take us into the third dimension.''

The United States's share of the Ulysses mission is about $500 million, including the cost of the shuttle launch, while the European Space Agency

spent around $250 million to build the spacecraft.

Like the $1.5 billion Galileo Jupiter probe launched last October from the shuttle Atlantis, Ulysses is powered by a ''radioisotope thermoelectric generator,'' or RTG, a compact energy pack that converts the heat produced by the decay of radioactive plutonium 238 into electricity.

Galileo was equipped with two such power packs while Ulysses only needs one. While the odds of a radiation release in the event of a flight disaster are subsequently lower for Ulysses, officials Tuesday gave apparently conflicting estimates of the potential health threat in a worst-case scenario.

''If the worst of the worst of the worst happened, the largest number that I've seen, and I want to be very careful how I give you this, would be that we would have a release of plutonium in the upper atmosphere,'' said Willis Meeks, Ulysses project manager at the Jet Propulsion Laboratory in Pasadena, Calif.

Given the Earth's population of about 4 billion, ''after 50 years, you could possibly have somewhere like 300 or 400 additional cancer deaths over what you would have from natural causes,'' Meeks said.

An engineer with the Department of Energy said the number of additional cancer deaths around the world in an absolute worst-case scenario was between 10 and 100, depending on a complex set of variables.

The DOE official, citing orders from superiors, refused to give his name to reporters, saying the Energy Department wanted to maintain a ''low profile'' on the RTG issue.

Anti-nuclear activists filed a lawsuit to block Galileo's launch, but the effort was not successful. NASA officials are in the final stages of seeking formal White House permission to launch Ulysses, which is required whenever nuclear payloads are to be carried into space.

Ulysses is equipped with nine sensitive instruments to study the sun's magnetic field, the solar wind, X-rays, gamma rays, radio waves, cosmic dust, gravity waves and other phenomena.

Meeks said scientists have dreamed about launching a spacecraft over the poles of the sun since the 1960s.

#90177u1684 06/26/1990 ~United Press International

CHICAGO (JUNE 26) UPI - Grain and soybean futures were mostly lower at the close Tuesday on the Chicago Board of Trade.

Wheat held moderate gains much of the day, supported by China's bid for 140,000 tons and on reports of further deterioration in the condition of the crop. Gains in wheat were tempered by harvest activity and the weakness on the rest of the floor.

Corn and soybeans were lower on profit-taking following Monday's gains and by the 6- to 10-day outlook from the National Weather Service. It calls for normal temperatures and above-normal rainfall next week for much of the Grain Belt.

Losses in corn and soybeans were limited by steady basis levels and positioning ahead of Thursday's acreage and grain stocks reports.

There was little change in the condition of the corn and soybean crops as reported in the weekly state-by-state survey, although the corn is much shorter than normal for this time of year.

Country movement generally was light.

At the close, corn was off 1 1/4 to up 1/4, soybeans down 4 1/4 to 6 1/2, wheat up 1/2 to 3 1/2 and oats off 1 1/4 to up 1/2.

-30- 1269

#90177u1688 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - President Bush broke his campaign promise Tuesday and dropped his long-standing opposition to tax increases, saying ''it is clear to me'' tax revenue increases are needed to help control a swelling budget deficit.

But Bush and his aides declined to spell out what taxes might be raised. The president is insisting that taxes be just one part of a package that would also include defense and domestic spending cuts, savings from entitlements, such as Medicare and farm programs whose payments are made by formulas, and changes in the way the government raises and spends money.

A tax increase ''is an area we're committing to, but we're not willing to discuss specifics,'' White House press secretary Marlin Fitzwater said.

''Clearly this is the turning point where the president wanted to insert himself,'' Fitzwater said, describing Bush's move as an attempt to revive the stalled budget talks, which are expected to resume Wednesday. He said Bush is comfortable with the decision.

In a brief statement following a two-hour White House meeting with top Republican and Democratic congressional leaders, Bush laid out a new package of proposals, without specifics, and said that the ''bipartisan leadership agree with me on these points.''

''It is clear to me that both the size of the deficit problem and the need for a package that can be enacted require all of the following: entitlement and mandatory program reform; tax revenue increases; growth incentives; discretionary spending reductions; orderly reductions in defense expenditures; and budget process reform - to assure that any bipartisan agreement is enforceable and that the deficit problem is brought under responsible control,'' Bush said.

''The statement speaks for itself - the president has concluded that tax increases are necessary,'' Senate Democratic leader George Mitchell of Maine said at a Capitol Hill news conference.

Bush's ''Read my lips: No new taxes'' pledge was a fundamental element of his 1988 campaign against Democratic opponent Michael Dukakis. Bush steadfastly argued that rising revenue from economic growth alone would be enough to rein in the deficit.

But the economy has been persistently sluggish since Bush took office and the added pressure of the tremendous cost of bailing out the failing savings an loan industry has sent the budget deficit soaring.

With more than three months left in fiscal 1990, the deficit has already surpassed last year's.

Current estimates predict a 1991 deficit pushing $250 billion if Bush and Congress do not find a way to leash it. The Gramm-Rudman budget-cutting law requires the government to reduce the deficit to $64 billion in 1991.

Those pressures, along with the dawdling nature of the budget talks and Bush's wish to avoid drastic, automatic spending cuts, prompted the president to act, Fitzwater said.

Bush's announcement was the first time he mentioned taxes since bipartisan budget talks began May 15 - when the first cracks appeared in Bush's campaign promise. Bush lured Democrats to the bargaining table by promising that all options - including tax hikes - would be considered.

Democratic leaders took pains not to portray Bush's reversal on taxes as a Democratic victory - even though Republicans scored big political points in the 1984 and 1988 presidential campaigns by painting Democrats as eager to raise taxes.

''I think it is important that neither political party attempted to make political capital out of serious bipartisan efforts to reach a budget agreement,'' Foley said.

''We hope this is not going to be the subject of a political campaign effort,'' he added. ''Someone who wants to complain about taxes being raised ... will have to complain against both parties.''

''I do think the president is acting responsibly and in good faith in dealing with the deficit problem - at long last,'' said Senate Budget Committee Chairman James Sasser, D-Tenn., also a budget negotiator. He said he thinks Bush's reversal ''was long and painful and I assume he means what he says.''

-30- 4361

#90177u1689 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Lawyers for three youths on trial for beating and raping a woman jogger failed Tuesday in a bid to put their psychological reports into evidence to prove they were too stupid to make detailed confessions without police coercion.

The move to show the jury their rock-bottom intelligence scores and other information was rejected by Justice Thomas Galligan before the start of the trial Monday at state Supreme Court.

''It's important for the jury to know about my client, how he scored on his intelligence test, his I.Q.,'' said Michael Joseph, a lawyer for Antron McCray, 16.

''You could use the word susceptible,'' Joseph said. ''(He could be) coerced. He could say things that were not true.''

McCray, Yusef Salaam, 16, and Raymond Santana, 15, are the first three youths to go on trial for the April 19, 1989, attack in Central Park.

If convicted, each faces a maximum sentence of five to 10 years imprisonment. All three were juveniles at the time of the attack.

The detailed confessions are considered the strongest evidence against the youths, who are charged with 13 criminal counts, including attempted murder, rape and sodomy.

Referring to a famed Harvard Law School professor, Joseph said, ''On one end of the intelligence scale you have an Alan Dershowitz. My client is on the other end.''

McCray's attorney and Salaam's lawyer, Robert Burns, said they hoped to use the dim psychological reports on their clients' behalf. However, Galligan turned down their request during a closed conference in his chambers early Monday.

In testimony Tuesday, Police Officer Raymond Alvarez described how he found the first victim of a teenage gang's vicious rampage through Central Park in which the woman jogger was gang raped, beaten and left for dead.

He was patrolling the huge park in his cruiser when he was flagged down by a homeless man, Antonio Diaz, who said the gang had beaten him, Alvarez testified.

''He had blood on his head,'' Alvarez said, adding that he put Diaz in the patrol car and they drove around trying to spot the gang.

Alvarez testified that earlier in the evening, he had seen about 30 black and Hispanic youths wandering in the park.

Nine people were attacked in the one-hour ''wilding'' rampage, four victims before the woman jogger, and four after.

It was not known if the 29-year-old woman jogger, a Wall Street investment banker, would testify. Her name has not been used by the media because of the nature of the crime.

#90177u1698 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - The maker of LifeSavers, answering a question that has dogged candy eaters for nearly 80 years, Tuesday introduced LifeSavers Holes miniature mints and candies.

Planters Lifesavers Co., based in Winston-Salem, N.C., hopes the Holes - which look like the missing center pieces of round LifeSavers candies - will knock Tic Tac mints from the top of the $102 million-a-year and growing bite-size candy market.

The company believes the one-calorie confections - available nationally in six flavors by late October - will achieve sales of at least $70 million annually, said product manager Richard Burton. Holes will retail for about 50 cents a package, the same as LifeSavers.

"There really isn't a hole from a LifeSavers candy since it is formed around a steel rod, so we had to invent the hole," Cheryl Bachleder, vice president of marketing for Planters LifeSavers, told reporters at a news briefing.

But after extensive research and development - producing Holes is tricky since they are punched from a very thin rope of candy - the company believes it has perfected the technique, Bachleder said.

After six months of test marketing, "consumer response to Holes has been outstanding," said Bachleder. About 85 percent of consumers who tried the product said they would buy it, she added. "When compared to the Tic Tac brand, consumers significantly preferred LifeSavers Holes, 52 percent to 34 percent," she said.

First manufactured in 1912 by a Cleveland candy maker searching for a sweet that could withstand summer heat better than chocolate, LifeSavers have long dominated the hard candy category.

Over the years LifeSavers, purchased by Nabisco Brands in 1985 and now a unit of RJR Nabisco Inc., have launched, discontinued or revived, according to consumer preferences, about 40 flavors, including Fruit Juicers in 1987.

But until now, the company had no answer to bite-size confections such as Tic Tac, which holds down at least 50 percent of the miniature market, and Sugar Free Certs.

Burton said the company expects adults as well as children will have a hankering for Holes, which are packaged in plastic, roll-shaped containers that hold 45 pieces of candy.

Televison ads have been created catering to both groups. Holes won't compete directly with LifeSavers since they have "a usage occasion" that is different, Burton said. "Holes are for discreet occasions, whereas regular LifeSavers are too big to just pop quickly in your mouth," he said.

NEW YORK (JUNE 26) UPI - Three Brooklyn students were shot and wounded Tuesday in a dispute over a yearbook outside their school.

A fourth youngster was severely beaten in the incident about 10:15 a.m. outside Jackie Robinson Intermediate School, police said.

The victims, whose names were not released, were taken to Kings County Hospital after the shooting, where a spokesman said a 13-year-old boy and a 14-year-old girl were listed in critical condition with gunshot wounds to the abdomen.

A 16-year-old youth who also suffered a gunshot wound and the teenager who was beaten were both listed in guarded condition, said hospital spokesman Phil Petrie.

The gunfire erupted behind the school, where hundreds of students had gathered to pick up their yearbooks, report cards and diplomas, police and school officals said.

''Today is the (next to) last day of school and they hand out the yearbooks and some sort of dispute erupted over a yearbook,'' said Officer Anthony Mazzola, a police spokesman.

Police said said the students had been outside the school, which has about 1,800 students in grades 6 to 8, since 8:45 a.m.

''There was possibly more than one gun pulled,'' said Mazzola, adding that a silver .22-caliber pistol was apparently used in the shooting.

ATLANTA (JUNE 26) UPI - Civil rights leader Hosea Williams said Tuesday it is unfair that only people with money will hear Nelson Mandela speak, and he announced plans for a ''poor people's liberation march'' during the visit by the African National Congress leader.

Mandela was scheduled to speak at Bobby Dodd Stadium on the Georgia Tech campus Wednesday night after a noon arrival and an afternoon of wreath-laying ceremonies, tributes and honorary degrees.

Williams said he would organize a group of poor people to march from the Imperial Hotel on Peachtree Street to the stadium, beginning the march late in the afternoon.

He said the march was intended both as a tribute to Mandela and a protest against the mistreatment of poor people by Atlanta city leaders.

''These black leaders must stop fighting among themselves, get together, and fight for the liberation of homeless and poor people in Atlanta,'' Williams said at a press conference. ''In some ways the homeless and poor in Atlanta are worse off than the poor people in South Africa. At least the poor in South Africa have someplace to sleep and something to eat.''

Williams said he was upset because there were no opportunities for members of the public to hear Mandela for free, saying the poor of the city will not hear his message.

Officials planned a $5 admission fee for the speech at Bobby Dodd Stadium, ''which many of the poor do not have,'' Williams said.

Williams also was critical of the Martin Luther King Center for Nonviolent Social Change, which he said ''withdrew'' a plan to distribute free tickets.

Employees of the King Center, who would not give their names, said the center had distributed ''hundreds'' of free tickets between June 4 and June 25 for the Mandela speech to inner-city school children. King Center officials were unavailable for comment.

Williams also called on Mandela to begin working to help poor blacks in the United States, ''just as he is working to liberate poor and oppressed people in South Africa.''

#90177u1768 06/26/1990 ~United Press International

LONDON (JUNE 26) UPI - Share prices drifted slightly higher after failing to sustain early gains on London's International stock exchange Tuesday as investment demand fizzled out.

The Financial Times Stock Exchange 100-share index ended the day up 1.3 points at 2499.5. The narrower Financial Times 30 index closed down 2.8 points at 1926.6. Volume was a moderate 461.2 million shares, up from 379.1 million traded Monday.

Dealers said markets seemed to ignore a strong early showing on Wall Street inspired by President George Bush's comments about the possibility of using tax revenue increases to reduce the budget deficit.

A firm pound helped the FTSE-100 move back up through the crucial 2500-point support level, and at one stage it was showing a 21-point lead, lifted by continued speculation on when Britain might fully enter the European Monetary System.

The market has recently been sustained by hopes that when the pound is entered into the EMS exchange rate mechanism it will bring about lower inflation and interest rates, analysts said. Shares sagged by late afternoon, however, as institutions stayed out of the market awaiting the end of the second quarter Friday, dealers said.

Late trading may have also been undercut by the fact that some dealers left their offices early to see Wimbledon tennis matches or World Cup soccer, one trader said.

Banks shares moved lower amid renewed concern over bad debts and a round of brokers' downgradings. Midland Bank shares fell 12 cents at $5.07 on worries about Chilean debt.

Food manufacturers were depressed by competition fears, with Cadbury shares down ten cents at $6.14 and United Biscuits 12 cents lower at $6.12.

Elsewhere, British Steel shares gained five cents at $2.56 on U.S. expansion plans.

#90177u1776 06/26/1990 ~United Press International
HOUSTON (JUNE 26) UPI - Dates for the auction of Sakowitz Inc. real estate leases are expected to be set in July or August, after liquidation sales in the retail chain's Houston and Dallas stores are complete, Sakowitz said Tuesday.

Two Houston stores and the Dallas store are expected to be closed by July 8, with remaining merchandise being shipped to the flagship Post Oak store in Houston, according to Sakowitz representative Barbara Alexander.

L.J. Hooker Corp., the majority owner of the 88-year-old upscale retailer, opted to liquidate the stores earlier this month after it failed to find a suitable buyer.

The liquidation sales featured markdowns of 20 to 50 percent and sparked shopping sprees that required crowd control orders from the city fire marshal. Furniture and fixtures are being priced for sale as soon as departments in the liquidating stores are emptied, Alexander said.

Hooker representative David McAdams said the corporation will ask the New York City bankruptcy judge overseeing the disposition of Sakowitz assets to approve a date to auction the store leases in late July or early August. Hooker bought its holding in Sakowitz to help the then-family owned retailer out of Chapter 11 bankruptcy.

#90177u1800 06/26/1990 ~United Press International
WASHINGTON (JUNE 26) UPI - The administration and Senate leaders reached agreement Tuesday on compromise legislation that could lead to approval of the first major housing bill in a decade, Senate sources said.

The bill, which reforms federal housing policy and is designed to provide decent and affordable housing for moderate- and middle-income families, could be passed before the Senate leaves for a weeklong July 4 recess Friday.

The agreement, which previously proved elusive, was worked out by assistant Senate Democratic leader Alan Cranston, HUD Secretary Jack Kemp, a top-level representative of budget director Richard Darman and about 10 senators most involved in the legislation.

Cranston and Sen. Alphonse D'Amato, R.N.Y., the floor managers for the bill, were scheduled to reveal the details of the agreement Thursday, but Senate sources said it covered all the major points that had held up action on the bill.

The agreement, according to the sources, covered the cost of the bill, the

means to keep the Federal Housing Administration mortgage program financially sound, the scope of the proposed HOP (Housing Opportunity Partnership) compact between the federal government and states to provide housing for the poor; and the amount of money for President Bush's HOPE program to help middle- and low-income people buy houses.

Administration representatives had warned that unless their objections were met, senior advisers would recommend Bush veto the bill, which has been developed over three years.

After a week of debate negotiations off the floor, the Senate was stymied when it could not reach a vote on a D'Amato amendment on FHA mortgages and Democratic leader George Mitchell set the bill aside.

The sources said that the agreement adopted the administration position of putting FHA on a sound footing and end the dramatic shrinking of the mortgage surplus.

The administration proposal would continue the 3.8 percent up-front premium but add an additional 0.5 percent annual premium for persons with low down payments and it would require borrowers to pay two-thirds of closing costs in cash. Cranston estimated this would cost a typical family another $1,000 more than paid now.

The agreement, according to the sources, also would include rent vouchers as one of three options - to go with construction and rehabilitation - that local communities can use in developing housing plans under the HOP compact. The administration insisted on rental assistance and Senate Democrats on new construction.

The agreement also includes less for the HOP compact with the states and local communities and more for HOPE, Bush's plan to make housing affordable for low and moderate income families. The exact amounts were not immediately available.

The sources said the agreement would cost about $4 billion more in fiscal 1991 than was recommended by the administration. The appropriations, however, could lower the amount.

#90177u1816 06/26/1990 ~United Press International

TUNIS, Tunisia (JUNE 26) UPI - The Arab League has agreed to an extraordinary meeting to discuss President Bush's decision to suspend the U.S. dialogue with the Palestine Liberation Organization, a senior PLO official said Tuesday.

The PLO sought such a meeting, hoping the Arab League would condemn Bush's cutoff of its peace dialogue, said Abu Iyad, PLO leader Yasser Arafat's top deputy.

''We will expose the dangerous situation created by the American decision to suspend its dialogue with the Palestine Liberation Organization,'' said Iyaad, whose real name is Salah Khalef.

''We expect the Arab countries to adopt a common, clear position,'' he told United Press International.

The meeting, originally expected to be held Wednesday, is now tentatively scheduled for an unspecified day next week, after the Moslem holiday of Eid, Iyad said.

The delay was at the request of ''some member states who want their foreign ministers to attend,'' Arab League officials said.

Arab diplomats said that, with the holiday approaching, Arab ministers might have been reluctant to travel to Tunisia for a meeting now.

Sources in the PLO leadership at Tunis say they expect to present a number of proposals to the Arab League gathering and are likely to pitch their demands for support high so as to obtain a minimum response.

The PLO is expected to demand an Arab boycott of the United States and a provisional recall of Arab ambassadors from Washington, both demands that are highly unlikely to be accepted.

The sources say the PLO hopes to obtain a firm condemnation of Washington's decision to stop talking to the PLO, a decision President Bush said he made because of PLO reluctance to condemn a failed guerrilla raid on Israeli shores by commandos loyal to radical Palestine Liberation Front leader Mohammed Abu Abass.

Whatever the outcome of the Arab League session, the PLO insists that its decision to adopt a moderate policy at a November 1988 meeting of the Palestine National Council, the PLO parliament-in-exile, is not in question.

In a two-state solution to the Palestinian question, the PLO parliament-in-exile declared a postage-stamp sized Palestinian state in the occupied West Bank and Gaza Strip that would co-exist with Israel.

''We are going to continue along this path,'' Abu Iyad said. ''Our initiative is not tactical. It is strategic and irreversible.''

But if the rupture with the United States should prove definitive, Abu Iyad said, the PLO would pursue its path toward Middle East peace, but ''in the context of the United Nations, in order to obtain the convening of an international conference.''

Abu Iyad rejected ''absolutely'' any suggestion the PLO might take up the military option against Israel, but he said there were increasing calls within the organization for an abandoning of diplomatic action and recourse to armed struggle.

''This is not realistic and we will try to confront these adventurist tendencies,'' he said.

The No. 2 man in Arafat's Fatah organization, one of the factions that make up the PLO, also said it is ''indispensable'' to find a formula on the future of the Israeli-occupied territories that will group all Palestinian factions ''so as to confront the Israeli plan which has the aim of smashing the Intifadah,'' or uprising in the West Bank and Gaza.

Abu Iyad also rejected ''the irresponsable appeals'' by hotheads who want ''to replace the stones of the Intifadah with arms.''

''This would be to play the game of Israel.''

-30- 3757

#90177u1818 06/26/1990 ~United Press International

(JUNE 26) UPI - President Bush says he must break his his ''NO new taxes'' pledge. Bush said ''it is clear'' that new taxes must be combined with budget cuts to bring the deficit under control. House Speaker Thomas Foley of Washington said both parties will share responsibility for increasing taxes.

Nelson Mandela told Congress today that his African National Congress canNOT renounce ''the weapons of war'' until South Africa's apartheid system is irreversibly on a course of reform. The black leader also said the A-N-C is NOT committed to nationalization of South Africa's economy.

The crumbling of the East Bloc goes one step further today with Hungary's approval of a plan to withdraw from the Warsaw Pact. One Hungarian leader says the military alliance NO longer serves a purpose and should dissolve itself. Lawmakers unanimously agreed that if that does NOT happen, Hungary will remove itself from the group by the end of next year.

Leading Chinese dissident Fang Lizhi and his wife thanked President Bush and the U-S Embassy staff in Beijing today for helping them obtain asylum in England. The couple also expressed hope that Chinese communist authorities would soon allow their son to come to England.

An army investigator told a court-martial panel that a U-S Army private and his sergeant faked a gun battle that killed a civilian woman during December's invasion of Panama. An Army investigator testified that the two soldiers staged the battle to cover up the loss of one of their guns while

they were at a brothel.

-30- 1713

#90177u1838 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - Health Secretary Louis Sullivan was unable to announce Tuesday, as hoped, the specifics of his proposed food labeling rule because of a dispute with the administration over federal pre-emption of state laws.

Sullivan sent to the Office of Management and Budget proposed Food and Drug Administration regulations that would require mandatory nutrition labeling on most packaged foods, including a declaration of amounts of calories, fatty acids, cholesterol and fiber. The regulations would pre-empt state laws so that there would be uniform requirements nationwide.

But OMB has taken a ''federalism'' view of the matter, a government source said.

''They think federal pre-emption is going too far in the sense that states should have the right to determine what they want,'' said the official, who did not wish to be identified.

Sullivan had hoped to discuss the proposed rule in detail at an Agriculture Department-Food and Drug Administration Journalists Conference the source said, but was forced to present just an outline.

''Like other parts of the proposed regulations, this (pre-emption) issue is under review within the administration,'' Sullivan said diplomatically. ''I believe that our review will be completed very soon ... (and) until then, I must postpone any detailed discussion of the issue.''

John Cady, president of the National Food Processors Association, said a uniform standard would eliminate confusion.

''We sincerely hope that FDA's rules are applied uniformly and that Congress will let the agency do the job it has set out to do without going ahead with conflicting legislation,'' Cady said.

Legislation awaiting House and Senate floor action provides for uniform nutrition labeling as well as requirements for health claims. Sullivan has said he wants to handle health claims in separate agency regulations.

Consumer groups have said they would prefer legislation over agency regulations.

''The legislation sets timetables for FDA action, not leaving definitive action to bureaucratic chance,'' said Ellen Haas, executive director of

Public Voice for Food and Health Policy.

The Center for Science in the Public Interest said the proposed regulations ''are inadequate,'' adding the legislation appropriately prohibits misleading ''no cholesterol'' or ''low cholesterol'' claims on foods that contain significant amounts of saturated fat.

Sullivan said he has proposed a tentative final rule that would define ''cholesterol free,'' ''low cholesterol'' and ''reduced cholesterol.''

A staff member of the House Energy and Commerce Committee said there is some question over whether the FDA even has the legal authority under the Food, Drug and Cosmetic Act to handle the food labeling changes.

''Our bill .. would not be subject to OMB pressures,'' the staffer said.

Federal regulations that pre-empt state laws could affect California, whose Proposition 65 requires strict warnings on products concerning cancer or reproductive risks.

But Steve Book, director of California's Proposition 65 office, said if food items require such a warning, they probably do not make it to the shelves.

California probably would be more affected by the anticipated federal regulations on health claims if they pre-empt state laws.

#90177u1881 06/26/1990 ~United Press International

CHICAGO (JUNE 26) UPI - The Chicago Bulls traded away their top 1990 draft pick along with two other future selections Tuesday to the New Jersey Nets for guard Dennis Hopson.

The Nets will receive the Bulls' 20th pick in Wednesday's NBA draft, their second-round pick in 1991 and the best of Chicago's three 1992 second-round draft choices.

The Bulls are left with a second-round pick, the 29th overall, in this year's draft.

The 6-foot-5 Hopson was the third pick overall in the 1987 draft out of Ohio State. He was the Nets' leading scorer this past season with a 15.8 average in 79 games. He started 64 of those.

The Bulls also announced they had given up the rights to reserve forward Charles Davis. Davis, who averaged 2.5 points in 53 games this past season in limited action, will become a free agent July 1.

#90177u1902 06/26/1990 ~United Press International

MANAGUA, NICARAGUA (JUNE 26) UPI - The Sandinista Front Tuesday publicly acknowledged mistakes that led to the party's surprise Feb. 25 election loss, but also said the United States and the Catholic Church bore much of the blame.

''The policies of aggression practiced by successive U.S. governments (under former President Ronald Reagan and President Bush) against Nicaragua was the principal factor for the erosion and demise of our revolutionary project,'' the Sandinistas said in a report published in Barricada, the party's official newspaper.

The Sandinistas, who ruled Nicaragua for 10 years after ousting late dictator Anastasio Somoza in the 1979 revolution, lost the presidency and control of the National Assembly Feb. 25 to Violeta Chamorro and her National Opposition Union, a 14-party coalition known as UNO.

''The Yankees blocked us, sabotaged our economic measures, blackmailed those to whom we gave our friendship and forced us into a war that consumed lives and resources,'' the document said in reference to U.S. economic sanctions and financing of the Contra rebels.

The report is part of a lengthy process of internal revision and reflection that began last week and is to culminate next February in a party congress and the election of new leaders.

The report also blamed the Catholic Church hierarchy in Nicaragua, private companies and ''Indian communities on the Atlantic Coast manipulated by the CIA'' for drumming up anti-Sandinista sentiment among the rural population.

The report also admitted mistakes on the part of the Sandinista leadership in failing ''to take into account the traditional characteristics of Nicaraguan society.''

''The Socialist-oriented model that we began to execute and carried like a flag, contradicted in practice the program of reconstruction and national unity,'' the report said.

It said Leninist-style economic programs such as cooperative land reforms, forcing farmers to sell their products to the government at official prices and rationing some products by issuing government food cards ''alienated some social sectors.''

''The war and the economic aggression demanded of the party and the government a structure and discipline that was almost militaristic,'' the document said.

The report pointed to mistakes made during the run-up to elections, particularly overconfidence on the part of the Sandinistas.

''We committed the serious mistake of not foreseeing the election defeat, and thus, we were not prepared for such an eventuality,'' it said.

''International collaboration ... had been essential for us to sustain the functioning of our economy during the hardest periods of the war. But this collaboration took a rough tumble as, one by one, the governments of Eastern Europe changed.

''All this was exploited by the UNO and the Yankees, who offered the people an end to the war, the suspension of the trade embargo and abundant external resources to produce an improved economy in the short term.

''The UNO promises were believed by the population, and the same could not

be said for our campaign slogan of 'Everything will be better','' the party document said.

LOS ANGELES (JUNE 26) UPI - Actor James Caan announced Tuesday that he is engaged to a woman from his New York hometown.

The couple plan to wed sometime later this year and will live in Los Angeles.

Caan, 49, met Ingrid Hajek, 29, two years ago when they were introduced by mutual friends, a publicist for the actor, said.

Caan and Hajek grew up a few blocks apart in Sunnyside, N.Y., and went to the same public school.

This is the second marriage for Hajek and the third for Caan, who has a son and daughter by previous marriages.

Caan is probably best known for his Academy Award-nominated performance as Sonny Corleone in ''The Godfather,'' as well as his his portrayal of football player Brian Piccolo in ''Brian's Song,'' which earned him an Emmy nomination.

SEWARD, ALASKA (JUNE 26) UPI - A sightseeing plane with five people aboard was missing in a mountainous ice-covered region of southern Alaska, the Federal Aviation Administration and the Air Force reported Tuesday.

The chartered Harbor Air Cessna 207 carried four passengers from the cruise ship Universe plus the pilot, said FAA spokeswoman Ivy Moore. The tourists, three women and a man, had arranged an 80-minute flight from Seward to see Bear Glacier, the Harding Icefield and other sights.

The plane left Seward early Monday afternoon and when it failed to return, the airline called for help. Clouds at the time were at 1,000 feet, lower than many of the mountains surrounding Resurrection Bay, the fjord leading into Seward.

Seven civil air patrol planes and other aircraft from Harbor Air failed to find any sign of the missing plane in a search that lasted until midnight Monday. The search resumed early Tuesday and was being coordinated by the Rescue Coordination Center at Elmendorf Air Force Base.

A helicopter was dispatched Tuesday afternoon to investigate what appeared to be a suspicious oil sheen on a small lake near Bear Glacier, Air Force Sgt. David Haulbrook said.

Seward, a small fishing town south of Anchorage, is a scenic visitor stop. In the nearby coastal mountains is the 300-square-mile Harding Icefield.

CINCINNATI (JUNE 26) UPI - Lights! Camera! Action! Cincinnati is becoming a movie-making hotbed as production begins on the eighth film to be made in the Queen City in the last three years.

Director John Sayles, who started the Cincinnati movie-making boom in 1987 by making parts of ''Eight Men Out'' in the city, is back to shoot all of ''City of Hope''.

Over the past three years, such films as Dustin Hoffman's ''Rain Man,'' ''Tango and Cash,'' ''An Innocent Man'' and ''A Rage in Harlem'' have been all or partly produced in Cincinnati.

''A Rage in Harlem'' director Bill Duke said money and convenience were big factors in deciding to make movies in Cincinnati. He said it cost him less money to stay and work in Cincinnati for several weeks than it would have in many other cities. And, he said it was easier logistically to shoot scenes in Cincinnati than in larger cities.

Sayles echoed those sentiments.

''The movie's supposed to be set in an eastern New Jersey middle-sized city,'' Sayles said of his new ''City of Hope'' film. ''Eastern New Jersey middle-sized cities are very difficult to get around. There's a lot more traffic lights. A lot more traffic. People triple-park.

''A traffic jam in downtown Cincinnati is a five-minute inconvenience. A traffic jam in downtown Jersey City?''

Sayles laughed at that thought.

''What might be a 10-minute move here could be a two-hour move there. It's just much, much easier here.''

Housing, and Sayles' access to it for scene-setting, is also much more convenient in Cincinnati than other places, noted Sayles.

Sayles also credited Greater Cincinnati Film Commission executive director Lori Holladay for helping take care of pre-production details, including arrangements for work in nearby northern Kentucky.

''Very often, a city or state film commission stops at the border,'' said Sayles. ''They don't even want you talking to the people on the other side. Whereas here, there's great cooperation.

''Lori Holladay took us over there (to northern Kentucky) and made arrangements for us, so we didn't have to spend a week just getting

permission to see things. We were able to breeze in and out in two days, see all the potential locations we needed to make the decision. It made it very easy for us to come here.''

#90177u1965 06/26/1990 ~United Press International

MONROVIA, LIBERIA (JUNE 26) UPI - Some 10,000 Liberians demanding a peaceful resolution of the nation's civil war marched through the capital Tuesday as thousands more fled the city, fearing a violent battle in the streets between government forces and rebels of the National Patriotic Front.

The demonstrators, estimated to number more than 10,000, demanded President Doe's resignation and chanted ''We Shall Overcome Someday.''

''We are tired of our children being killed,'' one demonstrator said. ''We want this monkey (President Doe) off our backs. He is corrupt.''

As rebels slowly advanced on Monrovia, thousands more Liberians fled the capital for neighboring Sierra Leone or sought refuge at a Voice of America relay station near Careysburg, about 20 miles northeast of Monrovia, witnesses said Tuesday. Many said they feared a bloodbath in the the streets of the capital between Doe's military forces and the rebels.

Many of the refugees braved heavy rainstorms traveling north toward Sierra Leone, the witnesses said.

About 4,000 people were seeking refuge at the Voice of America relay station near Careysburg, 20 miles northeast of Monrovia, according to reports from the scene. Careysburg is controlled by the rebels.

The rebels have also captured Fendall, 10-miles from the capital, where a campus of the University of Liberia is located. Witnesses said some university professors were hiding in the bush.

Tensions continued to mount Tuesday in Monrovia itself, which is bracing for a rebel attack after talks between the rebels, led by Charles Taylor, and the government of President Samuel Doe broke down in Freetown, Sierra Leone, last week.

Monrovia has been living under an uneasy peace as the rebels and the government tried to find a peaceful agreement to the conflict. But with the breakdown of the talks, the possibility of a rebel attack on the capital has become more likely, Liberian political analysts said.

Rebel spokesman Thomas Woiweyou Monday announced the National Patriotic Front had named a 26-man interim government to run the country for six

months leading toward national elections.

Woiweyou also repeated the rebel threat to invade the capital unless Doe and his government resign. The rebels control several towns around Monrovia and much of the countryside.

The influential Liberia Action Party also called for Doe's resignation, charging that the government had plunged the country into a state of anarchy.

Liberia's leading daily newspapers, the Daily Observer and the News, ran editorials Tuesday calling for Doe to resign.

#90177u1966 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - International Business Machines Corp., targeting a potentially huge household market, Tuesday introduced Personal System/1, a personal computer loaded with powerful features but easy enough to be used by children.

"We believe the PS/1 will do for the home what business computers have done for the office," said George Conrades, IBM's senior vice president for U.S. marketing and services. "PS/1 makes it possible for all members of the family to use their time more productively - to gather information, to bring work home or run a business from home, to learn or to keep track of family finances."

IBM priced the new line of four personal computers from $999 to $1,999 - broken down according to memory capacity and to whether the monitor is color or black-and-white - and said this price range "won't break the family budget."

The four PS/1 are available immediately in three U.S. markets, Dallas, Chicago, and Minneapolis, and will be shipped in September to major retailers throughout the country as well as overseas. The computers can be used in 17 different languages.

The four PS/1s come with a ready-to-use feature letting users turn on the system with the touch of a button. The monitor instantly displays icons with simple visual instructions allowing the user to move from one function to another at the click of a mouse - a system simple enough to be used by a young child or by an adult with no computer knowledge at all.

The world's largest computer manufacturer estimated that only 20 million U.S. households out of 90 million have at least one PC - meaning, the company said, there is a huge potential market for IBM to tap and generate additional revenues at a time when domestic sales of mainframes and large

business systems are slowing down.

"Market research showed that many people who have considered buying a PC did not do so because they did not find one that would be easy to use or give them the right value for their money or was not backed up by strong service," Conrades said. "PS/1 offers all of this."

IBM has also loaded its PS/1 line with Microsoft Works, a software program for word processing, spreadsheets, database access and communications. The computers can also be loaded with Microsoft's DOS operating system to run any program or game made for IBM units.

PS/1 marks IBM's second attempt at cracking the huge PC business. In 1983, the company introduced the PC junior, which enjoyed little success and which was withdrawn from the market after 18 months.

"It is not another PC junior, which certainly had some shortcomings," said Jonathan Yarmis, personal computer analyst with the Gartner Group in Stamford, Conn. "The problem with the PS/1 is more the $1,000 barrier, and IBM did not brake through it, although they are getting a lot closer."

"For the home, it is difficult to justify spending $2,000 on a computer, and that is what people will have to spend to get a unit comparable to what they have in the office," he said. "The point is that there is a home market out there, but it has proven to be an elusive market for a long time, and it is unclear whether IBM will be successful this time."

PS/1 also comes with Prodigy, a computer service accessing databanks with travel, financial, and shopping information. Prodigy is a joint venture between IBM and Sears, Roebuck & Co., which is putting the computer on shelves this week at 20 Sears locations.

#90177u1968 06/26/1990 ~United Press International

BATON ROUGE, La. (JUNE 26) UPI - The state Senate, faced with the threat of a gubernatorial veto, opened debate Tuesday on what could become the nation's toughest anti-abortion law.

The measure, which already has been passed by the Louisiana House, would outlaw abortions except in cases where a woman's life is threatened by her pregnancy. The bill would make it a felony to perform an illegal abortion, setting a maximum prison term of 10 years and a fine of up to $100,000.

''This is what this bill is all about today,'' said Sen. Mike Cross, D-Baker, who held up a plastic replica of a 5-month-old fetus during the Senate debate, which was expected to culminate in a vote on final passage Wednesday evening.

''It's about whether or not these little boys and girls will have a chance to live or not,'' Cross said.

Gov. Buddy Roemer, who describes himself as ''pro-life,'' has said he will veto the legislation if the Legislature does not include contains exceptions allowing abortions in pregnancies caused by rape or incest.

A veto would set up what it is believed could be the first legislative override of a veto in Louisiana history. It would take a two-thirds vote of both the House and Senate to override a gubernatorial veto.

Cross and the bill's House sponsor, conservative Democrat Louis ''Woody'' Jenkins of Baton Rouge, have scoffed at Roemer's proposed exceptions, saying they would amount to legalizing abortion on demand.

Some abortion rights advocates in the Senate were expected to offer an amendment incorporating the rape and incest exceptions into the bill. Abortion rights activists have said privately they might be close to having a majority in the 39-man upper chamber in favor of the rider, a contention disputed by Cross.

''I think we have the votes, by four or five, to kill the exceptions,'' he said. ''The hardest vote will be on the exceptions, and I predict we will beat the exceptions. And when we do, they'll only be seven or eight, at the most, senators who vote against the bill.''

Should the exceptions be put on the bill, it would have to return to the House for concurrence, a move Jenkins has said he wants to avoid.

If the bill is enacted, even with the exceptions Roemer demands, the U.S. Supreme Court could use the measure as a test case to either affirm or overturn its 1973 Roe vs. Wade decision.

New abortion restrictions have been enacted in several U.S. jurisdictions - including Pennsylvania and Guam - and rejected in others in a flurry of legislative action since last year's high court ruling in a Missouri case.

That decision made it easier for states to impose new and tougher limits on a woman's right to abortion.

Forces on both sides of the abortion question have descended on Louisiana as the anti-abortion bill has gone through the legislative process in recent weeks.

The swarm of activists and the intense and emotional interest in the bill caused a logistical nightmare for Senate security personnel. Anyone other than recognized lobbyists - including reporters and members of the public

- was ordered Tuesday to wear identifying credentials.

#90177u1979 06/26/1990 ~United Press International

BOSTON (JUNE 26) UPI - Massachusetts Gov. Michael Dukakis, hearing President Bush had broken his no new taxes pledge, acted vindicated Tuesday, noting, ''I told the truth and I paid the price'' when he lost the White House to Bush in 1988.

Dukakis, a Democrat who is leaving office after this year, refused during the 1988 presidential campaign to follow Bush's lead and promise that he would not raise taxes to cut the deficit.

He insisted repeatedly that tax increases would be a last resort for him. But his refusal to flatly rule them out prompted speculation that he would push for an increase.

''I told the truth and I paid the price,'' Dukakis told reporters Tuesday. ''Mr. Bush did not and we're all now going to have to pay for it dearly.''

However, Dukakis brushed aside reporters' suggestions that he was guilty of poor fiscal management.

Dukakis spent much of the 1988 campaign touting his state's recovered fiscal health - the ''Massachusetts Miracle.'' However, the state's financial strength has since dissolved into a huge budget deficit that will require up to $1.3 billion in new state taxes. The state's credit rating has also fallen to the worst in the nation.

The tax issue was one of several factors that helped Bush gain the edge on Dukakis in 1988.

#90177u2019 06/26/1990 ~United Press International

BUDAPEST, HUNGARY (JUNE 26) UPI - The Hungarian Parliament voted unanimously Tuesday for Hungary's withdrawal from the Warsaw Pact by the end of 1991, in the first such move by a member of the Soviet-led military alliance.

Parliament approved a motion for withdrawal with 232 votes for and none against. There were four abstentions.

All six political parties represented in the chamber were in favor of the move, proposed a month ago by the liberal party of Free Democrats. The parliamentary vote binds the government to start negotiations with Warsaw Pact members on Hungary's withdrawal from the Soviet-led military alliance.

''The Warsaw Pact has no reason to exist any more,'' Deputy Foreign Minister Tamas Katona told Parliament, noting the government supported the proposal.

Katona said the desired goal would be the total dissolution of the pact by a joint resolution. But if other members want to sustain it, Hungary would withdraw from the organization by the end of 1991 at the latest.

In an interview Tuesday with the Communist Party newspaper Pravda, Soviet Foreign Minister Eduard Shevardnadze said the Warsaw Pact ''is not eternal.'' Nevertheless, he said, the pact will exist as long as it meets the needs of member states.

Hungary's move is a psychological blow to the military alliance, not a physical, one as it is not major presence within the pact. Hungary's army numbers only 84,000 people. It's air force is 22,000 and its navy just 5000.

By contrast, Soviet troops in the landlocked nation number 49,700. Moscow withdrew some 300 troops March 12 in the first stage of symbolic withdrawal of forces, which have been on Hungarian soil since Soviet tanks put down a reformist revolution in 1956. Moscow has agreed to withdraw all Soviet forces by June 30, 1991.

The Warsaw Pact was signed in Warsaw, Poland, May 14, 1955, to create a military alliance of the Soviet Union and its East European satellites - Moscow's answer to NATO. Pact members are the Soviet Union, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland and Romania.

Katona said Hungary should proceed carefully on pulling out of the pact to avoid endangering the Vienna disarmament talks and the current Soviet troop withdrawals from Hungary.

He also warned that unless the negotiations were circumspect, there was a danger Hungary would be isolated and wedged between the Warsaw Pact and NATO.

At a crucial Warsaw Pact summit June 7 in Moscow, Czechoslovakia and other members warned against dissolution of the Warsaw Pact immediately on grounds it could be used to aid the process of arms reductions in Central Europe.

Foreign Affairs Committee Chairman Gyula Horn, who was the foreign minister under communist rule, pointed out the Hungarian proposal ''did not cause unbearable tension at the Moscow summit but Hungary was clearly left alone while the other members only agreed to reform the Pact but denied its dissolution.''

In one way, Hungary's decision to become neutral was 30 years in the making. During the 1956 revolution, Prime Minister Imre Nagy announced withdrawal of Hungary from the Warsaw Pact. The revolution was crushed by Soviet troops.

As the first step, Hungary plans to suspend its membership in the military organization of the alliance. It will not take part in the military maneuvers and will not allow the use of its territory for such purposes.

The government said it intends to establish constructive cooperation with Warsaw Pact member-states and will continue to strive for establishment of an all-European security system.

Hungary also wants negotiations aimed at revising obsolete bilateral friendship and mutual aid agreements.

Independent member of Parliament Bela Kiraly, who was commander in chief of the revolutionary National Guard in 1956, pointed out that Hungary's proclamation of neutrality on Nov. 1, 1956, had always been regarded in the West as a ''hasty move.''

''Therefore, the current decision must be backed by arguments the West can also accept,'' Kiraly said.

In his reply, Prime Minister Jozsef Antall said he was convinced as a result of his recent discussions with several Western leaders that the West will accept Hungary's intention to withdraw from the Pact, provided it will not be a unilateral move.

The probable Soviet reaction is less clear. Shevardnazde said he expects the pact to continue. However, in the Pravda interview, he acknowledged the alliance had problems.

''The trouble is that our organization (the pact) proved to be poorly receptive to changes, failed to keep up with the pace of the times, to update itself, to bring up to date its military and politicial structures '' Shevardnadze said.

Hungarian officials said the country will strive to strengthen its relationship with others in the five-country Alps-Adria group that includes Austria, Italy, Yugoslavia and Czechoslovakia.

In one of those twists of history, the original motion was submitted by Free Democrat member of Parliament Miklos Vasarhelyi, who was spokesman for the Nagy government and the only member still alive in Hungary of the executed leader's inner circle.

WASHINGTON (JUNE 26) UPI - An appellate court Tuesday ordered an end to a 20-year lawsuit that sought to force the government to police federally funded schools and universities that discriminate against women, minorities and the handicapped.

The U.S. Circuit Court of Appeals for the District of Columbia ruled that a victim of discrimination by a school, university or educational program receiving federal funds ''lacks ... the green light'' from Congress to sue the government.

The court, citing Supreme Court precedent, said victims of such discrimination should consider filing suits individually against each institution rather than against the government.

''So far as we can tell, the suit targeting specific discriminatory acts of fund recipients is the only court remedy Congress has authorized for private parties,'' the court said.

Julius Chambers, a lawyer for the Women's Equity Action League and other minority groups that brought the suit, said the ruling ''takes a substantial bite'' out of the Civil Rights Act of 1964 and subsequent education and rehabilitation amendments, which prohibit discrimination on the basis of sex, race and against the handicapped in federally assisted programs and educational institutions.

''It's going to be very difficult to challenge discrimination in higher education against minorities and others who suffer from discrimination over the years,'' he said. ''We thought the government was responsible for ensuring that these institutions did not discriminate, and that's what we sought, to force the government not to support institutions that discrimate.''

The case began in 1970 when black students attending racially segregated public schools in 17 states complained of the failure by the Department of Health, Education and Welfare to enforce civil rights laws forbidding discrimination in any federally assisted program.

The litigation grew over the years to include discrimination in federally funded educational institutions and sought to force the government to monitor schools and universities accused of using discriminatory practices. The suit also sought to force the government to discontinue its funding of such institutions.

Chambers said individual suits seeking to force institutions from discriminating were currently pending in Louisiana, Mississippi, Alabama and Tennessee.

#90177u2052 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Chase Manhattan Corp.'s newly designated top management intends to cut the money center bank's operating costs by 8 percent, or some $300 million, and lay off up to 3,000 employees, newspapers reported Tuesday.

Thomas G. Labrecque, chairman-designate of the second-largest U.S. bank, and Arthur F. Ryan, the bank president-designate, told senior officers in a memorandumthis week that the bank must trim its sails in coming months.

The financial climate is ''as difficult as any in the history of the global financial-services industry,'' the Wall Street Journal quoted Labrecque and his second-in-command as saying in the internal memo.

The incoming management's warning closely followed an announcement by Willard C. Butcher, the bank holding company's current chairman, that he would retire Oct. 31 and that Labrecque would succede him.

The memo did not detail the planned cost or staff cuts, estimates as to which were provided by employees and bank analysts, according to the New York Times. It said reorganization costs would probably affect second-quarter results.

The two newspapers said sources estimated that as many as 3,000 jobs could be lost out of the bank's total world staff of 41,600. The Journal said European corporate finance staff was likely to be cut heavily.

Chase spokesman Ken Mills confirmed that the memo specified cutbacks of $300 million, but he described as ''conjecture'' the estimates of how many layoffs would be necessary to achieve those cost savings.

''We have made no specific statement except that we intend to cut expenses '' he said.

The Chase memo confirmed that the bank was tossing out an organizational plan whereby it was divided into global, consumer and institutional departments, replacing it with 10 more focused operational units.

Chase had profits of $44 million or 20 cents a share in the first quarter, down from $132 million or $1.27 a share in the year-earlier quarter. The company had a loss of $665 million in 1989, resulting from a $1.26 billion third-quarter provision taken against Third World loan losses.

(JUNE 26) UPI - Nelson Mandela told a joint session of Congress today that South Africa must make significant reforms before the African National Congress can renounce violence.

Mandela said South African security forces must stop turning their weapons against blacks who are trying to assert their rights. He said that until that happens, blacks canNOT give up what he called ''the weapons of war.''

Mandela served 27 years as a prisoner of the government he took up arms against.

And he said that struggle will end when South Africa frees political prisoners, allows exiles to return, lifts a state of emergency, and ends apartheid laws and political trials.

But Mandela also said armed struggle is ''incompatible'' with negotiations.

He thanked the United States for sanctions against South Africa, and repeated his request for direct economic aid to the African National Congress.

He described his vision of a future South Africa as one with a bill of rights, a democratic constitution and a multi-party system.

The European Community today announced a significant softening of its policy toward South Africa.

E-C leaders meeting in Dublin, Ireland, for the first time voiced a willingness to lift sanctions against South Africa.

Britain had called for ending most economic sanctions in recognition of recent racial reforms. But Ireland and Denmark had strongly favored retaining sanctions until the dismantling of apartheid is shown to be ''irreversible.''

A European Community statement praised what it called ''the foresight and courage'' of Pretoria reforms, and paid tribute to President Frederik de Klerk and black leader Nelson Mandela .

The 12 heads of state also endorsed the concept of financial aid to the Soviet Union. But they refused to provide a 15-BILLION-dollar emergency aid package sought by France and West Germany. Instead, a high-level panel will study Soviet needs.

NEW YORK (JUNE 26) UPI - A $5.3 billion refinancing of RJR Nabisco Inc. debt will generate some $250 million in fees for banks and other advisors, the Wall Street Journal reported Tuesday.

Although many Wall Street securities firms and commercial banks stand to profit from the restructuring, Kohlberg Kravis Roberts & Co., the leveraged buyout firm that took the food and tobacco giant private in a record $24.9 billion deal, will miss out on the fee windfall, the newspaper said.

KKR, which charged RJR Nabisco $75 million for putting the original deal together, won't charge for its work on the refinancing, according to the Journal.

Since the junk-bond market, which had fueled the takeover frenzy of the 1980s, went bust late last year, many Wall Street firms and commercial banks have been scrambling to get in on restructuring fees.

Firms such as Rothschild Inc., J.P. Morgan & Co. and Smith Barney, Harris Upham & Co. all have expanded their restructuring departments.

In many cases, they are working with companies that took on too much debt - ironically, at Wall Street's urging - just a few years ago.

#90177u2102 06/26/1990 ~United Press International
VILNIUS, LITHUANIA, USSR (JUNE 26) UPI - Lithuanian President Vytautas Landsbergis met Mikhail Gorbachev in the Kremlin Tuesday and insisted any negotiations must deal ''with the restoration of Lithuania as a state.''

Landsbergis was received by Gorbachev at the Soviet President's invitation in an attempt to break a three-month stalemate over Lithuania's declaration of independence that Gorbachev wants frozen before he lifts an economic blockade of the republic.

It was the first direct one-on-one meeting between the two men since Lithuania's parliament declared the republic sovereign in a bold move to regain the independence lost when the Soviet Union annexed it in 1940.

Landsbergis, who flew back to Vilnius immediately after the meeting, told the Lithuanian parliament on arrival that the republic will aim for full statehood once negotiations commence - an apparent setback for Gorbachev's hopes to keep Lithuania in a new Soviet federation.

''The subject of any negotiations should be very clear - that is, the restoration of Lithuania as a state,'' Landsbergis told the legislators.

Landsbergis, a former music professor and father of Lithuania's independence movement, said the next step was to adopt some sort of document to satisfy Gorbachev but insisted it need not take the form of an outright moratorium on the independence act.

He told parliament the results of the meeting ''are not particularly gladdening, since earlier both Lithuania and the Soviet Union made certain steps to bring their positions closer together, but now they are requiring unilateral concessions from us to close the remaining distance.''

''Moscow has not exhausted its possibilities for compromise,'' he told Lithuanian radio.

But Prime Minister Kazimiera Prunskiene, who has differed with Landsbergis told the parliament it was time to act, with the Soviets' partial blockade starting to bite deep into the local economy.

''We need negotiations,'' she said. ''We can't find any other way to solve the problems.

''The way to go seems to be a moratorium,'' she said. She then challenged anyone with better ideas to come forward.

Prunskiene, who according to a Lithuanian poll has surpassed Landsbergis in popularity, said the moratorium should be precise and clear.

''We have to check once more whether we understand each other,'' Prunskiene said.

She told Lithuanian legislators Gorbachev had called her after the talk with Landsbergis and said a moratorium did not mean a return to the situation of March 10, before the independence declaration was passed.

Landsbergis called the talks with Gorbachev and vice president Anatoly Lukyanov ''very useful, very open and very sincere.''

''They also listened to our position, our side,'' Landsbergis said.

The Lithuanian parliament now must decide between eight different versions of a potential moratorium on the independence act that would suspend its effects for the period of negotiations with the Soviet Union.

#90177u2116 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - The administration said Tuesday it would seek to change the Endangered Species Act as part of its plan for preserving both timber jobs and the vanishing northern spotted owl.

The proposed change would broaden the powers of a rarely used Cabinet-level committee that already has limited abilities to waive some conservation measures under the Endangered Species Act.

The law currently allows this committee, informally known as the ''God squad,'' to pass judgment only on very specific federal actions taken by the U.S. Fish and Wildlife Service to protect threatened or endangered species.

The Endangered Species Committee, as it is officially known, was created by Congress in 1978 in response to the controversy over the endangered snail darter, a tiny fish that nearly blocked completion of a dam in Tennessee.

Broadening the committee's mandate to allow it to pass judgment on a long-term forest management plan for the Pacific Northwest was one element of a five-part plan announced by Agriculture Secretary Clayton Yeutter and Interior Secretary Manual Lujan for protecting the spotted owl.

U.S. Fish and Wildlife Service chief John Turner signed an order Friday to place the 16-inch bird on the government's list of threatened species for its entire range, including Oregon, Washington state and northern California.

The listing takes effect July 23, along with habitat conservation protections accorded the bird under the Endangered Species Act.

The service has found the owl is threatened because logging patterns in the Northwest are destroying the old-growth forests where the bird roosts.

Yeutter and Lujan said the administration would seek to convene the Endangered Species Committee in the event any of the timber sales now planned by the government in the Northwest are challenged by the Fish and Wildlife Service.

The administration also plans to assemble an interagency task force headed by Yeutter to draft by Sept. 1 a short-term plan for managing federally owned forests in a way that blunts the loss of jobs.

''We see no reason why there should be a job loss or problem in fiscal 1990,'' Yeutter said at a news conference.

At the same time, the Bureau of Land Management will carry out a separate

plan for protecting owls on the lands it manages, primarily in western Oregon, that is expected to cost no more than 1,000 jobs.

The government had projected that timber restrictions on BLM land under an alternate plan proposed by a panel of government scientists in April would result in 7,600 job losses.

For the rest of this fiscal year, which ends Sept. 30, the BLM and the Forest Service will continue to try to meet the timber harvest targets specified under fiscal 1990 appropriations.

A long-term forest management plan is vital, Lujan and Yeutter said, because of a Forest Service estimate that up to 28,000 jobs could be lost by the end of the decade under one proposed plan to protect the owl.

''The president has charged us with finding a balance between protection of owl habitat and concern for jobs,'' Yeutter said in a statement.

In addition, the administration said it would ask Congress to approve legislation that would allow implementation of the management plans without any challenge in court.

About 1,700 pairs of spotted owls are believed to exist in the Pacific Northwest, most of them on federal land.

A panel of government scientists proposed an owl protection plan, known as the Thomas plan, in April that would have reduced the pool of federal timberland open to commercial logging by 3.8 million acres.

Lujan said the new five-point plan ''builds on the Thomas report'' because it would protect more owls while limiting the scope of job losses.

#90177u2123 06/26/1990 ~United Press International

(JUNE 26) UPI - Hungary could become the first East Bloc nation to pull out of the Warsaw Pact in the latest dramatic development from that region.

The Hungarian Parliament today voted unanimously... 232-0 with four abstentions... to withdraw from the Soviet-led military alliance by the end of next year.

But Hungary's deputy foreign minister says the desired goal is the ultimate break-up of the pact... which he feels NO longer serves a pupose. He added that if other Warsaw Pact members want to sustain the group, Hungary would leave.

Today's vote binds the government to start negotiations with fellow Warsaw

Pact countries on Hungary's withdrawal from the alliance.

The Defense Ministry spokesman says Hungary must be careful during such negotiations to avoid endangering the Vienna disarmament talks and the current Soviet troop withdrawals from Hungary.

There are reports of another 15 people having been pulled alive from the rubble left by last week's devastating earthquake in Iran.

But relief officials say they are giving up on finding any more survivors and announced today that rescue efforts were winding down.

An Iranian relief worker traveling between Tehran and the disaster area in northern Iran says the 15 survivors were found under tons of debris in a town some 140 miles northwest of the capital.

Iranian officials say at least 50-thousand people perished in Thursday's tremor... registered at seven-point-seven on the Richter scale.

Tehran radio reports that helicopters are dropping relief supplies to citizens in high mountain villages that have been cut off by landslides blocking roads.

Money and emergency supplies are flowing in from a number of countries that have strained relations with Iran... and one even stranger source.

Novelist Salman Rushdie has donated 86-hundred dollars to victims.. despite being sentenced to death by Iranian zealots angered by his book ''The Satanic Verses.''

Rushdie says the humanitarian issue of helping those in need transcends all other considerations.

#90177u2126 06/26/1990 ~United Press International

ATLANTA (JUNE 26) UPI - Nelson Mandela comes to honor the memory of Martin Luther King Jr. Wednesday, surrounded by symbols of the civil rights martyr's unconditional rejection of violence - a philosphy Mandela refuses to embrace.

King's staunch unwillingness to employ violence contrasts with Mandela's stubborn reluctance to renounce it. The difference, some of King's followers say, is that non-violent protest ''overcomes injustice while violence merely rataliates for it.''

''I think the South African struggle would be better off adopting the strict adherence to non-violence as taught by Martin Luther King,'' said

civil rights activist Hosea Williams, a former King associate.

''I think it would bring them even greater international sympathy and moral standing, just as it did for our movement here,'' Williams said. ''There's never a time when violence is the best way to go.''

Mandela is scheduled to lay a wreath Wednesday afternoon at King's white marble crypt situated between the Ebenezer Baptist Church, where he preached non-violence, and the Martin Luther King Jr. Center for Non-Violent Social Change, a shrine of his crusade and headquarters for those working to keep his principles alive.

''Atlanta still has that non-violent orientation,'' said the Rev. McClellon Cox, associate pastor of Big Bethel AME Church, where Mandela will speak after leaving King's tomb a few blocks away.

Expressing a hope for a non-violent solution in South Africa, McClellon said, ''At times it seems as though violence would win out, but to come to Atlanta and to embrace the ideals of Martin Luther King Jr. would indicate that non-violence is still an important thrust in this movement.''

President Bush invoked King's memory this week in calling on Mandela to officially disown violence in the fight against apartheid.

''Let us not seek to satisfy our thirst for freedom by drinking from the cup of bitterness and hatred,'' the president said, quoting King.

But Mandela - who formed an underground group in 1961 to force change through sabotage in South Africa, spent 27 years in prison and turned down an offer five years ago to go free if he renounced violence - would not back down.

''When a government decides to ban political organizations of the oppressed, intensifies oppression and does not allow any free political activity, no matter how peaceful and non-violent, then the people have no alternative but to resort to violence,'' Mandela said. ''If we are forced to resort to violence, it is because we have no other alternative whatsoever.''

But Williams argues that non-violence is always an alternative.

''Violence only brings about temporary relief, because you don't change the heart of your opposition,'' he said. ''And until you change the heart of your opposition, the threat is always there.

''I can't speak for the South Africans, but we met some mighty strong oppression and opposition here,'' Williams said. ''I was born and reared in a most brutal lifestyle.

''When I was a little boy in southwest Georgia, I remember three lynchings. Back in those days, you pulled off your hat to a white woman passing on the street. If you didn't, they'd whup your head 'til it was bloody.

''Those were most violent times, but I have learned through Dr. King that non-violence is the main reason those times are behind us now.''

The Rev. Joseph Lowery, a close friend of King who also knows Mandela, said the two men, ''If Dr. King were alive today, I think he and Mr. Mandela would talk about the universal character of the struggle.

''They'd have a lot to talk about,'' said Lowery, president of the Southern Christian Leadership Conference, which King founded. ''They'd talk about how they could strengthen each other's movement and the efficacy of massive resistance to oppression. Dr. King would, of course, embrace non-violence.

''But Dr. King would respect the right of oppressed peoples to exercise self-determination.''

Mandela ''has chosen to exercise the right of the South African oppressed peoples to decide when and how they will pursue their liberation,'' he said. ''I think he is saying that the principle of self-determination compels them to reserve the right to determine when they will (use violence.)''

Lowery said Americans ''protest too much about this issue of violence.''

''Where is our indignation at the violence the South African government has perpetrated? That government is guilty of state terror,'' he said. ''Why didn't we ask the Contras to renounce violence?

''I think it's a little bit hypocritical to criticize a people for seeking to liberate their country from tyrants when we weren't exactly non-violent in our struggle for liberation against England.''

#90177u2150 06/26/1990 ~United Press International
(JUNE 26) UPI - The Louisiana state Senate is the next battleground for the heated fight over a woman's right to an abortion.

State senators have gathered in the capital of Baton Rouge to debate what could be the nation's toughest anti-abortion legislation.

The bill would outlaw abortions in Louisiana unless a woman's life is threatened by the pregnancy. It also would make it a felony to perform an abortion... punishable by up to 10 years in prison and a fine of as much as 100-thousand dollars.

The measure, sponsored by conservative Democratic Representative Louis Jenkins of Baton Rouge, has already passed in the state's House. And Jenkins says the support is there in the Senate.

But Louisiana Governor Buddy Roemer says he will veto the bill unless it includes exceptions for cases of rape and incest.

Chinese dissident Fang Lizhi and his wife are in Great Britain today... where they thanked President Bush and U-S Embassy staff in Beijing for helping them obtain asylum in the West.

The couple spent more than a year holed up in the Embassy after being

accused of helping ignite last year's democracy uprising in China. They flew to England aboard a U-S military plane yesterday following China's decision to allow them to leave the country.

The release ends a bitter dispute between the United States and China, but a State Department spokeswoman says it won't bring an end to U-S sanctions against China.

British officials are taking a low-key approach to the dissidents' arrival... in an effort NOT to anger China with the approaching transfer of power in Hong Kong in 1997.

#90177u2163 06/26/1990 ~United Press International
(JUNE 26) UPI - President Bush today banned oil drilling off California for at least six years and deferred development off the Florida Keys until the end of the century.

The president also announced that he would NOT allow any federal sales of oil and natural gas leases off the North Atlantic Coast or the shores of Washington and Oregon for the next 10 years.

The moratoriums are meant to allow time for further environmental study.

Bush said the only areas offshore California where drilling might be permitted after 1996 are 87 southern California sea floor tracts identified as having high potential for significant amounts of oil and gas.

Opponents in both state have said oil and gas development would irreparably damage rich fishing grounds and vital habitat for many rare animals and ecosystems.

Bush said that while he is responding to environmental concerns, he wants to achieve a balance between the environment and the need for energy.

#90177u2227 06/26/1990 ~United Press International

WIMBLEDON, ENGLAND (JUNE 26) UPI - John McEnroe made an inglorious exit from Wimbledon Tuesday, losing in straight sets in the first round to Derrick Rostagno, a player ranked 129th in the world.

The three-time Wimbledon champion fell 7-5, 6-4, 6-4 in his first appearance at a Grand Slam tournament since his expulsion from the Australian Open in January.

McEnroe, 31, has not won a major title since 1984. Against Rostagno, he

never sustained the brilliant shot-making that made him one of the finest players in tennis history.

The No. 4 seed could not return Rostagno's serve consistently, occasionally netted easy volleys and struggled to pass his ever-attacking opponent.

McEnroe, who has played just one tournament since February, said he has not trained sufficiently to return to the pinnacle of his sport.

''It came so natural to me for so long,'' said the former top-ranked player, who used to laugh about being on the Hagen-Dazs diet. ''I know I haven't given it my best.''

Although he is the oldest player in the world's top 50, McEnroe said age is not the obstacle.

''I'm not convinced I can't do a helluva job at this,'' he said. ''It's just a matter of doing it (the preparation).''

Rostagno, 24, maintained his composure throughout the Centre Court match. Last year at the U.S. Open, the Los Angeles native lost to second-round opponent Boris Becker despite having a two-set lead and a pair of match points. This year, in eight of his previous nine tournaments, Rostagno failed to survive the second round.

When Rostagno was a teenager, McEnroe was one of his heroes.

''It was definitely my dream 10 years ago to play on Centre Court, and there I was, and McEnroe was there,'' he said.

McEnroe joined a growing list of upset victims at the All England Club. Also losing in the first round Tuesday were French Open champion Andres Gomez, the No. 5 seed, and No. 6 Tim Mayotte.

The top seeds on the women's side - Steffi Graf, Martina Navratilova and Monica Seles - all made quick work of their overmatched opponents, none of the three favorites surrendering more than three games.

No. 12 Jennifer Capriati, 14 years old and 89 days, became the youngest player to win a match at Wimbledon, eliminating Helen Kelesi 6-3, 6-1. Capriati, a semifinalist at the French Open, is also the youngest seed in Wimbledon history.

Gomez, who hoped his first Grand Slam title two weeks ago would provide a new ''sunrise'' for his career, lost 6-4, 6-2, 6-2 to American Jim Grabb.

Mayotte, a Wimbledon quarterfinalist last year, was ousted by Gary Muller

of South Africa 4-6, 7-6 (7-1), 7-5, 6-3. The American, who has recently had a back problem, has failed to reach the second round in his last four tournaments.

Graf opened the second day's play on Centre Court, where she needed just 51 minutes to dispatch fellow West German Claudia Porwik 6-1, 6-2. The top seed, seeking her third consecutive Wimbledon title, had too much power and the answer for every offensive tactic of her opponent.

Graf took two weeks off after finishing runner-up at the French Open to ready herself for her Wimbledon.

''I've prepared very well I think,'' she said. ''I'm very eager. I'm very, very eager.''

Navratilova, in pursuit of a record ninth singles crown, required only 45 minutes to dispose of France's Sophie Amiach 6-1, 6-1. The No. 2 seed is tied with Helen Wills Moody at eight singles titles. The No. 2 seed joked and smiled throughout the match.

''It's easy to have fun when you're winning easily,'' she said.

Seles, the 16-year-old Yugoslavian who won the French Open with her baseline game, used an occasional serve-and-volley attack against Sweden's Maria Strandlund in a 6-2, 6-0 victory lasting 49 minutes.

Seles, however, had more on her mind than tennis. She awaited word on the World Cup soccer game between Yugoslavia and Spain. Yugoslavia won 2-1 in overtime.

''I was getting the score all through the match from one of my friends who sat behind me,'' she said.

Gomez seemed in a hurry to complete his opening round, smashing groundstrokes in a hit-or-miss fashion, giving Grabb every opportunity to come to net. The clay-court star from Ecuador said he was discouraged by the fast play on grass.

''I like to play on it but I just don't feel comfortable ... I come here but I know I'm not one of the favorites,'' he said.

Grabb, ranked No. 49, is a serve-and-volley specialist who was a first-round loser in five of his last six Grand Slam events. He rarely had to play three successful shots to win a point against Gomez. Grabb won his first 11 service games, not dropping serve until he had built a 4-1 lead in the third set.

''Jimmy's got a good game for here,'' Gomez said. ''He's got a big serve

and he moves well at net.''

Other women to advance to the second round were No. 5 Zina Garrison, No. 11 Natalia Zvereva, No. 13 Jana Novotna and No. 15 Ros Fairbank.

#90177u2239 06/26/1990 ~United Press International

TEGUCIGALPA, HONDURAS (JUNE 26) UPI - A major labor federation called on members to strike Thursday in support of banana plantation workers at an American-owned company who walked off their jobs demanding higher wages and the reinstatement of fired colleagues.

President Rafael Callejas said Tuesday he was concerned that a widening of the strike could have a devastating affect on Honduras' already delicate economic situation.

''I sincerely feel that a strike of this magnitude, with the crisis facing the country, will have a very hard effect on the Honduran economy,'' Callejas said.

More than 9,000 workers of the American-owned Tela Railroad Co., which operates near the Caribbean coast 100 miles north of the capital, are demanding a 60 percent across-the-board wage increase and reinstatement of fired workers.

Rene Ayestas, president of the workers' local union, accused the company of failing to honor work agreements and of ''laying off people or replacing permanent workers with temporary or contract workers.''

The union called a strike last October, charging the company with similar contract violations. Ayestas said the company has not complied with any of the commitments made last October to settle the dispute.

Bananas are the chief Honduran export, which earn the country $300 million a year.

The Union Federation for Workers in Northern Honduras called on all its members to strike Thursday in sympathy with the banana workers.

The federation has also called on the government to decree wage increases for the entire country to compensate for the rising cost of living caused by austerity measures announced by Callejas when he took office in January.

In March, the Honduran currency, the lempira, was devalued from 2 to $1 to 4 to $1, fueling increases in consumer prices.

Callejas, who on Monday sent a commission to mediate the talks between the

banana workers union and the company, said the call for a general strike ''further complicates the circumstances under which union-management relations develop.''

Company officials agreed Tuesday to resume talks on a wage increase, but union officials said the strike will continue until a concrete settlement is reached.

#90177u2250 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - Health Secretary Louis Sullivan was unable to announce Tuesday, as hoped, the specifics of his proposed food labeling rule because of a dispute with the administration over federal pre-emption of state laws.

Sullivan sent to the Office of Management and Budget proposed Food and Drug Administration regulations that would require mandatory nutrition labeling on most packaged foods, including a declaration of amounts of

calories, fatty acids, cholesterol and fiber.

The regulations would pre-empt state laws so that there would be uniform requirements nationwide.

But OMB has taken a ''federalism'' view of the matter, a government source said.

''They think federal pre-emption is going too far in the sense that states should have the right to determine what they want,'' said the official, who asked not to be identified.

Sullivan had hoped to discuss the proposed rule in detail at an Agriculture Department-Food and Drug Administration Journalists Conference the source said, but was forced to present just an outline.

''Like other parts of the proposed regulations, this (pre-emption) issue is under review within the administration,'' Sullivan said diplomatically. ''I believe that our review will be completed very soon ... (and) until then, I must postpone any detailed discussion of the issue.''

John Cady, president of the National Food Processors Association, said a uniform standard would eliminate confusion.

''We sincerely hope that FDA's rules are applied uniformly and that Congress will let the agency do the job it has set out to do without going ahead with conflicting legislation,'' Cady said.

Legislation awaiting House and Senate floor action provides for uniform nutrition labeling as well as requirements for health claims. Sullivan has said he wants to handle health claims in separate agency regulations.

Consumer groups have said they would prefer legislation over agency regulations.

''The legislation sets timetables for FDA action, not leaving definitive action to bureaucratic chance,'' said Ellen Haas, executive director of Public Voice for Food and Health Policy.

The Center for Science in the Public Interest said the proposed regulations ''are inadequate,'' adding the legislation appropriately prohibits misleading ''no cholesterol'' or ''low cholesterol'' claims on foods that contain significant amounts of saturated fat.

Sullivan said he has proposed a tentative final rule that would define ''cholesterol free,'' ''low cholesterol'' and ''reduced cholesterol.''

A staff member of the House Energy and Commerce Committee said there is

some question over whether the FDA even has the legal authority under the Food, Drug and Cosmetic Act to handle the food labeling changes.

''Our bill .. would not be subject to OMB pressures,'' the staffer said.

Federal regulations that pre-empt state laws could affect California, whose Proposition 65 requires strict warnings on products concerning cancer or reproductive risks.

But Steve Book, director of California's Proposition 65 office, said if food items require such a warning, they probably do not make it to the shelves.

California probably would be more affected by the anticipated federal regulations on health claims if they pre-empt state laws.

#90177u2252 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Kaneb Services Inc., the oil services company nearly bankrupt and $524 million in debt several years ago, Tuesday launched a new business and said it planned to start two more and buy another over the next year.

The Dallas-based company introduced its new Kaneb Metering Corp. unit and its initial LaserTite meter for testing leakage from underground oil storage tanks the Environmental Protection Agency will require by December 1993.

Kaneb President John Barnes estimated there are between 1.8 million and 2 million underground storage tanks in the United States creating a potential testing market of more than $500 million by 1993.

''Over the next 12 months, we intend to roll out two additional businesses and make a major acquisition,'' he also told a meeting of New York security analysts.

He declined to elaborate on the nature of the new businesses or the acquisition.

In 1986, Kaneb lost $184 million, had long-term debt of $574 million and cash on hand of $54 million.

Since then Kaneb has eliminated $440 million in debt by selling off its offshore drilling operations and oil and gas properties as well as a 36 percent interest in its products pipeline to generate $120 million in cash and $175 million in tax loss carryforwards.

In addition to entering new areas, the company is planning to expand its remaining pipeline business, Barnes said.

Barnes said Kaneb was looking for an acquisition in the range of $50-$100 million although it would consider something larger if it presented a ''unique'' opportunity.

He said Kaneb also wanted to unload a ranch and coal mine. ''If you know or anybody who wants to buy a ranch, we have a wonderful ranch ... we'd love to sell it.'' The ranch had been appraised at $3 million, Barnes said.

Kaneb had net loss of $4.7 million in 1989 compared to a 1988 loss of $77.9 million.

The company estimates its 1990 interest expense will be $10 million compared to $13 million in 1989.

#90177u2276 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - The stock market closed slightly lower Tuesday in light trading, after an early rally tied to President Bush's acknowledgment that tax hikes were needed to cut the federal budget deficit was wiped out.

The Dow Jones industrial average, which lost 12.13 Monday, eased 2.72 to close at 2842.33. The blue-chip index was up more than 30 points at mid-morning.

Among broader market gauges, the New York Stock Exchange composite index fell 0.30 to 192.47 and Standard & Poor's 500-stock index fell 0.25 to 352.06. The price of an average share lost three cents.

Declines led advances 773-691 among the 1,978 issues crossing the NYSE tape. Gaining issues had led by about a three-to-one margin shortly after the opening.

Big Board volume totaled 141,420,000 shares, compared with 133,100,000 shares traded Monday. The pace lightened from the moderate turnover earlier in the session.

Bush reversed his long-standing opposition to tax increases by saying Tuesday "it is clear to me" that the need to reduce the deficit requires "tax revenue increases" and cuts in domestic spending.

His announcement came in the form of a brief statement after a two-hour breakfast meeting with Republican and Democratic leaders. He laid out a new package of proposals without giving details and said the "bipartisan leadership agree with me on these points."

It was the first time that Bush has mentioned tax increases since the start of budget summit negotiations, although he had appeared to be easing away from his presidential campaign promise - "read my lips, no new taxes."

In the early going, Treasury bonds rallied on the news and stocks followed, since a lower deficit likely means less government borrowing and more room for interest rates to fall. Some analysts also say a deficit-reduction plan might prompt the Federal Reserve to cut short-term interest rates.

But the absence of details about what types of "tax revenue increases" Bush would accept proved the market's undoing and sparked a retreat in bonds. Treasury bond futures closed up 12/32. The 30-year bond itself had been up as much as 26/32.

"The Bush tax statement gave the market confidence early in the day, but then investors began to believe they were hearing more jawboning than action itself on the deficit," said Alan Ackerman, senior vice president at Gruntal & Co. "And the absence of concrete developments on the deficit front means rates will probably hang at these levels," he said.

On the trading floor, Caterpillar was the most active issue, tumbling six to 52 1/2 after the stock lost $5 a share Monday, when the company said it expected earnings for the second quarter and the full year to fall short of year-ago levels.

Philip Morris followed, up 1/4 to 46 7/8. United Telecommunications was third, off 3/8 to 37 3/8.

Among the other blue chips, AT&T was unchanged at 41 3/8, Merck added 1/2 to 82 5/8, Eastman Kodak lost 1/2 to 39 7/8, Woolworth fell 5/8 to 32 1/4, and General Motors fell one to 46 7/8 in active trading. IBM gained 1/8 to 116 3/4, also in active trading, after introducing a new easy-to-use home computer.

Elsewhere, Corning tumbled 2 1/8 to 43 7/8 after reporting lower quarterly earnings and American International Group slumped 2 5/8 to 94 after agreeing to buy International Lease Finance for $1.38 billion in cash and stock. In over-the-counter trading, International Lease Finance finished up 3 7/8 to 31, the most active issue on volume of almost six million shares.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 169,546,850 shares, compared with 154,718,670 shares traded in the previous session.

Prices closed lower in moderate trading on the American Stock Exchange. The Amex Market Value index lost 0.59 to close at 356.80. Declines led

advances 293-245 among the 811 issues traded. The price of an average share fell one cent. Composite volume totaled 12,834,200 shares, compared with 15,259,500 shares traded Monday. Fruit of the Loom led the Amex issues, up 3/8 to 11 3/8.

The National Association of Securities Dealers composite index fell 0.26 to 455.38.

#90177u2283 06/26/1990 ~United Press International

OTTAWA (JUNE 26) UPI - In a move hailed by Canadian police, federal gun control legislation was introduced Tuesday in Parliament that would ban semi-automatic weapons that can be converted to automatic.

The proposed legislation also makes it an offense to convert such weapons to automatic, sets maximum cartridge magazine size at 10 and enforces better storage of weapons to keep them from falling into criminal hands.

There were calls for tougher gun laws after a bloody rampage by Marc Lepine in December that left 14 women dead and 13 injured at a Montreal engineering school. Lepine used a semi-automiatic rifle in the attack.

Tuesday's move also came a day after a police officer in Edmonton, Alberta was shot to death while trying to apprehend two bank robbers, and two days after a Toronto officer narrowly escaped death when shot by a drug dealer.

''We're very pleased with the proposed legislation,'' said Chief Herb Stephen, president of the Canadian Association of Chiefs of Police.

Stephen, who is chief of the Winnipeg, Manitoba, police force, said the legislation tabled by Justice Minister Kim Campbell contains many items recommended by police. ''There are a lot of good things in it,'' he said.

A spokesman for Campbell said opposition parties have given their support to the legislation, and it could become law by the new year once it passes the necessary legislative steps.

The legislation would:

-Ban the importation and ownership of fully automatic weapons such as Uzis that are converted for sale to semi-automatic mode. Such weapons are now legal.

-Create a new offense, punishable by a maximum 5-year prison term, outlawing the conversion of weapons to fully automatic.

-Ban large-capacity cartridge magazines set a maximum size of 5 or 10 depending on the type of gun.

-Require proof of safe storage facilities before a restricted weapons registration certificate can be granted.

-Require firearms Acquisition Certificate applicants to provide two references and a photograph, then wait 28 days for a thorough assessment.

Canadian law allows anyone over 16 to buy a gun after receiving a gun buyer's certificate from local police. Officers now conduct brief interviews of applicants and make only cursory checks of criminal records and screen for signs of emotional instability.

''Promoting responsible gun ownership and limiting access to guns will help ensure that we have a safer and better system of gun control,'' Campbell said. ''This should provide comfort to all Canadians; it should also help to alleviate the personal sense of fear and vulnerability that people experience in today's society.''

There were calls for tougher gun control after Lepine, 25, used a .223 semi-automatic Sturm Ruger hunting rifle to kill 14 women and wound 13 others on Dec. 6 at the University of Montreal engineering school.

Lepine, who ended the rampage by fatally shooting himself, killed the women after separating them from the men.

Lepine had the proper firearms acquisition certificate required by Canadian law.

#90177u2287 06/26/1990 ~United Press International

LOS ANGELES (JUNE 26) UPI - Ten people have been indicted in a nationwide credit card fraud ring believed responsible for losses of millions of dollars, prosecutors announced Tuesday.

The defendants were being rounded up by agents of the Secret Service which conducted a 16-month investigation into the case, District Attorney Ira Reiner said.

The indictments by the county grand jury were returned late Monday, and the defendants were tentatively scheduled to be arraigned in Superior Court later Tuesday.

Reiner said the defendants, including three reputed ringleaders of the Los Angeles-based operation, were charged with 40 counts of conspiracy, grand theft, fraud, forgery and counterfeiting credit cards.

He said the ring, which has been in operation for several years, used stolen blank credit cards manufactured by an Orange County firm and credit cards stolen in robberies and burglaries.

With the help of an ''inside'' person at TRW, the credit-rating firm, the ring obtained credit histories and card numbers, Reiner said.

The stolen cards were embossed with new numbers and given to other ring members who posed as shoppers and obtained from $1,000 to $8,000 a day in mechandise and cash from automated teller machines.

Reiner said ring members also went on weekend spending trips with the bogus cards and in some instances, even flew to Puerto Rico to make their purchases.

Deputy District Attorney Peter Berman said the indictment represents about $1 million in losses to Bank of America and American Express. However, the losses are believed to be even higher.

The indictment is the first handed down in Los Angeles County under Proposition 115, the so-called speedy trial initiative approved by the state's voters in the June 5 election. A provision of the measure allows for the suspension of a preliminary hearing when a felony indictment is returned by a county grand jury.

''Instead of a three-month preliminary hearing, which a complex case like this would take, we presented 35 witnesses to the grand jury in just 11 hours,'' Reiner said.

As a result, the case will now go straight to arraignment in Superior Court, followed by the pretrial stage and then the trial.

The identities of the defendants were not immediately available.

#90177u2300 06/26/1990 ~United Press International

MEXICO CITY (JUNE 26) UPI - A group of Mexican, Canadian and West German businessmen purchased the state-owned Cananea copper mine, bidding $468 million in an auction, Mexican news reports said Tuesday.

Ingenieros Civiles Asociados (ICA), backed by the Teck Corp. of Canada and West Germany's Metallgesellschaft AG, bid $468 million for the mine, promising to invest a further $100 million to develop the bankrupt concern and absorb $700 million in outstanding debt.

Bernardo Quintana, a major shareholder of ICA, is participating in the

purchase as a private investor.

A second bid of $600 million was received from the Sintemex consortium, but was rejected because Monday's 11:30 a.m. deadline had passed.

Sintemex spokesman Rocardo Sanchez said his group would protest the refusal, although the consortium had failed to come up with the minimum deposit of $45 million, or 10 percent of the starting price.

In addition to its bid for the purchase of Cananea, the consortium, known as Cuprifera Cananea, pledged to invest an additional $100 million to improve the company's operations.

If it completes the purchase, it will also have to assume Cananea's $700 million debt, more than 80 percent of which is owed to Nacional Financiera - a government development bank - and slightly less than 10 percent to American Express.

The state-owned Cananea declared bankruptcy last August, saying it could not meet its financial commitments or cope with the salary demands of its workers.

The company receiver, Financiera Nacional Azucarera, has to approve the sale to Cuprifera Cananea.

When the federal government decided in 1988 to privatize Cananea, it estimated it could receive $910 million for the sale. The company has proven reserves of more than 700 million tons of copper and employs 2,900 workers following 715 layoffs last October.

''The workers are interested in seeing that the conquests achieved during many years of union struggle are respected,'' said Napoleon Gomez Sada, leader of the National Mining and Metallurgical Workers Union.

He said the union will insist on complete adherence to existing contracts and respect for workers' legal rights.

#90177u2346 06/26/1990 ~United Press International

CALGARY, ALBERTA (JUNE 26) UPI - Queen Elizabeth's visit to Canada this week was originally intended as a celebration of Canadian unity and an end to the centuries-old hostilities between French and English-speaking Canada.

Instead, the British monarch, who arrives in Calgary on Wednesday, will find herself in the midst of a unity crisis, sparked by last week's collapse of a constitutional amendment aimed at gaining Quebec's signature on the 1982 constitution and averting the province's secession.

A spokesman for Buckingham Palace said the queen was following constitutional events ''closely,'' but there was ''no question'' of postponing her visit because of the failure of the amendment.

Some news reports said the queen was rewriting her original speech in light of the unity crisis and might use her role as symbolic head of Canada to address French-English hostilities.

But the crisis will have little impact on the queen's arrival Wednesday in Calgary, where thousands of fans sporting white stetson hats and cowboy boots are expected to welcome her.

The royal tour includes a visit to a pediatric hospital in Red Deer, about 100 miles north of Calgary, and equestrian events at the renowned Spruce Meadows stables in Calgary.

But the main reason for the queen's visit was the July 1 Canada Day ceremonies in the Canadian capital of Ottawa. The queen was scheduled to preside over Quebec's signing of the 1982 constitution, something it agreed to do if the Meech Lake constitutional amendment was passed by the federal government and 10 provinces.

The amendment, which recognized Quebec's distinct society and gave it special powers to promote and preserve its French language and culture, collapsed last Friday when two provinces, Manitoba and Newfoundland, adjourned their legislatures without voting on the measure. The amendment required the consent of all 10 provinces.

In 1982 Queen Elizabeth signed a constitutional proclamation that gave

Canada the right to amend its own constitution. Quebec did not sign the document or attend any of the spectacular celebrations that accompanied it on grounds it was not given a veto over future constitutional amendments and because the final package did not recognize its distinct society.

When Conservative Prime Minister Brian Mulroney began negotiations three years ago on the Meech Lake accord, Quebec promised to sign the constitution if its demands were met.

Quebec is expected to be absent from the Canada Day ceremonies, which will include speeches by Governor-General Ray Hnatyshyn, the queen's representative in Canada, Mulroney and the queen.

But the queen will make one brief stop in the Quebec city of Hull, across the river from Ottawa, to greet young children.

NEW YORK (JUNE 26) UPI - CBS Sports and the Big Ten Conference have agreed on an exclusive 4-year contract to broadcast conference basketball beginning in 1991-92, it was announced Tuesday.

The agreement ensures anywhere from 10 to 20 annual appearances by Big Ten teams. ABC's exclusive network rights to televise the conference's games expires after next season.

CBS recently renewed its agreement with the Big East Conference. It will also serve as the primary network carrier of Atlantic Coast Conference basketball games in 1990-91, and holds exclusive rights to the entire NCAA Tournament.

AUSTIN, TEXAS (JUNE 26) UPI - GenTrans Technology, Inc. said Tuesday it will begin manufacturing and marketing a ''breakthrough'' diagnostic test for gonorrhea and other sexually-transmitted diseases.

The test, using the first genetically engineered mutant bacteria applied to human disease control, will go on the market Sept. 1, said GenTrans president Jerry Richmond.

''It's a test that we think is going to put our little company on the map and we hope will enhance the biomedical community here in the Austin area '' he said.

The in-vitro diagnostic test kit, which was approved by the U.S. Food and Drug Administration in August, will be manufactured in the Austin suburb of Round Rock.

The company also said it is moving to Austin from Santa Clara, Calif., where it was known as Technology Management & Marketing Inc.

Between 30 million and 40 million gonorrhea tests are conducted annually in the United States.

The new test, based on the detection of gonococcal DNA in clinical material, will be sold primarily to public health agencies that must ship swab samples containing living specimens to culture labs.

Since the test, named Gonostat, does not require a living gonococcal bacteria in the specimen, no special handling such as refrigeration is necessary. And collection swabs need no special storage or handling before or after use.

''The primary advantage of the test is that it permits gonorrhea test swabs to be transported without being affected or destroyed by extremes of heat or cold,'' said Tony Baker, a senior vice president who heads the firm's science division.

Baker said Gonostat allows specimens to be shipped even by regular mail in transit for as long as 20 days because it is not affected by heat or cold.

GenTrans is the second biotech company formed by Austin-based Research Applications, Inc., a seed venture capital-technology transfer company which specializes in helping Texas universities commercialize new technology.

Richmond said GenTrans hopes to enter into cooperative agreements with the University of Texas at Austin in developing new products.

''We're already working with Texas in getting in future programs to get this thing enhanced in second and third generations,'' he said. ''We are going to be working with the outstanding university microbiology systems that this community offers. That was one of the first reasons we took a look at Austin.''

Richmond said the new test kit will initially be shipped in a frozen form, but the next step is to develop a freeze-dry process.

''We're finding considerable resources here at the university to do that '' he said.

Richmond said the technology for the new test kit was invented at the Temple University School of Medicine in Philadelphia. It was developed by TMMI, which had operated in California since 1985.

GenTrans, which also has a clinical reference testing at a San Antonio laboratory, will employ about 15 people in Round Rock, primarily microbiologists and chemists.

#90177u2388 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Creditor banks of Donald J. Trump agreed Tuesday to collectively fund a $20 million bridge loan that will enable the overextended developer to avoid a default at midnight on casino bond issues.

"They actually funded the $20 million bridge loan at 4 p.m.," a bank source said, referring to Trump's seven major U.S. creditor banks and a consortium of about 60 foreign banks with shares in his loans.

Trump needed the $20 million cash infusion to avoid defaulting on $43 million in interest and principal payments overdue since June 15 on two bond issues financing his Trump's Castle casino in Atlantic City. He faced a deadline at midnight Tuesday to make the bond payments or fall into legal default.

Failure to meet the payment could have triggered foreclosure by his creditors and eventually the collapse of his entire empire. Trump owes $2 billion to his bank creditors and $1.3 billion in publicly traded debt. "This is far preferable to a bankruptcy filing, for him and for everyone," said the banking source, speaking on condition of anonymity.

The Trump Organization, the developer's main company, released a statement saying Trump "is making all payments due with respect to Trump Castle Hotel and Casino in Atlantic City."

The statement also said Trump "has reached an agreement in principle with his lenders on a long-term facility," suggesting that opposition by two European banks to a comprehensive bailout had been overcome. But this could not immediatly be confirmed with banking sources.

"I want to thank all of my banks and lending institutions for making this complex and highly technical agreement possible," the statment quoted Trump as saying. "I have gained a great and deep respect for the banking system and those who make it work.

"This agreement allows the Trump Organization to go strongly forward and reflects and confirms the inherent long-term value of our assets, including Trump Tower, the Plaza Hotel, the Atlantic City hotels and the Trump Shuttle," the developer added.

"The agreement demonstrates the confidence of the banking group in the company's ability to maximize the value of these assets." The eleventh-hour bridge loan at least temporarily resolved the crisis that, over the past month, threw Trump into virtually nonstop negotiations and talks with his bankers in a bid to avoid bankruptcy.

Revenues from his three Atlantic City casinos as well as from the Plaza Hotel on Central Park, the Grand Hyatt Hotel at Grand Central Station, the Trump Shuttle airline and other properties fell short of his crushing obligations.

From Trump, the clock began ticking June 15, when he admitted he could not meet $43 million in bond payments. After notification by the bank acting as trustee of the bond issue, he had ten days to pay or legally default.

His main New York money center bank creditors - Citicorp, Chase Manhattan, Bankers Trust, Manufacturers Hanover - and three New Jersey banking units said they would lend him $65 million to defuse the debt bomb.

But it took days of negotiating and jawboning for Citicorp and Chase to win approval of the package from about 60 Japanese and other foreign banks that had purchased shares of syndicated Trump loans.

Late last week, the Japanese banks as a group gave a green light to the Trump bailout. But Dresdner Bank of West Germany and Societe Generale of France until Tuesday held up issuance of the bridge loan.

#90177u2430 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Imelda Marcos's flamboyant country lawyer, foregoing his cowboy clothes and folksy style, made an impassioned plea for her Tuesday at her fraud trial, saying she ''has committed no crime but loving a man for 35 years.''

Marcos, 60, is charged with fraud and obstruction of justice for allegedly plotting with her husband, ousted Philippine President Ferdinand Marcos, to divert more than $200 million stolen from the treasury in Manila into fraudulent real estate and art investments in New York and around the world.

Her lawyer, Gerry Spence of Jackson Hole, Wyo., left behind his Western garb and instead donned a blue jacket and gray slacks for his closing argument in U.S. District Court in Manhattan.

''There is no crime in being wealthy ... spending money,'' Spence said. ''There's no crime in buying jewelry, real estate in New York. She has committed no crime but loving a man for 35 years, raising his children, (receiving) his lavish gifts.''

Spence agreed with Charles LaBella, an assistant U.S. attorney prosecuting the case, that Marcos should not get a sympathy vote because she became ill three times during the three-month trial.

''Mrs. Marcos does not want your verdict on sympathy,'' the defense lawyer said. ''She fought to stay in this case ... she wants to be vindicated.''

Further recalling LaBella's argument, Spence said, ''It must have been dirty money ... she must have known. It's the other way around under the American system of presumption of innocence. She must have been innocent. If there is a question ... she must be innocent.''

Marcos, in black mourning clothes, stared at a blank page in a book in which she had been writing and sketching during the trial. Once, when Spence was listing items bought by the Marcoses, he said ''even shoes,'' and Mrs. Marcos looked up and smiled briefly.

Spence, resorting to the dramatic, pounded his fist, thumped binders, slapped the jury railing, stabbed his finger at blackboards and tossed pens into his upturned cowboy hat. He shouted and whispered.

''We're here to reach a verdict (even though) we didn't put a single witness on,'' Spence said. ''Reasonable doubt can also arise from lack of evidence.''

As Spence read from the jury charge prepared by Judge John Keenan, LaBella objected, but the judge overuled him, saying he would allow the tactic.

Spence continued, but was quickly interrupted by the judge.

''I would add, Mr. Spence, leave me something to do,'' he said.

The packed, hot courtroom erupted in laughter.

The prosecutor's argument Monday saw Marcos from a different angle.

''She was in every sense a partner with Ferdinand Marcos, in fact she was the driving force in transactions Ferdinand Marcos was informed of,'' LaBella said. ''Imelda Marcos was not just the wife of Ferdinand Marcos, but a politician in her own right. She was the governor of metro Manila.''

James Linn, the lawyer for Adnan Khashoggi, Marcos's co-defendant, was to sum up his case Wednesday. Khashoggi, 53, at one time one of the world's richest men and also allegedly involved in the Iran-Contra scandal, is charged with obstruction of justice and fraud for allegedly helping the Marcoses hide the purchase of four prime pieces of real estate in Manhattan.

The jury was expected to start deliberations Thursday, after government rebuttal and the judge's charge on the law.

In an otherwise quiet day, U.S. crude oil prices dipped in the final minutes of trading on the New York Mercantile Exchange Tuesday, apparently in anticipation of an industry report of higher-than-expected inventories.

Gasoline prices also fell as much as 2 cents a gallon on the nation's cash markets.

On the Merc, the benchmark West Texas Intermediate crude for August delivery ended the day down 24 cents to $17.14 a barrel, near its low on the day of $17.12.

Trading volume was a very light 54,834 contracts.

''Crude sold off in the final 15 minutes,'' noted Tom Bentz, director of trading at United Energy Inc. in New York.

''It could be a reaction to what the people are expecting the American Petroleum Institute stats will look like,'' said Ray Mazzeo of Shearson Lehman Hutton's International Energy Desk in New York.

Bentz said some traders were expecting the weekly survey to show U.S.

crude supplies to have dropped by 2 million to 4 million barrels and gasoline supplies to remain unchanged or drop by 1 million barrels.

Refinery utilization had also been expected to rise 0.5 percent to 1 percent, the trader said.

''At least the stats will shed some light on things. The market hasn't been trading with much vigor,'' Bentz said.

Released after the Merc closed, the survey showed crude stocks slipped only 500,000 barrels last week to 383.9 million barrels and gasoline supplies only declined 400,000 barrels to 216.2 million barrels.

Moreover, refinery utilization slipped 0.5 percent to 87.6 percent.

On the Merc, unleaded gasoline for August delivery dove 0.95 cent to 61.32 cents a gallon.

On the New York Harbor cash market, prompt delivery unleaded dropped 2 cents to 64.05 cents a gallon while falling 1.7 cents on the U.S. Gulf Coast cash market to 59.9 cents a gallon.

Exxon Corp. also said it had begun returning its 130,000-barrel-a-day Bayway, N.J., refinery to production and planned to have it fully operational by mid-July.

The refinery had been undergoing extended maintenance since mid-March after Exxon closed down Bayway marine operations to assess the cause of oil spills.

On the European spot market, Britain's widely traded North Sea Brent fell 20 cents to $15.95 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - lost 21 cents to $13.69 a barrel.

On the Merc, heating oil finished the day at 48.49 cents a gallon, down 0.43 cent.

LUSAKA, ZAMBIA (JUNE 26) UPI - Two days of fierce, student-led anti-government rioting and random looting claimed at least 25 dead and 80 injured by late Tuesday, and authorities imposed an indefinite nightly curfew on the strife-torn capital.

State-run radio and televison announced the 6 p.m. to 6 a.m. curfew to a city still echoing to sporadic gunfire as riot police fought scattered running battles with protestors.

More than 100 people have been detained since the civil unrest - the worst since 1986 - broke out early Monday, officials said.

Most of the dead were under 20 and some were policemen, hospital sources said.

All senior doctors at the University of Zambia were called in to help at hospitals, clinics, and make-shift dressing stations.

Of the estimated 80 injured, one was reportedly bayonetted by a para-military policeman.

President Kenneth Kaunda cut short a working holiday to return to Lusaka Tuesday to oversee counter-measures to the violence, which flared in clashes between protesting UZ students and riot police. The battles spilled off campus into the city and led to residents rampaging through the streets and looting dozens of stores.

''The problem is more than a political one and the police can not give any comment... the political leadership will have to do that,'' one high-level police official said.

Kuanda has been running a one-party state since independence from Britain in 1964.

Students began the protest after accusing Kaunda of balking on introducing a multi-party democracy and of breaking promises to feed all the people.

It follows a 100 per cent overall hike this month in the price of corn meal, the staple food.

Police in December 1986 shot and killed 15 protestors during similar riots in the northern copperbelt region.

The latest corn meal price increase was in line with International Monetary Fund suggestions on cutting subsidies to ensure economic stability.

Many of Zambia's 10 million citizens are starving as the copper-based economy struggles against decades of economic mismanagement and socialist experiments to introduce a free-market agriculture-based system.

Kaunda had left town early Monday apparently to discuss economic remedies with advisers.

More than 1,000 protesters were estimated to be involved in the unrest.

Zambia in May 1987 turned its back on IMF prescriptions for a sound economy. But in March, as a result of a deepening recession and a falling copper price, it secured IMF approval for a new economic blueprint aimed at freezing prices, cutting subsidies and introducing business incentives.

#90177u2547 06/26/1990 ~United Press International

ANCHORAGE, Alaska (JUNE 27) UPI - Oil production halted by volcanic eruptions earlier this year resumed Tuesday in Cook Inlet and an oil rig arrived from Africa to drill the first offshore exploratory well in the inlet since 1984, oil industry officials said.

Redoubt Volcano has continued to rumble with small earthquakes but has not erupted since April 21. Resumption of oil production and shipments and the new drilling signal a return to the oil business in the huge inlet carved into the southern Alaska coast by North Pacific waters.

''We're certainly not normal in that we have some restrictions, but we will not have any more delays in oil shipments,'' said Harold Mouser, manager of Cook Inlet Pipe Line Co., which operates the Drift River oil terminal in the shadow of Redoubt Volcano on the west side of Cook Inlet, about 90 miles southwest of Anchorage.

The first tanker in three months had loaded crude and was on its way to California, Mouser said.

The Drift River terminal was shut down after the Coast Guard and the state of Alaska imposed safety restrictions when Redoubt was erupting almost

weekly.

Dikes surrounding the terminal, a mere 20 miles from the restless volcano, were being extended and raised to a height of 20 feet in a $17 million project required by the state to protect oil tanks from flooding caused by volcanic debris cascading down the mountain into the Drift River valley.

But even when the project is completed July 15, Mouser said his company will use only four of its seven storage tanks, leaving three closest to the Drift River empty despite the new spill insurance afforded by the raised dikes.

As Cook Inlet operations resumed, Arco Alaska Inc. was preparing to drill for the first new oil and gas in the inlet since 1984.

The jackup drilling rig Adriatic VIII traveled 13,000 miles from West Africa on a Dutch ship, the 528-foot Mighty Servant I, in a 45-day journey that ended Sunday at the port of Seward, Arco reported. The rig was welded to the ship.

Global Marine Drilling Co. workers removed the rig from the ship for the month-long task of modifying it for drilling in a cold climate. Its three legs stand 410 feet and it can drill in 300 feet of water.

The rig was to be moved into place, a few miles off the west shore of Cook Inlet near Kalgin Island, for two months of drilling starting in late August, Arco spokesman Ronnie Chappell said.

Although the rig will stand about 15 miles east of Redoubt Volcano, Chappell said, ''We see it as a pretty routine operation. I don't think anyone sees any safety problem.''

The rig had to make the marathon journey to Alaska from West Africa, Arco spokeswoman Susan Andrews said, because it was ''the closest available rig.'' She said rigs in the Gulf of Mexico would have had to travel around the bottom of South America to reach Alaska.

Arco partners in its so-called Sturgeon well are Union Pacific Resources Co. of Fort Worth, Tex., Beard Oil Co. of Oklahoma City, and Rowan Petroleum Inc. of Houston. The rig is owned and operated by Houston-based Global Marine and chartered to Arco, which declined to reveal the cost of the drilling project. Arco is one of a number of companies with production platforms in Cook Inlet.

Alaska produces one-fourth of America's oil and the lion's share comes from Prudhoe Bay.

NEW YORK (JUNE 26) UPI - At a time of the year when they might be expected to decline because of greater demand reflecting warm-weather driving, the nation's gasoline stocks remained relatively firm last week, the American Petroleum Institute reported Tuesday.

The API's survey for the week ended June 22 showed gasoline supplies slipped to 216.2 million barrels from 216.6 million barrels in the prior week and stayed below year-ago levels of 218.8 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also slipped, to 165.1 million barrels from 165.7 million barrels a week earlier, but remained significantly higher than year-ago levels of 154.3 million barrels.

Gasoline production held steady at 7.1 million barrels daily, the same level as in the previous week but lower than the year-ago daily output of 7.3 million barrels.

Gasoline imports increased substantially to 513,000 barrels daily from 377,000 barrels in the previous week and were well above year-ago daily imports of 365,000 barrels.

U.S. refineries operated at 87.6 percent of capacity last week, compared with 88.1 percent a week earlier and 90.1 percent a year ago.

Crude oil inventories fell to 383.9 million barrels from 384.4 million barrels in the prior week but remained way above year-ago levels of 343.4 million barrels.

Daily crude oil imports declined to 6.5 million barrels in the latest week from 7.0 million barrels in the previous week but were higher than year-ago imports of 6.3 million barrels.

Imports of refined products rose to 3.0 million barrels daily from 2.3 million barrels daily in the preceding week and were much higher than year-ago imports of 1.8 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 109.8 million barrels from 107.4 million barrels a week earlier and remained above year-ago levels of 99.1 million barrels.

Daily distillate production stayed steady with the previous week's 3.0 million barrels and was higher than year-ago output of 2.9 million barrels.

Distillate imports rose to 371,000 barrels a day from 242,000 barrels a day in the previous week and were much higher than year-ago imports of

169,000 barrels a day.

#90177u2593 06/26/1990 ~United Press International
BUDAPEST, HUNGARY (JUNE 26) UPI - Hungary's former communist leadership gave shelter to terrorists - including the elusive ''Carlos'' - in the early 1980s, Parliament was told Tuesday by the new non-communist government.

During a question-and-answer session, Interior Minister Balazs Horvath said he had called on the chief prosecutor to investigate the case of ''serious crime'' which may implicate the late communist leader, Janos Kadar, and several other members of the one-time party Politburo.

The revelation came following similar developments in East Germany, where the former Stasi, or secret police, were said to have harbored left-wing extremists wanted in West Germany for a string of violent attacks at the direction of the communist leadership.

Horvath said he had information that terrorists came to Hungary several times over the two-year period that ended in 1982 and ''were the guests of the Political Committee.''

They included the Venezuelan-born Ilich Ramirez Sanchez, known as ''Carlos'' and ''The Jackal,'' who has been sought by police and intelligence agencies of a dozen countries, Horvath said.

''Carlos'' appeared to drop from sight in 1976, but his name continued to surface for several years in connection with terrorist activities. He was believed to have been living in Libya.

Andras Benkei, who was minister for interior at the time, disputes the charges that the Communist Party elite harbored terrorists.

''Nonsense,'' he told Hungarian television after the parliamentary session. ''It's inconceivable that we as members in Interpol (the international police organization) would have supported terrorists.''

Benkei's name was not on the list Horvath read to Parliament of high officials involved with terrorists.

Among the names were one-time Justice Minister Mihaly Koron, Central Committee Secretary Sandor Racz, Politburo member Andras Gyenes and close Kadar associate Karoly Nemeth.

Austrian television has reported that prior to a terrorist attack on the Vienna airport in December 1985, the assailants had stayed in the Atrium

Hyatt Hotel in Budapest.

#90177u2611 06/26/1990 ~United Press International
BONN, WEST GERMANY (JUNE 26) UPI - A television report Tuesday said West German firms were helping Libya build a second chemical weapons plant similar to an installation in Rabta.

The SWF television station made the report on the eve of the planned conclusion of a trial against Juergen Hippenstiel-Immhausen. He is accused of playing a key role in the construction of the Rabta plant, 40 miles south of the Libyan capital of Tripoli.

The station, quoting West German intelligence sources, said Libyan leader Col. Moammar Gadhafi was planning to erect the second chemical weapons plant at the Sheba oasis, about 60 miles south of Rabta.

On Monday, Libya's minister for light industries dismissed reports that the north African country had plans to set up chemical weapons plants. ''Libya has no plans whatsoever of building chemical weapons plants,'' Amin Helmy Kamel said in remarks carried by Egypt's Middle East News Agency.

But in its report Tuesday, the SWF television station said Libyan authorities were using the same plans that West German firms, including Immhausen-Chemie GmbH, had allegedly drawn for the construction of the Rabta installation.

The station named two companies that it said had dealt with Libya through other firms in Switzerland and Holland in the latest affair.

It said West German customs officials had managed to stop the export of a high-tech computer that a West German firm was trying to export to Libya via Holland.

Hippenstiel-Immhausen is accused of having sold a similar computer to Libya for use in the Rabta plant.

The television station said that the Stuttgart-based firm had used an address in Saudi Arabia as a cover but that West German customs authorities found the real addressee to be a firm named Mechanical Merchandising Co. in Tripoli.

The station said the West German prosecutor general had started investigations against the part-owner of another firm in the city of Ulm who is believed to have exported laboratory equipment for the planned chemical weapons factory.

Meanwhile, a state prosecutor has requested that Hippenstiel-Immhausen be sentenced to more than six years imprisonment.

Hippenstiel-Immhausen, who is appearing in a Mannheim court, had earlier admitted he had participated in the construction of the Rabta plant but did not mention whether the installation was meant for chemical weapons production.

Libya has claimed that the facility at Rabta was a pharmaceutical plant. U.S. and West German officials have claimed that about 30 tons of nerve gas were recently produced in a test run at the plant.

#90177u2614 06/26/1990 ~United Press International

NEW YORK (JUNE 27) UPI - Whites are New York's newest minority in the work force, edged out by a combination of black and Hispanic workers, the Bureau of Labor Statistics said Tuesday.

Samuel Ehrenhalt, the bureau's regional commissioner, called it ''a milestone in the economic history of New York City,'' estimating that white city residents accounted for just under half - 49.7 percent - of the labor force by 1989.

Yet, despite the economic gains of the 1980s, blacks and Hispanics still suffered above average unemployment, averaging a rate of 9.6 percent in 1989, more than double the 4.1 percent uemployment rate for whites, Ehrenhalt said.

And only one in four black workers held professional, managerial or technical jobs, compared to over one in three whites, while 15 percent Hispanics held such higher paying jobs, Ehrenhalt said.

Whites remained the single largest group in the resident labor force but shrunk by about 100,000 to 1.7 million workers as groups grew by a total of about 400,000 since the 1980 Census, he said.

Blacks and other racial groups represented 30.2 percent of the city's labor force, or 1,015,000, while Hispanics made up 20.2 percent, or 678,000, Ehrenhalt said.

Overall, the number of city residents employed or actively seeking work rose to 3,364,000 in 1989, up 293,000 since the start of the last decade, according to Ehrenhalt.

Hispanics and non-Hispanic blacks and other racial minorities appeared to account for all the net labor force growth, while the number of whites

declined in that period, he said.

In a new report issued by his office, Ehrenhalt warned that New York's job growth has focused on higher pay and status fields and that the Labor Bureau's national projections indicate more growth in occupations requiring more education and training.

''In an era of slower labor force growth, when trained workers will be needed as never before, it becomes all the more imperative to better equip black and Hispanic workers to meet the needs of the changing job world,'' Ehrenhalt said.

About 80 percent of over 50,000 students who drop out of New York City schools are black or Hispanic, Ehrenhalt said.

#90177u2638 06/26/1990 ~United Press International

WASHINGTON (JUNE 27) UPI - Total U.S. machine tool orders surged 38.2 percent in May from April, the American Machine Tool Distributors' Association said Tuesday.

The May gain in total monthly sales was 33.6 percent in metal cutting orders, and 86.1 percent in metal forming orders, the AMTDA said.

May machine tool orders were 8.8 percent above their level a year ago. The May index for metal cutting orders was 5.2 percent above May of 1989, and the May index for metal forming orders was 69.6 percent above May of 1989.

Yet, the 12-month moving average for machine tool orders increased only 0.8 percent in May, and was 9.3 percent below the level of sales posted for the prior year, the association noted.

Robert A. Gale, AMTDA president, contended that ''healthy consumption levels still exist'' for machine tools and the current trend so far in 1990 reflects a stable plateau of orders.

The association's figures measure U.S. machine tool consumption, reflecting both domestic and foreign sources of tools.

-30- 1205

#90177u2661 06/26/1990 ~United Press International

LOS ANGELES (JUNE 26) UPI - President Bush's decision to halt new oil drilling off the California coast until 1996 was criticized Tuesday by both environmentalists who advocate an end to drilling and oil companies that warned of an increased dependence on foreign oil.

''These biologically rich marine waters deserve permanent protection from the threat of offshore oil drilling,'' said Michael Fischer, executive director of the Sierra Club. ''Anything less is unacceptable.''

Dan Haisley, a spokesman for Santa Cruz-based Save Our Shores, said, ''If the president thinks this will dampen opposition to offshore oil drilling, he's dead wrong. As long as the door to offshore oil leasing is open, we will try to slam it shut.''

Bush, in announcing his decision in Washington, said all lease sales off the coast of California would be delayed until after 2000, except for 87 tracts identified as having high potential for significant amounts of oil and gas in the Santa Maria Basin and the Santa Barbara Channel, which will delayed until 1996.

The president's decision comes at a critical time for Sen. Pete Wilson, a Republican facing a close race for governor against former San Francisco Mayor Dianne Feinstein, a Democrat.

Wilson, an opponent of drilling, said of Bush's move, ''If it's not perfect, it's an extraordinarily good result.''

''I think that this signals a permanent moratorium because it's my expectation that in the decade that follows the decision, alternatives to drilling will be developed as part of the national energy inventory.''

Although she otherwise applauded the president, Feinstein said, ''A temporary solution is not enough. It simply delays a difficult decision in the face of mounting political pressure.''

Other anti-drilling lobbyists said Bush's move was politically motivated.

''Bush simply recognized that offshore drilling equals political suicide in California,'' said Warner Chabot, consultant to six California coastal counties that have been fighting drilling.

Richard Charter, another anti-drilling lobbyist for local governments, said the decision reflects the ''political dynamics'' in the state.

''The Republican Party had their backs to the wall on this issue and the prospect of completely losing any chance for a Republican governor to have a role in Congressional reapportionment was completely unacceptable to party strategists,'' Charter said. ''So the president essentially bailed out.''

California has been the focus of bitter disputes between oil companies and environmentalists, dating back to the 1969 blowout of a Union Oil platform that spilled a quarter-million gallons of crude oil and fouled Santa

Barbara's beaches.

Bush's decision to halt drilling along some of the world's most celebrated coastline reflects the public's growing distaste for taking on more environmental risk.

That attitude intensified with the Exxon Valdez spill in Alaska last year and crystalized with the American Trader tanker spill of 400,000 gallons of crude oil at Huntington Beach in February.

''Californians would be very negative toward any move for more drilling,'' said Jack Kyser, an economist with the Los Angeles Chamber of Commerce. ''I'd say there's not much hope for any more drilling.''

''Having more oil drilling is not a cost California is willing to pay right now,'' said First Interstate Bank economist Jerry Jordan. ''And they don't have to pay that cost, since fossil fuels seem to be in abundance.''

Unocal and Chevron, both with extensive offshore California operations, criticized the decision.

''We're disappointed but not surprised,'' said Unocal spokesman Jeff Callender. ''It's unfortunate, because it will worsen our dependence on foreign sources.''

Sherri Zippay, a Chevron spokeswoman, said, ''Our intitial reaction is that the president's actions seem to go too far but we certainly recognize that there is great concern by the American public over this issue.''

-30- 4236

#90177u2668 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Mayor David Dinkins, calling the Zodiac killer ''twisted ... vicious,'' offered a $10,000 reward Tuesday for information leading to the arrest of the gunman who has stalked and shot four people, one of whom has died.

Dinkins announced the reward in a statement at City Hall one day after police released a sketch of a man they said questioned the mysterious gunman's latest victim about his birthday. The killer has apparently known his victim's dates of birth before shooting them.

''Since March 8, a twisted individual with a distorted notion of his role in life has stalked our neighborhoods and shot four persons, one fatally '' the Dinkins statement said.

''At the request of Police Commissioner Lee Brown and after consulting with Deputy Mayor for Public Safety Milton Mollen, I have authorized a

reward of $10,000 for information leading to the arrest and conviction of 'the Zodiac' killer,'' the statement said.

Dinkins also said he hoped anyone with information about the ''vicious killer'' would come forward.

Police said the man depicted in the sketch, released Monday, approached a homeless man in Central Park and asked him his birthdate several days before the homeless man was shot in the chest as he slept on a bench in the park on June 21.

Deputy Police Commissioner for Public Information Suzanne Trazoff refused to describe the man depicted in the sketch as a suspect in the case. ''We're looking for him for questioning,'' she said. ''It is a description of the man who the Central Park victim had a conversation with prior to the shooting.''

The man in the sketch, depicted as black, was described as being in his early 30s, weighing about 184 pounds and being between 5-foot-10 and 6 feet tall. The man is shown with an Afro-style haircut that either is slightly receding or has a slight bald spot in the front. The man also had a mustache and three days' growth of beard.

Meanwhile, New York Newsday reported Tuesday that investigators had found a fingerprint they believe belongs to the killer on a letter he left in Central Park after shooting his fourth victim.

''Unless the Zodiac has been arrested before, it will be difficult to work off a single print,'' one investigator told the newspaper. ''If it doesn't determine his identity, it could confirm it.''

The third victim of the Zodiac gunman, Joseph Proce, 78, who was pistol-whipped and shot May 31, died Sunday of complications from his wounds at Jamaica Hospital.

Proce's death brought an eerie twist to the case of a mysterious gunman who stalked four defenseless victims - and apparently knew each of their astrological signs.

In his first note to the police, in November, months before he struck, the gunman wrote, ''Taurus the first sign is dead.'' Proce, the third of the Zodiac's victims, was a Taurus.

The three other victims are all recovering from their wounds.

A task force of nearly 50 detectives is assigned to the hunt for the gunman.

#90177u2701 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - The dollar skidded against the major currencies in New York trading Tuesday as technical selling erased earlier gains spurred by President Bush's acknowledgment that budget progress might mean higher taxes.

But many currency traders and analysts were at a loss to explain why the U.S. currency slid so quickly on news which, when taken at face value, should have give the dollar a shot in the arm.

''God only knows,'' said Shearson Lehman Hutton currency analyst Lisa Finstrom. ''I think it's basically technical.''

In late New York trading, the dollar was quoted at 1.6615 West German marks, off a sharp 1.6 pfennigs from 1.6775 marks Monday, and was changing hands at 154.50 Japanese yen, well down from 155.38 yen.

''We're talking about a major technical move here,'' said Francoise Soares-Kemp, a Credit Suisse treasury vice president. But she said technical analysts thought the dip might presage a dollar rally.

Finstrom said the dollar did not rise appreciably on the news that Bush dropped his opposition to higher taxes on the grounds revenue increases were needed to keep the federal budget deficit in hand.

The prospect of a budget being achieved by the Republican administration and the Democratic-controlled Congress ''was seen as a plus for the dollar but the dollar did not move much,'' she said.

Then the market concluded that progress on the deficit might result in lower U.S. interest rates, pushing the dollar lower, Finstrom said. The drop was accelerated by selling for technical motives.

Other dollar rates: 1.3972 Swiss francs, off from 1.41; 5.5750 French francs, down from 5.6310; and 1,216.50 Italian lire, down from 1,228.25.

The pound advanced to $1.7420 from $1.7305.

In Europe, the dollar finished mixed after trading in narrow ranges against the major currencies.

Currency analysts said the dollar was relatively unaffected by comments from Bush that greater tax revenues would likely be a part of any deficit reduction plan.

Dealers in London and New York were selling dollars for British pounds on

the belief that the government will keep U.K. interest rates at 15 percent through the autumn, one dealer said.

''The dollar was fairly flat. Most of the market activity has been in sterling, with anticipation of an exchange rate mechanism entry announcement,'' said a trader at Barclays de Zoete Wedd in London.

''The market seems to be a little gung-ho about it,'' he said, referring to Britain's expected full participation in the European Monetary System, which could translate into lower inflation and interest rates.

The U.S. unit closed marginally higher in both Frankfurt, at 1.6770 deutsche marks against 1.6760 Monday, and Zurich, at 1.4125 Swiss francs aginst 1.4050.

In London, the pound surged to $1.7375 from $1.7305.

The dollar inched lower in Paris and Milan, to, respectively, 5.6315 francs against 5.6325 and to 1,229.25 lire against 1,229.40. But the dollar moved marginally higher in Brussels, to 34.48 Belgian francs against 34.36.

Earlier in Tokyo, the dollar sagged against the yen on profit-taking after four days of gains, ending at 155.23 yen against 155.62.

Gold fell in Zurich to $349.50 an ounce against $353.50 Monday and was down in London at $349.75 an ounce against $353.50. London analysts said gold was weakened by nervous dealer selling and liquidation.

Republic National Bank in New York closed cash gold at $350.25 an ounce, down from $353.40 Monday. The New York Commodity Exchange settled gold at $350.40 an ounce, down from $353.80.

Silver ended lower in Zurich at $4.80 an ounce against $4.85 and fell in London to $4.79 an ounce compared with $4.85.

Republic closed cash silver at $4.85 an ounce, up from $4.84, while the Comex settled silver at $4.82, up from $4.816.

#90177u2739 06/26/1990 ~United Press International

WASHINGTON (JUNE 27) UPI - MCA Corp. on Tuesday disclosed the terms of an agreement in which it would provide $50 million to lenders if Cineplex Odeon Corp., 49 percent owned by MCA, fails to meet certain financial covenants.

The agreement, dated June 11, also calls for Claridge Investment and Co.,

a Toronto concern that also holds Cineplex stock, to provide up to $50 million.

MCA included a copy of the agreement in a filing made Tuesday with the Securities and Exchange Commission. Cineplex had previously outlined the agreement in its first quarter report for 1990, filed with the SEC May 15, but had not disclosed the terms.

The agreement relates to a program that Cineplex began late last year, when it changed management and began restructuring its holdings by selling off assets not related to the Toronto-based company's core business, showing and distributing motion pictures.

Cineplex failed to meet financial covenants for some loans last December, but was able to get waivers from its lenders and amend the loan covenants.

The amended covenants restrict Cineplex's ability to make new investments outside of reduced allowances for new theater construction, establish asset sale covenants, including $200 million cumulative net proceeds required to be received in 1990, and require that a substantial portion of funds from asset sales be used to reduce bank debt.

Under the terms of the June 11 agreement, MCA and Claridge will backstop Cineplex's financial performance by promising payments of up to $100 million in total if the company does not meet the amended financial covenants.

For example, if Cineplex asset sales do not raise the amounts stated in earlier agreements, MCA and Claridge would be required to make up approximately one-half of the shortfall in payments to the creditors.

Moreover, the banks can foreclose on any security they hold, or exercise any other right or remedy they may have against the corporation, without affecting or impairing in any way MCA's and Claridge's obligation under the agreement (except to the extent that the Cineplex debt is repaid by the foreclosure).

At the same time, the proposal allows Cineplex to make payments to MCA and Claridge if its net cash proceeds by December 1990 reach at least $200 million, or if it has excess cash flow. Both conditions, however, are strictly qualified in the agreement.

Bank of Nova Scotia and Bank of America in the negotiations represented several lending syndicates that provided revolving and nonrevolving credit facilities to Cineplex.

These syndicates included banks such as the Chase Manhattan Bank of Canada Sovran Bank, N.A., Chemical Bank, and the Bank of New York.

#90177u2755 06/26/1990 ~United Press International

ROCHESTER, NY (JUNE 26) UPI - Two armored car guards stopped at a convenience store for coffee Tuesday and were robbed of $10.8 million in the second-largest armored car heist in U.S. history, authorities said.

The Armored Motor Services of America guards were taking the cash to the Federal Reserve Bank in Buffalo when they stopped at a convenience store at about 7 a.m. in the Rochester suburb of Henrietta, said Monroe County Sheriff Andrew Meloni.

The $10.8 million was the second-largest amount ever taken in an armored car robbery in the United States, Meloni said.

After one guard went into the store the second guard was accosted by a man who jammed a shotgun through a gunport in the truck, Meloni said. The first guard was grabbed when she returned to the vehicle with the coffee, he said.

The two were driven to a remote area about a quarter mile away behind the Rochester Institute of Technology in Henrietta, and were met by a second man. The guards were tied with tape, and the contents of the truck were put into a van and the robbers drove off.

''They were taken down a farm lane out of sight from the road and houses '' said Capt. Glen Marcus, commander of the sheriff's Henrietta substation.

The guards freed themselves about 15 minutes later and drove back to their company headquarters. They were not injured and their names were not released.

Authorities would not reveal in what denominations the cash was divided into, but said the haul weighed between 1,500 and 1,700 pounds.

Police were interviewing employees of the armored car company, but had no suspects, Meloni said.

Armored Motor Services of America officials would not comment on the holdup.

The largest armored car heist in the United States occurred in the Bronx, Dec. 12, 1982, when $11 million was stolen from Sentry Armored Car-Courier.

Some $39 million in gold ingots and diamonds were stolen Nov. 26, 1983 from a Brink's Mat warehouse at Britain's Heathrow Airport in the world's largest holdup.

#90177u2771 06/26/1990 ~United Press International
(JUNE 26) UPI - Nelson Mandela today became the third private citizen from a foreign country to address a joint meeting of Congress. He outlined a post-apartheid South African government and defended the use of violence against apartheid by drawing parallels between the struggle for equality in South Africa and the struggle for freedom in colonial America.

More than 10-thousand people marched through the Liberian capital today, defying an encroaching rebel offensive to ask an end to the country's civil war. The demonstrators demanded that President Samuel Doe resign, with one person saying... ''We want this monkey off our backs. He is corrupt.'' Liberians who wereN'T demonstrating were fleeing the region. Many Liberians fear a bloodbath as loyalist forces make their last stand against the rebels.

The Senate is taking up the defeated constitutional amendment to ban desecration of the American flag today in a symbolic but ultimately meaningless debate. Democratic leaders predict the proposed amendment will fail to win a two-thirds majority in the Senate, just as it failed in the House. Edward Kennedy leads the opposition, saying amendment backers are willing to- quote- ''sacrifice the Bill of Rights for what they hope will be a benefit in the polls.''

The Palestine Liberation Organization has appealed to the Arab League for support in its diplomatic impasse with the United States. The P-L-O hopes the Arab League will condemn the U-S suspension of talks with the P-L-O. The Arab League's initial response is receptive. It has scheduled a meeting to address the issue next week.

#90177u2778 06/26/1990 ~United Press International
WASHINGTON (JUNE 27) UPI - J.M. Schneider Inc., a Canadian food manfacturer who began a recall of its ''Schneider's Franks'' last week, is expanding the recall to cover the entire United States, the Agriculture Department said Tuesday.

The original recall applied to the Northeastern states. Further investigation showed the franks were distributed in California, Connecticut, Massachusetts, New York, Pennsylvania, Michigan, Ohio, Maryland and Texas.

Schneider is voluntarily recalling the franks because they may be contaminated with a bacteria that can cause serious illnesses. The problem was discovered during a routine inspection. No illnesses have been

reported.

The franks, made of pork and beef, are sold in one-pound plastic packages. The words ''Canada 35'' appear inside the inspection seal on the label. The recall involves about 22,000 pounds, or 9,091 kilograms, of franks in packages with a ''Best before'' date of ''Jul 03.''

The Food Safety and Inspection Service urged consumers to return the suspect franks to the store where they were purchased.

No other Schneider products were involved in the recall.

Consumers with questions about the recall can telephone the toll-free Meat and Poultry Hotline at 1-800-535-4555 from 10 a.m.-4 p.m. EDT Monday through Friday. At other times, the number is connected to a tape recording describing the recall. Callers in the Washington area should dial 447-3333.

#90177u2819 06/26/1990 ~United Press International

DALLAS (JUNE 27) UPI - Lone Star Technologies Inc. Tuesday said it will omit payment of the quarterly dividend due July 1 on its cumulative preferred stock.

The dividends, amounting to about $875,000, were due on about $50 million of preferred stock sold through private offerings in 1988, spokeswoman Judith Murrell said.

Murrell said this will be the third quarterly dividend the company will be skipping.

Lone Star is the parent of Lone Star Steel, which has been operating in Chapter 11 bankruptcy protection since June 1989.

In 1989, Lone Star Technologies lost $191.4 million on revenues of $607.6 million.

Lone Star also owns American Federal Bank F.S.B., which was created from the merger of 12 insolvent Texas thrifts in 1988.

#90177u2824 06/26/1990 ~United Press International

WASHINGTON (JUNE 26) UPI - The Senate rejected a constitutional amendment Tuesday to ban flag desecration with a symbolic vote of significance only to politicians looking for an issue in the fall elections.

The Senate turned down a 20-word measure supported by President Bush and congressional Republicans, chief among them in the Senate GOP leader Robert Dole of Kansas. Last year the Senate refused to adopt a flag amendment on a 51-48 vote.

Tuesday night's tally was 58-42 to favor the measure - nine short of the two-thirds necessary for adoption. The 35 Democrats voting against the proposal were joined by seven Republicans, and the 38 Republicans voting for it were backed by another 20 Democrats.

Senate Democratic leader George Mitchell of Maine, closing the debate for amendment opponents, said, ''I oppose and condemn the burning of the flag. I find it offfensive and obnoxious. ... But I do not support changing the Constitution. We can support the American flag without changing the American Constitution.''

Mitchell said it would be a ''sad irony'' if a handful of flag burners got a monument to their cause written into the Constitution.

''This amendment rescues the Bill of Rights by correcting the Supreme Court's red, white and blue blunder,'' said Dole, who declared it was ''a hoax'' that the proposal attacked the First Amendment. He argued that flag burning was ''maliscious conduct, not speech'' as the Supreme Court has held.

And Dole, who first suggested the issue would be useful in 30-second campaign commercials, a remark that set Democrats off with cries the issue was being manipulated for political purposes, told the Senate, ''All this nervous campaign chatter misses the point.''

Assistant Senate Democratic leader Alan Cranston of California told the Senate, ''I deplore flag burning but I care more deeply about preserving the First Amendment and the Bill of Rights. ... We should not be weakening that charter of freedom.''

A constitutional amendment by Sen. Joseph Biden, D-Del., to give Congress the power to enact a specific statute - saying it is unlawful to burn, mutilate or trample on the flag - failed on a 93-7 vote.

There were a number of switches from last year, among them Democrat Chuck Robb, whose state of Virginia produced many of the founding fathers involved in writing the Bill of Rights. He declared: ''My heart requires that I defend the flag. My mind tells me that our flag will be better protected and the freedoms and values it represents will be better honored by resisting this amendment.''

In remarks highlighting the politicization of the issue, Sen. Edward Kennedy, D-Mass., said the Senate was being asked to vote for a

constitutional amendment in part ''because of concern over the antics of a few obnoxious protesters but largely because of a partisan campaign to misuse the flag and abuse the Constitution for political advantage.''

''Stirred by fears of sound bites and 30-second spots, members of Congress who know better are expressing a willingness to sacrifice the Bill of Rights for what they hope will be a benefit in the polls,'' said Kennedy who added, ''We respect the flag most - and protect it best - when we honor the freedoms for which it stands.''

In a prelude to the final debate and votes, the Senate voted 51-48 to reject on procedural grounds an effort by Sen. Dale Bumpers, D-Ark., to pass a statute declaring flag desecration illegal if the individual knew it would incite a breach of the peace. It also killed, 90-10, the bid of Sen. Jesse Helms, R-N.C., to remove flag cases from the jurisdiction of the federal courts.

Sen. Strom Thurmond, R-S.C., speeded the debate in late afternoon when he dropped plans to offer a constitutional amendment proposal of his own.

Legislatively, the question was a moot point because the House last week not only rejected the amendment approach, 254-177 or 34 short of the two-thirds eded, it refused by a nearly identical margin to pass a statute to ban flag desecration. Flag desecration cases that have prompted court reviews have involved flag burnings.

The core amendment declared: ''The Congress and the states shall have power to prohibit the physical desecration of the flag of the United States.''

The issue exploded onto the floors of the House and Senate this month when the high court, for the second time in a year, held 5-4 that flag burning was a constitutionally protected form of free speech.

The futility of the debate and the political nature of it was noted by Sen. Howard Metzenbaum, D-Ohio, who recited the comments of GOP strategists expressing delight at how the issue could be used against Democrats in the fall.

''It is unnecessary, unworkable and unwise for Congress to take any action to prevent flag desecration,'' said Metzenbaum.

''So why are we going to vote on a constitutional amendment that cannot possibly be enacted this year? The answer can be summed up (as) ... there are those who would politicize the flag issue. There are those who are anxious to find the material for a 30-second TV spot. There are those politicians who want to exploit the issues of flag burning. So today we will take a meaningless vote so some campaign operative'' can use the

results, said Metzenbaum.

Sen. Dan Coats, R-Ind., argued, ''We do care deeply about symbols. ... The support I have seen and heard for such an amendment is undeniable. ... Most of all I can see it in the determination fixed in the faces of our veterans.''

#90177u2831 06/26/1990 ~United Press International

PANAMA CITY, Panama (JUNE 27) UPI - Panama's first brokerage firm was launched Tuesday with the participation of the country's major banks and commercial companies in a move aimed at stimulating the economy.

The purpose of the exchange is to give the government and private

enterprise an additional means of obtaining financing and to present an option to savers and potential investors, General Manager Ricardo Brin said.

The president of the stock brokerage is banker and trader Frank Kardonski.

The exchange is authorized to operate with an initial capital of $1 million, split into 10,000 shares worth $100 each.

The capital has been totally underwritten and paid, and the only shareholder with a more than 2.5 percent interest in the concern is the National Bank of Panama, the country's principal bank, which owns 5 percent of the shares.

Brin said in his inauguration speech that the brokerage would serve as a way of transferring funds from those seeking to invest to companies and the government which are strapped for cash.

The government is expected to issue bonds through the exchange, and private companies also could offer their own commercial paper.

Brin said it was hard to estimate how large a volume would be traded at first since the activity is new to Panama and because of the current economic crisis.

Those expected to buy shares, limited at first to Panamanian companies, are savers and small investors seeking better returns on their money than banks offer.

#90177u2857 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - The city spent some $2.6 million on Nelson Mandela's visit last week, with most of the money going for police security costs that might still be reimbursed by the State Department, officials said Tuesday.

Echoing comments by Mayor David Dinkins earlier this week, Deputy Mayor Bill Lynch said the cost was well worth it because of the priceless positive image of the city broadcast around the world.

The city Office of Economic Development estimates that each minute of free television air time on the major and local networks, who broadcast large portions of the visit live, was worth some $720,000, he said.

''We could not have bought this promotion. We could not have paid for it '' Lynch said.

The city's bill for Mandela's visit was $2 million for police, including overtime; $250,000 for the Transportation Department, including $50,000 in lost revenue from traffic and parking tickets; $210,000 for the Sanitation Department; $54,000 for the Emergency Medical Service; $40,000 for the General Services Department; and $3,200 for Parks Department overtime, Lynch said.

The Parks Department also put up $55,000 as a deposit to cover possible damage to the field at Yankee Stadium for last Thursday's rally for Mandela.

But Lynch said Yankees owner George Steinbrenner was returning the entire fee, in spite of some minor damage done to the field.

Steinbrenner also is footing the $90,000 bill for costs for rental of the stadium, which were to be borne by the Mandela Welcoming Committee.

Lynch said the city was still negotiating with the State Department for reimbursement for a ''substantial'' portion of the police costs of the visit.

There also is the matter of the specially built ''Mandela Mobile,'' which Lynch said belongs to the city.

It already has accompanied Mandela on his trip to Washington at the State Department's request and could travel with him on stops across the country to provide security at parades and motorocades, he said.

#90177u2865 06/26/1990 ~United Press International

RIO DE JANEIRO, Brazil (JUNE 27) UPI - Luiz Otavio de Motta Veiga, president of the Petrobras, said Tuesday the Brazilian state oil company will reduce its work force to about 63,000 from the current level of 80,000.

Viega told a news conference 10,000 jobs will be eliminated when several of the company's smaller subsidiaries are sold to the private sector and between 7,000 worker and 8,000 additional workers will be retired or put on voluntary paid leave.

President Fernando Collor de Mello in late May ordered government managers to lay off nearly 20 percent of the more than 360,000 Brazilian public employees by mid-June.

The Petrobras chief executive, head of Latin America's leading petroleum company in terms of sales, said the cuts would help reduce costs and give more money to retirement funds.

Without mentioning exact figures, Viega added, ''There have always been some firings.''

Viega said the company, a massive conglomerate of oil refineries, wells and fuel distributors, may have to raise domestic fuel prices in the near future.

''Brazil is the only country in the world where the price of gasoline suffers (from) the influence of the international suger market,'' Viega said.

He explained that, due to the large percentage of Brazilian cars manufactured to run on cane alcohol, fluctuating sugar prices affect gasoline rates.

''When international sugar pricec rise, planters prefer to sell sugar and not alcohol, thus driving the alcohol-derived gasoline prices up,'' Viega said.

He said he supported eliminating subsidies currently made by the government to alcohol manufacturers.

#90177u2985 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - Two Brooklyn students waiting on line to pick up yearbooks, diplomas and report cards and a third youth were shot and wounded Tuesday outside an intermediate school, police said.

A fourth youngster was severely beaten in the incident about 10:15 a.m. outside Jackie Robinson Intermediate School.

The victims, whose names were withheld, were taken to Kings County Hospital after the shooting, where a spokesman said a 13-year-old boy and a 14-year-old girl were listed in critical condition with gunshot wounds to the abdomen.

A 16-year-old youth who also suffered a gunshot wound and a 13-year-old who was badly beaten were both listed in guarded condition, hospital spokesman Phil Petrie said.

The gunfire erupted behind the school, where hundreds of students had gathered on the next to last day of school to pick up their yearbooks, report cards and diplomas, police and school officals said.

''There was a physical confrontation ... in the rear of the school between two males,'' police spokesman Officer Ralph St. Just said. ''A third male intervened in the confrontation and fired shots.''

Sgt. Peter Sweeney, another police spokesman, said the students had been outside the school, which has about 1,800 students in grades six to eight, since 8:45 a.m.

Police were unsure whether any of the wounded had been involved in the shooting and said more than one gun may have been involved.

''There was possibly more than one gun pulled,'' said Officer Anthony Mazzola, adding that a .22-caliber pistol was apparently used in the shooting.

Mazzola said some of the victims may file charges against one another.

Police initially said the shooting stemmed from a dispute over yearbooks and that all three of the youngsters who were shot were students at the

school. But St. Just said later that police were unsure what sparked the incident. He also said only two of the teens who were shot were believed to be students at Jackie Robinson.

#90177u2997 06/26/1990 ~United Press International

NEW YORK (JUNE 26) UPI - A bicyclist who was riding tandem with his fiance testified Tuesday he was terrified when he spotted about 30 youths lunge into the roadway in Central Park, blocking his path in ''a very threatening stance.''

Speeding along at about 28 miles per hour, Gerald Malone, 35, said he and his fiance, Patricia Dean, had no means of escape.

''It was sort of like a gauntlet. They were all over the place,'' Malone, an advertising executive, testified at the trial of three of the youths.

Malone and his fiance were among nine victims attacked in the moonlit park on April 19, 1989, during a random crime spree - known as ''wilding'' - in which a female jogger was gang raped, beaten and left for dead.

As the couple rode their bicycle built-for-two north on the East Drive near 97th Street at about 9:12 p.m., Malone noticed the youths standing in grass.

When the couple got to within 100 feet, the youths crouched in ''basketball-type stances,'' Malone said.

''They were pulling their hoods over their heads. It was a very threatening stance,'' Malone testified as the three youths on trial stared ahead, emotionless.

Terrified, Malone, a 200-pound, 6-foot man, began bellowing at the ''grunting'' group of youths.

Fearing the tandem bike would crash, Malone said he ''tried to hit the first guy in front of me. I was going to use him as the mattress. He seemed to be the once who was calling the shots. He was the energy.''

Malone said the youth jumped out of the way and they pedalled quickly to an emergency call box and notified police.

''I said we were just attacked by 30 to 40 black kids. I felt they were a threat to somebody else, that if they didn't break them up they were going to hurt somebody,'' Malone testified.

About that time, the female jogger was entering the park and was destined

to become the gang's next victim, according to Assistant District Attorney Elizabeth Lederer.

Earlier Tuesday, lawyers for two of the defendants revealed they wanted to put their clients' psychological reports into evidence to prove they were unable to make detailed confessions without police coercion.

However, Justice Thomas Galligan rejected their request before the start of the trial Monday.

Antron McCray, 16, Yusef Salaam, 16, and Raymond Santana, 15, are the first three youths to go on trial in the Central Park attack.

The detailed confessions are considered the strongest evidence against the youths, who are charged with 13 criminal counts, including attempted murder, rape and sodomy.

If convicted, each faces a maximum sentence of five to 10 years imprisonment. All three were juveniles at the time of the attack.

McCray's lawyer, Michael Joseph, said his psychological report showed he has ''vulnerabilities'' that make him susceptible to suggestion. And, Salaam's lawyer, Robert Burns, said he has an ''identity'' problem that also leaves him open to coercion.

Nine people were attacked in the one-hour ''wilding'' rampage, four victims before the woman jogger, and four after.

It was not known if the 29-year-old woman jogger, a Wall Street investment banker, would testify. Her name has not been used by the media because of the nature of the crime.

#90177u3267 06/26/1990 ~United Press International

(JUNE 26) UPI - Senate rejects flag protection amendment... President Bush admits new taxes are needed to help cut the deficit... Nelson Mandela addresses Congress... and a summer heat wave grips the West. U-P-I has it

all, next:

The proposed constitutional amendment banning desecration of the American flag failed in the Senate today.

The amendment was already dead after failing in the House. And tonight's defeat in the Senate diminished it as a campaign issue for the fall.

The vote this evening was 58 a majority, but a nine votes shy of the two-thirds majority required for passage.

Though the issue was for the most part dead, debate was lively. Kansas Republican Robert Dole said the idea that flag-burning is free speech is ''a hoax.'' He termed flag-burning ''malicious conduct, NOT speech.''

But Democrats took the high road and prevailed.

Democratic leader George Mitchell of Maine said- quote- ''We can support the American flag without changing the American constitution,'' a notion echoed by California's Alan Cranston, who cited the Bill of Rights and said... ''We should NOT be weakening that charter of freedom.''

The entire issue came under fire from Senator Edward Kennedy, who held up the proposed amendment as the product of what he called ''a partisan campaign to misuse the flag and abuse the Constitution for political advantage.''

-30- 1548
#90177u3297 06/26/1990 ~United Press International
(JUNE 26) UPI - As of today, there's a new message written on the lips of President Bush.

The president bit the tax bullet in an attempt to get stalled budget negotiations going with Congress. He issued a statement saying that new taxes will be necessary to help control the deficit.

Senate Democratic leader George Mitchell welcomed the president's change in policy without trying to turn it to political advantage. Mitchell said only that- quote- ''the statement speaks for itself.''

Republicans tried to put a good spin on the statement, pointing out that new taxes are clearly necessary and that Bush supports them only as part of a comprehensive deficit-reduction package.

But other Republicans jumped ship, saying they'll fight new taxes in any form.Republicans are nervous about new taxes in an election year-especially after branding the Democrats as the ''tax and spend'' party for

years.

But new revenue became necessary this year when the S-and-L bailout pushed the deficit above last year's level.

A new round of budget negotiations between the White House and Capitol Hill is set for tomorrow, and the president's tax move is expected to rejuvenate the talks.

Said White House news secretary Marlin Fitzwater... ''This is the turning point where the president wanted to insert himself.''

Nelson Mandela today became only the third private citizen from abroad to address a joint meeting of Congress.

He received an enthusiastic greeting and his 35-minute speech was halted several times by applause.

But conservatives in Congress attempted to steal Mandela's thunder by raising objections to his support for armed opposition to apartheid in South Africa.

California Republican Representative William Dannemeyer walked out of the joint meeting before Mandela arrived.

But Mandela was ready for such protests. He said the South African government remains- in his words- ''determined to turn their guns against the very idea of a NON-racial democracy.''

Mandela said that when faced with such intransigence, the ''weapons of war'' are necessary to insure inalienable rights.

He made frequent reference to U-S documents such as the Declaration of Independence and the Constitution in drawing parallels between the struggle for equality in South Africa and the struggle for freedom during the Revolutionary War.

Mandela joined Revolutionary War hero Marquis de Lafayette of France and Lech Walesa of Poland as the only other foreign private citizens to address a joint meeting of Congress. He also joined Walesa and Czechoslovak President Vaclav Havel as the only former political prisoners to address both bodies of Congress.

#90177u3319 06/26/1990 ~United Press International

(JUNE 26) UPI - While President Bush abandoned his ''NO new taxes'' campaign pledge today, he attempted to fulfill his promise to become the

environmental president.

Bush ordered a six-year delay in oil drilling off the California coast and moved to defer any development of the Florida Keys until the next century.

The president took similar steps to protect the North Atlantic Coast and the shores of the Pacific Northwest.

The California drilling ban is widely seen as an attempt to help Republicans in the state's upcoming elections. But Bush defended his decisions saying... ''Further steps to protect the environment are needed.''

The moves got mixed reviews both from environmentalists and the oil industry. One oil official said less offshore drilling will increase imports, increasing the chance of tanker accidents.

A conservation official responded by calling the moves ''a temporary reprieve'' and little more than ''a positive short-term step.''

The Bush administration today came out with a plan its says will save both the northern spotted owl and logging jobs in the Pacific Northwest.

Federal officials say part of the plan is to change the Endangered Species Act. The change would broaden the powers of a rarely used committee that already can bypass some conservation measures under the Endangered Species Act.

Environmental groups immediately assailed the proposal as an attempt to weaken the law.

Agriculture Secretary Clayton Yeutter and Interior Secretary Manual Lujan announced the step as part of a long-term forest management plan in the Pacific Northwest.

The U-S Fish and Wildlife Service placed the northern spotted owl on the threatened species list Friday, triggering laws which protect the bird's forest habitat from logging.

The government has projected thousands of job losses because of the conservation rules.

#90177u3387 06/26/1990 ~United Press International

(JUNE 26) UPI - A scorching heat wave in the Southwest is making power companies sweat.

Utilities in the Southwest and Southern California today asked customers to cut back on electrical usage amid sweltering triple-digit heat.

Phoenix had the highest temperature ever recorded in the city... 121 degrees. The Phoenix Fire Department paramedics responded to 13 heat-related calls. A spokesman says three deaths are ''possibly heat-related.''

Power companies in Phoenix, San Diego County and Las Vegas asked customers to set their air conditioner thermostats two or three degrees higher than normal. They also asked consumers NOT to use ovens, water heaters, dishwashers, or other major appliances until early evening.

In San Diego County, the town of Borrego Springs kept fireman indoors for all but essential fire-fighting duties as the temperature reached 118 degrees.

And in Texas, temperatures have hit the century mark 16 times already this month... and there's NO relief in sight.

-30- 1161

#90177u3460 06/26/1990 ~United Press International

(JUNE 26) UPI - The Senate tonight voted 58-42 in favor of a constitutional amendment to ban flag desecration. But that was nine votes short of the two-thirds margin needed for passage. The vote was merely symbolic in light of the House rejection of the flag burning amendment last week.

The White House is putting the best possible spin on President Bush's decision to drop his long-standing opposition to raising taxes. Spokesman Marlin Fitzwater describes Bush's change of heart as an attempt to revive the stalled budget talks, which are scheduled to resume tomorrow.

Nelson Mandela received a hero's welcome from all but a few lawmakers today as he arrived to address a joint meeting of Congress. The anti-apartheid leader urged the United States to keep in place the economic sanctions imposed in 1986 until black South Africans say they can be lifted.

In a communique ending their two-day meeting in Dublin, European Community leaders today applauded the ''foresight and courage'' of South African reforms. The European leaders signaled readiness to relax economic sanctions if steps to abolish apartheid continue.

Police in Henrietta, New York, near Rochester, say the two guards whose armored car was robbed of 10-point-eight-Million dollars today while they went for coffee and sandwiches probably violated company policy by

stopping at a convenience store. The armored car heist is the second largest in U-S history.

Arizona authorities say six firefighters battling a wind-whipped wildfire in the Tonto National Forest northeast of Payson are reported to have been killed today when the blaze jumped fire lines. The deaths have NOT been confirmed.

-30- 1847

#90177u3474 06/26/1990 ~United Press International

(JUNE 26) UPI - Army spokesmen at Fort Leonard Wood, Missouri, say two soldiers were killed and two critically injured today when an armored combat earthmover they were riding in rolled over. The accident occurred on an UNpaved road at the base.

Sirhan Sirhan, who assassinated Senator Robert Kennedy 22 years ago, lost his 13th bid for parole today... and was told he could try again in two years. The California Board of Prison Terms ruled Sirhan ''an UNreasonable risk to society.''

Imelda Marcos's flamboyant lawyer left behind his country clothes and folksy style during closing arguments today in the former Philippine first lady's fraud and obstruction of justice trial in New York City. Gerry Spence said Marcos had ''committed NO crime but loving a man for 35 years.''

In Los Angeles, the defense rested its case today in the retrial of Raymond Buckey... the sole defendant remaining in the notorious McMartin Pre-School molestation trial. Afterwards, Buckey predicted he would be acquitted.

Two studies released today by the National Center for Health Statistics :

The first shows the United States leading all other developed nations when it comes to the homicide rate for young men. The overall murder rate in 1987 for American males ages 15 to 24 was 21-point-nine per 100-thousand people. Scotland came in a distant second with a young male homicide rate of five per 100-thousand people.

Researchers say the rate of American infants born through Caesarean section remains ''extraordinarily high''... 23 per 100 hospital deliveries from 1981 through '86. That's more than twice the rate in England and the Netherlands and more than three times the rate in Japan.

-30- 1864

#90177u3600 06/26/1990 ~United Press International

(JUNE 26) UPI - The Senate tonight failed to pass a constitutional amendment to ban flag desecration. The vote was 58-42 in favor of the measure... but that's nine votes short of the two-thirds majority needed. Most Republicans voted for the amendment and cited patriotism... while most Democrats voted against it, citing concern for freedom of expression. Legislatively, the vote was just an exercise because the House failed to pass the measure last week.

President Bush gave up his ''NO new taxes'' pledge today... calling for new tax revenues. In a brief statement, Bush said the government needs more money to go with spending cuts to bring its raging debt under control. The president said the hike is backed by Democratic and Republican budget negotiators. Democratic leaders praised the president's decision, while some House Republicans vowed to oppose any new taxes.

The Louisiana Senate has approved what could become the nation's toughest anti-abortion bill. The state Senate voted 24-15 for the bill after five hours of emotional debate by the all-male chamber. One minor amendment was added, sending the bill back to the state House... which will likely approved it. Governor Buddy Roemer has indicated he will veto the bill unless lawmakers add exceptions for rape and incest.

West German television says West German firms are helping Libya to build a second chemical weapons plant. The report cites sources in West German intelligence for the information. Libya has denied its plant in Rabta produces chemical weapons. Yesterday, a Libyan official denied the government is contructing any new plants.

-30- 1798

#90177u3618 06/26/1990 ~United Press International

(JUNE 26) UPI - Black leaders in Florida expressed outrage today that six mayors and the state's governor denounced Nelson Mandela for his support of Cuba's Fidel Castro and Yasser Arafat. One black civil rights group called the denouncement ''hypocritical'' because Pope John Paul has embraced Castro, but was welcomed. The South African freedom fighter is due to arrive in Miami tomorrow night.

Federal agents are working to round up 10 people indicted in a nationwide illicit credit-card ring. A Los Angeles grand jury handed down the indictments yesterday following a 16-month invetigation. The charges include 40 counts of conspiracy, grand theft, fraud, forgery and counterfeiting credit cards. The ring is blamed for Millions of dollars in losses to credit-card companies.

New York City Mayor David Dinkins took a hard-line against the so-called Zodiac killer today. He called the killer ''twisted'' and ''vicious'' and offered a 10-thousand-dollar reward for information leading to his arrest.

A special task force of almost 50 detectives is assigned to track the man down. The Zodiac killer claims responsibility for four shootings since early May- one of them a fatality.

A witness to a Tallahassee, Florida, alligator attack on a nine-year-old boy has filed a child-abuse complaint against the boy's mother. Marianne Hightman says the mother, Summer Reeves, was warned about the presence of the alligator Sunday about 10 minutes before the attack. But while other parents called their children and pets away from a popular swimming pond, Reeves allegedly did NOTHING. Reeves later pulled her son from the jaws of the gator. The boy is hospitalized in fair condition after receiving hundreds of stitches.

KANSAS CITY, MO (JUNE 27) BUSINESS WIRE - BHA Group Inc. (NASDAQ:BHAGA, BHAGB), the leading aftermarket manufacturer and supplier of parts, rebuilding, conversion and related services for particulate air pollution control equipment (baghouses and electrostatic precipitators), announced Wednesday that it has retained the investment banking firm of First Analysis Securities Corp. (Chicago) to review strategic opportunities for financing the company's continuing growth, such as a joint venture, a private investment by a strategic partner or an additional public offering of its common stock.

A strategic partner and expanded capital base will assist the company in exploiting the international opportunities of its business, including those in eastern Europe, and provide a financing source for large baghouse and electrostatic precipitator reconstruction and conversion projects.

These opportunities should increase with the expected passage of the Clean Air Act and construction of new coal-fired electric generating capacity during the 1990s.

ENGLEWOOD, CO (JUNE 27) BUSINESS WIRE - U S WEST (NYSE:USW) announced Wednesday that U S WEST Spectrum Enterprises is the name being given to its radio communications division.

The division was formed in February of this year to manage U S WEST's worldwide interests in radio communications, including cellular, paging and Personal Communications Networks (PCN's).

U S WEST Spectrum Enterprises will own and manage U S WEST's 81 percent interest in NewVector, as well as the company's international radio communications projects. Those projects include the Hungarian national cellular system, the first cellular system in eastern Europe and the first national system in Hungary.

Two cell sites are now complete, and the third, and final, cell for the initial system will be complete shortly. Initial service will be available in Budapest later this year, and expansion of the system will begin after that date.

Another Spectrum project will be the recently announced joint ventures in Czechoslovakia with Bell Atlantic and the Ministry of Posts and Telecommunications (MPT) of the Czech and Slovak Federated Republic. In one venture, the parties have signed a letter of intent to construct and operate a cellular mobile network. Construction is scheduled to begin in the third quarter of this year.

Spectrum Enterprises will also oversee U S WEST's interest and involvement in Unitel's Personal Communications Network (PCN) in the United Kingdom. Presently, the PCN is under construction, with an anticipated service start date of late 1992 or early 1993.

U S WEST NewVector Group provides cellular service to 152,300 subscribers in 28 metropolitan service area (MSA) markets in 15 states of the United States. The company also operates three rural service area (RSA) markets.

U S WEST is a $25 billion diversified company headquartered in Englewood. Its major subsidiary, U S WEST Communications, serves the communications needs of 12 million customers in 14 of the western United States. U S WEST owns other companies involved in communications, marketing services, data solutions and financial services.

KANSAS CITY, MO (JUNE 27) BUSINESS WIRE - BMA Corp. (BMAC) announced that at the company's annual meeting held Wednesday stockholders approved the proposed sale of its wholly owned insurance subsidiary, Business Men's Assurance Company of America to Generali-Assicurazioni Generali S.p.A.

It is anticipated that the sale would produce, prior to closing adjustments, pretax cash of $157 million.

In addition to cash BMAC will receive from Generali, Business Men's Assurance Company of America will transfer assets to BMA Corp. carried at approximately $128 million of statutory book value, as of Sept. 30, 1989. The closing of the transaction is anticipated to occur in late July.

W. Thomas Grant II, president and chief executive officer of BMA Corp. said: ''The board of directors has indicated an intention to declare a special one-time dividend of $3.70 per share after the closing of the sale. We expect the special dividend, together with the regular third quarter dividend of 30 cents per share (for a total of $4) to be paid in early September.''

Grant also said that shareholders reelected the following directors for three years, and until their respective successors are duly elected and qualified: Lan C. Bentsen, Arthur J. Doyle, William D. Grant, George G. Joseph and Charles E. Yonkers.

Shareholders also approved ratification of the appointment of KPMG Peat Marwick as independent auditors for the year ending Dec. 31, 1990.

SANTA CLARA, CA (JUNE 27) BUSINESS WIRE - Logisticon Inc. announced the appointment of Rodney B. Murray to vice president of sales.

Immediately prior to joining Logisticon, Rod had been responsible for worldwide field operations for ASK Computer Systems of Mountain View, Calif. With ASK, Rod began as a vice president of field operations for North America and Asia Pacific prior to his appointment to vice president of worldwide field operations.

During Rod's tenure at ASK, revenues increased from $96 million in fiscal year 1987 to $186 million in fiscal year 1989.

Prior to joining ASK, Rod served as vice president of marketing at

Versatec, a Xerox Co., and as the national sales manager at California Computer Products (Calcomp).

Rod is a graduate of Rice University in Houston, where he received his bachelor of science in mathematics in 1959.

Logisticon is a privately held Delaware Corp. with headquarters in Santa Clara. The company designs, develops, installs and services computer-based, real-time material management systems for manufacturing, warehousing, and distribution facilities.

Fred C. Laccabue, the president and chief executive officer of Logisticon, stated that the appointment of Murray as the vice president of sales will allow Logisticon to take advantage of the lessons learned in the growth of the MRP II market and apply them to the fast-growing and newly emerging warehouse automation market.

Logisticon markets its products directly in the United States and Canada. Logisticon and LEX Electronics (UK) Limited have established a joint venture, LEX-Logisticon, in the United Kingdom which markets the product in the United Kingdom.

#90178b0063 06/27/1990 ~Business Wire

RENO, NV (JUNE 27) BUSINESS WIRE - O'Hara Resources Ltd. (NASDAQ:OHRAF) has signed a definitive agreement giving it 30 square miles of proven diamond fields in the Birim River district of Ghana, West Africa.

O'Hara thereby joins Sikaman Gold Resources (ToSE) and Prominent Resources (VcSE), which along with Billiton (Netherlands) and Northern Queensland (Australia), are already at varying stages of development or production on their own Ghanian properties.

The diamond field has little, if any, overburden, and production is a matter of scooping up the underlying gravels and washing them. O'Hara plans to install a total of three washing plants, each capable of processing 50 cubic yards per hour.

The diamonds themselves tend to be industrial type (85 percent), as opposed to gemstone type (15 percent). The company can sell them directly, or pass them through a Ghanian government agency, which will pay the going rate.

O'Hara's feasibility study shows the property will return its investment in less than six months, and provide a net cash flow of $24 million (U.S.)

over a five-year period. Additional properties will be acquired as O'Hara demonstrates its good faith in developing this first property and providing employment and revenue in Ghana.

The company has formed a subsidiary, JO'Hara, which is owned 75 percent by O'Hara Resources, 10 percent by the government of Ghana, and 15 percent by Jowak Mining Co. of Ghana. Equipment already owned by O'Hara is being prepared for shipment to Africa, and production is expected to begin during the summer.

Following the initial three-month run of production, a further independent feasibility study will be undertaken. That study, and the backing of the Ghanian government, will be used to apply for financing toward a major, world-class operation. Application will be made to the World Bank, the International Monetary Fund and the Industrial Development Bank, all of which already participate in the economy of Ghana.

O'Hara Resources is a Reno-based natural resources company, with properties in California, Nevada, Montana, British Columbia, and Ghana, West Africa. O'Hara owns the right to acquire 14.9 percent of the TCI telecommunications system, which provides toll-free services to travelers and the travel industry.

SAN FRANCISCO (JUNE 27) BUSINESS WIRE - Homestake Mining Co. (NYSE:HM) will continue its long-standing tradition of support for the Mount Rushmore Memorial by formally presenting a contribution of $1 million in cash and property to preserve this National Shrine and upgrade the facilities.

Harry M. Conger, chairman and chief executive officer, will present the gift to the Mount Rushmore Society's Golden Anniversary Campaign during ceremonies today at the Memorial.

''Today Mount Rushmore faces a new set of challenges. Its popularity has lead to increased public use for which the facilities are inadequate. Natural weathering also threatens the stability of the monument itself,'' says Conger. ''Homestake has a history of partnership with Mount Rushmore and the preservation and improvement of the Shrine of Democracy is important to the Company, as well as, to South Dakota and the nation.''

A bronze entitled ''The Miner'' will also be presented to the Society in honor of the event and symbolic of Homestake's financial contribution.

The contribution will be used to fund the first comprehensive structural analysis of the granite carving and to upgrade outdated visitor facilities. The current facilities were designed to accommodate 1 million visitors per year. More than 2 million travelers visited the memorial in 1989.

In 1927, when a lack of funds threatened to halt the dream of the mountain memorial even before carving had begun, Homestake became the first company to contribute to the cause and was subsequently named to the ''roll of honor'' by sculptor Gutzon Borglum.

''This pace-setting gift sends a powerful message to the South Dakota corporate community,'' said Paul R. Christen, chairman of the South Dakota Golden Anniversary Campaign Committee. ''Homestake has shown a historic interest in this symbol of democracy that is unequalled by any other

company.''

Homestake Mining Co. is an international gold mining company holding significant interests in the United States, Australia, Canada and Chile.

#90178b0078 06/27/1990 ~Business Wire

AUSTIN, TEXAS (JUNE 27) BUSINESS WIRE - Dell Computer Corp. (NASDAQ:DELL) is planning to further expand internationally, Michael Dell, chairman and chief executive officer, told shareholders Wednesday during the company's annual meeting, noting that international sales have more than doubled in the past six months.

''It is clear that the investments we made over the past three years in Canada, the United Kingdom, Germany, France and Sweden are beginning to yield handsome returns,'' Dell said.

''The outlook for continued growth in international sales during fiscal 1991 is strong,'' he said, adding that revenues from international operations were 36 percent of sales in the first quarter of fiscal 1991.

The company's key growth segment in the United States is expected to continue to be sales to major corporate, governmental and educational customers, which increased to 45 percent of revenues in the first quarter of fiscal 1991.

''We are achieving strong acceptance among major accounts and have formed corporate alliances that are strategically important to our future growth '' Dell said. He cautioned, however, that the overall domestic market for personal computers is marked by sluggish demand and intense pricing pressures.

The company's product development effort is ''strong and on track,'' he continued. Dell Computer has introduced six new products over the past 10 months and will introduce another new product within the next two weeks. Personal computers based on the Intel i486 and 386SX microprocessors, and laptop computers, will remain key areas of focus within Dell's research and development program, Dell said.

In concluding his remarks, Dell said that the company would continue to focus on strict control of overhead expenses and tight management of inventories and other assets. The company's inventory and expense control programs, combined with higher revenues generated by new products, resulted in record earnings of $.28 on record revenues of $120.3 million

in the first quarter of fiscal 1991.

#90178b0080 06/27/1990 ~Business Wire

SANTA CLARA, CA (JUNE 27) BUSINESS WIRE - Applied Materials Inc. has announced the availability of an integrated process that combines chemical vapor deposition (CVD) of blanket tungsten with tungsten etchback in the Precision 5000 WCVD.

The new process maintains the wafer under vacuum throughout the processing sequence, eliminating the need to move the wafer from the tungsten deposition system to a separate etch system to accomplish the etchback step. This reduces contamination caused by particle-induced defects, as well as cycle time.

''Since 1987, Applied Materials has introduced a number of integrated deposition/etchback processes in the Precision 5000 CVD for dielectric applications. Our experience in process integration makes this extension into blanket tungsten a logical move, resulting in a highly efficient metallization process sequence for our customers.

''This application offers chipmakers the advantages of a much smoother, quicker process flow for enhanced fab logistics, as well as an inherently clean, efficient process,'' said Dr. Sass Somekh, vice president of the Applied Conductor Technologies organization.

Combining the proven Precision 5000 blanket tungsten deposition process, introduced in September 1989, with an integrated etchback step offers a high degree of production-worthiness that can be quickly incorporated into a fab line's process flow.

''With this new integrated process, the customer can rapidly qualify the system in production, and achieve exceptional process results. The 5000 WCVD system was designed for this type of sequential process integration. In addition to new orders for the integrated system, we expect many of our customers to begin retrofitting etchback chambers onto their existing Precision 5000 WCVD systems,'' Somekh noted.

The etchback step uses a process similar to that developed for the Precision 5000 Etch system for etching patterned tungsten and tungsten silicides, with the same magnetically enhanced reactive ion etching (MERIE) technology that has made the Precision 5000 Etch an industry leader in advanced etch applications.

First, CVD tungsten is deposited, then the wafer is transferred to the etchback chamber where tungsten is etched at a high rate (7000 A/min). Once the tungsten ''blanket'' is removed from the wafer surface, the bulk of the remaining exposed tungsten is in the contact or via hole. At this point the etch system shifts to a process that removes the residual tungsten and adhesion layer on the oxide surface using a high-selectivity overetch step.

The process uses a highly accurate endpoint detection system based on multi-line optical emission. The system is used to detect the exact interface between the blanket tungsten film and the underlying adhesion layer, to prevent plug recess. Endpoint accuracy and control have become extremely important for today's state-of-the-art semiconductor devices.

Applied Materials Inc. is a global growth company based in Santa Clara, and is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition. The company is also a leading manufacturer of ion implantation and physical vapor deposition (PVD) systems.

#90178b0082 06/27/1990 ~Business Wire

WALNUT CREEK, CALIF. (JUNE 27) BUSINESS WIRE - Air Liquide America's affiliate Cardox, a leading manufacturer and distributor of carbon dioxide announced it will invest $1.1 million to expand its 150 ton per day carbon dioxide plant near Sioux City, Iowa.

Six CO_2 pelletizers, designed and built by Cardox, along with compression and refrigeration equipment to support the pelletizers will be added. This expansion will allow the facility to manufacture dry ice as well as increase production of liquid CO_2 by 40 tons. The storage capacity will also be doubled to 800 tons.

Receiving raw material from Terra International's ammonia manufacturing plant in Port Neal, Iowa, Cardox provides liquid carbon dioxide for numerous applications in the Midwest including food freezing and chilling, beverage carbonation, wastewater control and welding.

The plant will be enlarged by 3000 sq. ft. to accommodate the new equipment. Construction is scheduled to be completed by December 1990 and 5 people are expected to be hired locally.

''This expansion combined with the recent consolidation of our Air Gases and CO2 divisions, places us in a unique position in the Midwest market,'' commented Lonnie Albracht, regional manager, U.S. Merchant Gases. ''We are the only source in the area able to supply all industrial gases as well as liquid and solid CO2.''

The 16th liquid CO2 plant owned and operated by Cardox in the United States offers greater product supply to a new and existing customers in Iowa, Nebraska, Minnesota, and North and South Dakota.

Part of the world's largest industrial gas organization, L'Air Liquide, S.A., Cardox is a marketing arm of Air Liquide America which has operations throughout the United States, Canada and Brazil serving the needs of the food processing, beverage, electronics, laser, medical, metallurgy, petrochemical, pulp and paper, waste water treatment and research and development industries.

ST. PETERS, MO (JUNE 27) BUSINESS WIRE - MEMC Electronic Materials Inc., announced Wednesday that Dr. Robert M. Sandfort has been appointed a member of the board of directors.

Sandfort is presently an MEMC corporate vice president and president, MEMC/U.S.

Prior to joining MEMC, Sandfort was with Monsanto Electronic Materials Co. for 18 years. His last position with them was vice president, European Operations.

''It gives me great pleasure to have Dr. Sandfort as a member of the board. His past 19 years of silicon experience, encompassing technology, manufacturing and marketing will bring to the board a wealth of knowledge and experience from which to draw,'' said Roger D. McDaniel, president and chief executive officer of MEMC Electronic Materials Inc.

MEMC Electronic Materials Inc., with headquarters in St. Peters, is a leading world-wide producer of silicon products used in the manufacture of semiconductors for the electronics industry.

SAN DIEGO (JUNE 27) BUSINESS WIRE - Members of the senior management team of Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) have been named San Diego Biotechnology Entrepreneurs of the Year.

Gensia President David F. Hale and vice presidents Dr. Harry E. Gruber and Dr. Paul K. Laikind were selected from a field of more than 100 nominees.

The winners were announced during a banquet on June 19. The award, sponsored in part by Ernst & Young Inc., Merrill Lynch and Inc. magazine, is presented annually to leaders of successful and growing businesses.

Gensia is a biopharmaceutical company founded in 1986 to discover, develop manufacture and market novel drugs for the diagnosis and treatment of cardiovascular, cerebrovascular and neurological diseases. Earlier this month, the company raised $30.8 million from an initial public offering of 2.8 million shares of common stock.

''We hope these awards will bring the winners the recognition they deserve and inspire others to follow in their footsteps,'' said Harry Casari, Ernst & Young director of Entrepreneurial Services in San Diego.

Hale has extensive experience in the pharmaceutical and health care industries, including 10 years with Ortho Pharmaceutical Corp., a division of Johnson & Johnson. In 1982 he joined Hybritech Inc. where he was president and chief executive officer prior to joining Gensia in 1987.

Gruber is Gensia's vice president of research and is responsible for leading the company's basic research program in purine/pyrimidine metabolism. Prior to founding Gensia, he was an assistant professor at the University of California, San Diego (UCSD) School of Medicine.

Laikind is a company cofounder and has been vice president of corporate

development since the company's incorporation. He was formerly an assistant research biochemist at UCSD.

Gensia has two cardiovascular drugs in Phase 2 clinical trials. The company is also conducting preclinical research to develop other pharmaceutical products for the treatment of certain cardiovascular, cerebrovascular and neurological diseases.

The company focuses its research and development efforts on its two core technologies, which are based on Gensia's extensive knowledge of purine/pyrimidine metabolism and catecholamine analogues.

NOVATO, CALIF (JUNE 27) BUSINESS WIRE - WordStar International Inc. (NASDAQ:WDST) Wednesday announced revenues of $9,936,000 and net income of $116,000, or 1 cent per share, for its third quarter ended May 31.

In the like quarter of the preceding year, the company reported net earnings of $199,000, or 1 cent per share, on revenues of $11,858,000. Cash and equivalents totaled $14,494,000 on May 31, 1990 as compared to $17,093,000 on May 31, 1989.

For the nine months ended May 31, 1990, the company reported revenues of $27,447,000 and a net loss of $4,127,000, or 30 cents per share. For the first nine months of fiscal 1989, WordStar reported revenues of $31,840,000 and a net loss of $2,242,000, or 17 cents per share.

Third quarter revenue grew at 9 percent as compared to the second quarter.

This growth was primarily due to the success of the English version of WordStar 6.0, released in February.

Cash declined in the quarter from $14.8 million to $14.5 million due to approximately $500,000 invested in new technology. WordStar licensed unique linguistic technology for use in a product developed specifically for multi-lingual communication. Also during the quarter an investment was made in translating WordStar 6.0 into five European languages.

WordStar International Inc., headquartered in Novato, is a leading developer of business productivity software products. WordStar word processing products are among the largest selling microcomputer software programs in the world with 14 different language versions and an installed user base of more than 3.5 million.

#90178b0217 06/27/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (JUNE 27) BUSINESS WIRE - Skyline Gold Corp. Wednesday announced that it will suspend mining operations of its Stonehouse Deposit in the Fall of this year.

Ronald Shon, chairman and chief executive officer, said ''the decision to suspend operations was directly related to the inability of the company to continue to develop new reserves at the Stonehouse Deposit with ore grades that would be economical to mine at current gold prices.'' The company will retroactively charge $30 million of development cost against earnings in its second quarter financial statement.

Skyline's Stonehouse Deposit is located in the Iskut River Region of north western British Columbia. Mining operations commenced in August 1988 and to date have produced 75,000 ounces of gold, 123,000 ounces of silver and 1,960,000 pounds of copper. The mine which is located in an area that is not accessible by road, is totally dependent on air transportation for ongoing operations. The Provincial Government recently announced plans to build a road into the area. Construction of the road is expected to lower operating costs of mines in the area and will be an important factor in any decision to resume mining operations in the future.

Skyline is accelerating exploration work of its property interest located between the Stonehouse Deposit and the SNIP deposit to the north. The company is seeking a major industry partner to accelerate the exploration and development of its acreage and is in the process of completing a flow through share financing to advance the exploration on the promising Bronson Creek, Bonanza West and C-3 prospects successfully explored last year. Monies will also be spent on further exploration of the Windsock

and Cornice prospects.

DATED at Vancouver, B.C., this 27th of June, 1990.

The Vancouver Stock Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.

CHICAGO (JUNE 27) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) Wednesday announced it is extending the exchange offer for its 13-5/8 percent subordinated debentures due Jan. 2, 2001, until 5 p.m., New York City time, on Wednesday, July 11, 1990.

Except for the extension of the expiration date for the exchange offer, the terms of the exchange offer, including the consideration to be issued in exchange for the debentures, have not been changed, and Bally has no intention of effecting any such change. Each holder of debentures accepting the offer will receive 57 shares of Bally common stock for each $1,000 principal amount of debentures.

Bally will pay the July 2, 1990, regular cash interest payment to recordholders of the debentures at the close of business on June 15, 1990, in accordance with its usual procedure. No additional payment will be made in respect of accrued interest on the debentures.

As of 5:00 p.m., New York City time, on June 27, 1990, approximately $20 million aggregate principal amount of the debentures had been tendered to the exchange agent for the exchange offer.

Bally is a world leader in the gaming and fitness industries with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment and systems, fitness products and lottery products and services.

GREENBELT, MD. (JUNE 27) BUSINESS WIRE - Group 1 Software (NASDAQ/NMS Symbol: GSOF) Wednesday announced results for the fourth quarter and year ended March 31, 1990, the highest revenue and earnings in the Company's history.

Revenues for the fourth quarter increased 18 percent to $6,747,000 compared with $5,706,000 for the comparable period last year. Net earnings increased 20 percent to $1,226,000, or 29 cents per share, compared with $1,022,000, or 25 cents per share, reported in the same period the prior year.

For the year ended March 31, 1990, revenues increased 15 percent to $20,281,000 compared with $17,710,000 in the same period last year. Net earnings were $2,951,000, or 70 cents per share, compared with $2,763,000, or 66 cents per share, reported for the year ended March 31, 1989. The already strong Group 1 balance sheet was enhanced still further by these results.

Commenting on the results, Robert S. Bowen, Chairman and Chief Executive Officer of Group 1 Software, said,''The number of new Group 1 sales prospects identified during the past fiscal year fully met our projections. Group 1's expected growth rate was reduced, however, by a significant lengthening of the selling cycle during the first three quarters, which we attributed to general economic uncertainties.''

Group 1 Software Inc. is the leading supplier of computer software for the direct marketing industry and other volume mailers. The Company's customer base for mainframe computer software now totals approximately 950 clients, including a number of Fortune 500 companies and other premiere organizations in the U.S. and Canada. Approximately 4,500 copies of Group 1's micro- computer (PC) software packages are in use.

SALT LAKE CITY (JUNE 27) BUSINESS WIRE - Evans & Sutherland Computer Corp. (NASDAQ:ESCC), a member of the winning McDonnell Douglas-Beech Aircraft-Quintron team, has been selected to design, build and deliver the visual systems for the Air Force's Tanker/Transport Training System (TTTS).

The contract value is over $20 million for 11 ESIG-500 systems.

TTTS, the Air Force's air training command's first completely new training system in nearly 30 years, marks the first step in the Air Force's planned transition to specialized undergraduate pilot training with specially configured Beechjet 400T aircraft and advanced simulation training systems.

From 1991 through 1996, Evans & Sutherland is slated to deliver the 11 visual systems for use in operational flight training simulators. The visual systems are based upon the ESIG-500 image generator, with four infinity optics displays.

The ESIG-500 is a textured day/dusk/night system which will provide the out-of-the-window scene to support all the TTTS flight simulator training requirements. The ESIG-500 has also been chosen by the USAF for its F-16 operational flight trainers.

Evans & Sutherland has sold more than 500 visual systems to every U.S. branch of service, allied military forces, NASA, airlines around the world prime training contractors, and major airframe manufacturers. The company employs 1,400 people and is headquartered in the University of Utah Research Park, Salt Lake City, Utah.

ALAMEDA, CA (JUNE 27) BUSINESS WIRE - Aquanautics Corp. (NASDAQ:AQNT) Wednesday announced that it is not associated with the Houston-based Zapata Corp. (NASDAQ:ZOS) that yesterday announced financial restructuring.

Aquanautics has jointly developed its Smartcap crown closure for beer with ZapatA Industries Inc., a privately owned leading manufacturer of bottle caps and closures. ZapatA Industries Inc. is completely unaffiliated with the Houston firm with a similar name.

''We have had numerous concerned inquiries from brokers and stockholders during the last couple of days, especially since the Zapata Corporation news release,'' said N. Ross Buckenham, Aquanautics president and chief executive officer. Buckenham continued, ''our program with ZapatA, the crown cap manufacturer, is on schedule and brewery taste testing has begun according to plans.''

Aquanautics Corp. is a development stage separations and specialty chemical company producing new oxygen technologies. Aquanautics' proprietary synthetic oxygen-binding molecules can be structured into a variety of systems for extracting, concentrating and/or eliminating oxygen. The company is currently developing applications for food, medical, industrial and defense markets.

ZapatA Industries Inc. is a major supplier of crowns to leading U.S. brewers. The company also maintains a strong and growing presence in Europe and Latin America.

IRVINE, CALIF. (JUNE 27) BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA) has begun shipments of its Premium 486/33E Extended Industry Standard Architecture (EISA) desktop system.

''The Premium 486/33E desktop delivers the highest performance available for an industry-standard desktop system,''said Jim Ashbrook, senior vice president of product marketing. ''It offers superior price/performance for multi-tasking environments or stand-alone, processing-intensive applications,'' he said.

Announced in May, Premium 486/33E optimizes performance by combining EISA bus architecture with Intel's state-of-the-art 33-MHz 486 processor. Because it accommodates high-resolution graphics adaptors and high-performance disk controllers based on the EISA specification, it is ideal for CAD/CAM/CAE and database applications.

The fast processing speed of the 486/33 microprocessor makes the Premium 486/33E ideally suited for demanding business applications.

The Premium 486/33E supports five drive bays and the Weitek 4167 coprocessor. It contains seven EISA expansion slots and is expandable up to 48 MB of RAM.

Three models are available and come standard with 4MB of RAM and one 5.25-inch floppy drive. Model 5 is priced at $11,245, Model 115 with a 110-MB hard drive lists at $12,545 and Model 325 with a 320-MB ESDI hard drive retails at $14,245.

AST is a leading worldwide manufacturer of high-performance computing solutions. The AST-systems product line ranges from cost-effective Bravo systems to the 386-based and i486 high-performance Premium line of personal computers, including the new EISA bus architecture.

AST is the developer of the patent-pending Cupid-32 architecture, which eliminates obsolescence in its Premium line of personal computers. Cupid-32 computer systems may be upgraded to higher-performing microprocessors with the simple exchange of an innovative plug-in processor card.

#90178b0636 06/27/1990 ~Business Wire

BOISE, Idaho (JUNE 27) BUSINESS WIRE - Privately held Evening Star Mine, a Nevada corporation headquartered at Boise, announced Wednesday that it has purchased the painting titled ''Discovery of America,'' by the renowned surrealist ''FRAMA.''

The purchase price was $25 million. This price broke the world record for the highest price ever paid for a painting of a living artist.

''FRAMA'' was the first great artist from the Eastern bloc to enter into a French and an American Museum since the fall of the Berlin Wall. A native of Yugoslavia, ''FRAMA'' has emerged and taken his place as the worlds' pre-eminent surrealistic painter.

Steven Mortensen, vice-president of Evening Star Mine said '' 'Discovery of America' is an awe-inspiring painting and fully illustrates that 'FRAMA' has become the world's paramount surrealist of this century.''

This painting together with a set of other masterpieces from ''FRAMA'' commemorating the discovery of America by Christopher Columbus was unveiled June 19, at the French National Navy Museum. Former president and Mrs. Ronald Reagan said in a letter read at the unveiling ''Today we see another brick torn from the wall of oppression. And where that brick once was, light shines through allowing us to see more clearly the images and ideals of our neighbors in the East. May this celebration be only the first of many more to come.''

Mortensen said the painting will be displayed in a selected museum for the 500th anniversary of the discovery of America by Christopher Columbus before entering into the private collection of Evening Star Mine.

Evening Star Mine operates a hard-rock gold mine approximately 100 miles east of Bakersfield, Calif. Mortensen said the purchase of the painting is a diversification of the company's assets.

''FRAMA'' has been described as a ''painter who drapes his canvas with tumultuous images of his childhood among peasants in his native Yugoslavia.'' According to Pierre-Olivier Simon, previous restorator of the Louvre's Museum, '' 'Frama' drops the mental barrier between the intimate being and the external self.''

''Discovery of America'' is a masterpiece of outstanding quality, it describes the ship's book of Christopher Columbus in a quadri-dimensional space.

''FRAMA has reinvented the surrealism'' concluded Roger Peyrefitte who is a famous French writer.

DENVER (JUNE 27) BUSINESS WIRE - ''Colorado Crystal'' has overtaken Coors' Rocky Mountain Spring Water to become the best-selling bottled water in Denver, according to A.C. Nielsen's Scantrack Market Survey.

Produced by Rocky Mountain Beverage Co. (NASDAQ:RMBCU), ''Colorado Crystal'' overtook Coors' water in both dollar volume and market share for the weeks ending April 21 and May 19, 1990.

''Colorado Crystal'' had a 25.2 percent market share for the four-week period ending May 19, 1990, vs. Coors' 19.5 percent share. Dollar volume for the same period was $53,500 vs. $41,382. Perrier had enjoyed a 30.5 percent share of the Denver market in January until it was pulled from the shelves because of product contamination.

''Colorado Crystal'' significantly outsold H2Oh! (produced by Pepsico) and California's Calistoga, which were rated at 14 percent and 12.4 percent share respectively in this highly competitive market.

''We continue to believe in the superior taste and purity of 'Colorado Crystal' '' said Raymond A. Murtha, president and chief executive officer of Rocky Mountain Beverage Co. ''Consumers familiar with the bottled water market who try our product and then compare it to others clearly want 'Colorado Crystal'. ''

''Colorado Crystal'' has succeeded despite the formidable size of the local competition (Coors, Pepsico, etc.) because of product taste and consistency. ''Rocky Mountain Beverage Co. is tiny in comparison to the other companies producing bottled waters sold in our market,'' said Murtha.

Sales for Rocky Mountain Beverage Co. have increased 30 percent over the 12 month period ending May 31, 1990. On June 15, the company announced a distribution agreement for ''Colorado Crystal'' in the Dallas-Ft. Worth area. Other major markets are scheduled to be opened in the third quarter 1990.

Rocky Mountain Beverage Co. manufactures and distributes ''Colorado Crystal,'' a line of naturally flavored mountain spring water bottled at the source in Western Colorado's Grand Mesa.

''Colorado Crystal'' is currently available in nine states.

CULVER CITY, CA (JUNE 27) BUSINESS WIRE - Luxottica Group (NYSE:LUX), an optical manufacturer, has been named by Wilshire Designs, the Los Angeles-based distributor of the popular line of MIRA sunglasses, in a lawsuit for federal trademark infringement and related claims against Avant-Garde Optics Inc. and its parent company, Luxottica USA Inc.

The action is seeking to enjoin them from marketing eyewear under the name MIRARI. The lawsuit was filed in the U.S. District Court for the Central District of California on June 22, 1990.

Wilshire Designs has been manufacturing and distributing the MIRA line since 1987 and holds registered trademarks to that name. MIRA is endorsed by hockey superstar Wayne Gretzky.

Wilshire Designs alleges that the name MIRARI, which is almost identical to MIRA, will cause confusion in the marketplace which will have an adverse effect on sales of the MIRA line. The suit also alleges that Avant-Garde hired away three key people from Wilshire Designs, all of whom were responsible for marketing the MIRA line.

In addition to seeking a preliminary injunction and a premanent injunction barring Avant-Garde and Luxottica from selling their products under the MIRARI name, Wilshire Designs also seeks an award of damages to compensate for its lost profits and for the profits wrongfully obtained by the defendants from their infringing activities.

LOUISVILLE, KY (JUNE 27) BUSINESS WIRE - Vencor Inc. Wednesday said that it expects earnings for the second quarter of 1990 to be nearly double the 5 cents per share reported for the first period of this year.

The second quarter results will also represent a significant gain over the earnings of 2 cents per share in the second period of 1989.

W. Bruce Lunsford, chief executive officer, said that the actual quarterly

results would be released in late July. He remarked, ''This acceleration in Vencor's growth reflects our successful transition into a period where more of the company's patients are covered by some form of private supplemental health insurance.

''Although the Medicare Catastrophic Coverage Act was formally repealed in November 1989, the coverage specified under that legislation effectively carried over for many patients well into the second quarter of 1990. We have now reached a point where the impact of that legislation has ended, resulting in an improvement in Vencor's profitability.''

Lunsford indicated that the increase in second quarter earnings also reflected favorable results from the two hospitals most recently acquired by Vencor. He said, ''Both Vencor Hospital Fort Worth, acquired in December 1989, and Vencor Hospital Phoenix, acquired in February 1990, are now making positive contributions to our progress. Their results will aid our continued growth through the second half of 1990.''

Vencor specializes in providing long-term hospital care for patients who suffer from catastrophic illness. The company has nine hospitals in Arizona, Florida, Illinois, Indiana, Louisiana and Texas. Vencor's common shares are traded on the NASDAQ National Market System under the symbol VCOR.

WARSAW, IN (JUNE 27) BUSINESS WIRE - Biomet Inc. Wednesday reported record sales and earnings for its fiscal year and fourth quarter ended May 31, 1990.

($000's Except Per Share Data) Fiscal Year Ended May 31:

	1990	1989	Percent Change
Net sales	$162,379	$135,760	20
Gross profit	110,951	91,448	21
Operating income	40,116	30,010	34
Net income	29,933	21,477	39
Earnings per share	1.08	.78	38

Fourth Quarter Ended May 31:

	1990	1989	Percent Change
Net sales	$45,138	$37,486	20
Gross profit	30,461	25,420	20

Operating income	10,776	8,757	23
Net income	8,687	6,332	37
Earnings per share	.31	.23	35

Biomet's sales and earnings increases for the fourth quarter of fiscal year 1990 were primarily attributable to continued domestic market penetration and expansion of the Company's higher margin reconstructive devices and Electro-Biology Inc.'s electrical stimulation and external fixation products.

Biomet Inc. and its subsidiaries design, manufacture and market surgical implants, electrical bone growth and neuromuscular stimulators, orthopedic support devices, and various operating room supplies. These products are used primarily by orthopedic medical specialists in both surgical and non-surgical therapy.

Biomet and its subsidiaries currently operate manufacturing and/or office facilities in Warsaw; Indianapolis;, Parsippany, N.J.; Guaynabo, Puerto Rico; Bridgend, South Wales; and Swindon, England. Biomet currently distributes its products in approximately 100 countries.

LOS ANGELES (JUNE 27) BUSINESS WIRE - Xsirius, Inc. (NASDAQ:XSIR) Wednesday announced that its majority-owned subsidiary Xsirius Photonics, Inc., completed a private placement of equity securities. Parliament Hill Capital Corp. acted as its investment banker and raised $1.5 million in the offering.

The Company also announced the completion of a joint development arrangement and receipt of an initial purchase order from a high-tech Fortune 500 company for a supply of advanced photodetection devices (APDs) for the United States Department of Energy. Under the terms of the Arrangement, Xsirius will retain commercial rights to market any resulting products, excluding any internal uses by its joint development partner and sales to the Department of Energy.

Xsirius Photonics also announced that it has signed a separate agreement with Applied Solar Energy Corporation's (''ASEC'') (NASDAQ:SOLR) Advanced Optoelectronics unit to jointly complete product engineering and commence large-scale manufacturing of Xsirius-designed large area solid state silicon APDs. ASEC based in City of Industry, California, and majority-owned by American Cyanamid, has pioneered many of the advancements in space solar cell performance that have contributed to the U.S. position as a world leader in space satellite technology.

ASEC provides products for NASA's scientific, defense and commercial communications satellites. In 1989, ASEC formed its Advanced Optoelectronics unit to pursue the development and production of silicon photodetectors. Mr. Gerard McLarnon, President & Chief Executive Officer of ASEC, stated, ''We are looking forward to a successful relationship with Xsirius Photonics and believe that the introduction of the avalanche devices based on Xsirius' technology represents a significant market opportunity for the future. The combination of the Xsirius proprietary technology and our experienced engineering and manufacturing team creates an opportunity to move quickly into the marketplace.''

Xsirius completed the research and development of its APD devices under joint development arrangements with General Electric's Static Power Components Operation and ASEC. Xsirius believes its APD devices represent an improved technology in that they offer significantly better performance compared to existing commercial devices in the key characteristics of detector area, gain, and gain uniformity.

Xsirius Photonics has developed and is bringing to the marketplace technologically advanced next generation photonics devices designed to detect low levels of incoming light or nuclear radiation. The parent company, Xsirius, Inc., was founded to identify, develop and commercialize leading edge technologies, including photonics and high-temperature superconductivity.

MOUNT VERNON, NY (JUNE 27) BUSINESS WIRE - Lillian Vernon Corp. (AMEX: LVC) Wednesday reported increased earnings for the first quarter of fiscal 1991, ended May 26.

For the quarter, net income increased 8.6 percent to $1.4 million or 23 cents per share, compared to $1.3 million or 21 cents per share earned in the first quarter of fiscal 1990. Revenues for the period were $30 million compared to $29.5 million for the same period last fiscal year.

"We are pleased that we continue to report increased profits in a very difficult retailing environment," said Lillian Vernon, chief executive officer.

"We anticpate revenue gains for the balance of the year to come from our core catalogs, our sale catalogs, our Lillian Vernon At Home catalogs, as well as our new children's catalog, Lilly's Kids, which will be introduced in Fall 1990. We were recently honored by being named the 1990 Catalog of the Year at the Annual Catalog Conference in New York City."

Vernon continued, "Our unique merchandise selection, broad product lines, tradition for value, affordable price points, large data base of loyal customers, and efficiencies from our National Distribution Center all contribute to a strong financial performance even in periods of soft retail sales."

Lillian Vernon Corp. is a direct mail specialty catalog company that markets gift, household, personal care and children's items. During fiscal 1990, Lillian Vernon mailed more than 121 million catalogs in 15 editions and filled over four million customer orders.

Lillian Vernon Corp.'s Annual Meeting will be held on Tuesday, July 17, 1990 at 10:00 a.m. at: The American Stock Exchange, The Board Room, 86 Trinity Place, New York City.

#90178b0667 06/27/1990 ~Business Wire

CAMBRIDGE, MA (JUNE 26) BUSINESS WIRE - Lotus Development Corp. Wednesday announced availability of Lotus 1-2-3/M for five additional versions of the MVS and VM operating environments, broadening the market for Lotus 1-2-3/M by making the product available to a wider range of users. The new versions of the product are shipping on schedule.

Announced in February 1990, Lotus 1-2-3/M began shipping in March 1990 for the MVS/XA JES 2 and VM/SP5 operating systems. Lotus 1-2-3/M is now available for users of MVS/XA JES 3, MVS/SP, MVS/ESA, VM/SP6 and VM/XA.

Lotus 1-2-3/M is an IBM/System 370 1/8tm3/8 application based on Lotus 1-2-3 Release 3 spreadsheet technology and designed to facilitate Enterprise Spreadsheet Computing. By integrating personal computer and host spreadsheets, Enterprise Spreadsheet Computing allows users throughout an organization to build enterprise-wide applications and tap centralized resources.

''The initial orders for Lotus 1-2-3/M are exceeding our expectations. The early feedback from IBM and Lotus customers is that 1-2-3/M will be central to the cost-effective development of true enterprise-wide applications,'' said Frank Moss, Lotus vice president of the Consulting Services Group and acting vice president of the Networked Applications and Systems Division. ''With this announcement, we're pleased to be offering the power of 1-2-3/M to a broader group of users.''

National Semiconductor Builds Performance Monitoring System With 1-2-3/M

National Semiconductor, of Santa Clara, Calif., was one of the first adopters of Lotus 1-2-3/M. The company has built a manufacturing and product performance monitoring system for its domestic and Asia-Pacific operations, using 1-2-3/M as the ''hub'' of the application. National Semiconductor chose to make 1-2-3/M the focal point, due to the product's functional and user interface compatibility with other versions of 1-2-3.

''It's absolutely imperative that our users see the same data in the same format, whether they have access to the mainframe directly, or view the data from a PC, workstation, or connected minicomputer,'' said Judy Armstrong, manager of end-user computing for National Semiconductor. ''The company mainframe is the central consolidation and distribution point for the data. It affords us a single development and training environment. We view this as the first of many applications we plan to build around 1-2-3/M.'' Price and Marketing Channels

Lotus 1-2-3/M prices are based on processor size. Depending on the IBM

system, primary license charges range from $15,360 to $47,470, and monthly license charges range from $583 to $1,800.

Lotus 1-2-3/M is jointly marketed worldwide by IBM and Lotus. The product is sold exclusively in the United States by IBM's Marketing and Services organization. Lotus 1-2-3/M is also sold exclusively by IBM's World Trade Europe/Middle East/Africa Corp. and Americas and Asia/Pacific Groups worldwide. Leasing arrangements and installment-payment financing are available from the IBM Credit Corp.

International Language Versions

French, German and Italian language versions for all operating environments will be available in September 1990. Availability of Japanese and Spanish language versions for all operating environments will be announced at a later date.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and a worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

BELLINGHAM, WA (JUNE 27) BUSINESS WIRE - V. Lawrence Evans, president of Horizon Bank (NASDAQ: HRZB), announced Wednesday that the bank's board of directors declared a 7.5 cents per share cash dividend on the bank's common stock.

This dividend is a 25 percent increase over last quarter's dividend of 6 cents per share, and will be payable July 26, 1990, to stockholders of record July 10, 1990.

Horizon Bank has paid a cash dividend on its common stock every quarter since December 1987. This increase to 7.5 cents per share is the second such increase the bank has made since going public in August 1986.

Horizon Bank is a state-chartered, FDIC insured savings bank with over $300 million in assets. The bank has eight offices serving Whatcom, Skagit and Snohomish counties.

WESTBOROUGH, MA (JUNE 27) BUSINESS WIRE - Speaking Wednesday before users of Proteon's Token Ring products, president and CEO Patrick Courtin commented: ''Proteon has shipped more than 16,000 ProNET-4/16 EISA and AT interfaces since February, and is well-positioned to meet the increasing demand for 4/16 Mbps Token Ring products.

Our ProNET-4/16 cards use Texas Instruments' Eagle chip, as well as Proteon's own front-end analog design, which is comparable in function to the TI Falcon chip. Proteon has extensively tested these products both in-house and with AT&T and Compaq to prove complete interoperability with IBM.''

''The ability to successfully develop, test and deploy token ring products is dependent on a vendor's experience in high-speed analog design,'' he continued. ''Our 10+ years' experience in shipping high-speed token ring products has proved invaluable in delivering reliable, high-performance 4/16 Mbps products.''

Courtin noted that Proteon is currently testing TI's Falcon chip, and will use the chipset in future products upon completion of interoperability tests and volume availability. Courtin is available for comment.

DALLAS (JUNE 27) BUSINESS WIRE - American Healthcare Management Inc. (ASE:AHI) Wednesday announced plans to relocate its corporate headquarters from Dallas to a western suburb of Philadelphia.

The move is expected to be completed by Oct. 1, 1990. According to Steven L. Volla, president of AHM, this relocation will complete the organizational restructuring of the company, which emerged from reorganization under the bankruptcy laws late in 1989. Further, the move will enhance management's new focus upon the utilization of emerging medical technology in the delivery of health services at AHM hospitals.

Volla stated that the Philadelphia area, as a major center of the medical research and with numerous teaching hospitals, has attracted a large base

of experienced individuals who can assist the company in the appropriate application at its hospitals of newly developed, highly sophisticated medical procedures.

It is AHM's intent, he said, to tap these resources in order to enhance the company's strategic position within the industry and to expand its base of operation.

Volla said AHM's core management team will be relocated to the Philadelphia area in connection with the move. The company anticipates employing a new work force of middle management, technical, administrative and clerical personnel at its headquarters.

American Healthcare Management Inc., owns or leases 17 hospitals in 10 states with approximately 2,203 licensed beds. Revenues in 1989 were approximately $475 million. AHM's common stock is listed on the American Stock Exchange under the symbol AHI.

SAULT STE. MARIE, MI (JUNE 27) BUSINESS WIRE - Newberry Bancorp Inc. (NASDAQ:NEWBA) (the ''Company'') announced the signing of a definitive agreement to acquire California-based Equitec Savings Bank for a total of $1.8 million made up of cash, Class A Common Stock and a contingent note.

Equitec Savings Bank has approximately $18 million in assets and shareholders equity of $3.0 million. Equitec Savings Bank has sustained substantial losses since the mid-1980s.

Stephen Lange Ranzini, president of Newberry Bancorp Inc., said, ''Under our ownership we intend to continue to downsize Equitec Savings Bank with the ultimate aim of a complete liquidation. The savings bank is very well capitalized with an equity to assets ratio of over 17 percent. Liquidation is anticipated to take no more than two years.

The acquisition is subject to various regulatory approvals as well as the approval of the company's primary lender, Bank One Milwaukee, NA. Pending these approvals, the company projects the acquisition to occur on or before Aug. 31, 1990.

The company owns 100 percent of the Newberry State Bank, a Michigan FDIC-insured community bank located in the eastern upper peninsula of Michigan (in the city of Newberry). At March 31, the company had unaudited consolidated assets of $41,134,917.

BATON ROUGE, LA (JUNE 27) BUSINESS WIRE - United Companies Financial Corp. (NASDAQ/NMS:UNCF) Wednesday announced that it has signed a letter of intent to acquire substantially all of the assets of Foster Mortgage Corp.

Foster, located in Fort Worth, Texas, currently services approximately $8 billion of mortgage loans for private and agency investors and is the 27th largest mortgage servicing company in the United States.

The purchase price will be determined based on balances at closing. The acquisition will be made by a wholly owned subsidiary of United Companies Financial Corp.

J. Terrell Brown, chief executive officer and president of United Companies Financial Corp., stated: ''We are pleased to have been the selected bidder. It is our intention to operate this business, under the Foster name, at Foster's present location in Fort Worth, and to maintain most of Foster's present staff and facilities.''

Brown added: ''We have been examining the opportunities available for expansion in our mortgage banking business for some time and determined that this acquisition fits well with our strategic plan. We believe this transaction will contribute to our national focus in financial services and will have long term benefits for our company and our shareholders.''

United Companies was among several bidders seeking to acquire the stock or assets of Foster. Foster is a wholly owned subsidiary of Benjamin Franklin Federal Savings Association, Houston, a federally chartered savings and loan association currently under conservatorship of the Resolution Trust Corp.

The letter of intent is subject to the execution of a definitive purchase and sale agreement, investor and regulatory approval and the final approval of the Resolution Trust Corp.

United Companies is a Louisiana-based financial services holding company engaged primarily in the businesses of life insurance and mortgage lending. United Companies Financial Corp. is publicly owned and its shares are traded under the symbol UNCF on the NASDAQ National Market System.

#90178b0703 06/27/1990 ~Business Wire
WAYNE, NJ (JUNE 27) BUSINESS WIRE - Union Camp Corp. Wednesday announced a new technological development in the bleaching of paper.

By replacing elemental chlorine with ozone in the bleaching sequence, the process dramatically reduces the total amount of chlorinated organics, including dioxin and chloroform, that is generated.

Use of the process will also significantly reduce the amount of oxygen that is consumed by effluent. Additionally, the new technology will substantially reduce the color and quantity of the wastewater discharged from the bleach plant.

In commenting on the development, Dr. William H. Trice, executive vice-president and head of corporate technology, stated, ''After years of research and development, and the operation of a pilot plant, by using both oxygen and ozone in the new process, we have achieved success in producing white pulp of top quality, competitive with today's cost standards, while significantly reducing many of the environmental problems normally associated with bleaching.''

As part of a $158 million modernization of its Franklin, Va., pulp and fine paper facility, the company plans to install a new bleach line which will utilize the newly developed process, insuring that the plant will meet dioxin discharge limits included in the newly adopted Virginia water quality standards.

Franklin's new bleached line will implement the new bleaching process as the first full-sized commercial installation of the new technology. Union Camp has applied for patents on this newly developed bleaching system. Start-up is scheduled for the second half of 1992.

SHREWSBURY, MA (JUNE 27) BUSINESS WIRE - Edward L. Tucker, president of The Casual Male Corp. (NASDAQ:CMLQE) (the ''Company''), debtor-in-possession under Chapter XI of the bankruptcy code, announced Wednesday that the company has hired Harold Leppo as a full-time senior management consultant to the company.

Leppo was president and chief operating officer of Lord & Taylor from 1977 to 1987 and executive vice president and chief merchandising officer of Allied Stores Inc. from 1987 to 1988.

Edward L. Tucker, who will remain as president and chief executive officer stated: ''Harold Leppo is one of the foremost talented executives in the men's apparel industry. The board of directors and I are confident that he will identify the optimal merchandising strategy for the company and lead what is the largest men's big and tall retail chain in the United States successfully out of Chapter XI.''

Since voluntarily filing for protection under Chapter XI in April 1990, the Casual Male has restuctured its operations to eliminate unprofitable divisions and stores and to focus all efforts on its 190 big and tall men's specialty stores.

NEW YORK (JUNE 27) BUSINESS WIRE - Richard H. DeMoll has been named executive vice president of Dun & Bradstreet Business Credit Services.

DeMoll will be responsible for two units of Business Credit Services, Dun & Bradstreet Receivable Recovery Systems (RRS) and American Credit Indemnity (ACI). RRS is a leading provider of commercial receivable-management services, and ACI is the nation's oldest and largest credit-insurance company, insuring more than $6 billion in commercial accounts receivable.

''Rich's strong financial background makes him ideally suited to lead these financially oriented operations within Business Credit Services,'' said Ron K. Glover, president of D&B Business Credit Services. ''He is a valuable addition to the senior management team of the company.''

DeMoll joined The Dun & Bradstreet Corporation in 1981 as manager of the corporate audit staff, after holding several finance and audit positions at The General Electric Company. He subsequently served as director of the corporate audit staff, assistant controller-corporate accounting operations, assistant controller-budgets and financial analysis and senior vice president-finance of D&B's Business Information Group, of which D&B Business Credit Services is the largest unit.

DeMoll is a graduate of Lehigh University, with a B.S. in economics.

D&B Business Credit Services is a leading supplier of business information in the U.S. Its products and services support the needs of credit management and a variety of specialized industries, such as banking, commercial-insurance underwriting and the apparel industry. D&B Business Credit Services is a division of The Dun & Bradstreet Corporation, the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.

SHANNON, IRELAND (JUNE 27) BUSINESS WIRE - GPA Group plc announced Wednesday that it had placed its first aircraft order for delivery in the next century. The order is for an Airbus Industrie A340 for delivery in 2000 and forms part of GPA's plan to purchase 15 additional A330s and A340s worth about US$1.9 billion.

The A340 is the long-range, four-engine version of the 330-seat A330 twin (which GPA has also ordered) and is the European competitor to Boeing's B747 and the McDonnell Douglas MD-11. The A340 has been ordered by ten international airlines and the first aircraft will be delivered to Lufthansa in 1992. GPA's A340s will be powered by CFM56-5 engines, manufactured by the American/French partnership of General Electric and SNECMA.

This latest order brings GPA's total orders and options for the A330/A340 series to 39 aircraft to be delivered between 1994 and 2000. GPA already has more than 700 new aircraft on order or option for delivery in the 1990s, including Airbus, Boeing, Fokker and McDonnell Douglas jets and the ATR and Boeing Canada modern turboprops.

''As an Irish company with a global business we are proud that our first order for the new century should be for a European aircraft,'' said Dr. T.A. Ryan, chairman & group chief executive of GPA. ''Airbus has now firmly established itself as a world leader in the design and manufacture of commercial jet aircraft.''

Mr. Jean Pierson, president and CEO of Airbus Industrie, said GPA was Airbus's largest customer outside the United States with orders and options for some 202 aircraft (including 26 not acquired directly from the manufacturer) worth $13.4bn throughout the decade. These included the A320, A321, A300/A310, A330 and A340 types.

''Airbus and GPA have a successful partnership relationship,'' Pierson said, ''and we are delighted by the resounding expression of confidence in our aircraft which this latest order represents.''

GPA has over 253 aircraft on lease to 73 airlines in 42 countries and recently announced a 59 percent rise in net profit to $242 million for the year to March 31, 1990. Fully diluted earnigns per share increased 49 percent to $42.

SAN FRANSISCO (JUNE 27) BUSINESS WIRE - Phoenix Laser Systems Inc. (NASDAQ:PXLS) Wednesday announced that the company has filed its fifth patent application with the U.S. Office of Patents and Trademarks in connection with its development of the Phoenix Ophthalmic Surgical Workstation.

The announcement was made by H. Alfred Sklar, director of research for the San Fransisco-based research and development company, who said, ''This application describes a method and apparatus for controlling the energy output of a laser system to insure that pulse-to-pulse variations remain within standards established by the FDA and Bureau of Devices and Radiation Health (BDRH).''

According to Sklar, this device provides a means of narrowly controlling the size of lesions caused by photodisruptive lasers. The company has previously filed four patent applications for the Surgical Workstation.

Earlier this year, in April, the company filed a 510k application with the FDA for the use of the ophthalmic surgery workstation in posterior capsulotomy procedures. If and when this application is approved by the FDA, the company will be free to commercially exploit its ophthalmic surgical workstation for posterior capsulotomy without further testing.

Separately, the company has filed an Investigational Device Exemption application with the FDA for corneal refractive surgery. This procedure is directed at surgically treating nearsightedness, farsightedness and astigmatism.

The Phoenix Ophthalmic Workstation is a self-contained proprietary workstation that combines measurement, positioning, high-speed tracking and therapeutic devices for the precise control of laser surgery, utilizing a frequency-doubled Nd:YAG laser. The company's technology permits surgery on a single human cell without creating thermal damage to surrounding cells. As a result, this procedure can overcome damage or potential damage to the most critical and sensitive parts of the eye, as sometimes occurs with ultra-violet high pulsed excimer laser-based technology.

MUNICH, WEST GERMANY (JUNE 27) BUSINESS WIRE - All 30,000 parts of a test engine which has completed 9,200 cycles, or simulated ''flights'', on the ground are being examined by experts from 15 airlines and aircraft manufacturers in Munich this week.

The engine, an international V2500, normally 3.2 metres long, is laid out in a 100-metre-long display. When the engine finished testing at MTU's plant in Munich, engineers found only 15 parts needed to be replaced. The engine will be re-assembled and put on test for another 4,000 cycles.

The 9,200 simulated flights, equivalent to some three years normal airline service, are part of a continuous program whereby engines on the ground, known as lead-the-fleet engines, have always ''flown'' for substantially longer than any carrying passengers in the air.

This enables engineers to spot possible snags on the ground and put them right long before they would have been met in service.

The V2500 engine has been in airline service for more than a year. The high-time engine has completed 2,200 actual flights, well below the 9,200 of the lead-the-fleet engine.

The engine completed 5,000 of the 9,200 cycles at MTU in four months, running an average of 19 hours per day. The rest was done earlier at Rolls-Royce in Derby, England.

The companies are two of the five shareholders in International Aero Engines which directs the V2500 program. The other three companies sharing the project are FiatAvio of Italy, Japanese Aero Engines Corp. and United Technologies Corp. (the parent company of Pratt & Whitney, the U.S. aero engine company).

WAYNE, NJ (JUNE 27) BUSINESS WIRE - Union Camp Corp. Wednesday announced that its board of directors authorized an Employee Stock Ownership Plan (ESOP) covering salaried employees that will form part of ther existing savings and investment plan.

The board's action authorizes the issuance of up to $160 million of a new convertible preferred stock to the ESOP. Following the issuance of the convertible preferred shares to the plan, Union Camp intends to repurchase up to approximately 4.5 million shares of its common stock on the open market from time to time.

Union Camp has approximately 68.9 million shares of common stock outstanding.

Terms of the convertible preferred stock will be finalized upon completion of the transaction between Union Camp and the trustee of the ESOP. This is expected to take place within one month.

Commenting on the plan, Gene Cartledge, chairman and chief executive officer, said, ''The ESOP is part of our continuing plans to provide a greater portion of our employees' long-term savings in the form of company stock. This plan will further align the interests of employees with those of our shareholders.''

Union Camp Corp. is a leading manufacturer of paper, packaging and wood-based chemicals.

CHESTNUT HILL, MA (JUNE 27) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE:NMG) announced Wednesday that its board of directors has approved a dividend reinvestment plan which will allow shareholders to use their cash dividends to purchase additional shares of its common stock.

General Cinema Corp., which owns 50 percent of The Neiman Marcus Group's outstanding common stock and all of its six percent preferred stock, indicated that it would participate fully in the dividend reinvestment plan. General Cinema annually receives $22.5 million in preferred dividends and approximately $3.3 million in common dividends.

Under the terms of the plan, which will be in effect for the October dividend payment, The Neiman Marcus Group will issue new shares to holders who elect to participate. The price of the new shares will be based on the average of the New York Stock Exchange closing prices for The Neiman Marcus Group common stock for the five days preceding each dividend payment date.

Each shareholder of record will also have the opportunity to purchase up to $2,500 worth of additional common stock each quarter through this program at the same price. The Neiman Marcus Group anticipates filing a registration statement with the Securities and Exchange Commission in connection with the plan, which will be offered to stockholders only by means of a prospectus.

Richard A. Smith, chairman and chief executive officer of both The Neiman Marcus Group and General Cinema, pointed out that General Cinema's willingness to purchase new Neiman Marcus Group shares ''illustrates our continuing strong commitment to specialty retailing and to ensuring that The Neiman Marcus Group's capital structure remains strong to support its capital investment programs for store remodels, new stores and support facilities.''

The Neiman Marcus Group is a leading specialty retailer. Its three operating units are Neiman Marcus, Bergdorf Goodman and Contempo Casuals.

CLEVELAND (JUNE 27) BUSINESS WIRE - Sealy Inc. has promoted three executives within its domestic bedding sales management organization:

Tony Smith has been promoted to Vice President of Sales, Western Region, and will be responsible for sales of both Sealy and Stearns & Foster products. Tony, formerly Vice President of Sales of Sealy's Oakville, Conn. plant, has 11 years experience in the furniture industry and eight years of sales and sales management experience with Sealy.

Mark Hobson has been promoted to Vice President of Sales, Central Area. Mark was recently Vice President of Sales for Sealy's Watertown, Wisc. plant, has nine years experience in the bedding industry and has been with Sealy for six years.

Stewart Perry has been promoted to Vice President of Sales, Southwestern Area. Stewart is a 13 year veteran in the bedding industry, and has been with Sealy for ten years, having recently been Vice president of Sales for Sealy's Brenham, Texas plant.

In announcing the three promotions, Gary Fazio, Sealy's newly appointed Vice President of Sales, stated, "These sales management promotions clearly enhance the Sealy sales management team which, from top to bottom, is seeking to raise its professional standards for serving its customers through blending the complementary strengths of direct industry industry experience with proven functional expertise developed outside the industry.

"These sales management appointments, coupled with the strength of industry and company veterans Gerry Aumand, Vice President of Sales, Northeast Region, and Cleve Murphy, Vice President of Sales, Southeast Region, provide us with the experienced leadership we require to respond to the challenges of an increasingly demanding marketplace."

Sealy Mattress Co., a wholly owned subsidiary of Sealy Corp., produces the complete Sealy line of mattresses including the world famous Posturepedic.

Other operations include: The Stearns & Foster Bedding Co., one of the oldest and largest premium-brand bedding manufacturers in the country; Advanced Sleep Products, a leading manufacturer and distributor of waterbeds; Woodstuff Manufacturing Inc., a manufacturer of waterbed furniture; and the Sealy Furniture Co. and the Stearns & Foster Upholstery Furniture Co., manufacturers of convertible sofas.

CLINTON, NJ (JUNE 27) BUSINESS WIRE - John A. Hinds, president of AT&T International, has been elected to the board of directors of Foster Wheeler Corp.

Hinds has been an executive with AT&T since 1983. Prior to joining AT&T he held a variety of positions in the nuclear and environmental engineering fields and in international management.

Hinds received a Bachelor of Arts degree in physics from Pomona College and a masters in Mechanical Engineering from the University of Santa Clara. After four years in the U.S. Navy Nuclear Reactor Program he joined General Electric in 1963. His career with General Electric included several international management positions, among them vice president, Latin America Business Development.

In January 1983, Hinds joined AT&T International as vice president-market development. In December of 1985, he transferred to the information systems division of AT&T as vice president international. After a subsequent position in the Data Systems Group, in May of 1987 Hinds was named to his present position as president of AT&T International.

Hinds is a registered nuclear engineer in California, and for two years managed General Electric's International Projects Department, building turnkey power plants in Saudi Arabia, Egypt, Indonesia, the Dominican Republic, etc.

Hinds is on the board of directors of the following organizations: U.S. Telecommunications Training Institute, the U.S.-China Business Council, U.S.-USSR Trade and Economic Council, the American Univeristy in Cairo, Business Council for Intertaional Understanding, the U.S. Council for International Business, the International Institutue for Management Development, and is a member of the executive committee of the U.S.-Korea Business Council and the British-North American Committee.

In addition, he is a member of the Conference Board International Council and serves on the State Department Advisory Committee on International Communications and Information Policy.

Foster Wheeler Corp. is a diversified international design, engineering, construction, manufacturing, real estate development and service

organization with subsidiaries and affiliates operating worldwide. The corporation's headquarters are at Clinton.

NEW YORK (JUNE 27) BUSINESS WIRE - Jonathan M. Tisch, president and CEO of Loews Hotels, founding division of Loews Corp., and Paul Blackney, acting president and CEO of Covia, a leading worldwide travel distribution company, today unveiled CLAS International and its four core product lines.

Tisch also serves as chairman of CLAS, an industry first with unrivaled hotel reservation and representation services that will make life easier for hoteliers, travel agents and travelers alike.

The official launch of CLAS, which stands for Covia Loews Automated Services, was announced at a ''power breakfast'' at the Loews' Regency Hotel in New York. Loews Hotels and Covia are equal partners in the venture, headquartered at One Park Avenue in New York. Paul Mercurio, former Covia director of business development, was named president of CLAS.

Loews Hotels is part of the $32 billion Loews Corp., which started in the hotel business more than 40 years ago. Covia owns and operates Apollo, a computerized travel distribution system that serves more than 15,000 travel agency locations worldwide.

CLAS International products and services enable a hotel chain to ease travel for is guests by providing reliable instant confirmations, up-to-date room and rate information across all properties and a guest recognition system that can ensure consistent, individual service at all locations.

In addition to Mercurio, members of the CLAS management team include Bill Stern, who continues as President of LRI, responsible for the LRI and The Grande Collection product lines, and Declan Boland, director of sales for Reserve-based product lines.

For more information about systems and services available from CLAS, hotel companies should contact Boland at 212/545-2499.

Loews Hotels is based in New York with regional offices in Washington, D.C., Chicago and Los Angeles. It currently owns or manages 17 hotels. Covia, based in the Chicago suburb of Rosemont, is an international partnership owned by seven major airlines.

#90178b0761 06/27/1990 ~Business Wire

CAMBRIDGE, MA (JUNE 27) BUSINESS WIRE - Intermetrics Inc. (NASDAQ:IMET) Wednesday reported revenues of $12,271,000 for the first quarter of fiscal year 1991 which ended May 31, 1990, compared to $11,604,000 for the first quarter of fiscal 1990.

Net income for the quarter was $496,000 or $.14 per share, compared to $595,000 or $.17 per share a year ago.

In making the announcement at the company's annual meeting, Joseph A. Saponaro, president and chief executive officer stated that, ''Results for the first quarter were as anticipated and improved over last year's fourth quarter revenues and net income of $12,177,000 and

$.06 per share. The improved revenues during the first quarter resulted from contracts awarded during the fourth quarter of last year. Profits were somewhat less in the first quarter than the same period a year ago due to conservative profit recognition on start-up work for new customers and higher income taxes, but were improved over last year's fourth quarter which had net income of $.06 per share.''

Saponaro also noted that ''Intermetrics' current business mix is approximately 53 percent defense-related, 22 percent NASA-related and 25 percent commercial; the company continues to concentrate its marketing and

proposal resources on software opportunities with established customers which require upgrading of systems, testing, integrating or quality assurance projects, and supporting operations of existing systems or programs. We are continuing to pursue new customers in the United States Government, civil and commercial sectors. Backlog rose about 4 percent during the first quarter to $51 million. The total potential value associated with this contract backlog increased from $118 million to $152 million during the first quarter. The company's expectations for the fiscal year remain conservative.''

Headquarterd in Cambridge, Mass., Intermetrics is a leading software company providing professional engineering and software services, standard software products and integrated systems to commercial and U.S. Government customers. The company specializes in embedded computer-based information systems.

FORT LAUDERDALE, FLA. (JUNE 27) BUSINESS WIRE - Ronald A. Cass, chairman of Hospital Staffing Services Inc. (NASDAQ/NMS:HSSI), and Jack Rosen, chairman of Continental Health Affiliates Inc. (OTC:CTHL), Wednesday announced that Hospital Staffing Services has completed its acquisition of the net assets of Continental's home nursing division for $3.1 million in cash.

Hospital Staffing will operate the division as a wholly-owned subsidiary under the name ''Alternative Care Medical Services Inc.,'' except in New York State where it will operate under the name ''Alternative Care Services Inc.''

Hospital Staffing also purchased from Continental Health Affiliates certain accounts receivables of the home nursing division, generally those less than 150 days old, for a total cost of $4.3 million.

As the accounts receivables were purchased for less than their face value of $5.7 million, Hospital Staffing has agreed to pay Continental Health Affiliates any monies collected in excess of the $4.3 million purchase price.

Leonard J. Cass, president of Hospital Staffing Services, said the company financed the purchase of the accounts receivables separately with $7 million loan package from NCNB National Bank of Florida which consists of a $3.5 million term loan and a $3.5 million revolving credit agreement.

In addition, Hospital Staffing Services paid Continental Health Affiliates $500,000 for a three-year non-competition agreement which precludes Continental from engaging in the same business as the home nursing division during that time period.

Hospital Staffing Services also granted Continental Health Affiliates a three year earnout provision, up to a maximum of $600,000, should the division exceed certain revenue or gross margin levels.

Hospital Staffing Services Inc. is a leading professional recruitment organization specializing in the placement of medical personnel, on both an interim and permanent basis, in hospitals and other health care facilities located throughout the United States, Canada and the United Kingdom.

LONG BEACH, CA (JUNE 27) BUSINESS WIRE - The SQL Access Group, Microsoft Corp. (NASDAQ:MSFT) and Sybase Inc. Wednesday announced that Microsoft and Sybase have joined the SQL Access Group as producer members.

''We are very pleased that Microsoft and Sybase have joined the SQL Access Group and are excited about their participation in the association,'' said Roger Sippl, chairman of the SQL Access Group.

''They are among several vendors who have recently joined the association since the completion of the technical specification,'' he said.

''We participate in organizations and industry consortiums, such as the SQL Access Group, that are in the best interest of our customers. To that end, we support the association's work towards database interoperability '' said Adrian King, assistant general manager of Microsoft's network business unit.

Dr. Robert S. Epstein, Sybase executive vice president, commented: ''Vendors and customers alike recognize database interoperability as one of the industry's significant and immediate challenges. The SQL Access Group has proven itself to be very effective in facing that challenge. It quickly and effectively achieved consensus among its members and has published its first technical specification.

''Sybase has always supported the concept of open systems and we feel that the technology we have pioneered in the market may further advance the work of the SQL Access Group.''

The SQL Access Group has two classifications of membership: producers and reviewers. Only producers have voting rights. An additional requirement for producers is that they dedicate a high-level software designer to work full-time on the association's technical specification. A producer must be a publisher of currently shipping database or application software.

Reviewers are organizations or individuals with an interest in the SQL

Access Group's work towards database interoperability.

Microsoft develops, markets and supports a wide range of software for business and professional use, including operating systems, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer market.

Sybase develops, markets and supports SYBASE, the leading relational database-management system (RDBMS) for on-line enterprise applications. The company is based in Emeryville and markets its products worldwide to corporate and government end-users, OEMs and value-added resellers.

The SQL Access Group is a non-profit association, open to vendors and users, that is developing a technical specification to enable multiple Structure Query Language (SQL)-based RDBMSs and application tools to work together.

Founded in 1989, members are Ashton-Tate, Bull, Cincom Systems Inc., Digital Equipment Corp., Fujitsu America Inc., Hewlett-Packard Co., Infocentre Corp., Informix, Ingres, Metaphor, Microsoft Corp., NCR Corp., Oracle, Progress Software Corp., Retix, Sun Microsystems, Sybase Inc., Tandem Computers, Teradata Corp., Unify and X/Open Consortium Ltd.

NEW YORK (JUNE 27) BUSINESS WIRE - Barclays Bank announced that better than expected U.S. investor demand for the Series C Fixed Rate preference share issue launched a fortnight ago resulted in the raising of $224 million at today's close.

Brian Pearse, Barclays' finance director, observed, ''There has been a strong on-going US investor demand for this issue which exceeded our original proposal to raise $100 million in this market.

''We are using the proceeds from this issue to increase the foreign

currency content of our Tier 1 capital.

''Together with a similar preference share issue last year, we will now have $724 million on our balance sheet from this market source.''

With a dividend set at 11.25 percent gross, at current rates of taxation this represents a net cost to the issuer of 8.44 percent.

The issue was lead managed by Merrill Lynch Capital Markets, with co-managers Goldman Sachs & Co. and Lehman Brothers.

GERMANTOWN, TN (JUNE 27) BUSINESS WIRE - Community Bancshares Inc. (NASDAQ:CBOG) Wednesday announced that John D. Ferguson has been elected chairman of the board of directors, replacing R. Lee Winchester who will continue to serve as a director.

Ferguson, president of Equity Investment Inc., was a founder of Community Bancshares and previously served as its secretary as well as a member of the board.

The company also announced the election of two new directors. Henri Wedell a stockbroker with The Robinson-Humphrey Co. in Memphis, Tenn., and Carolyn Williams, also of Memphis, were elected to the board.

Winchester, who had served as chairman since the company's founding, cited the growing demands of both the bank and his law firm as his reason for stepping down as chairman. Ferguson, the new chairman, said the direction of the bank and its emphasis on service and support of its local communities will not change.

Community Bancshares Inc. is a bank holding company headquartered in Germantown, a separately incorporated municipality adjacent to Memphis.

Community Bancshares' principal subsidiary is Community Bank of Germantown which serves Germantown and the Memphis area through seven branch locations.

CHICAGO (JUNE 27) BUSINESS WIRE - Rodman & Renshaw Inc. Wednesday announced that a letter of intent has been signed with Creditanstalt-Bankverein to establish the first jointly owned U.S. -European company to conduct financial and commodities futures brokerage services to corporate and institutional investors in Austria, USSR, and other major eastern and central European nations.

Rodman & Renshaw Inc. is a full-service securities broker/dealer, commodities futures commission merchant and investment banking firm headquartered in Chicago.

Creditanstalt-Bankverein is a commercial and investment banking corporation headquartered in Vienna, Austria and ranks among the world's 100 largest banking organizations.

The new company, GA Global Futures AG, will be 30 percent owned by Rodman and 70 percent owned by the bank. It will be headquartered in Vienna. Jerome de Bontin, a managing director of Rodman's financial futures department, will serve as one of the two co-managing directors of the joint venture firm, with the other co-managing director coming from the bank.

In a related transaction, Creditanstalt-Bankverein will invest $5 million in Rodman through the purchase of 4.99 percent of the outstanding common stock of Rodman & Renshaw Capital Group Inc. and the purchase of subordinated debentures.

Both transactions are subject to execution of a definite agreement and approvals of regulatory authorities. Rodman executives said they expected the transactions to be completed by September 30.

Kurt B. Karmin, chairman of the board and chief executive officer of Rodman & Renshaw, said, "We are proud that the management of Creditanstalt-Bankverein has selected Rodman & Renshaw for this exciting joint venture project. With the network of the bank's offices throughout Europe, CA Global Futures AG will play a leading role in establishing a commodities and financial futures market in central and eastern Europe."

"The expertise developed by Rodman in finanacial and commodities futures will be applied to the new potentials in central and eastern Europe," continued Karmin. "We are building a strong foundation for business in the near and long-term future and this joint venture is an example of our strategy to enhance Rodman & Renshaw's position in both the domestic and international financial markets."

Rodman & Renshaw Inc. is a member of the New York Stock Exchange, the Chicago Board of Trade, the Chicago Mercantile Exchange and nearly all other national and regional securities and commodities exchanges.

The firm currently has commodities future offices in Chicago, New York, Kansas City, Philadelphia and London. Rodman & Renshaw Inc. is a wholly owned subsidiary of Rodman & Renshaw Capital Group Inc. whose stock is listed on the New York Stock Exchange under the symbol RR.

HOUSTON (JUNE 27) BUSINESS WIRE - "Today's preliminary ruling by the U.S. International Trade Commission ("ITC") in favor of an antidumping petition filed by Southern California producers against Japanese cement is a further crucial step in providing the U.S. cement producers with relief from unfairly priced imported cement," Clarence C. Comer, chief executive officer of Houston-based cement manufacturer Southdown Inc., Wednesday reported.

"Based on information gathered by our investigators, the dumping margin is substantial. If the Commerce Department confirms the alleged dumping margins and the importers are required to post bonds, we anticipate that the unfair pricing of Japanese cement will diminish."

According to the petition filed in May by cement manufacturers and labor unions in Southern California, Japanese producers are dumping cement in the United States and selling it for less than one-half the price being charged to customers in Japan, threatening U.S. production and jobs.

The U.S. producers and labor unions asked the U.S. International Trade Commission and the U.S. Department of Commerce to impose antidumping duties on imports of gray portland cement from Japan in an amount sufficient to eliminate the price differential between the Japanese home market and U.S. sales.

Following today's favorable ruling by the ITC, the case will be turned over to the U.S. Department of Commerce, which will preliminarily determine the

amount of the dumping margin by Oct. 25, 1990.

If the Department's preliminary dumping determination is affirmative, U.S. importers will be required to post bond equal to the dumping margin with respect to imports entered after Oct. 25. Bond would be set in an amount sufficient to eliminate the price differential between Japanese home market and U.S. sales. The ITC is expected to make a final ruling in the first half of 1991.

The petitioning cement companies and labor unions are Southdown, Inc., National Cement Company of California Inc., Independent Workers of North America Locals 49, 52, 89, 192, and 471, and International Union of Operating Engineers Local 12.

Southdown Inc. is also a co-petitioner in a separate antidumping investigation of gray portland cement and cement clinker from Mexico. In that case, the ITC issued an affirmative preliminary determination in November of 1989, and the Commerce Department issued an affirmative dumping determination in April of 1990.

ST. PETERSBURG, FL (JUNE 27) BUSINESS WIRE -''Each step taken toward a comprehensive resolution of the student loan issue brings us that much closer to recapitalization,'' said John W. Sapankski, president and chief executive officer of Florida Federal Savings Bank.

''The court's recent decision defines a significant component of the potential student loan loss and thereby helps clear the way for Florida Federal to be recapitalized. There are several investment groups currently performing 'due diligence' on Florida Federal,'' he said, ''and once the student loan uncertainty is quantified and settled, we can look for investor commitments to be made.''

The chief executive officer's statement was made in reference to a ruling issued by a US District Court judge in Tampa on the afternoon of June 27.

The court said it will require Florida Federal to pay $17 million of restitution and $2.2 million of fines to the government as a result of the savings bank's conviction for student loan fraud. (Florida Federal was tried and found guilty last month of falsifying, between November 1986 and May 1987, records of collection activity contained in some insurance claims for defaulted student loans).

According to Sapanski, there are positive indications that remaining steps in the resolution and recapitalization process may be taken soon. To quantify and resolve some of the other components of the student loan issue, Florida Federal is negotiating a student loan settlement with the Civil Division of the US Justice Department and the US Department of Education.

Also on the board's June 28 agenda is a regulatory matter. Because Florida Federal was unable to meet regualtory capital requirements, the savings bank and the Federal Home Loan Bank Board (now the Office of Thrift Supervision) entered into a ''supervisory agreement'' in June 1989.

The chief executive officer confirmed that a consent agreement is interpreted by many as the signal that an institution will be placed under regulatory managment.

Deposits at Florida Federal's Savings Bank are insured up to $100,000 per account by the FDIC.

WILLOW GROVE, PA (JUNE 27) BUSINESS WIRE - Kulicke and Soffa Industries Inc. (K&S) announced Wednesday that its board of directors has voted to exclude K&S from two of the three major provisions of the recent amendments to the Pennsylvania Business Corporation Law.

Under the terms of the amendments to the law, all provisions automatically apply to public Pennsylvania corporations unless company bylaws are amended by July 26 to opt out of them.

The two provisions made inapplicable to K&S are the ''control shares'' provision, which limits the voting powers of shareholders owning 20 percent or more of the voting stock in a Pennsylvania corporation and the ''disgorgement'' provision, which permits a Pennsylvania corporation to recover profits resulting from the sale of shares in certain situations where an individual or group attempts to acquire at least 20 percent of the company's votable shares. The K&S board elected to allow the third provision, concerning ''directors' responsibilities,'' to become applicable to the company because it clarifies current law.

Kulicke and Soffa is a leading global supplier of assembly equipment and systems for the semiconductor industry. K&S serves both the IC and hybrid markets with sales and service facilities worldwide. In addition, to wire

bonding systems, the company's product line includes wafer preparation, wafer dicing and die bonding systems. Traded on the Over-the-Counter national market (NASDAQ: KLIC), the company is headquartered in Willow Grove, Pa.

WASHINGTON (JUNE 27) COMTEX - The 8-K report filed at the SEC shows on June 18, 1990 Atratech dismissed its public auditors of the firm of Sanossian, O'Reilly and Sardis and engaged in their stead those of the firm of Price Waterhouse.

For the six month period ended Dec. 31, 1989 and the years ended June 30, 1989 and 1988, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For those same periods, there were no disagreements between those former auditors and the company.

Also during those periods, Atratech did not consult with Price Waterhouse on any matters related to its business, its audits or its corporate policies and practices.

-30- 912

#90178c0042 06/27/1990 ~Comtex
WASHINGTON (JUNE 27) COMTEX - The 8-K report filed at the SEC shows on June 8, 1990, Club-Theatre Network Inc. (CTN), together with its wholly-owned subsidiary, M.P. Acquisition Corp., acquired the business, building, and land of Media Productions Inc. and its wholly-owned

subsidiary, Media Properties Inc. That purchase occured pursuant to two purchase agreements variously between the parent companies and their subsidiaries, both on March 28, 1990.

Consideration for the sale consisted of $1.58 million plus the assumption by M.P. Acquisition of debts and obligations of Media, subject to exceptions, as present at the time of purchase. Those costs were estimated at $160,000. Real property and buildings were purchased by CTN from Media Properties for $1.68 million. That price consisted of $664,678 in mortgage assumptions, $400,000 in the form of a purchase money second mortgage and note due July 7, 1991 (at two percent above prime), and the balance in cash, subject to closing adjustments.

Further, Ronald J. Kovak, principal stockholder of Media together with James B. Carlson, entered non-compete and consulting agreements with Club-Theatre of an aggregate value of $200,000, lasting 18 and 13 months following the date of closing of the acquisition, respectively.

Media owns and operates a production studio, located in Pompano Beach, Florida, for the production and post-production of film and television video.

The executive office of Club-Theatre is located at 2095 North Andrews Avenue Extension, Pompano Beach, Florida 33069, and its telephone number is (305) 968-5110.

-30- 473

#90178c0046 06/27/1990 ~Comtex
WASHINGTON (JUNE 27) COMTEX - The 8-K report filed at the SEC shows in a letter dated June 12, 1990, Scientific NRG Inc. dismissed its independent auditors of the firm of Blanski, Peter, Kronlage & Zoch. Effective June 15 1990, the company engaged the firm of McGladrey & Pullen to serve in their stead.

Independent audits as filed by Blanski, Peter, Kronlage & Zock for the company for the two fiscal years ended June 30, 1990, were qualified as to the ability of Scientific NRG to continue as a going concern, owing to recurring losses from operations and significant declines in working capital. Those qualifications were reportedly not factors in the company's decision to change auditors.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

#90178c0050 06/27/1990 ~Comtex

WASHINGTON (JUNE 27) COMTEX - The 8-K report filed at the SEC shows in a press release dated June 20, 1990, Eastland Financial Corp. announced that it expected to record a second-quarter loss due to an increase in loan loss reserves.

As reported by chairman and CEO Herbert L. Miller, a rise in non-performing loans, continued weakness in the New England economy and further deterioration of real estate loan collateral as witnessed by the corporation necessitated the increased reserves.

#90178c0053 06/27/1990 ~Comtex

WASHINGTON (JUNE 27) COMTEX - The 8-K reports filed at the SEC shows Legal Software Solutions dismissed its independent public auditors of the firm of Richard A. Eisner & Co. on June 21, 1990. On that same date, the company engaged Bernard Wopert, CPA, to serve as the company's independent auditor of its financial statements.

For the previous two fiscal years ended April 30, 1990, the reports issued by Richard A. Eisner & Co. were qualified as to significant doubts as to the ability of the company to continue as a going concern.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JUNE 27) COMTEX - The House Energy and Commerce Committee agreed today to send two pieces of legislation which provide the Securities and Exchange Commission added enforcement powers in the areas of penny stock abuse and other securities frauds to the House floor.

On a unanimous voice vote, the House panel endorsed congressional passage of the Penny Stock Reform Act and Securities Law Enforcement Remedies Act, respectively.

Americans lost an estimated $2 billion in both 1987 and 1988 as a result of fraud and abuse in the penny stock market, according to a study conducted last year by the North American Securities Administrators Association Inc.

Penny stocks are low priced securities which trade in the over-the-counter market but are not listed on NASDAQ. They trade primarily in the pink sheets, published once a day by the National Quotation Bureau and containing thousands of thinly traded stocks.

The penny stock bill urges the SEC to facilitate at the earliest possible time the development of the National Association of Securities Dealers' OTC Bulletin Board into a fully implemented automation quotation system for all penny stocks. It also expands the SEC's authority to expel crooked promoters and consultants from the securities business and increases disclosure to penny stock customers.

In addition, the bill requires the SEC to adopt rules to address the problem of fraud associated with blank check offerings. A blank check offering is one in which the issuer discloses no specific business purpose or identifies an intent to engage in unspecified mergers or acquisitions.

The legislation requires timely disclosure of intended business plans prior to effective registration of a blank check offering and allows investors to get their money back if they disapprove of the issuer's business proposal.

In a recent letter to Rep. Edward Markey (D-Mass.), one of the principal authors of the penny stock bill, NASAA president Susan Bryant strongly endorsed the legislation.

"I know of no other single piece of investment-related legislation before Congress today that would do more to protect so many individuals and their life savings," said Bryant, whose organization speaks for grassroot government officials responsible for securities regulation and investor protection in the 50 states and District of Columbia.

The Securities Law Enforcement Remedies Act authorizes the SEC to issue both permanent and temporary cease and desist orders which give the agency power to halt illegal conduct without going to court, and allows the SEC to order the disgorgement of illegal profits.

The legislation also enables the SEC to impose monetary penalties against violators of federal securities laws and authorizes the agency to seek through the federal courts to bar or suspend a securities law violator from serving as an officer or director of a public company.

"For cases other than those involving insider trading, which has its own statutory directive on fines, the commission would now have an effective alternative to the simple slap on the wrist represented by an injunction or the nuclear bomb represented by barring someone from the securities business," Markey said.

GROUP LED BY SUTTON MANAGEMENT LTD OWNS 6,342,787 SHARES (73.80%) OF MIRTRONICS INC (TICKER: MNTCF) OF TORONTO, ONTARIO.

ANNOUNCEMENT:

On May 11, 1990, VTL Venture Corp., a company indirectly controlled by Fred Litwin, acquired 200,000 shares at $.69 each from Tonem Management Corp., a company controlled by one of the Mirtronics' directors.

On the same date, Mark Litwin bought 550,000 shares from Tonem for the same price, with funds borrowed from Mirtronics.

Sutton had borrowed $768,411 borrowed from VTL and, in turn, loaned the money to Tonem in exchange for options to buy 750,000 shares at $.72 each (which were subsequently cancelled), and 1,441,633 shares of Mirtronic's series 1 preference shares at $.16 each.

On May 11, the money paid by VTL to buy 200,000 ordinary shares at $.69 each and 1,441,633 preference shares at $.19 each from Tonem was paid to Sutton on account of Tonem's indebtedness, as was the case with the funds used to buy the 550,000 shares by Litwin.

On May 17, Mirtronic bought 138,889 shares from Tonem at $.55 each.

PURPOSE:

Liquidation of holdings owned by Tonem Management Corp. and to increase ownership of Sutton and affiliates.

STAMFORD, CT (JUNE 28) COMTEX - Denver-based Tipperary Corp. has sold its gas-processing segment, comprising a 50 percent interest in five natural gas processing plants, for $7.85 million cash to J.L. Davis, the owner of the other 50 percent.

The gas-processing plants are located in Lea County, N.M., Fisher, Frio, Lavaca and Gonzales counties in Texas and Iberville Parish, La., according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 27, 1990

-30- 676

#90178c0147 06/27/1990 ~Comtex

STAMFORD, CT (JUNE 28) COMTEX - Kaypro Corp., the Carlsbad, Calif., personal computer maker that is in bankruptcy proceedings, has been called on by the Securities and Exchange Commission to produce certain financial and corporate records for the years ended Sept. 2, 1988, and Sept. 1, 1989.

The document request indicates that the SEC is concerned with the accounting methods and policies employed by Kaypro's former management, according to an SEC filing.

The SEC's enforcement staff has also informed Kaypro that the documents should be produced immediately in case new management is ousted and control of Kaypro is returned to Andrew Kay, Kaypro's founder, and his family.

The SEC noted that Kay has been enjoined by the commission in the past for failing to keep proper accounting records.

Kaypro's new management believes that previous management's practices and policies with respect to accounting for the 1988 and 1989 fiscal years

could be view by the SEC as constituting criminal violations of federal securities laws, according to the filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 27, 1990

#90178d0070 06/27/1990 ~French/German News Agency
BRUSSELS (JUNE 27) - Consumer prices in the EEC rose by 0.4 percent in May, and the inflation rate in the 12 months to May remained at 5.4 percent, the same level as in May 1989, official EEC figures showed on Wednesday.

During May prices remained stable in Belgium and in Spain, while the Netherlands experienced an increase of 0.1 percent, West Germany, France and Luxembourg 0.2 percent, and Italy 0.3 percent.

But in Denmark prices rose by 0.7 percent, in Britain by 0.9 percent, and in Portugal by 1.1 percent.

Prices in Greece rose by three percent.

Compared with 12 months ago, the inflation rate had eased in West Germany, France, Denmark, Belgium, Luxembourg and Italy, while it had increased in the Netherlands, Britain, Ireland, Portugal and Greece.

The EEC rate during the 12 months was higher than the rate of 4.4 percent in the United States, 2.5 percent in Japan, five per cent in Switzerland and 3.1 percent in Austria.

NEW YORK (JUNE 27) - A 27-year-old man Wednesday was charged with sawing off the heads of his elderly adoptive parents after their decapitated bodies were discovered the night before, police said.

Thomas Camerlengo was charged with murder and weapons possession, said police, who gave no motive for the slayings.

The bodies of his parents, Anthony and Ann Camerlengo, both 73, were found in the basement of their home by the couple's nephew. Anthony Camerlengo's legs were also cut off.

The couple's heads were discovered in a street storm drain early Wednesday.

The bloody blade of a bow saw was found in the couple's bathroom and the saw's handle was near the bodies, police said.

#90178d0290 06/27/1990 ~French/German News Agency
BERLIN (JUNE 27) - East Germany said Wednesday that all inner-German border checks, including those between East and West Berlin, will disappear on Sunday with the birth of German economic and monetary union.

The East and West German governments jointly decided to lift border controls, Matthias Gehler, spokesman for the East German government, said during a press conference.

The accord between the two governments will be signed Sunday at an inter-German border point by East German Interior Minister Peter-Michael Diestel and his West German counterpart Wolfgang Schaeuble.

The barrier between the two countries was first broken on November 9, more than 28 years after the construction of the Berlin Wall in August, 1961. Since November, border controls have been slackened and the Berlin Wall

has gradually been coming down, permitting car traffic between the two sides of the city.

On Sunday, the Deutsche mark becomes the only valid currency in East Germany, marking a major step towards the reunification of the two Germanies after 41 years of division.

#90178d0670 06/27/1990 ~French/German News Agency

BRUSSELS (JUNE 27) - The European Commission told the British government Wednesday to recover 44 million pounds (76.8 million dollars) in aid illegally paid to encourage British Aerospace (BAe) plc to buy the state-owned car manufacturer Rover Group.

BAe must pay back 42.9 million pounds (74.2 million dollars) and Rover 1.5 million pounds (2.5 million dollars), a Commission communique said.

But another 40 million pounds (69.2 million dollars) may also have to be reimbursed in 1991 so that BAe meets the terms laid down by the Commission for restructuring Rover's former commercial vehicles division, it said.

Britain asked the European Economic Community's executive in 1988 to allow it to inject 800 million pounds (1.384 billion dollars) into Rover to write off its debts before selling it to BAe for 150 million pounds (259.5 million dollars).

The Commission cut the debt-write off to 469 million pounds (811 million dollars) and tied it to a range of conditions.

The 44.4 million pounds were described as "sweeteners" by the British press to encourage the aerospace giant to take over the ailing car-maker.

The hidden subsidies, the Commission said, comprised benefits to BAe of 33.4 million pounds by being allowed to defer payment for nearly two years; payment of 9.5 million pounds to BAe to buy the stakes of minority shareholders; and 1.5 million pounds paid to Rover to cover costs incurred from the sale.

But the Commission dismissed accusations that the government had underpitched the price to keep the firm in friendly British hands.

After comparing data provided by Ford Motor Co., which offered a rival bid, and Britain's National Audit Office, the Commission said the 150 million pounds together with the debt burden amounted to "a reasonable purchase price."

The sale triggered controversy in Britain, with the opposition Labour Party

accusing the Conservative government of deliberately underpricing the sale of a national asset.

PESHAWAR, Pakistan (JUNE 27) - Unidentified assailants severely burnt a local journalist, Mansoor Khan, Wednesday by throwing acid on him.

Doctors said he lost an eye.

Police had no immediate clue to the attackers or their motive. Mansoor's friends however recalled his critical reporting of the Afghan jihad often put him in trouble with Islamic extremists.

On Tuesday he reported that several working Afghan women had been kidnapped, killed or harassed in recent weeks by elements opposed to women's emancipation.

A western aid agency, Shelter Now International, has decided to abandon its relief work among Afghan refugees after attacks on its women programmes and an attempt on the life of its American director.

Mansoor's troubles with Afghans cost him several jobs. At present he is working for Islamabad's daily Democrat. Journalists and legislators in the city have condemned the attack on Mansoor.

BRUSSELS (JUNE 27) - The European Commission said on Wednesday that it had decided to file formal objections to a joint venture between British Airways plc, Sabena SA of Belgium and KLM Royal Dutch Airlines, arguing that the tie-up could violate EEC anti-trust rules.

The Commissioner for competition, Sir Leon Brittan, said the European Economic Community's executive was sending a letter to the three companies, giving them two months to respond to the objections.

"We will give this case the highest priority," Sir Leon told a press conference.

The tie-up, announced in December, aims at providing fresh capital for the ailing state Belgian carrier and at giving the British and Dutch firms wider access to Brussels as a hub for their European and transatlantic routes.

Sir Leon said the Commission "welcomes the general concept" of joint

ventures, as they could "provide services to the consumer that, at the moment, don't exist."

But he said there was "very real" concern that the venture, known as Sabena World Airways (SW), would have a dominating effect on take-off and landing slots and routes.

COPENHAGEN (JUNE 27) - France clashed with other Conference on Security and Cooperation (CSCE) member states Wednesday over the rights of ethnic minority groups and CSCE human rights provisions, diplomatic sources said here.

France, and to a lesser degree Greece, submitted "an avalanche of surprising amendments" to the draft of a final document on minority rights and the control and application of CSCE mechanisms, one of them said.

An East European diplomat who requested anonymity told Agence France-Presse that "these amendments and omissions substantially depreciate commitments made in Vienna" by the 35-nation organization, which groups all European countries except Albania, plus the United States and Canada.

The moves "considerably water down a final document that must be adopted by consensus and is to reflect current changes" in Europe, he said.

Diplomatic sources said France objected to the teaching of minority languages at school.

Several Western delegations have accused France of blocking the CSCE's "human dimension" talks here, which are due to end on Friday. It is believed to want discussion of the contentious issues postponed until a CSCE summit in Paris in December.

#90178d0860 06/27/1990 ~French/German News Agency

LONDON (JUNE 27) - Prime Minister Margaret Thatcher opened a meeting on the planet's depleted ozone layer here Wednesday, announcing that Britain would donate nine million dollars to Third World countries to help them switch away from use of harmful chlorofluorocarbons (CFCs).

"We sink or swim together", Mrs. Thatcher told environment ministers and officials of more than 100 nations attending the Second Conference of Signatories of the Montreal Protocol on protection of the ozone layer.

Mrs. Thatcher said Britain would contribute nine million dollars over three

years to an international fund for developing states.

The fund is to help the Third World obtain new technology to make products less damaging to the earth's protective covering than CFCs.

Calling for faster action and tighter controls, Mrs. Thatcher appealed to countries that had not signed the 1987 Montreal protocol to do so. Only 56 of those represented here are signatories.

The current meeting, due to close late Friday, aims to set stricter limits CFCs as well as other substances not yet subject to controls.

Mostafa Tolba, the executive director of the United Nations Environment Programme (UNEP), exhorted delegates to write "a new chapter of international relations".

#90178d0940 06/27/1990 ~French/German News Agency
TUNIS (JUNE 27) - The president of the European Parliament, Enrique Baron Crespo, met here Wednesday with PLO leader Yasser Arafat, the Palestinian news agency WAFA reported.

It was Mr. Arafat's first meeting with a foreign official in Tunis, the Palestine Liberation Organisation's political headquarters, for almost a month.

WAFA said they discussed the European Economic Community's (EEC) stand on developments in the Israeli-occupied territories and the situation in the Middle East.

The PLO chairman said he was "satisfied" with an EEC statement issued Tuesday at a summit in Dublin condemning Israeli policies in the occupied West Bank and Gaza Strip.

The 12 community leaders described Israeli settlements among Palestinians on the territories as an obstacle to peace and "illegal under international law." They also said the status of human rights in the territories was "lamentable."

Mr. Arafat has spent most of the last month in Baghdad amid fears of a possible Israeli assassination bid, according to Palestinian sources.

ROME (JUNE 27) - Italy and West Germany, more than ever favourites to meet in the July 8 final, are the only teams among the eight surviving

contenders to stamp their class on this World Cup.

Argentina, England and Yugoslavia can count themselves particularly fortunate to have got beyond the last 16.

Diego Maradona and Dragan Stojkovic made the difference for the defending champions and Yugoslavia who meet in Florence on Saturday.

Argentina were played off the pitch by Brazil in their second round tie in Turin but one moment of Maradona magic produced the winner for Claudio Caniggia.

Yugoslavia could also thank their luck and the width of the goalposts for keeping out Spain before Stojkovic scored twice to send them into the last eight for the first time since 1962.

England rode their luck in an absorbing 120 minutes against Belgium who twice hit the post through Jan Ceulemans and Enzo Scifo.

With a minute remaining substitute David Platt spun to volley in a stunning winner - the first for his country and the 100th of this tournament - and send England to Naples for a first-time match with Cameroon.

The Africans, who set the precedent for upsets by beating Argentina in the opening match, got through against Colombia thanks to 38-year-old Roger Milla and a comic blunder by Rene Higuita, known as El Loco for his upfield excursions.

"It was as big as a house," the Colombian goalkeeper said of the mistake which let in Milla for his second goal.

#90178d1170 06/27/1990 ~French/German News Agency

COLOMBO (JUNE 27) - Heavy fighting continued in the northern Sri Lankan city of Jaffna Wednesday, with military sources saying that over 40 rebels had been killed.

Fighting has been raging for almost a week between government troops and rebels outside the old Dutch-built fort in Jaffna where 270 soldiers are trapped.

The battle has involved heavy government aerial bombardments and mortar attacks by the rebels.

Casualties were said to be high but no exact information was available.

Unconfirmed reports suggested that several civilians had been killed or

injured the cross-fire in Jaffna, but government sources denied these reports, saying that civilians had been evacuated before firing was ordered from the air.

#90178d1260 06/27/1990 ~French/German News Agency

SEOUL (JUNE 27) - The United States will avoid a unilateral troop withdrawal from South Korea because of a continued threat of invasion from North Korea, the U.S. ambassador here said Wednesday.

"We're not going to unilaterally withdraw our forces from South Korea because we feel that it would very much increase tension rather than reduce tension on the Korean Peninsula," Ambassador Donald Gregg said.

"Those who travel to North Korea and talk to North Koreans tell me the belief in the North is that if Amercans go, North Korea can invade and win " he said during a dinner with reporters.

"In order to keep them from undertaking a tragic miscalculation, we must be very careful not to change the military balance of the peninsula," he said.

Noting that the United States had announced that it would reduce its 43,000 troops stationed in South Korea to 36,000 by 1992, he said the United States was trying to improve dialogue between the two Koreas.

"We're very much hoping that North Korea will respond to the lowering of our forces which are already underway," he said.

Mr. Gregg also said the United States estimated that North Korea might be able to have nuclear weapons by the mid-1990s.

"This is our grave concern," he said, adding that efforts of all people should be made to "bring the devastating program under control."

Mr. Gregg also said that the United States would not recognize North Korea simply to reciprocate the Soviet Union's rapprochement with South Korea.

Praising South Korea for its efforts to improve ties with Moscow, he said: "North Korea has done nothing (to come out of its isolation). Why should North Korea be rewarded by our recognition?"

He said the recent return of the five remains of U.S. soliders who died during the Korean War of 1950-53 was a "tiny step we welcome." However, those remains were only a fraction of the 8,000 he said were still unaccounted for.

Since he took up the post 10 months ago, Mr. Gregg, with a long career at the Central Intelligence Agency (CIA), has been the target of protests by student radicals demanding the pullout of the U.S. troops.

Mr. Gregg, however, denied press reports that security around him has been strengthened due to threats from student radicals.

KHARTOUM (JUNE 27) - A relief convoy of 47 trucks has left Kampala, the capital of Uganda, heading for Sudan with 500 tonnes of maize for starving people in the war-torn south of the country, a senior official disclosed here Wednesday.

Sudanese Deputy Commissioner for Relief and Rehabilitation Awad Khalifa told the Sudan News Agency (Suna) that the convoy would arrive in Yambio, capital of western Equatoria province in southern Sudan, in the first week of July.

Brigadier Dominic Cassiano, member of the ruling military council, said the convoy would take the long route of Zaire instead of travelling directly to Sudan.

The detour was attributed here to rebel activities along the remote Sudan-Uganda border.

Khalifa also disclosed that over 1,000 tons of relief had been flown to Juba from East Africa. He said relief flights would continue with the help of the Sudanese embassy in Uganda.

The convoy is part of relief operations initiated by the United Nations in 1988 to provide food for an estimated three million starving people trapped in the war zone in the south.

The U.N. initiative came after 250,000 civilians died of starvation in the

south in 1987.

#90178d1380 06/27/1990 ~French/German News Agency
DIJON, FRANCE (JUNE 27) - A Frenchman and his Algerian accomplice were handed five-year prison sentences here Wednesday for acting as middlemen in the sale of stolen paintings by French artist Camille Corot to Japanese collectors.

Philippe Jamin, 34, and Youssef Khimoun, 46, were also ordered to pay the French government 152,000 francs (27,000 dollars) in damages in connection with the theft, sale and recovery of one of the paintings, "Une Soiree", owned by the Louvre Museum in Paris.

The five works by the 19th century French artist, worth several million dollars, were stolen while on loan to a museum in the French town of Semur-en-Auxois on October 18, 1984 and sold in Japan for millions of yen.

Mr. Jamin was arrested at a Paris airport in 1988 after Schimichi Kazama of Japan alleged the Frenchman turned the Corots over to him in 1987. Mr. Khimoun remains at large and was convicted in abstentia.

Mr. Jamin, who described himself in court in this central city as a car salesman, admitted he stayed with Mr. Kazama but denied having "brought the paintings to Japan and sold them."

Experts valued two of the paintings at between eight and 10 million francs (1.3 to 1.7 million dollars) and the two others at about five million francs (almost one million dollars) each.

The fifth, "Portrait de Madame Baudot", is considered one of Corot's masterpieces. It is the only one of the five still missing. Japanese buyers returned the other four to France.

Mr. Jamin and Mr. Khimoun are also suspected of involvement in the holdup of an armored truck in Tokyo containing more than 430 million yen (almost three million dollars) in November 1986.

#90178d1400 06/27/1990 ~French/German News Agency

LUSAKA (JUNE 27) - Violent riots sparked by foodprices rises which erupted in the Zambian capital Lusaka this week spread Wednesday to Kabwe, 140 kilometres (90 miles) north of here, Kabwe police chief Elias Kaite confirmed.

He said police shot dead three rioters in Kabwe.

Over 20 other people are unofficially reported to have died in the riots in Lusaka, which were sparked by anger at a rise in the price of maize meal, the staple food.

In a report to the semi-official Times of Zambia newspaper, Mr. Kaite said trouble in Kabwe began at midday Wednesday when a group of youths looted a state-owned shop and were soon joined by many others.

The rowdy rioters later marched to Kabwe Milling Company, producers of maize-meal, to loot those premises. There, in trying to stop them, police opened fire on the rioters, instantly killing three of them.

''Three people were shot dead when they tried to loot Kabwe Milling Company, while another was shot and injured in the thigh,'' Mr. Kaite was quoted as saying.

He also said a lot of damage to vehicles and buildings was done. He did not however say if anyone had been arrested, nor did he give any other casualty figures.

Although the situtation in Kabwe had been contained by police in the area, the town is still tense, he said.

In Lusaka, a 36-hour curfew imposed Tuesday seemed to be helping quell the unrest, and the city was quiet throughout Wednesday.

Police have stopped firing their guns and people remained indoors all day in line with a curfew warning.

#90178d1420 06/27/1990 ~French/German News Agency
JOHANNESBURG (JUNE 27) - Repression in South Africa, which decreased after President Frederik de Klerk introduced sweeping reforms five months ago, has returned to levels of "former brutality," the Human Rights Commission (HRC) said here Wednesday.

In a report submitted to a United Nations fact-finding mission which toured the country earlier this month, the HRC claimed that while certain changes had been made since February 2, when Mr. De Klerk lifted a ban on the African National Congress (ANC), all the powers of repression remained intact.

The only exception was the partial lifting of the national state of emergency on June 7, which represented "the first shift in formal repression" since February.

The report said that while political activity escalated, the security forces had "blown hot and cold" and "returned decisively to their former brutality."

Since February 2, more than 170 people have died and 1,500 have been injured in clashes with police breaking up "illegal gatherings," it said. This had proved an "extremely serious obstacle to freedom of assembly and expression."

"Such heavy handed and irresponsible action carries the danger that communities, and particularly the youth, struggling to articulate their grievances and aspirations, will conclude that peaceful merthods lead nowhere," the report warned.

While Mr. De Klerk was undoubtedly genuinely committed to change, there was "an uncomfortable feeling that a game is being played."

"The apartheid government is moving forward under pressure, but constantly looking for ways to maintain apartheid power under some new guise. Any let-up in pressure at this time would encourage that tendency."

Political detainees continued to complain of torture by security forces, while deaths in detention showed no signs of tailing off. Five people have died in detention this year.

#90178d1610 06/27/1990 ~French/German News Agency

CALGARY (JUNE 27) - Queen Elizabeth arrives Wednesday in Canada, where a constitutional crisis over the status of French-speaking Quebec has cast a shadow over her plans to mark the country's national day with a speech celebrating Canadian unity.

The queen, who is due to arrive at 2000 GMT from Iceland, will follow a low-key schedule during the first three days of her trip, visiting Calgary and Red Deer in the western province of Alberta. She will inspect troops, dedicate a museum, visit an equestrian center and attend a concert.

But Sunday, Canada's national day, the royal visit comes face-to-face with a Canada in crisis.

To mark the occasion, Queen Elizabeth is scheduled to deliver an address in Ottawa on Canadian unity, which suffered a serious blow after last week's failure to ratify the so-called Lake Meech constitutional agreement granting Quebec special status.

Ratification of the accord, which declared French-speaking Quebec a "distinct society" within Canada, would have led to Quebec's signing Canada's 1982 constitution. The failure of two English-speaking provinces - Manitoba and Newfoundland - to ratify the accord sparked renewed calls in Quebec for independence.

The queen's Canada Day speech will be written by Prime Minister Brian Mulroney, who had hoped that ratification of the Lake Meech accord would permit him to compose a ringing tribute to renewed national unity.

In early June, believing he had saved the accord through a week of marathon negotiations, Mr. Mulroney said, "Let's have the biggest, noisiest, happiest, most joyful Canada Day celebration of our lives."

But now English-speaking Canadians, who disliked the pact because they thought it granted too many privileges to Quebec, are criticizing Mr. Mulroney for ill-placed optimism and blaming him for unecessarily provoking tensions.

#90178d1630 06/27/1990 ~French/German News Agency
ANKARA (JUNE 27) - Two days of talks between ministers of Iraq, Syria and Turkey on sharing the waters of the River Euphrates ended in disagreement here Wednesday with the sides not budging from their entrenched positions.

Emerging from eight hours of intense bargaining, Turkish Public Works Minister Cengiz Altinkaya said the pre-condition set by Baghdad for Ankara's letting through at least 700 cubic metres of Euphrates waters per second instead of the current 500 cubic metres made a solution impossible.

''But the sides agreed to continue talks at an unspecified further date'', he noted.

Baghdad rejected the Turkish thesis that the River Tigris should be included in a water-sharing scheme and that the requirements of the three countries be ''scientifically'' worked out by a tripartite commission or a neutral consultancy firm, the minister said.

He said there had been no response to Turkey's offer to go over the 500 cubic metres per second average at peak hours in summer months, provided it was allowed to compensate by reducing the flow in the rainy season.

#90178d1720 06/27/1990 ~French/German News Agency
PARIS (JUNE 27) - A violent thunderstorm Wednesday afternoon brought chaos to the French capital flooding part of the metro system and bringing traffic to a standstill.

The storm which hit Paris in mid-afternoon caused the River Seine to overflow jamming traffic along city centre expressways, while drains in and around the city spouted out water.

Five metro lines grinded to a halt as heavy rain poured down and thousands of homes in the north-east of the city had their electricity supplies cut. Five hospitals also were without power.

There were no immediate reports of damage or casualties.

-30- 789
#90178d1740 06/27/1990 ~French/German News Agency
AMMAN (JUNE 27) - Finnish Foreign Minister Pertti Paasio said here Wednesday that his country was not acting as a transit point for Soviet Jewish emigres flying into Israel.

"We are not participating in constructing a tunnel from the Soviet Union

via Finland to Israel," Mr. Paasio told a press conference before heading for Israel on the last leg of a regional tour.

He said "no transportation of Soviet Jewry has so far taken place" from Helsinki, although Finland was an advocate of freedom of movement.

Informed Jordanian sources said Finland was one of several countries singled out at last month's Arab summit in Baghdad as possible transit points for Soviet Jews flying to Israel.

Mr. Paasio stressed his country opposed the settlement of Jewish emigrants in the Israeli-occupied territories, including east Jerusalem, saying such settlements violated international law.

"We have put it quite straight months ago that we expect the Israeli government to respect our conditions that Soviet emigres will not be settled in the occupied territories," he added.

The Finnish minister said his country offered help for Soviet Jews "to change their destination to some other country including Finland rather than travelling to Israel."

Mr. Paasio, who has also visited Damascus, held talks earlier with King Hussein to discuss the situation in the Middle East and bilateral relations.

The king, quoted by Petra news agency, said the U.S. decision to cut its dialogue with the PLO served the interests of "extremists who seek neither the establishment of a just peace in the Middle East nor security and stability."

The United States began a dialogue with the PLO in December 1988 but broke it off last week after the organization failed to condemn an aborted landing on the Israeli coast May 30 by Palestinian commandos.

#90178d1760 06/27/1990 ~French/German News Agency

SAN PEDRO LOVAGO, Nicaragua (JUNE 27) - The military commanders of Nicaragua's contra rebels surrendered their weapons Wednesday, officially bringing an end to the country's decade-long civil war.

The rebel commanders relinquished their arms at a ceremony in the central plaza of this town some 260 kilometers (160 miles) southeast of Managua.

The ceremony was attended by President Violeta Chamorro, Roman Catholic Archbishop Miguel Obando y Bravo and the head of the U.N. force monitoring peace efforts in the region, General Agustin Quesada of Spain.

The U.S.-backed contras pledged to turn in their weapons after Mrs. Chamorro took over as president from leftist Sandinista leader Daniel Ortega.

The war between the contras and the Sandinista regime left 50,000 people dead and caused some 15 billion dollars in economic damages.

#90178d2050 06/27/1990 ~French/German News Agency

WASHINGTON (JUNE 27) - Angolan rebel leader Jonas Savimbi has called for a break in the fighting in his drought-plagued country so that food and medical supplies can be shipped to millions of starving people, his representatives here said Wednesday.

In a letter sent to U.S. President George Bush and Soviet President Mikhail Gorbachev, the leader of the National Union for the Total Independence of Angola (UNITA) asked them to set up a joint relief effort in Angola similar to one they have pledged to undertake in Ethiopia.

"We need your help now to avert a catastrophe," said Mr. Savimbi in his letter.

At their May-June Washington summit, the superpower leaders agreed to deliver U.S. food and medical supplies aboard Soviet planes to Ethiopia's starving.

In another letter also sent Wednesday to Angolan President Jose Eduardo dos Santos, Mr. Savimbi called for a cease-fire in the country's 15-year civil

war so that demilitarized "corridors of peace" could be established to channel the emergency aid.

The corridors would be jointly controlled by UNITA and government forces, he added, calling on "all parties to the war in Angola to bring the fighting to a halt."

A U.N. study released in March indicated that several years of drought in Angola have put a large part of the population on the brink of starvation.

"A joint U.S.-soviet aid program would provide much needed assistance in a critical situation and might serve as the catalyst in Angola inducing definitive movement away from war, to the negotiating table," said Mr. Savimbi in his letter to Mr. Bush and Mr. Gorbachev.

According to the statement released by the Free Angola Information Service, a Washington lobbyist for UNITA, Moscow has been providing yearly one billion dollars in military aid to Angola's leftist government.

U.S. aid to UNITA is estimated at about 50 million dollars per year.

#90178d2070 06/27/1990 ~French/German News Agency

FRANKFURT (JUNE 27) - Commerzbank, West Germany's third-biggest bank, announced here Wednesday that it will have a network of 50 branches in East Germany before the end of the year.

As of next Sunday, the date for economic and monetary union of East and West Germany, Commerzbank will be present in 50 East German cities, thanks to 21 permanent branch offices and 15 "bank buses", enabling it to serve another 38 cities.

Commerzbank plans to have a complete network in 1991 over the entire territory of East Germany, investing 150 million Deutsche marks (about 90 million dollars) for this purpose.

Unlike its two leading competitors, Deutsche Bank and Dresdner Bank, Commerzbank has not concluded any agreement with East Germany's former central bank, Deutsche Kreditbank, to take over part of its branches. Deutsche and Dresdner are going to take over 122 and 72 such branches, respectively, that they will open to the public next Sunday.

MOSCOW (JUNE 27) - Soviet conservative hardliner Yegor Ligachev Wednesday rejected any attempt within the Communist Party to water down its

Marxist-Leninist principles and ditch democratic centralism.

"We cannot permit the existence in the party of different ideologies, or abandon the Leninist interpretation of the principle of democratic centralism," under which the grass roots must submit to decisions adopted by central party authorities, he told Interfax, a semi-independent news agency.

A draft platform, to be submitted to next week's party congress, calls for reform of democratic centralism, an end to rigid centralization and more democracy within the party, notably in the conduct of elections.

"I recognize the right of communists and citizens who are opposed to the foundations of our party to form a new party of their own," Mr. Ligachev said. But it would be wrong to allow people to remain within the party if they called for abandoning the ultimate goal of communism, he added.

"I don't think that there will be a split at the 28th CPSU (Communist Party of the Soviet Union) congress.

"Perhaps a number of people will leave the party, but this is not going to be a split," he said, referring to next week's scheduled party gathering.

"Compromises that are reached at the expense of principles do not yield desired results and in the end damage the party," he said.

LONDON JUNE 27 (AFP) - British Aerospace (BAe) said Wednesday afternoon it had "noted" the decision announced earlier in the day by the European Commission in Brussels that the British government should recover aid illegally paid to encourage BAe to buy the state-owned car manufacturer Rover Group.

The Commission told the British government to recover 44 million pounds (76.8 million dollars) in such aid.

BAe expressed no overt reaction, saying that "That decision is addressed to the British government."

It added that "British Aerospace wil decide its position (having due regard to shareholders' interests) once the government's response to the decision is known."

BAe shares lost six pence to 544 on the Stock Exchange in reaction to the EEC decision, though it had been expected.

Trade and Industry Secretary Nicholas Ridley will make a statement on the matter in the House of Commons on Thursday, an informed source said. He said the minister could either ask British Aerospace to comply, or to appeal to the European Court of Justice.

FRANKFURT (JUNE 27) - West Germany's two largest commercial banks began putting together a 5-billion-mark credit to the Soviet Union with the signing Wednesday of an accord that lets them start organising a consortium for the mostly state-guaranteed loan.

Spokesmen for Deutsche Bank and Dresdner Bank said the credit, equivalent to about 3 billion dollars, would aid Soviet economic reform efforts and help carry out infrastructure adjustments.

The government of Chancellor Helmut Kohl agreed last week to issue guarantees for all but 10 percent of the loan - a step that required Bonn's parliamentary budget committees to rearrange the books on the volume of credits the administration can pledge to cover.

Deutsche and Dresdner, the No. 1 and No.2 banks in West Germany respectively, said that after the signing of Wednesday's agreement the way was open for them to forge a consortium to finance the deal.

The credit will run over a 12-year period and under standard West European conditions, with repayment in 12 half-yearly installations due to begin after a 78-month grace period.

NOUMEA (JUNE 27) - Talks between New Caledonia's chief nickel producer and striking miners broke off Wednesday as a strike entered its 10th day.

The New Caledonian Federation of Workers and Employees Unions is demanding that the Societe le Nickel (SLN) upgrade a profit-sharing plan. Management has rejected the demand.

The union announced it was breaking off the talks because it had not received "concrete proposals" from management.

The company said it was "open to discussions to find a solution to the conflict."

The talks were broken off on the 10th day of a strike at SLN, which produced 47,000 tonnes of nickel in 1989, 80 per cent of the total output

of New Caledonia. This French overseas territory is the world's third largest nickel supplier.

Company officials said that since the strike began at three mines and a factory, lost nickel production has totaled 1,300 tonnes.

At the same time, workers belonging to the same federation blocked access to the port of Noumea Wednesday for the third consecutive day in sympathy with the striking nickel miners.

Noumea city hall and high commission employees meanwhile struck to demand salary hikes and an end to hiring of retired policemen and wives of serving top civil servants.

PRAGUE (JUNE 27) - Alexander Dubcek, the man who led Czechoslovakia's ill-fated 1968 attempt to create ''Communism with a human face'', was overwhelmingly elected speaker of parliament Wednesday at the national legislature's opening session.

Members of the Federal Assembly voted 218 for Dubcek to 49 against, with six abstentions.

Born in 1921, Dubcek rose to the first secretaryship of the Czechoslovak Communist Party in 1968 and embarked on a series of liberal reforms until the August 1968 invasion by Soviet-led Warsaw Pact troops ushered more than a decade of renewed hardline rule.

After the invasion he was taken to Moscow, where he agreed to cooperate with Soviet demands, but was ousted from his post in April 1969 and expelled from the party altogether in 1970.

For the better part of the next decade he worked as a factory labourer but re-entered national politics during last year's ''velvet revolution'' that toppled the Communists from power in a largely violence-free uprising.

Dubcek, who was nominated by the dominant Czech Civic Forum and its Slovak sister party, Public against Violence, called in a short address Wednesday for the Assembly to help forge closer ties to Western Europe, introduce a market economy and draw up a new constitution.

#90178d2500 06/27/1990 ~French/German News Agency

CAIRO (JUNE 27) - The Egyptian Organization for Human Rights (Eohr) charged here Wednesday that the freedom of expression for journalists,

writers and publishers in Egypt has been severely restricted over the past two years and that torture has been used in some cases.

But General Dr. Baha Ed-Din Ibrahim, first assistant to the Minister of Interior for Public Relations, rejected the allegations, declaring that, ''Torture is not allowed and if any policeman comitted torture, we will send him to the court. There is no torture''

Referring to Eohr charges that ten journalists had been tortured, he added, ''It may have happened two or three years before, but now I'm sure that it never happens.''

The 40-page Eohr report said that between 1988 and 1990 numerous journalists had been hampered in their work, and that some had been prevented from leaving the country.

Since the current interior minister, Mohammed Abdel Halim Musa, had assumed office in January of this year, the only recorded violations had been searches on entering or leaving the country, and confiscation of documents.

The interior ministry spokesman, however, described this as quite normal. ''The customs is an independent authority, they have to search the luggage '' he noted.

But, as far as he knew, ''I'm quite sure, the minister spoke to the airport authorities and told them not to make problems to journalists.''

The report said that during the two-year period, 23 journalists had been detained for between 48 hours and seven months. With the exception of one writer, the first Egyptian to be arrested this century for his literary work, all had since been released.

The report complained that the country's most important Islamic institution,

Al Azhar, was spreading its influence in the censorship field beyond religious publications. Opposition Islamic groups were also exerting pressure.

The report pointed out that the Egyptian constitution guarantees the right of free expression, opinion and publication. The state of emergency in force since the assassination of President Anwar Sadat in October 1981, permitting restrictions on these freedoms, should be lifted.

#90178d2590 06/27/1990 ~French/German News Agency

PRAGUE (JUNE 27) - Marian Calfa was re-appointed prime minister of

Czechoslovakia by President Vaclav Havel on Wednesday. The 44-year-old Calfa had led the government since last December.

Calfa will have four deputy prime ministers - economics expert Vaclav Vales, Foreign Minister Jiri Dienstbier, jurist Pavel Rychetsky, and computer expert Jozef Miklosko.

Vaclav Klaus stays on as finance minister, and Defence Minister Miloslav Vacek also retains his post. Jan Langos, a long-time human rights activist is interior minister.

The new foreign trade minister is Slavomir Stracar, previously in charge of iron and steel production.

The new government is a coalition of the Civic Forum, led by President Havel, its Slovak sister party Public against Violence, the Christian Democratic Movement, and the Democratic Party.

Caifa resigned from the Communist Party after being elected prime minister last December.

In the country's first free elections in 44 years on June 10, the Civic Forum and Public against Violence together won 42.8 per cent of the popular vote and 164 of the 300 seats in the federal parliament. The Communist Party won 13.6 per cent of the vote and 40 seats.

WASHINGTON (JUNE 27) - The International Finance Corporation (IFC), a World Bank affiliate, said Wednesday it had agreed to invest 8.7 million U.S. dollars in a Malaysian company that will produce a range of fatty acids and glycerine from palm-based feedstock.

Most of the production will be for export, said the IFC.

The IFC said it would make an equity investment of 800,000 U.S. dollars for 20 percent of the stock of Twenty First Century Oleochemicals Sdn. Bhd. and a loan of 7.9 million dollars.

The project involves construction of a hydrolysis plant with a capacity to process 125 tons a day of feedstock of palm kernel oil, palm fatty acid distillate and palm stearin in the state of Jahore.

The project will also benefit from 4.9 million U.S. dollars worth of loans from two Malaysian banks -- the Sabah Development Bank and the Rakyat Merchant Bank, said the IFC.

DETROIT, MICHIGAN (JUNE 27) - The world's largest auto manufacturer, General Motors, said Wednesday it had signed a preliminary agreement with the government of Czechoslovakia, paving the way for GM to open a plant in that country.

GM spokesman Ronald Theis said the agreement was for GM to start building transmissions, primarily for its Europe-produced Opel range of automobiles.

He said it had not yet been determined whether the Czechoslovak transmission plant would be a completely GM-owned operation or a joint venture.

GM has already announced plans to open an assembly plant, producing 15,000 vehicles a year, in Hungary in a joint venture with the Hungarian firm, Raba, and will begin assembly operations in East Germany later this year in a joint venture with an East German company.

The U.S. firm has also reached an agreement with the Soviet firm VAZ for the joint production of vehicles in the Soviet Union.

#90178d2920 06/27/1990 ~French/German News Agency
BOGOTA (JUNE 27) - The Colombian Government Wednesday was considering a surrender offer made by 200 assailants who allegedly carried out murders in Medellin on behalf of the cocaine cartel based there, officials said.

They said they would lay down their arms if the government reintegrated them into society and refrained from prosecuting them, said Medellin Mayor Omar Florez.

"They are delinquents who believe that the government will reintegrate them into society," Mr. Florez said. "They are fed up with the lives they lead and of the risks of living in the streets, and they hope to have a more promising future."

"They are youths who want to break from violence," said Mr. Florez, who favors a negotated truce between drug lords and the government.

Last weekend's wave of bloodshed in Medellin left 63 people dead -- including 19 massacred at a tavern -- and has stunned Colombia despite its daily violence and a near year-long war between the government and powerful drug barons.

The mayor -- in Bogota for a meeting about Medellin's violence which has

left 2,748 people dead this year -- said the gunmen who wanted to surrender generally were unemployed and between the ages of 13 and 20.

He has proposed a plan to rehabilitate the assailants, give them well-paying and stable jobs and improve poor sections of the city where many of the criminals flourish.

#90178d3060 06/27/1990 ~French/German News Agency

BRUSSELS (JUNE 27) - The European Economic Community (EEC) began talks here on Wednesday with six Gulf countries on a free trade agreement, an EEC source said.

The negotiations are expected to be difficult. The meeting here constituted an initial contact between the EEC Commission, the Community's executive arm, and representatives of the Gulf Cooperation Council - grouping Saudi Arabia, Bahrain, United Arab Emirates, Kuwait, Qatar and Oman.

Diplomatic sources say the Gulf countries have already expressed resentment at EEC reluctance to open the Community to their petrochemicals. Under pressure from the EEC oil industry, the 12 Community members have asked the Commission to negotiate transition periods before full free trade, ranging up to 16 years for the most sensitive petrochemicals.

The EEC also rules out any free trade agreement with the Gulf countries until they have all joined the General Agreement on Tariffs and Trade (GATT) and have set up a customs union among themselves.

The free trade agreement is to replace an agreement signed in June 1988 calling for cooperation between the two sides in agriculture, industry, environment, energy and trade, the EEC Commission noted.

AMSTERDAM (JUNE 27) - Suriname rebel leader Ronny Brunswijk arrived here Wednesday seeking Dutch humanitarian aid for his country's so-called Bush negroes, whom he says face famine and are living in "inhuman" conditions.

Mr. Brunswijk, who said recently he had handed over command of the "Bush negro" rebellion temporarily to his deputy Johan Castro, is to meet with the Dutch parliamentary commission on foreign affairs Thursday.

On arrival at Amsterdam airport, he said the Bush negroes needed food and medical care, particularly in the Brokopondo region.

He planned to ask the government and public for help and was "convinced of

success".

Foreign Minister Hans van den Broek said Tuesday he did not wish to see the rebel leader, but invited him to make a request if he wished to meet with another foreign ministry official.

Mr. Brunswijk, who has fought the military regime of Desire Bouterse in the former Dutch colony for three years, said he would raise what he called the role of the Suriname army in frustrating peace moves during his talks with Dutch leaders.

"The army is blocking the agreement of Kourou and I haven't been able to bring about a change in my discussions with the government and military authorities", he said.

"That's why I'm counting on France and the Netherlands which could undertake moves to bring the army under control of the civilian government again", he added.

The rebel leader received permission to enter the Netherlands Tuesday after being declared persona non grata a week ago.

On arrival here, he said he would stay two weeks and then return to Suriname to resume leadership of the rebellion.

The guerrilla leader left Suriname June 18 and was arrested later that day with a false passport at Cayenne Airport in neighbouring French Guiana while trying to board a plane flying to the Netherlands via Paris.

He told police there that on June 18 he had handed over command of the "Bush negro" rebellion to his deputy, Johan Castro.

After arriving in Paris, he was given temporary asylum before continuing on to the Netherlands.

#90178d3180 06/27/1990 ~French/German News Agency

TOKYO (JUNE 28) - Peugeot's Japanese subsidiary will handle all imports of the French auto to Japan beginning in July, thanks to an influx of capital allowing a linkup with two other Peugeot distributors, the company announced here Wednesday.

Peugeot Japan, created in January 1989 as a joint venture among Automobiles Peurgeot, Rover Japan and Suzuki Motor, will increase its capital from 20 million yen (1.3 million dollars) to 500 million yen (33 million dollars).

Nissho Iwai Corporation and Seibu Motor Sales Corp., the distributors

respectively of Suzuki and of the Peugeot 505 line, will now take a stake in the joint venture, Peugeot Japan said.

The redistribution of capital will enable Automobiles Peugeot to up its controlling share of the company from 52 percent to 67 per cent.

Rover Japan and Susuki will hold 11.5 percent each, against 24 percent previously, and Nissho Iwai and Seibu Motors Sales will each have a five per- cent stake in the operation.

The increase in Peugeot Japan's capital base reflects its graduation from the status of an intermediary to a full-fledged import company.

The firm said it would seek to sell 13,000 vehicles in 1991, up from 1990's target of 8,000, through its network of distributors.

#90178d7980 06/27/1990 ~French/German News Agency

SOENDRE STROEMFJORD, GREENLAND (JUNE 27) - A 50-year-old Dutchman who sold his restaurant in The Hague to fly a microlight plane from there to New York on Tuesday became the first person every to take such a craft across the vast ice desert of Greenland, a police spokesman said here.

Eppo Numan made the crossing from Kulusuk on the eastern coast of the huge island to Soendre Stroemfjord in seven hours, slung underneath his frail 189 kilogram (417-pound), 80-horsepower craft.

"I must be dreaming," the 50-year-old Mr. Numan told a reporter here. "It's wonderful."

He said he had spent four-and-a-half years preparing for the exploit.

A French pilot attempted the same feat last year, but became disoriented and came down on the ice after running out of fuel. He was found by rescue teams, and survived the ordeal.

Mr. Numan, who is an environmental activist, had arrived in Kulusuk on Monday from the Icelandic capital Reykjavik. On the insistence of the Danish authorities who administer Greenland, he is being accompanied by an escort plane.

The port authorities in Kulusuk made no secret of the fact that they thought the whole idea was crazy, but they nevertheless let Mr. Numan make the attempt.

And the Danish government, faced by complaints from the Greenland police that such exploits tied up precious rescue services, said that Mr. Numan

would be the last person allowed to attempt the feat.

The flying Dutchman was next due to fly on to Frobisher Bay on the Canadian coast, with his ultimate destination the United Nations in New York.

Once there, he plans to submit to U.N. Secretary-General Javier Perez de Cuellar "an addendum to the Universal Declaration of Human Rights, on the protection of the environment," he said.

SEOUL (JUNE 27) - The South Korean government will propose a non-aggression pact to North Korea, in a bid to seek a breakthrough in stalled inter-Korean relations, Unification Minister Hong Sung-Chul has said.

"The government is preparing a proposal for a non-aggression pact with the North," Mr. Hong told the National Assembly late Tuesday, according to published reports.

The pact would have that both sides respect existing borders, not intervene in each other's internal affairs and settle disputes through peaceful means.

Mr. Hong did not say when the proposal would be made.

Local press reports, however, quoted a government source as saying that South Korea would make the proposal early next month, probably on the first anniversary of a declaration by President Roh Tae-Woo on July 7, 1989.

Mr. Roh said in the declaration that South Korea would treat the North as a partner instead of an enemy and the Seoul government would not oppose it if its allies sought to improve ties with Pyongyang.

North and South Korea have also agreed to dicuss the issue of a non-aggression declaration at parliamentary talks, which are expected to resume this month after a hiatus of several months.

North Korea had initially proposed to discuss a non-aggression pact at the parliamentary talks, which the South rejected because parliaments had no right to sign a treaty.

Meanwhile Prime Minister Kang Young-Hoon said late Tuesday that the government was seriously studying the establishment of an across-the-board panel to handle the issue of arms reduction.

Defense Minister Lee Sang-Hoon also said that arms reduction would emerge

as the main agenda of the dialogue between North and South Korea in the future.

#90178d8270 06/27/1990 ~French/German News Agency

KUALA LUMPUR (JUNE 27) - Edaran Otomobil Nasional (EON) Bhd., the sole local distributor of Malaysia's national car, drew 1.29 billion dollars (478,000 U.S. dollars) for its public share offer, a share issuing house official said Wednesday.

The Malaysian Industrial Development Fund official said the EON offer attracted 237,003 applications for 301.8 million par value shares priced at 4.30 dollars (1.59 U.S.), representing an oversubscription of 22.03 times.

EON has offered 36 million shares or 30 percent of its paid-up capital of 120 million dollars (44.4 million U.S.), of which 13.1 million shares were available to the public.

The rest of the shares had been set aside for government approved bumiputra (ethnic Malays and indigenous people) investors and institutions, in compliance with listing regulations, and for company directors and employees.

The five-year-old company, which has sold 180,000 Proton Saga cars, made a pre-tax profit of 55 million dollars (20.4 million U.S.) last year compared to 10 million dollars (370,000 U.S.) in 1985.

EON has a 65 percent share of the domestic passenger car market for cars under 1,600 c.c and plans to raise its stake to 70 percent this year.

PORT ELIZABETH, South Africa (JUNE 27) - Demand continued to move downwards Tuesday at the South African Mohair Board's eigth sale in this Eastern Cape province town, with only 25 percent of the 3,726 bales sold.

Selection was average, the Board said, with very limited demand for adult, fine adult and lower end young goats.

Competition was mainly on a selective basis and prices remained basically unchanged.

The highest kid price registered was 5,800 cents (21.80 US dollars) a kilogram.

#90178d8430 06/27/1990 ~French/German News Agency
PARIS (JUNE 27) - A Catholic bishop and priest jailed in China since November have been sentenced to three years in a labor camp, the Asian Churches bulletin reported.

According to the bulletin, published by the Paris-based Foreign Missions organization, Msgr. Pierre Liu Guandong and Father Xu Zhemin, detained since their arrests on November 26 near the town of Tangshan in Hebei province, were sentenced on May 21 but "did not have the right to a fair trial."

The two will be detained at a camp for "reeducation through manual labour". Msgr. Liu, bishop of Yixian in Hebei province near Beijing and Father Xu, vicar of Baoding diocese in the same area were condemned for "illegal activities". Msgr. Liu must collect rubbish as part of his sentence and Father Xu will clean lavatories, the bulletin said.

The prelate and the priest had both participated on November 21 in a clandestine Episcopal conference held in the central Chinese Shaanxi province by bishops, priests, and laymen unaffiliated with the Patriotic Association of Chinese Catholics. Msgr. Liu was elected chairman of the conference's executive committee.

The Patriotic Association of Chinese Catholics was established in 1957 and monitors the officially-sanctioned Church's activities in the country. The 70 bishops who belong to the association were ordained after the 1958 rupture between China and the Vatican.

According to the Asian Churches bulletin, the clandestine Church organization counts about 60 bishops.

All the participants at the November conference, including nine bishops and some 30 priests and laymen, were arrested in the following few weeks.

Asian Churches reported that three among them have since been freed and a fourth, Msgr. Mathias Lu Zhensheng, bishop of Tianshui in the northeastern Gansu province, has been under house arrest since his release from jail on April 26.

The bulletin also said that two Catholic priests, eight seminarians, and six nuns have recently been arrested in Hebei province, a stronghold of Catholics loyal to Rome and opposed to the officially-sanctioned Church.

Protestants have also been subject to repression as about a dozen pastors were arrested in China last November, Asian Churches said.

The official number of Catholics in China stands at 3.3 million, with as

many Protestants, but Asian Churches says there are actually about five million Catholics in the country.

#90178d8590 06/27/1990 ~French/German News Agency

SEOUL (JUNE 27) - South Korea hit back at foreign makers of designer goods here Wednesday, rejecting allegations that South Korea was the world's number one counterfeiting centre.

Kim Chul-Su, Commissioner of the Korea Industrial Property Office said South Korean authorities considered the allegations to be "quite unfounded" .

"We do recognize that problems still exist but we have made strong, concerted efforts to remove counterfeit products selling here as well as those being exported," Mr. Kim told foreign correspondents.

He was commenting on allegations by visiting representatives from Nina Ricci, Yves Saint Laurent, Louis Vuitton, Chanel and Cartier who called South Korea "number one in fakes" at a press conference here Monday.

Since the government began efforts to eradicate counterfeiting in 1987, Mr. Kim said, "considerable improvement" has been made in prosecuting counterfeit retailers and boosting public awareness that counterfeit goods are illegal and should therefore be removed.

By Wednesday, government authorities had carried out 28 raids on shops and factories producing counterfeit goods this year, he said.

Mr. Kim's statement contradicted allegations by foreign manufacturers that the situation was getting worse, and that despite the fact that more

counterfeit products were being confisticated, more were appearing on the market.

However, Mr. Kim said the government faced difficulties in enforcing laws against counterfeiting because of a shortage of staff.

Annual sales of counterfeit goods is estimated at more than 110 million dollars a year, he said.

#90178d8730 06/27/1990 ~French/German News Agency
Essen (JUNE 27) - Huge restructuring costs at the West German steelmakers Krupp swallowed up a 410-million-mark (247 million dollars) operational profit last year, the firm said here Wednesday.

Chairman of the board Gerhard Cromme and finance chief Gerhard Joos said the surplus was almost double the 217 million marks made the previous year.

However, the concern spent 705 million marks on ''extra-ordinary'' restructuring measures, leading to a deficit for the year of 452 million marks, compared to 202 million marks the year before.

Parent company Fried. Krupp GmbH performed evenly in 1989, but was forced to dip into capital reserves to cover a 352-million-mark deficit. A minus of 244 million marks from the previous year was carried forward into 1989.

Cromme and Joos, in their review of last year's performance, said the Krupp concern had accumulated losses of about two billion marks over the last five years.

However the continuing restructuring programme, including the closure of loss-making operations, would soon help to put the concern back onto a ''clean and solid base'', Cromme said.

The company, owned 70.4 percent by Fried. Krupp and 25 percent by Iran, has not paid a shareholder dividend since 1974.

#90178d8790 06/27/1990 ~French/German News Agency
PARIS (JUNE 27) - French legislators Wednesday approved new legislation restricting advertisements for smoking and drinking as of January 1, 1993.

Health Minister Claude Evin said the measures were "unprecedented in public health history".

Direct or indirect advertisements for, or the sponsoring of alcoholic

beverages will be outlawed by 1993, as will be their sales in service stations.

Vintage wines and traditional wine festivities will be excluded from the ban but Mr. Evin warned that the exemption was inconsistent with EEC regulations and could be overruled.

The vote came after the state-owned railway company SNCF announced that there will be a complete ban on smoking on suburban Paris trains as of next year.

For inter-city services, smokers will be banned from lighting up in corridors outside nonsmoking compartments and whole carriages will be designated non-smoking.

By 1993, 70 per cent of train seats will be for non-smokers.

Every year, 50,000 people die in France from lung cancer, respiratory or heart disease caused by smoking, insurance statistics say, and the health bill for smoking-related illnesses comes to 40 billion French francs (seven billion dollars).

JOHANNESBURG (JUNE 27) - South Africa's Atomic Energy Corporation (AEC) has been privatised and plans to embark on a bold international marketing campaign, Economic Co-ordination Minister Wim de Villiers has said.

The Minister told journalists that the decision was in line with government policy of making parstatal companies self-sufficient.

By making AEC expertise and products available locally, South Africa could save about 150 million rands (57.6 million dollars) annually in import replacement, he said.

AEC chief executive Waldo Stumpf said that once "political normalisation" has taken place, "we will actively enter the world market" - in particular the Far East.

He said AEC had had two major programmes in its new "corporate" identity - to supply fuel to South Africa's Koeberg nuclear power station and to "actively assist neighbouring countries with technology and nuclear know-how.

The corporation also planned to lift technological levels locally by selling expertise proven in the stringent nuclear environment.

These included areas such as plating, fabrication and welding, the separartion of dust from air, turbine technology, the production of isotopes for both medical and industrial application, laser technology and metallurgy.

South Africa's national energy body, Escom, has identified a site on the Western Cape coastline where a second nuclear station could be built but an Escom spokeswoman said no developments were expected this century.

The French-built Koeberg station, near Cape Town, was completed was in 1984.

LONDON (JUNE 27)- The British cables and construction company BICC is to increase its capital by 177 million pounds (305 million dollars) mainly to increase its stake in the Spanish Grupo Espanol General Cable (GEGC) telecommunications company, BICC said on Wednesday.

Since last year BICC has held 20 per cent of GEGC, and under the new arrangement agreed with the Spanish company, its participation will rise to 39 per cent at an estimated cost of 127 million pounds.

The two companies will then introduce one quarter of the company's capital to the stock exchange at the end of 1992 or early in 1993.

BICC is asking shareholders to subscribe for 13 new convertible bonds for 20 ordinary shares held. The bonds will have a nominal value of one pound, bearing interest of 10.75 per cent. The issue has been underwritten by S.G. Warburg and by Barclays de Zoete Wedd.

ATHENS (JUNE 27) - The Bank of Greece has raised 60 billion yen (about 390 million dollars) through a bond issue on Japanese capital markets, the bank said on Wednesday.

Agreement for the loan, over seven years at 7.4 percent with an issue price of 101 percent, was signed in Tokyo on Tuesday by the governor of the bank, Dimitris Halikias.

The issue will be managed by the Japanese Nomura Securities Co Ltd., and was underwritten by 36 investment banks.

Beirut (JUNE 27) - Industrial output in Lebanon is at its lowest ever because of the recent fighting in East Beirut, officials said Wednesday.

Imad Nawam, acting general director of ministry of industry, said exports of Lebanese products have dropped from a monthly average of 22 million dollars in 1988 to less than 11.36 million in 1990.

Nawam attributed the decline to difficulty in importing raw materials due to the continued closure of many ports in the Christian sector of the Lebanese capital.

He also said that many factories were hit by shells and their products damaged or stolen. Power cuts have also asffected production.

''This year is the worst ever for Lebanese industry'', Nawam said.

PARIS (JUNE 27) - The number of people unemployed in France fell by 1,100 on a seasonally adjusted basis in May compared with April to total 2,480,200, official figures showed on Wednesday.

Adjusted unemployment was 49,400 lower than one year earlier, representing a reduction of two percent.

On an unadjusted basis, there were 2,366,552 people without work in May.

The rate of unemployment was unchanged at 9.3 percent.

This stability followed a sharp fall of 23,000 in the number of people seeking work in April.

During the first quarter, 82,000 jobs were created.

TOKYO (JUNE 27) - Japan's Suntory Ltd. said Wednesday that it has purchased a 51 percent controlling interest in Qintex Resorts BV, a Dutch firm that owns Princeville Resorts in Kauai, Hawaii.

Qintex had paid-in capital of 152 million dollars, the major Japanese whiskey and beer producer said without specifying what it paid to buy the resort management firm.

Suntory said that it was diversifying business lines.

KUALA LUMPUR (JUNE 27) - The Malaysian government has moved to corporatise the management, operations and development of its airports and aviation services, a local merchant bank said Wednesday.

Amanah Merchant Bank said in a statement that the government had appointed the bank and a consortium team of consultants to conduct a study on the most suitable approach to implement the move.

The consortium team comprise British Airports Services Ltd., a unit of British Airways, and local legal, valuation and accounting firms HRM Sdn. Bhd., Nik Saghir, Yaacob and Ismail, and Zaki and Partners.

The team Wednesday signed an agreement to undertake the 100 million dollar (370,000 U.S.) study with the Department of Civil Aviation which currently manages the airports.

The study would involve a detailed examination of the financial performance of 20 designated airports, the volume of revenues received, expenditures incurred and capital and operating costs projection, the merchant bank said.

The study began on May 14 and was expected to take more than 16 weeks to be completed.

The assets of the 20 airports are estimated to total 600 million dollars (222 million U.S.).

The government set up a company called Malaysian Airport Corp. in December to pave the way for the corporatisation.

BRUSSELS (JUNE 27) - The Societe Generale de Belgique (SGB) has acquired 19.5 percent of the French-Belgian Wagons-Lits travel company from the Belgian Bruxelles-Lambert (GBL) group, SGB said on Wednesday.

SGB, which is part of the French Suez group, may increase the stake to 26.75 percent by July 1 1991 if it exercises an option to buy the remaining GBL share of 7.25 percent.

SGB, which is the main shareholder in the leading European tourist company Accor, with 12.6 percent, will later create a holding which will own the shares in Wagons-Lits. This holding wil be associated with Accor through a

minority stake.

Analaysts said that consequently the two groups, specialising in hotels and tourism, would be able to benefit from common factors.

MONROVIA (JUNE 27) - Liberian soldiers opened fire here Wednesday to disperse demonstrators calling for the resignation of rebel-beleaguered President Samuel Doe in the second mass rally in two days.

The marchers were heading for the U.S. Embassy when the first shots were heard and sporadic gunfire later spread to other parts of central Monrovia. It was not immediately clear whether there had been casualties.

Earlier, it was reported that troops would stop the marchers going to the Capitol, seat of parliament, to hand in a Doe resignation demand to House of Representatives speaker Samuel Hill.

On Tuesday, about 20,000 people turned out at a peace rally called by the Liberian Council of Churches (LCC), demanding an end to six months' civil war between government troops and rebels who have neared the capital.

The National Patriotic Front (NPLF) rebels, led by Charles Taylor, pulled out of a second round of peace talks with government officials Monday in the capital of neighbouring Sierra Leone, Freetown.

A rebel spokesman said that until Mr. Doe stood down, there was nothing to talk about.

"Doe Must Resign!" read banners at Wednesday's demonstration, organized by several civil organizations, in what was clearly a more focussed protest than Tuesday's march.

Marchers sang: "Today, today, Doe come down! You like it, you don't like it,

Doe come down! Doe come down today! How long must we cry, the power of the people is the greatest!"

More than 1,000 people, mostly civilians have died in the fighting, which has a partly ethnic nature, pitting Mano and Gio rebels against the people of Mr. Doe's Krahn tribe.

Thousands more have been displaced or fled across the borders of the West African country to Sierra Leone and Guinea. Two Liberian opposition parties have called on the president to resign.

Munich (JUNE 27) - The West German electronics giant Siemens said here Wednesday it planned to invest more than one billion marks (595 millio dollars) in East Germany in the next two to three years.

The company said it was currently working on more than 30 projects with East German partners. As the projects continue, Siemens expected to generate employment for 25,000 to 30,000 people while reaching a business volume in East Germany of 5 billion marks.

Telecommunications, data processing, energy, transportation technology, factory automation, medical equipment, and environmental protection were the main areas in East Germany which Siemens said it would be concentrating on.

#90178d9750 06/27/1990 ~French/German News Agency

LONDON (JUNE 27) - The Lloyd's of London insurance market reported 1987 taxable profits of 509.1 million pounds (850 million dollars) compared with 650 million pounds in 1986, on Wednesday.

The results are published after a delay of three years to allow settlement of any litigation over claims.

Premium income rose to 4.194 billion pounds from 3.712 billion pounds in 1986 and 3.056 million pounds in 1985.

Lloyd's chairman Murray Lawrence said in his annual report that relatively satisfactory results on marine insurance had been countered by a worsening of the trading situation in the non-marine business.

Non-marine underwriting made a profit of 281.9 million pounds compared with 385 million pounds in 1986, mainly because of late settlement of pollution cases, particularly concerning asbestos, which dated from before 1987.

Property insurance showed a profit of 300 million pounds despite huge damage caused by a storm in southeast England in October 1987. This event led to the biggest claims from a single catastrophe, excluding the marine sector.

Mr. Lawrence said that the 1988 accounts were expected to show a profit, but that the figures for 1989 would be affected by record damages caused by several natural disasters including Hurricane Hugo and an earthquake in San Francisco.

Aviation insurance earned a profit of 176 million pounds in 1987 after a record profit of 266 million pounds in 1986. But the results for 1988 were likely to be affected by the loss of 24 aircraft resulting in damages of at least 900 million dollars.

The auto sector showed a profit of 60.8 million pounds in 1987 on an 18.5 per cent increase in premium income.

Marine insurance showed a profit of 291.9 million pounds in 1987. The results in the following two years were likely to be affected by several catastrophies, including an accident on the North Sea Piper Alpha oil platform, pollution by the Exxon Valdez oil tanker in Alaska, Hurricane Hugo, and damage at a Phillips oil refinery in Pasadena, California.

#90178d9850 06/27/1990 ~French/German News Agency

FRANKFURT (JUNE 27) - Interest rates in Germany are unlikely to go on rising after monetary union and are expected to level out over the next few months, according to financial experts here.

Fears that monetary union effective from July 1 might accelerate the upward trend triggered by the opening of the Berlin Wall, appear to have subsided.

The analysts agree with the vice-president of the West German central Bundesbank Helmut Schlesinger that rates should stabilise at current levels in coming months.

Some bankers such as Walter Seipp, president of the Commerzbank, even expect rates to fall once monetary union between West Germany and East Germany has taken effect.

An official responsible for equity operations at the Dresdner Bank Dieter Ecklebe, said: "We are counting on a return to reason."

Like many of his colleagues he is tired of the madcap atmosphere which has dominated the stock market here since the Wall was breached on November 9.

In the space of a few months, yields on 10-year bench-mark loans rose from 7.5 percent before the frontier was breached to nearly nine per cent.

This was the highest level since 1980-81. It appeared particularly high compared with West Germany's low inflation rate of just over two percent and when set against a booming economy which registered an annual growth rate of 4.4 percent in the first quarter.

The increase in the level of interest rates reflects deep disquiet on

financial markets at the unknown consequences of monetary union.

The markets are also uneasy about the high level of spending required to put the East German economy on its feet. It has been estimated that the cost could total many hundreds of billions of Deutschemarks.

#90178e0022 06/27/1990 ~Latin America New Agency

SAN SEBASTIAN, SPAIN (JUNE 27) EFE - Basque nationalists burned a train and set up barricades Wednesday in northern Spain to protest the deaths of two Basque separatists who the Interior Ministry said committed suicide after being cornered by police.

In the Basque village of Algorta, some 380 km north of Madrid, three masked youths forced passengers off a train and set fire to three carriages in protest at the deaths Tuesday of the two suspected members of the Basque terrorist group ETA, police said.

They also doused the train's driver and inspector with petrol in order to force them to leave the station.

Meanwhile in Renteria, 100 km east of Algorta, a group of demonstrators set up barricades across the railway line which links the area with France blocking one train's journey.

Protests were also reported overnight in Portugalete, just south of Algorta, with one person arrested.

In a related event, a group of radical Basque nationalists called a general strike in the Basque towns of Onate and Andoain, where funeral services for the two suspected ETA members were to be held later in the day.

The separatists, named as Juan Maria Lizarralde and Susana Arregui, were found dead close to the site where they and a third ETA member had been engaged in a shootout with civil guards in Foz de Lumbier, in the neighboring region of Navarre.

The third separatist was wounded and captured by the civil guards and is in serious condition in hospital. Lizarralde and Arregui were found dead several hours later in the same remote mountainous area.

Interior Minister Jose Luis Corcuera said Tuesday that the separatists probably committed suicide to avoid being captured by the civil guards.

Officials have said that the corpses had a single bullet wound each, but relatives of Arregui claim that her body showed two bullet wounds in the

head.

The results of an autopsy have yet to be made public.

Meanwhile, the chief minister of the Basque regional government, Jose Antonio Ardanza of the moderate Basque Nationalist Party, told reporters Tuesday that he was surprised by the suicide theory.

He said ETA members usually had instructions to hand themselves in to police if there was no possible way of avoiding capture.

ETA has killed more than 600 people since it launched its campaign 22 years ago for the right to independence for the Basque region.

Lizarralde was allegedly responsible for a dozen killings as well as involvement in four kidnappings, while Arregui was suspected of working with an ETA unit until she fled to France in 1987.

#90178e0024 06/27/1990 ~Latin America New Agency

JERUSALEM (JUNE 27) EFE - Israeli newspapers claimed Wednesday that the U.S. government might renew its dialogue with the Palestine Liberation Organization despite having broken relations with the group only a week ago.

Tel Aviv evening paper Yedioth Aharanoth published what it said was a "classified document" sent from the U.S. administration to the Israeli government in which Washington said that the PLO plays a vital part in seeking Middle East peace.

"The United States is staying firm in its efforts to reach a Middle East peace agreement based on UN Security Council resolutions 242 and 338 and on the principle of territory for peace as well as the security of Israel and the political rights of the Palestinians," the United States said in the document.

"The dialogue with the PLO has contributed to reaching this objective and it could continue contributing to it in the future,+ Washington added.

The UN resolutions refer to Israel's right to exist and the need to solve the Palestinian problems.

Tel Aviv daily Haaretz quoted the political adviser at Israel's embassy in Washington, Oded Eran, as saying that the United States feels that the PLO is the key to peace in the Middle East.

U.S. President George Bush suspended an 18-month dialogue with the PLO

last Wednesday after PLO leader Yasser Arafat refused to directly condemn a failed assault on a crowded beach near Tel Aviv carried out by a maverick faction of the PLO in May.

The dialogue started in January 1989 after Arafat recognized Israel's right to exist and vowed not to carry out +terrorist attacks+.

The break in relations is seen by observers as favoring hardliners in the Palestinian movement and in the Israeli government.-EFE

#90178e0025 06/27/1990 ~Latin America New Agency

MOSCOW (JUNE 27) - Factories dumping waste products into the northern Soviet Union's White Sea are responsible for causing an ecological disaster which has killed whales, seals and thousands of other marine animals, Moscow Radio's Interfax news service reported Wednesday.

Biologist Viacheslav Berzin told Interfax that scientists believe the environmental tragedy has resulted from factories in the cities of Archangel and Severodvinsk pumping industrial waste into the sea, located some 1,100 km north of Moscow.

Berzin is a member of a team sent by the Russian Federation to investigate the deaths of the animals.

None of the companies allegedly responsible for the pollution has admitted dumping waste products into the White Sea.

The scientific team was set up by the Russian Federation after five million starfish, 30 seals, seven white whales and 5,000 crabs were reported to be have died due to the sea's pollution.

#90178e0028 06/27/1990 ~Latin America New Agency

MONROVIA (JUNE 27) EFE - Witnesses said Liberian troops shot dead two people Tuesday when they opened fire on a group of several hundred demonstrators who had gathered in the capital to demand the resignation of beleaguered President Samuel Doe.

The protest march, organized by opposition groups, erupted into violence

shortly after troops and police attempted to charge and disperse the demonstrators, witnesses said.

There has been no offical confirmation that two demonstrators had been shot dead and several others injured.

Opposition calls for Doe, in power since 1980, to resign echo similar demands by the rebel National Patriotic Front (NPF), which has propelled its bloody seven-month insurgency against the president to within 30 km of Monrovia.

Scheduled talks last Monday between government officials and the NPF in neighboring Sierra Leone were abandoned when the rebel delegation failed to appear.

The NPF, led by former government minister Charles Taylor, began its insurgency last December after Doe slaughtered members of the Gio and Mano tribes that rushed to join rebel ranks during an abortive attempted coup.

Diplomats in the capital fear a rebel victory will lead to an escalation of bloodshed, as the NPF takes revenge on members of Doe's dominant Krahn tribe.

-30- 1496

#90178e0029 06/27/1990 ~Latin America New Agency

(JUNE 27) EFE - West German Green Aid will Britain change to environment-friendly technology in a bid to save the ozone layer, West German Environment Minister Klaus Topfer said Wednesday.

Speaking at an international conference on the ozone layer in the British capital, Topfer said that West Germany would back the creation of an international fund under the auspices of the World Bank to aid developing nations move away from using chloroflurocarbon gases, or CFCs, which damage the ozone layer.

Scientists say that damage to the ozone layer threatens the Earth's delicate atmosphere, essential to human survival.

CFCs are used in aerosols, insulating polystyrene, foams, cleaning solvents and refrigerators.

British Prime Minister Margaret Thatcher told environment ministers and representatives from nearly 100 countries at the conference that taking measures to save the ozone layer was essential +even though the cost may be high+.

"We have to keep looking for alternatives that do not damage the ozone

layer," she said.

Thatcher said that the world +cannot wait+ and that governments must apply strict regulations to protect the environment.

She announced that Britain would contribute dlrs 9 million towards helping developing nations avoid the use of CFCs and added that Britain had been in the forefront in the fight against the damage to the ozone layer, both in the scientific and diplomatic fields.

At the opening of the three-day London conference Wednesday, Thatcher received the United Nations Environment Program (UNEP) award for her contribution towards helping preserve the world's ecology.

UNEP Executive Director Mustafa Tolba said that Thatcher had given environmental problems a priority rating on the world stage.

The delegates are to discuss proposals for a worldwide ban on CFCs and the Scandanavian countries are to push for the elimination of the gases to be speeded up with a pledge to reduce levels by 85 per cent by 1995.

The United States and Japan, the world's two most industrialized countries want the goal to be 50 per cent by that year.

CFCs destroy ozone gas some 100 km above the earth's surface which filters out harmful ultraviolet rays.

Radiation from the ultraviolet rays causes skin cancer and cataracts, damages the human immune system and upsets the eco-system.

In 1987, 56 countries signed the Montreal Protocol which pledged to halve CFC levels by 1996.

MOSCOW (JUNE 27) EFE - The Soviet republic of Azerbaijan will hold elections Sept. 2 for the regional parliament and representatives to the Supreme Soviet, the Soviet news agency TASS reported Wednesday.

In a session Tuesday, the USSR Supreme Soviet, the Soviet Union's national legislative body, scheduled the poll and determined that the new Azeri parliament will be composed of 360 deputies, rather than the current 450, TASS said.

Elections in the republic were delayed due to the state of emergency imposed there in January this year following ethnic violence between Azeris and minority Armenians.

Soviet troops marched into Baku, the Azeri capital, to quell rioting and stop violence against Armenians which has cost hundreds of lives over the past two years.

The military occupation has fueled nationalist sentiment in the Moslem republic, and the powerful nationalist Popular Front is expected to rally widespread support in the polls despite internal divisions in the movement.

#90178e0031 06/27/1990 ~Latin America New Agency

TEHRAN (JUNE 27) EFE - An Iranian military helicopter crashed Wednesday while helping rescue victims of last week's devastating earthquake, the official Iranian news agency IRNA reported.

The helicopter, with an unknown number of people aboard, crashed in the mountainous region of Kalishom in the northwestern Gilan province where the epicenter of the quake was located.

Rescue workers were still pulling survivors out from under the rubble Tuesday, five days after the quake struck, IRNA reported.

A six-year-old boy was found alive inside a refrigerator where he had survived, while surrounded by the bodies of his parents and five brothers who were buried under concrete blocks by Thursday's quake.

Workers also pulled a 40-year-old woman and her 10-year-old son out from beneath tons of rubble. They were alive but in critical condition.

The Interior Ministry says that rescue workers have retrieved 37,000 dead and 35,000 injured from the quake debris, while the Foreign Ministry estimates that 60,000 dead and 200,000 wounded will eventually be found, as do several foreign aid organizations.

An estimated 700,000 people have been left homeless by the disaster.

IRNA said Wednesday that the quake, which registered 7.3 on the open-ended Richter scale, had devastated 11,000 square km of land in the northwestern area where it struck.

At least 50 more seismic movements have been recorded three of them registering more than 4 points on the Richter scale in the quake area since Thursday, Tehran University reported.

Aid appeals have raised an estimated dlrs 43 million around the world.

China announced Wednesday it would send dlrs 630,000 worth in material aid.

Some 500 foreign doctors have now arrived along with about 175 planeloads of foreign emergency aid in the form of medicine, clothes and food have so far arrived and some 500 foreign doctors are now working with the injured.

According to the Iraqi news agency INA, Iraq is to send a plane Wednesday containing 24 tonnes of medical supplies, although it is still officialy at war with Iran.

Other Arab countries, such as Jordan, Saudi Arabia and Egypt have leapt at the opportunity to send aid in what observers see as an attempt to improve tense relations with the fundamentalist Islamic nation.

SAN SALVADOR (JUNE 27) EFE - An arrest warrant was issued Tuesday for a Salvadoran military officer suspected of ordering the burning of crucial evidence in the Jesuit murder case, a judicial spokesman said.

Lt. Col. Carlos Camilo Hernandez was charged with obstructing the investigation into the slaying of six Jesuit Priests, their housekeeper and her daughter on the campus of the Central American University in San Salvador last November.

At the time of the killings, Hernandez, 37, was the assistant director of the military academy, from which the killers allegedly set out on their mission.

He is suspected of ordering the burning of the school's entry and exit log book, to protect the suspected murderers.

The academy's former director, Col. Guillermo Benavides, has been arrested for allegedly ordering the slayings.

The massacre took place amid a massive leftist guerrilla on the capital.

-30- 1088

#90178e0047 06/27/1990 ~Latin America New Agency

SAN SALVADOR (JUNE 27) EFE - Leftist Salvadoran guerrillas claimed to have killed or wounded 40 soldiers Wednesday in an ambush on an Army convoy in eastern El Salvador, according to a broadcast on rebel Radio Venceremos.

Two military vehicles were destroyed by land mines in the attack by a colomn of Farabundo Marti National Liberation Front (FMLN) guerrillas near the town of Ilobasco, some 40 km east of the capital.

The rebels also claimed to have downed an Army helicopter that was backing up the soldiers.

Meanwhile, the Armed Forces Press Office, which made no mention of the Ilobasco incident, announced Wednesday that four soldiers and a civilian employee were killed a day earlier when the vehicle in which they were travelling crashed near the city of San Miguel, some 100 km east of the capital.

Week-long, United Nations-sponsored peace talks between Salvadoran government and FMLN representatives ended in Mexico last Monday without agreement.

However, both sides are to meet for five days of talks starting July 20 on ending the rebels' 10-year insurgency that has cost more than 75,000 lives.

#90178e0049 06/27/1990 ~Latin America New Agency

LIMA (JUNE 27) EFE - Peru's growing economic crisis has spread to the energy sector as oil and gas shortages combined with scarce electricity supplies, caused by the country's worst drought this century, threatens the nation with disaster, government officials said Wednesday.

Minister of Energy and Mines Mario Samame Boggio said that if it does not rain before November, the country's hydroelectric plants will cease to function and spark "a national tragedy."

Since November, electricity has been rationed in the capital and several other Peruvian cities where noisy generators supplying power to many businesses line the sidewalks.

Samame denied the shortage was caused by rebel attacks on electrical pylons, and blamed instead the country's lack of water which is lowering hydroelectric dam levels.

Meanwhile, severe gasoline shortages were causing long lines to form outside the country's service stations, many of which have already been depleted of their supplies.

The shortage had been blamed on speculators buying up gasoline supplies as the government Wednesday rose the price of regular gasoline 38.7 per cent and increased the price of super 41.3 per cent.

But Lima Governor Jacobo Mishkin Wednesday said speculation was minimal, and blamed the state-owned Petroleos of Peru oil and gas company for the shortage, which threatens to paralyze the nation's transport.

The price of Peruvian gasoline is still one of the lowest in the world, despite the government's increase.

#90178e0052 06/27/1990 ~Latin America New Agency

MANAGUA (JUNE 27) EFE - Leftist Sandinista-led trade unions representing 200,000 state workers called selective strikes starting Wednesday that threaten to undermine President Violeta Chamorro's bid to revive Nicargua's bankrupt economy.

The National Workers' Front (FNT-Sandinista) issued the strike call citing Chamorro's refusal to negotiate on claims for a minimum monthly wage of dlrs 200, and pay increases for the police and the Army, which are dominated by pro-Sandinista officers.

Other bones of contention were Chamorro's apparent refusal to pump money into reviving nationalized industries, fears over mass lay-offs among the large public-sector workforce and her pledge to cut the 85,000-strong Army by half to save on public spending.

The strike hit two large factories in the textile and construction sectors where more than 700 workers walked off the job, and union leaders warned that the stoppage could spread to banks, public transport, and the water and power industries.

Thousands of workers affiliated to the Sandinista unions held a six-day strike in May that brought the country to a virtual standstill after Chamorro suspended a law guaranteeing the jobs of public-sector employees.

The law was passed by the Sandinista government shortly before it handed over to Chamorro's conservative UNO coalition on April 25, two months after the Sandinistas had been heavily defeated in elections that ended their 11-year hold on power.

The magnitude of the Sandinistas' defeat was attributed to the impoverished state of the Nicaraguan economy, which had been brought to its knees by a five-year economic embargo imposed by Washington in a bid to force the leftists from power.

#90178e0055 06/27/1990 ~Latin America New Agency

BOGOTA (JUNE 27) EFE - Leaders of the Quintin Lame guerrilla group Wednesday ordered their forces to suspend all military action against the Colombian Armed Forces and the wider civilian population.

Gildardo Fernandez, commander of the Indian rebel group, met with government peace negotiators earlier in the day, and after brief talks on an agenda for demobilisation, the order was given for a cease-fire.

Rafael Pardo, President Virgilio Barco's special mediator between the government and the country's many guerrilla groups, promised to "prevent attacks against popular organizations like Quintin Lame".

The Quintin Lame group was formed in 1982 when Guambiano and Paez Indians in the southeastern Cauca department took up arms to stop the theft of their land by wealthy ranchers.

The cease-fire comes after a government initiative June 18.

As a gesture of good will, Quintin Lame guerrillas tracked down and rescued a town councillor kidnapped by bandits, bringing her, and two of her captors, to the first day of talks yesterday.

Last March the M-19 guerrill group ended 16 years of armed struggle and became a political party.

M-19 fielded a presidential candidate, Carlos Pizarro, who was assassinated. The second M-19 candidate, Antonio Navarro, put up at the last moment, garnered 12.5 per cent of the vote.

Negotiations are under way with the Maoist "People's Liberation Army" (EPL) and the Trotskyist Revolutionary Workers Party (PRT), in which representatives from Quintin Lame said they were prepared to play a part.

Colombia's two other main guerrilla forces, the National Liberation Army (ELN), and the Colombian Revolutionary Armed Forces (FARC) have so far refused government conditions for talks.

The government has demanded that before any talks could take place on political integration, the rebel groups must lay down their arms.

#90178h0023 06/27/1990 ~Chinese News Agency

BEIJING (JUNE 27) XINHUA - ALL PREPARATIONS FOR THE FOURTH POPULATION CENSUS IN THE CHINESE CAPITAL HAVE BEEN COMPLETED, A MUNICIPAL GOVERNMENT OFFICIAL TOLD XINHUA HERE TODAY.

ACCORDING TO ZHU YILIN, DIRECTOR OF THE BEIJING POPULATION CENSUS OFFICE, CENSUS TEAMS HAVE BEEN ESTABLISHED IN BEIJING'S 18 DISTRICTS AND COUNTIES AND ABOUT 8,000 NEIGHBORHOOD AND VILLAGE COMMITTEES SINCE LAST AUGUST.

SO FAR, OVER 50,000 CENSUS TAKERS AND ADVISORS WHO HAVE UNDERGONE STRICT

PROFESSIONAL TRAINING HAVE ARRIVED AT THEIR POSTS AND CHECKED THE HOUSEHOLD REGISTRATION BOOKS OF THE CITY'S 3.24 MILLION HOUSEHOLDS, INVOLVING A TOTAL OF 10.24 MILLION PEOPLE.

ZHU SAID THE CENSUS, TO START JULY 1, IS FACING TOUGH PROBLEMS COUNTING THE FLOATING POPULATION OF 1.3 MILLION PEOPLE WHO HAVE COME TO SEEK EMPLOYMENT IN THE CAPITAL AS A RESULT OF CHINA'S REFORM AND OPEN POLICY. ALSO, MANY HOUSEHOLDS HAVE MOVED TO NEW APARTMENTS BUT FAILED TO REPORT THEIR CHANGE OF RESIDENCE IN ORDER TO KEEP THEIR CHILDREN AT PREFERRED SCHOOLS OR FOR OTHER REASONS, HE NOTED.

BESIDES, THERE HAS BEEN AN INCREASING TREND OF FAILING TO REGISTER BIRTHS, AND MANY OTHER PROVINCES AND CITIES WHICH HAVE NOT REGISTERED THEIR OFFICES IN BEIJING HAVE ALSO CAUSED SOME DIFFICULTIES FOR THE CENSUS.

TO PROTECT PEOPLE'S PRIVACY, BEIJING WILL CONDUCT DOOR-TO-DOOR SURVEYS FOR THE FIRST TIME AND STRICT RULES HAVE BEEN WORKED OUT TO KEEP SECRET DETAILS OF MARRIAGES, PROPERTY AND BIRTHS.

THE WHOLE OPERATION WILL COST 15 MILLION YUAN, ZHU SAID. DURING THE LAST CENSUS, IN 1982, ALL THE QUESTIONNAIRES WERE COMPLETED AND RETURNED, ZHU SAID, ADDING, "WE HAVE EVERY REASON TO BELIEVE THAT THE FORTHCOMING FOURTH CENSUS WILL BE OF HIGH QUALITY."

ISLAMABAD (JUNE 27) XINHUA - THE PAKISTAN ARMY WILL CONTINUE TO ACT IN AID OF THE CIVIL ADMINISTRATION IN SIND PROVINCE IN SOUTHERN PAKISTAN TILL PEACE IS RESTORED THERE, ACCORDING TO LOCAL DAILY THE MUSLIM TODAY.

TROOPS WERE CALLED IN TO RESTORE ORDER IN KARACHI AND HYDERABAD AFTER WAVES OF ARMED VIOLENCE HIT THE TWO MAJOR CITIES OF SIND PROVINCE IN MID-MAY THAT KILLED HUNDREDS OF PEOPLE.

A MINISTRY OF DEFENSE SPOKESMAN WAS QUOTED AS SAYING TUESDAY IN A STATEMENT THAT THE ARMY WAS DEPLOYED ON THE REQUEST OF THE PROVINCIAL GOVERNMENT OF SIND TO HELP RESTORE PEACE IN THE PROVINCE AND AS SUCH IT WAS PERFORMING ITS CONSTITUTIONAL DUTY.

WHEN ASKED ABOUT THE PROPOSED PROVINCE-WIDE CLEAN-UP OPERATION TO APPREHEND TERRORISTS AND DACOITS, HE SAID IT WOULD BE JOINTLY LAUNCHED BY THE ARMY, RANGERS AND POLICE. THE PROVINCIAL GOVERNMENT WOULD DECIDE THE EXACT DATE OF THE OPERATION WHICH, ACCORDING TO HIM, MIGHT CONTINUE FOR AT LEAST THREE MONTHS.

THERE WAS NO TRUTH IN REPORTS SUGGESTING DIFFERENCES BETWEEN THE ARMED FORCES AND THE FEDERAL GOVERNMENT OVER THE MODALITIES OF THE ONGOING JOINT

OPERATION BY THE ARMY, RANGERS AND POLICE FOR THE MAINTENANCE OF PEACE IN SIND PROVINCE, THE SPOKESMAND SAID.

THE MUSLIM REPORTED THAT THE OPERATION WOULD BE LAUNCHED SOON AND THE MODALITIES OF THE OPERATION HAVE ALREADY BEEN FINALIZED ON THE DIRECTIONS OF PRIME MINISTER BENAZIR BHUTTO WHO HAVE ISSUED SPECIFIC INSTRUCTIONS THAT NO MERCY SHOULD BE SHOWN TO THE GANGSTERS FOUND RESPONSIBLE FOR KILLING AND LOOTING INNOCENT PEOPLE.

ALL CRIMINALS, NO MATTER TO WHICH POLITICAL GROUP THEY BELONG, SHOULD BE APPREHENDED AND SEVERELY PUNISHED, THE PRIME MINISTER IS SAID TO HAVE TOLD THE AUTHORITIES RESPONSIBLE FOR THE OPERATION.

ACCORDING TO LOCAL PRESS REPORTS, MORE THAN 4,500 SUSPECTS OF CRIMINALS OF DIFFERENT KINDS HAVE BEEN ARRESTED IN SIND PROVINCE IN THE LAST TWO MONTHS IN A BID OF THE GOVERNMENT TO CURB KIDNAPPING, LOOTING AND KILLINGS WHICH HAVE BEEN RAMPANT IN THE PROVINCE IN THE LAST FEW YEARS.

CANBERRA (JUNE 27) XINHUA - THE RECESSION IN AUSTRALIA'S BUILDING INDUSTRY HAS PUT MORE THAN 3,000 ARCHITECTS OUT OF WORK SINCE CHRISTMAS, AN AUSTRALIAN MEDIA REPORT SAID TODAY.

SACKED ARCHITECTS ARE NOW TAKING JOBS AS TAXI DRIVERS OR DOOR-TO-DOOR SALESMEN TO MAKE ENDS MEET, THE REPORT SAID.

FROM A SEVERE SHORTAGE OF ARCHITECTS JUST A YEAR AGO, THE PROFESSION IS EXPERIENCING A MASSIVE GLUT. IT WAS REPORTED THAT MANY PRACTICES HAVE SACKED UP TO ONE-THIRD OF THEIR STAFF IN THE PAST FEW MONTHS.

ACCORDING TO THE PRESIDENT OF THE ASSOCIATION OF CONSULTING ARCHITECTS, ROBERT PECK, MORE THAN 3,000 OF AUSTRALIA'S 17,000 ARCHITECTS AND DRAFTSMEN HAVE LOST THEIR JOBS SINCE THE START OF 1990.

"THEY GO AND DRIVE TAXIS. IT IS TRAGIC. THE PEOPLE AFFECTED ARE TYPICALLY 30 OR 40 WITH A MORTGAGE AND TWO KIDS," HE SAID.

THE QUEUES OF UNEMPLOYED ARCHITECTS SEEKING WORK ARE LENGTHENING AND THE JOB OPPORTUNITIES SHRINKING. JOHN BRADY, MANAGER OF THE SPECIALIST EMPLOYMENT AGENCY ARCHITECTURAL PERSONNEL, WAS QUOTED AS SAYING THAT THERE ARE 30 PERCENT FEWER JOBS GOING THAN SIX MONTHS AGO.

ONE 30-YEAR-OLD ARCHITECTURAL DRAFTSMAN, WHO DECLINED TO BE NAMED, WAS PUT OUT OF WORK SIX WEEKS AGO AND IS NOW DRIVING A TAXI PART-TIME. HE SAID, "I HAVE APPLIED TO ALL THE SPECIALIST AGENCIES. THEY TELL ME THEY ARE LUCKY TO PLACE MORE THAN ONE OR TWO PEOPLE A WEEK." ONLY THE MOST EXPERIENCED

DRAFTSMEN GET THE JOBS NOW, HE SAID.

NAIROBI (JUNE 27) XINHUA - A TWO-DAY EXPERTS' MEETING ON TRADE BETWEEN KENYA AND RWANDA OPENED HERE ON TUESDAY WITH A CALL FOR THE UPLIFT OF THE TRADE VOLUME BETWEEN THE TWO COUNTRIES.

OPENING THE MEETING, KENYAN MINISTER FOR COMMERCE MR. ARTHUR MAGUGU SAID THAT THE TWO COUNTRIES HAVE NOT MADE SIGNIFICANT PROGRESS IN TRADE BECAUSE THE ANNUAL VOLUME OF TRADE BETWEEN THEM HAS NOT EVEN EXCEEDED 30 MILLION U.S. DOLLARS.

THE KENYAN GOVERNMENT, HE NOTED, IS KEENLY PURSUING A PRAGMATIC IMPORT LIBERALIZATION POLICY WHICH ENTAILS REMOVAL OF NON-TARIFF BARRIERS IN IMPORT LICENSING AS WELL ENCOURAGEMENT OF LOCAL MERCHANTS TO SOURCE THEIR SUPPLIERS FROM THE PREFERENTIAL TRADE AGREEMENT AREA.

SPEAKING ON THE SAME OCCASION, RWANDAN MINISTER FOR COMMERCE AND CONSUMPTION MR. JUVENAL UWILINGIYIMANA CALLED FOR THE FURTHER PROMOTION AND DEVELOPMENT OF THE TRADE RELATIONS BETWEEN THE TWO COUNTRIES.

THE JOINT MEETING WILL DISCUSS WAYS TO INTENSIFY MUTUAL ECONOMIC COOPERATION BY STREAMLINING ADMINISTRATIVE PROCEDURES AND ELIMINATING TARIFF AND NON-TARIFF BARRIERS.

KENYA'S PRINCIPAL EXPORTS TO LAND-LOCKED RWANDA ARE PETROLEUM PRODUCTS WHILE RWANDA MAINLY EXPORTS TEA TO KENYA.

NAIROBI (JUNE 27) XINHUA - A KILLER DISEASE KNOWN AS "HIGHLAND MALARIA" HAS CLAIMED LIVES OF 134 PEOPLE SINCE IT BROKE OUT IN JANUARY, THIS YEAR, ACCORDING TO "DAILY NATION" TODAY.

THE ENGLISH NEWSPAPER QUOTED MR. ISHMAEL CHELANGA, COMMISSIONER OF THE UASIN-GISHU DISTRICT IN NORTHWESTERN KENYA, AS SAYING THAT MORE THAN 2,000 PEOPLE IN THE DISTRICT ARE BVEING TREATED DAILY AT VARIOUS DIVISIONS THROUGH MOBILE CLINICS.

THE SYMPTOMS OF THE DISEASE, HE ELABORATED, INCLUDE HIGH TEMPERATURE, BLACK URINE, VOMITING, DIARRHOEA AND PERSISTENT CRYING BY CHILDREN.

HE SAID THAT MEDICAL OFFICERS FROM THE KENYA MEDICAL RESEARCH INSTITUTE AND THE VECTOR DISEASE CONTROL UNIT OF THE MINISTRY OF HEALTH ARE ALREADY IN THE DISTRICT TO STUDY THE ROOT CAUSE OF THIS HIGHLY RESISTANT DISEASE.

THE DIRECTOR OF MEDICAL SERVICES, PROF. JOSEPH OLIECH, WAS QUOTED AS SAYING THAT THE WORST HIT AREAS ARE SOY AND MOIBEN DIVISIONS IN UASIN-GISHU DISTRICT.

ACCORDING TO MR. OLIECH, THE KILLER DISEASE IS SEASONAL AND THRIVES IN COLD WEATHER AND IN AREAS OF HIGH ALTITUTE.

BEIJING (JUNE 27) XINHUA - CHINESE VICE-PRESIDENT WANG ZHEN MET CHAD PRESIDENT HISSEIN HABRE HERE TODAY.

ENTRUSTED BY PRESIDENT YANG SHANGKUN, WANG EXTENDED A WARM WELCOME TO HABRE, WHO IS PAYING HIS FIRST OFFICIAL VISIT TO CHINA.

WANG TOLD HABRE THAT PRESIDENT YANG HAS UNDERGONE AN OPERATION FOR ACUTE APPENDICITIS AND HE IS IN GOOD CONDITION.

WANG APPRECIATED THE CHAD GOVERNMENT AND PEOPLE'S ACHIEVEMENTS IN MAINTAINING THEIR COUNTRY'S INDEPENDENCE AND SOVEREIGNTY, PROMOTING NATIONAL RECONCILIATION AND RESTORING AND DEVELOPING THE ECONOMY UNDER THE LEADERSHIP OF PRESIDENT HABRE.

HE SAID HE IS HAPPY TO SEE CHAD'S PROGRESS IN THE FIELD OF DIPLOMACY. WANG SAID CHINA'S POLITICAL SITUATION IS STABLE. CHINA'S AIM IS TO REALIZE ITS MODERNIZATION PROGRAM AND BUILD SOCIALISM WITH CHINESE CHARACTERISTICS.

HE SAID CHINA IS FULL OF CONFIDENCE IN ITS FUTURE. HE SAID HE IS SATISFIED WITH THE DEVELOPMENT OF CHINA-CHAD FRIENDLY RELATIONS OF COOPERTION. HE SAID CHINA ALWAYS ATTACHES IMPORTANCE TO ITS RELATIONS WITH CHAD AND IS WILLING TO DEVELOP FRIENDLY RELATIONS WITH CHAD ON THE BASIS OF THE FIVE PRINCIPLES OF PEACEFUL COEXISTENCE.

HE SAID HE WISHES PRESIDENT HABRE'S VISIT TO CHINA A SUCCESS. PRESIDENT HABRE THANKED VICE-PRESIDENT WANG FOR THE WARM WELCOME EXTENDED TO HIM IN CHINA AND WISHED PRESIDENT YANG A QUICK RECOVERY.

HE SAID HIS VISIT WILL PROMOTE THE DEVELOPMENT OF THE TWO COUNTRIES' RELATIONS.

THROUGH THIS VISIT, HABRE SAID, HE WILL GET A DEEPER UNDERSTANDING OF CHINA.

#90178h0035 06/27/1990 ~Chinese News Agency

HONG KONG (JUNE 27) XINHUA - THE INDONESIAN GOVERNMENT HAS DECIDED TO ACCELERATE DEVELOPMENT OF LOW-COST HOUSING FACILITIES TO HELP IMPROVE THE LIVING CONDITIONS OF SLUM DWELLERS IN MAJOR CITIES, ACCORDING TO A RECENT REPORT OF THE JAKARTA POST.

TO START THE HOUSING PROGRAM, THE INDONESIAN GOVERNMENT HAS DECIDED TO USE JAKARTA, THE CAPITIAL, WHERE SLUM AREAS EXCEEDED 4,600 HECTARES, AS A PILOT PROJECT THAT WOULD LAST FOR TWO YEARS, INDONESIAN STATE MINISTER FOR HOUSING SISWONO JUDO HUSODO WAS QUOTED AS TELLING REPORTERS IN JAKARTA LAST WEEK.

HE SAID THAT IN JAKARTA, APARTMENT BLOCKS ON AT LEAST FIVE SITES WOULD BE ESTABLISHED ESPECIALLY FOR INHABITANTS CURRENTLY LIVING IN SURROUNDING AREAS.

THESE SITES INCLUDE FORMER KEMAYORAN DOMESTIC AIRPORT IN CENTRAL JAKARTA, PULOGADUNG IN EAST JAKARTA, DURI UTARA IN WEST JAKARTA, AND PADEMANGAN BARAT IN NORTH JAKARTA.

IN TOTAL, OVER 9,000 HOME UNITS WOULD BE SET UP IN THE FOUR SITES, 7,000 UNITS OF THESE WOULD BE BUILT BY THE STATE-OWNED REAL ESTATE COMPANY PERUM PERUMNAS AT KEMAYORAN AT A COST OF 22.5 BILLION RUPIAHS (12.22 MILLION U.S. DOLLARS), ACCORDING TO SISWONO.

AT THE OTHER THREE SITES, THE SOCIAL WELFARE FOUNDATION (YDBKS) WOULD PROVIDE 30 BILLION RUPIAHS TO BUILD THREE APARTMENT BLOCKS WITH A TOTAL OF 2,028 UNITS.

SISWONO SAID A PRIVATE REAL ESTATE DEVELOPER WOULD ALSO ESTABLISH APARTMENTS COSTING ABOUT 15 BILLION RUPIAHS AT TANAH ABANG, CENTRAL JAKARTA.

HE SAID PRIVATE FIRMS WERE INVITED TO TAKE PART IN THE HOUSING PROGRAM BY SETTING UP APARTMENTS ON STATE-OWNED LAND, AND THE GOVERNMENT WOULD COMPENSATE FOR THE COST OF PROJECTS BY PROVIDING DEVELOPERS WITH PLOTS OF LAND THAT COULD BE DEVELOPED FOR COMMERCIAL USE.

THE HOUSES TO BE DEVELOPED COULD BE SOLD TO SURROUNDING RESIDENTS USING CREDIT WITH A MATURITY OF UP TO 20 YEARS OR COULD BE LEASED AT LOW RATES, SISWONO SAID.

THE MINISTER SAID THE APARTMENTS WERE NECESSARY TO IMPROVE THE WELFARE OF SLUM DWELLERS.

ABOUT 2.37 MILLION PEOPLE NOW LIVE IN SLUM AREAS IN JAKARTA, 900,000 IN SURABAYA, EAST JAVA, 438,000 IN SEMARANG, CENTRAL JAVA, AND 205,000 IN BANDUNG, WEST JAVA, THE JAKARTA POST NOTED.

#90178h0036 06/27/1990 ~Chinese News Agency
SINGAPORE (JUNE 27) XINHUA - THE SINGAPORE GOVERNMENT WILL RELAX THE LIMIT ON FOREIGN OWNERSHIP OF SHARES IN SINGAPORE BANKS TO 40 PERCENT FROM THE CURRENT 20 PERCENT.

IT WILL ALSO ALLOW FULL-LICENSED FOREIGN BANKS TO PROVIDE HOME BANKING SERVICES TO INDIVIDUALS VIA THE TELEPHONE AND PERSONAL COMPUTER.

AT PRESENT, FOREIGN BANKS ARE NOT ALLOWED TO OPEN MORE BRANCHES, INSTALL OFF-SITE AUTOMATED TELLER MACHINES OR PROVIDE CASHLESS SHOPPING SERVICES TO THEIR CUSTOMERS IN SINGAPORE.

THE RELAXATIONS WERE ANNOUNCED BY THE MANAGING DIRECTOR OF THE MONETARY AUTHORITY OF SINGAPORE (MAS) LEE EK TIENG AT AN ANNUAL DINNER OF THE ASSOCIATION OF BANKS HERE ON TUESDAY (JUNE 26).

IN VIEW OF THE GREATER MATURITY OF THE BANKING INDUSTRY, HE SAID, A RATIONALIZATION OF THE FOREIGN OWNERSHIP LIMIT FOR LOCALLY-INCORPORATED BANKS WAS CONSIDERED NECESSARY.

HOWEVER, HE SAID, THE EXISTING FIVE PERCENT OWNERSHIP LIMIT FOR A SINGLE OR RELATED GROUP OF FOREIGN SHAREHOLDERS IN A LOCAL BANK'S SHARES WILL REMAIN.

FINANCE COMPANIES WILL ALSO CONTINUE TO BE SUBJECT TO THE EXISTING 20-PERCENT FOREIGN OWNERSHIP LIMIT, BECAUSE THESE COMPANIES HAVE A SMALLER CAPITAL BASE, WHICH IS EASY FOR FOREIGNERS TO INCREASE THEIR STAKE IN SUCH COMPANIES, HE SAID.

THERE ARE CURRENTLY 13 LOCALLY-INCORPORATED BANKS AND 22 FOREIGN FULL-LICENSED BANKS IN SINGAPORE.

BEIJING (JUNE 27) XINHUA - MEMBERS OF THE STANDING COMMITTEE OF THE NATIONAL PEOPLE'S CONGRESS (NPC) TODAY CALLED ON PUBLIC SECURITY ORGANS TO RELY ON THE PEOPLE AND AROUSE THE MASSES TO ACTION TO SOLVE THE CRIME PROBLEM.

THEY MADE THE CALL AT THE 14TH MEETING OF THE NPC STANDING COMMITTEE TODAY AFTER HEARING A REPORT ON PUBLIC SECURITY WORK AND PUBLIC ORDER PRESENTED BY WANG FANG, MINISTER OF PUBLIC SECURITY.

THE REPORT SAID THAT THE LAW AND ORDER SITUATION IS BASICALLY STABLE. CHEN SUIHENG SAID THAT TO SOLVE THE PROBLEM OF LAW AND ORDER "WE SHOULD NOT

ONLY TAKE STRONG MEASURES AGAINST CRIMINAL OFFENDERS, BUT ALSO PRACTISE THE POLICY OF COMBINING THE EFFORTS OF THE PUBLIC SECURITY DEPARTMENTS AND THE MASSES."

ZHANG SHIWANG SAID THAT PENALTIES FOR CRIMINAL ACTS HAVE BEEN TOO LIGHT ON THE PAST. HE APPEALED FOR AN AMENDMENT TO THE CRIMINAL LAW IN THIS REGARD.

#90178h0047 06/27/1990 ~Chinese News Agency

CANBERRA (JUNE 27) XINHUA - AUSTRALIAN FOREIGN MINISTER GARETH EVANS TODAY REITERATED AUSTRALIAN GOVERNMENT'S STRONG OPPOSITION TO THE FRENCH NUCLEAR TEST PROGRAM IN FRENCH POLYNESIA.

THE AUSTRALIAN SEISMOLOGICAL CENTRE TODAY CONFIRMED THAT AN UNDERGROUND NUCLEAR EXPLOSION TOOK PLACE IN FRENCH POLYNESIA AT 18:00 HOURS UNIVERSAL TIME ON JUNE 26.

THE YIELD OF THE EXPLOSION WAS ASSESSED AS BEING WITHIN THE RANGE OF 40-150 KILOTONNES OF TNT, ACCORDING TO A NEWS RELEASE BY THE FOREIGN AFFAIRS DEPARTMENT.

THE EXPLOSION WAS THE THIRD FRENCH NUCLEAR TEST TO HAVE TAKEN PLACE IN 1990, WITH THE FIRST OCCURRING ON 3 JUNE AND THE SECOND ON 8 JUNE. EIGHT SIMILAR TESTS HAD BEEN DETECTED IN 1989.

EVANS SAID IT WAS DEEPLY DISAPPOINTING THAT THE FRENCH NUCLEAR TESTS PROGRAM CONTINUED IN 1990 IN THE FACE OF THE STRONG AND WIDE-SPREAD OPPOSITION OF THE STATES OF THE REGION.

BEIJING (JUNE 27) XINHUA - CHINESE PREMIER LI PENG HELD TALKS HERE TODAY WITH CHADIAN PRESIDENT HADJ HISSEIN HABRE.

DURING THE TALKS, LI PENG SAID THE CURRENT INTERNATIONAL SITUATION IS UNDERGOING GREAT CHANGES, AND RELATIONS BETWEEN EAST AND WEST ARE BECOMING

RELAXED, LESSENING REGIONAL CONFLICTS.

MEANWHILE, LI SAID, HEGEMONISM AND POWER POLITICS ARE BECOMING MORE CONSPICUOUS. THE DEVELOPING COUNTRIES FACE AN INCREASINGLY HARSH SITUATION AND THEREFORE MUST STRENGTHEN THEIR UNITY AND COOPERATION.

DISCUSSING THE CURRENT INTERNATIONAL ECONOMIC RELATIONS WHICH ARE NOT JUST AND RATIONAL ENOUGH, LI PENG SAID THAT THEIR MAIN MANIFESTATIONS ARE EXCHANGES OF UNEQUAL VALUE AND HEAVY DEBTS.

THE CHINESE GOVERNMENT MAINTAINS THAT THE DEVELOPING COUNTRIES SHOULD STRENGTHEN MUTUAL AID AND ECONOMIC COOPERATION AND MAKE JOINT EFFORTS TO ESTABLISH A NEW INTERNATIONAL ECONOMIC ORDER, HE SAID.

LI EXPRESSED SATISFACTION WITH THE GROWING SINO-CHADIAN RELATIONS AND AN APPRECIATION FOR CHAD'S CORRECT DOMESTIC AND FOREIGN POLICIES UNDER THE LEADERSHIP OF PRESIDENT HABRE.

LI SAID THE CURRENT SITUATION IN SOUTHERN AFRICA IS DEVELOPING IN A POSITIVE DIRECTION, A RESULT INSEPARABLE FROM CHAD'S EFFORTS.

DESCRIBING RELATIONS BETWEEN CHAD AND CHINA AS GROWING SMOOTHLY, HABRE SAID HIS CURRENT VISIT IS AIMED AT CONSOLIDATING AND STRENGTHENING THE FRIENDLY, COOPERATIVE BILATERAL RELATIONS.

UNDER THE CURRENT CIRCUMSTANCES, HE SAID, IT IS NECESSARY AND NATURAL FOR CHAD TO STRENGTHEN RELATIONS WITH CHINA, ADDING THAT IT IS IMPORTANT FOR THE THIRD WORLD COUNTRIES TO STRENGTHEN THEIR UNITY AND COOPERATION.

THROUGH THEIR TALKS, PREMIER LI AND PRESIDENT HABRE ACHIEVED CONCENSUS ON A WIDE RANGE OF TOPICS IN INTERNATIONAL SITUATION AND HAD A DETAILED DISCUSSION ABOUT FURTHERING BILATERAL ECONOMIC COOPERATION.

DURING THE TALKS, PREMIER LI DISCLOSED THAT CHINESE PRESIDENT YANG SHANGKUN HAD BEEN HOSPITALIZED ON MONDAY FOR A MINOR OPERATION FOR AN ACUTE APPENDICITIS.

LI, CALLING THE OPERATION VERY SUCCESSFUL, SAID HE VISITED PRESIDENT YANG IN THE HOSPITAL YESTERDAY, ADDING THAT HE IS VERY WELL AND RECOVERING.

LI PENG SAID PRESIDENT YANG ASKED HIM TO CONVEY HIS REGARDS TO PRESIDENT HABRE.

HABRE EXPRESSED HIS WISH FOR PRESIDENT YANG'S RAPID RECOVERY AND ASKED PREMIER LI TO CONVEY HIS REGARDS TO PRESIDENT YANG.

TOKYO (JUNE 27) XINHUA - INDONESIAN FOREIGN MINISTER ALI ALATAS SAID HERE TODAY HIS COUNTRY WILL NORMALIZE RELATIONS WITH CHINA SOON AFTER A 23-YEAR DISCONTINUANCE.

ALATAS MADE THE REMARKS WHEN HE MET HIS JAPANESE COUNTERPART TARO NAKAYAMA GOVERNMENT SOURCES SAID.

HE IS SCHEDULED TO VISIT CHINA FROM JULY 1 AND WILL BECOME THE HIGHEST-LEVEL INDONESIAN GOVERNMENT OFFICIAL TO VISIT CHINA SINCE INDONESIA SUSPENDED RELATIONS WITH CHINA IN 1967.

THE CONCRETE TIMING OF THE NORMALIZATION WILL BE TAKEN UP IN HIS COMING TALKS IN BEIJING WITH CHINESE FOREIGN MINISTER QIAN QICHEN, ALATAS ADDED.

ALATAS WAS QUOTED AS SAYING HIS VISIT TO CHINA REPRESENTS "THE FINAL STAGE OF THE NORMALIZATION PROCESS."

INDONESIA AND CHINA AGREED TO BEGIN THE NORMALIZAITON PROCESS IN FEBRUARY LAST YEAR WHEN INDONESIAN PRESIDENT SOEHARTO MET QIAN IN TOKYO WHILE ATTENDING THE FUNERAL OF THE LATE EMPEROR HIROHITO.

ALATAS ARRIVED HERE FROM SOUTH KOREA ON TUESDAY AND WILL LEAVE FOR HONGKONG ON FRIDAY.

#90178h0050 06/27/1990 ~Chinese News Agency

NEW DELHI (JUNE 27) XINHUA - INDIA WAS URGED TO DEVELOP AN AIR-LAUNCHED CRUISE MISSILE SYSTEM IN ORDER TO CREATE AN "EFFECTIVE STRATEGIC SECURITY SHIELD AGAINST POTENTIAL ADVERSARIES."

THIS WAS SUGGESTED BY ANALYST SANGO PANWAR IN AN ARTICLE IN THE LATEST ISSUE OF THE STRATEGIC ANALYSIS, BROUGHT OUT BY THE INSTITUTE FOR DEFENSE STUDIES AND ANALYSES.

THE CRUISE MISSILE SYSTEM, HE SAID, BUILT AROUND THE INDIAN "AGNI" IRBM, WILL OFFER TREMENDOUS FLEXIBILITY IN CASE THE LAND-BASED STRATEGIC DETERRENT BUILT AROUND THE AGNI IS THREATENED BY CRIPPLING FIRST STRIKE FROM INDIA'S POTENTIAL ADVERSARIES.

THE IMPORTANCE OF THE CRUISE MISSILE HAS BEEN RECOGNIZED BY THE DEFENSE RESEARCH AND DEVELOPMENT ORGANIZATION (DRDO), AND THE INFRASTRUCTURE IS ALSO LARGELY AVAILABLE WITHIN THE COUNTRY, THE ARTICLE SAID.

THE PILOTLESS TARGET AIRCRAFT MADE BY THE AERONAUTICAL DEVELOPMENT ESTABLISHMENT CAN BE A GOOD STARTING POINT TO BEGIN THE DEVELOPMENT OF A CRUISE MISSILE SYSTEM.

AMONGST THE FOUR MISSILES NOW BEING DEVELOPED BY THE DEFENSE RESEARCH AND DEVELOPMENT LABORATORY, THE PRITHVI AND THE TRISHUL ARE EXPECTED TO REACH THE PRODUCTION STAGE EARLIEST.

THE SHORT-RANGE SURFACE-TO-AIR MISSILE, THE TRISHUL IS LIKELY TO BE THE MOST UBIQUITOUS OF ALL THE DRDO MISSILES AS IT HAS THE ENTIRE SPECTRUM OF LIKELY APPLICATIONS OPEN FOR IT.

APART FROM BEING AN SAM SYSTEM, IT CAN BE EMPLOYED AS AN ANTI-SEA SKIMMER MISSILE, AND IS LIKELY TO BE EMPLOYED BY ALL THE THREE DEFENSE FORCES IN VARIOUS INCARNATIONS.

THIS "PATRIOT" TYPE TRANSPORTABLE MISSILE WILL HAVE A PHASED-ARRAY RADAR AT COMMAND LEVEL TO PROVIDE JAM-FREE GUIDANCE WHILST THERE IS A SEPARATE ARRANGEMENT FOR TERMINAL GUIDANCE.

BEIJING (JUNE 27) XINHUA - THE ON-GOING 14TH MEETING OF THE NATIONAL PEOPLE'S CONGRESS (NPC) STANDING COMMITTEE CONVENED HERE TODAY IN FULL SESSION.

NPC STANDING COMMITTEE CHAIRMAN WAN LI AND THE COMMITTEE'S VICE-CHAIRMEN, INCLUDING RONG YIREN, WHO JUST RETURNED FROM ABROAD, ATTENDED THE SESSION, PRESIDED OVER BY VICE-CHAIRWOMAN LEI JIEQIONG.

PARTICIPANTS LISTENED TO REPORTS ON THE DRAFT NATIONAL FLAG LAW AND THE EXAMINATION OF THE FINAL STATE ACCOUNTS FOR 1989.

XIANG CHUNYI, VICE-CHAIRMAN OF THE NPC LAW COMMITTEE, EXPLAINED THE REVISED DRAFT OF THE NATIONAL FLAG LAW AND SUGGESTED ITS APPROVAL.

LI PENG, VICE-CHAIRMAN OF THE NPC FINANCE AND ECONOMIC COMMITTEE, DELIVERED THE REPORT ON THE EXAMINATION OF THE FINAL STATE ACCOUNTS FOR 1989.

CALLING THE 1989 STATE BUDGET BASICALLY SATISFACTORY, VICE-CHAIRMAN LI SAID HIS COMMITTEE SUGGESTED THE APPROVAL OF BOTH THE FINAL STATE ACCOUNTS FOR 1989 AND THE REPORT ON THE ACCOUNTS GIVEN BY STATE COUNCILLOR AND MINISTER OF FINANCE WANG BINGQIAN.

SOME MEMBER OF THE NPC STANDING COMMITTEE VOICED OPINIONS ON OTHER ISSUES, INCLUDING PUBLIC SECURITY, THE PROTECTION OF THE RIGHTS AND INTERESTS OF RETURNED OVERSEAS CHINESE AND THE RELATIVES OF NATIONALS LIVING ABROAD.

HONG KONG (JUNE 27) XINHUA - SINGAPORE WILL SET UP AN ARTIFICIAL INTELLIGENCE CENTER WITH THE JAPANESE GOVERNMENT, ACCORDING TO AN OANA BERNAMA REPORT MONDAY.

THIS IS THE FIRST TIME THE JAPANESE GOVERNMENT IS EXTENDING HELP OUTSIDE JAPAN IN THE AREA OF ARTIFICIAL INTELLIGENCE, THE REPORT SAID.

THE CENTER WILL BE IMPLEMENTED BY SINGAPORE'S NATIONAL COMPUTER BOARD AND THE JAPAN INTERNATIONAL COOPERATION AGENCY (JICA).

THE CENTER, A FIVE-YEAR PROJECT, WILL BE SET UP AT THE SCIENCE PARK IN JURONG.

JICA WILL CONTRIBUTE HARDWARE, SOFTWARE AND ARTIFICIAL INTELLIGENCE EXPERTS WHILE SINGAPORE WILL PROVIDE THE INSTRUCTORS AND FACILITATES AND PAY FOR THE OPERATION COSTS OF THE CENTER, JICA RESIDENT REPRESENTATIVE IN SINGAPORE ISHIZAKI WAS QUOTED AS SAYING.

THE PROJECT IS EXPECTED TO COST ABOUT 20 MILLION SINGAPORE DOLLARS (10.86 MILLION U.S. DOLLARS).

JICA WILL TRAIN 20 SINGAPORE INSTRUCTORS IN JAPAN FROM SEPTEMBER, AND ON THEIR RETURN, THEY WILL WORK CLOSELY WITH JAPANESE EXPERTS TO DEVELOP THE COURSE CURRICULUM FOR THE CENTER, ACCORDING TO ISHIZAKI.

THE PROGRAMS WILL START FROM THE THIRD QUARTER OF NEXT YEAR, HE SAID. THERE WILL BE FOUR PROGRAMS, RANGING FROM A THREE-DAY COURSE FOR SENIOR MANAGERS TO A SIX-MONTH COURSE TO TRAIN PROFESSIONALS TO DEVELOP EXPERT SYSTEMS.

#90178h0056 06/27/1990 ~Chinese News Agency

TEHRAN (JUNE 27) XINHUA - IRAN'S AGRICULTURE MINISTRY WOULD GATHER IN THE CROPS IN THE QUAKE-HIT AREAS WHILE SOME PROVINCES HAVE PLEDGED TO TAKE UP THE RESPONSIBILITY OF RECONSTRUCTING THE RUINED TOWNS AND VILLAGES.

LARGE TRACTS OF FARMLAND IN NORTHWESTERN IRAN WERE LEFT OWNERLESS AFTER THE WORST QUAKE IN DECADES HIT THE AREAS LAST THURSDAY, ACCORDING TO A STATEMENT ISSUED BY THE AGRICULTURE MINISTRY ON TUESDAY.

THE MINISTRY WOULD BE RESPONSIBLE FOR HARVESTING 10,000 HECTARES OF RICE FIELDS, 10,000 HECTARES OF WHEAT FARMLAND AND 10,000 HECTARES OF ORCHARDS IN GILAN AND ZANJAN, THE TWO HARDEST HIT PROVINCES AMONG THE SIX AFFECTED ONES.

THE TREMOR, MEASURING 7.3 DEGREES ON THE RICHTER SCALE, SHOOK AN AREA OF 785,000 SQUARE KILOMETERS, INFLICTING DAMAGE TO TOWNS AND VILLAGES IN AN AREA OF 11,000 SQUARE KILOMETERS.

IT CLAIMED MORE THAN 50,000 LIVES, WOUNDED HUNDREDS OF THOUSANDS OF OTHERS AND LEFT ABOUT HALF A MILLION PEOPLE HOMELESS.

A TOTAL OF 1,500 VILLAGES WITH A POPULATION OF 734,000, SUSTAINED VARIOUS DAMAGE, WITH SOME OF THEM BEING COMPLETELY WIPED OUT, EARLIER REPORTS SAID.

MEANWHILE, MORE THAN 150,000 HEADS OF CATTLE WERE ALSO KILLED IN THE TWO PROVINCES, THE AGRICULTURE MINISTRY ANNOUNCED.

THE CROPS FROM THE OWNERLESS FARMLAND WOULD BE SOLD TO COOPERATIVE ORGANIZATIONS AFTER HARVESTING, THE MINISTRY SAID.

PESTICIDES WOULD BE DISTRIBUTED FREE OF CHARGE TO THE FARMERS WHO SURVIVED THE QUAKE, BUT THE MINISTRY DID NOT MAKE IT CLEAR IF THE OWNERLESS LAND WOULD BE REDISTRIBUTED.

CROP LOSSES COULD NOT BE ESTIMATED EXACTLY RIGHT NOW, HOWEVER, THE NEEDS COULD BE LISTED FOR THE RECONSTRUCTION OF THE DAMAGED IRRIGATION SYSTEMS IN THE REGIONS.

ACCORDING TO OFFICIAL REPORTS, SEVERAL SMALL AND BIG RESERVOIRS USED FOR AGRICULTURAL PURPOSES SUFFERED DAMAGE IN VARYING DEGREES IN GILAN PROVINCE AFFECTING CROPS GROWING IN THE PROVINCE.

MEANWHILE, YAZD PROVINCE IN CENTRAL IRAN ANNOUNCED ON TUESDAY THAT IT

WOULD BUILD 1,000 NEW HOMES FOR THE SURVIVORS IN THE QUAKE-HIT AREAS AT A COST OF 8 BILLION RIALS (OVER 110 MILLION DOLLARS).

AT LEAST 5,000 NEW HOMES ARE NEEDED TO RESETTLE THE HOMELESS, IT WAS ANNOUNCED.

THE CENTRAL PROVINCE ALSO STATED THAT IT WOULD FINANCE THE RECONSTRUCTION OF RUSTAM ABAD AND ROUDBAR, TWO OF THE MOST SEVERELY HIT TOWNS BY THE QUAKE.

TECHNICAL TEAMS WOULD BE DISPATCHED TO THE REGIONS SOON TO EXPLORE THE WAYS OF RECONSTRUCTION.

RECONSTRUCTION PLANS ARE UNDER CONSIDERATION AS THE RESCUE OPERATIONS HAVE BEEN CARRIED OUT FOR SIX DAYS AFTER THE STRONG QUAKE.

FOREIGN RESCUE TEAMS WERE SAID TO CONSIDER WITHDRAWING FROM IRAN SINCE THE HOPE FOR SAVING THOSE STILL TRAPPED ALIVE IN DEBRIS FADED.

HOWEVER, THEY MAY BE ENCOURAGED TO CONTINUE THEIR SEARCH AFTER FOUR RESIDENTS IN KELISHOM AND VIEH VILLAGES OF THE ROUDBAR REGION WERE DUG OUT ALIVE ON TUESDAY.

IRAN'S OFFICIAL NEWS AGENCY IRNA REPORTED TODAY THAT A FAMILY OF THREE WERE FOUND ALIVE IN ANOTHER VILLAGE OF THE SAME REGION AFTER BEING TRAPPED IN DEBRIS FOR SIX DAYS.

NEW DELHI (JUNE 27) XINHUA - THE INDIAN GOVERNMENT IS EXPECTED TO GIVE A FORMAL CLEARANCE TO INDIAN AIRLINES (IA) TO OPERATE THE A-320S ON CERTAIN TRUNK ROUTES AS A CARGO SERVICE, LOCAL PRESS REPORTED TODAY.

THE DECISION TO OPERATE THE A-320S AS CARGO CARRIERS IS BASICALLY TO GIVE THE PILOTS AND TECHNICAL PERSONNELS AN OPPORTUNITY TO REACQUAINT THEMSELVES IN OPERATING THE NEW GENERATION AIRCRAFT AFTER A RECORD PERIOD OF GROUNDING, AVIATION SOURCES TOLD REPORTERS IN BOMBAY ON TUESDAY.

IT MAY BE RECALLED THAT ALL OF INDIA'S 14 A-320S WITH IA WERE GROUNDED FOR SAFETY REASONS IN THE WAKE OF THE CRASH OF AN A-320 AIRCRAFT IN THE SOUTHERN CITY OF BANGALORE ON FEBRUARY 14 THIS YEAR.

HOWEVER, THE INDIAN GOVERNMENT ALLOWED IA TO LEASE-CUM-SALE THE 14 GROUNDED A-320S AND THE FOUR A-320S READY FOR DELIVERY AT TOULOUSE IN FRANCE IN MAY. BUT THE RESPONSE TO THE LEASE PROPOSAL WAS REPORTED TO BE INADEQUATE, THOUGH THERE WERE FAVORABLE ENQUIRIES ON THE SALE OF THE FOUR NEW AIRCRAFT WHICH HAVE BEEN READY FOR DELIVERY FOR QUITE SOME TIME.

IA HAS BEEN ACCUMULATING LOSSES UP TO 25 MILLION RUPEES (1.47 MILLION U.S. DOLLARS) PER WEEK FOLLOWING THE GROUNDING OF THE A-320S. THE RECENT DECISION TO OPERATE THE AIRCRAFT AS A CARGO CARRIER IS EXPECTED TO GIVE AN OPPORTUNITY TO IA AT LEAST TO MITIGATE THE LOSSES.

BEIJING (JUNE 27) XINHUA - FOUR VETERAN REVOLUTIONARIES SAID THAT CHINA SHOULD ADHERE TO THE POLICY OF REFORM AND OPENING TO THE OUTSIDE WORLD WHILE CARRYING FORWARD THE FINE TRADITIONS OF THE COMMUNIST PARTY OF CHINA (CPC).

IN AN INTERVIEW WITH XINHUA, WU XIUQUAN, 82, MEMBER OF THE STANDING COMMITTEE OF THE CENTRAL ADVISORY COMMISSION OF THE CPC, SAID THAT ONE OF THE MOST IMPORTANT TRADITIONS OF THE CPC IS TO SERVE THE PEOPLE WHOLE-HEARTEDLY. REFORM AND OPENING TO THE OUTSIDE WORLD DOES NOT MEAN ALTERATION OF THE PARTY'S FINE TRADITIONS. SO LONG AS EVERY COMMUNIST PARTY MEMBER SERVES THE PEOPLE WHOLEHEARTEDLY, THE PARTY WITH 49 MILLION MEMBERS WILL BE ABLE TO LEAD HUNDREDS OF MILLIONS OF PEOPLE TO MARCH FORWARD.

WANG SHOUDAO, 84, SAID THE REASON THE COMMUNIST PARTY OF CHINA HAS SUCH STRONG VITALITY AND ENJOYS THE SUPPORT OF THE PEOPLE IS THAT THE PARTY'S ROOTS ARE AMONG THE MASSES AND IT STRIVES TO PROTECT THE WELFARE AND INTERESTS OF THE PEOPLE. WANG IS A FORMER SECRETARY OF THE HUNAN PROVINCIAL PARTY COMMITTEE, SECRETARY OF THE CENTRAL-SOUTH PARTY BUREAU, MINISTER OF COMMUNICATIONS, SECRETARY OF THE GUANGDONG PROVINCIAL PARTY COMMITTEE AND VICE-CHAIRMAN OF THE NATIONAL COMMITTEE OF THE CHINESE PEOPLE'S POLITICAL CONSULTATIVE CONFERENCE. HE IS NOW A MEMBER OF THE STANDING COMMITTEE OF THE CENTRAL ADVISORY COMMISSION OF THE CPC.

GENERAL XIAO KE, 82, MEMBER OF THE STANDING COMMITTEE OF THE CENTRAL ADVISORY COMMISSION OF THE CPC, HOPES THAT ALL MEMBERS OF THE COMMUNIST PARTY MAINTAIN THE WORK STYLE OF HARD STRUGGLE AND PLAY AN EXEMPLARY ROLE IN THE SOCIALIST MODERNIZATION DRIVE.

CHENG ZIHUA, 85, ALSO MEMBER OF THE STANDING COMMITTEE OF THE CENTRAL ADVISORY COMMISSION OF THE CPC, SAID THAT THE CENTRAL COMMITTEE OF THE CPC HEADED BY JIANG ZEMIN HAS ADHERED TO REFORM AND OPENING TO THE OUTSIDE WORLD AS WELL AS CARRIED FORWARD THE FINE TRADITIONS OF THE PARTY, ACHIEVING GREAT SUCCESSES. HE SAID THAT OVER THE YEARS, THE PARTY HAS OVERCOME COUNTLESS DIFFICULTIES AND HARDSHIPS, ACHIEVING VICTORIES ONE AFTER ANOTHER. "THE FUNDAMENTAL REASON IS THAT THE PARTY HAS MAINTAINED ITS FINE TRADITIONS AND ITS FLESH-AND-BLOOD TIES WITH THE MASSES, AND THEREFORE, ENJOYED THE SUPPORT OF THE PEOPLE," HE SAID.

MANILA (JUNE 27) XINHUA - PHILIPPINE PRESIDENT CORAZON AQUINO TODAY DIRECTED POLICE CHIEF MAJ. GEN. CESAR NAZARENO TO IMMEDIATELY FILE CRIMINAL CHARGES AGAINST FIVE SUSPECTED POLICEMEN WHO WERE INVOLVED IN THE KIDNAPPING AND KILLING OF TWO UNIVERSITY STUDENTS.

MRS AQUINO, IN A WRITTEN STATEMENT, ALSO DIRECTED MAJ. GEN. NAZARENO, PHILIPPINE CONSTABULARY CHIEF, TO COMMENCE SUMMARY DISMISSAL PROCEEDINGS AGAINST ALL THOSE INVOLVED IN THE HEINOUS CRIME.

THE TWO STUDENTS, MS. ANA LOURDES CASTANOS AND HER BOYFRIEND ERNESTO BERNABE, OF THE UNIVERSITY OF THE PHILIPPINES WERE KIDNAPPED AND TORTURED TO DEATH ALLEGEDLY BY A NUMBER OF POLICEMEN TWO MONTHS AGO.

THE DECOMPOSING BODY OF BERNABE WAS FOUND LAST MONDAY AT A SHALLOW GRAVE AT THE SUBDIVISION WHILE THAT OF MS. CASTANO WAS DUG UP TUESDAY IN ANOTHER GRAVE ABOUT 500 METERS AWAY.

THEY WERE BURIED WITH THEIR HANDS TIED TO THEIR BACKS WITH WIRES AND THEIR HEADS WRAPPED WITH MASKING TAPE. THEIR HEADS WERE BASHED IN.

PROBERS HAVE NOT YET COME UP WITH THEIR THEORY ON THE MOTIVE FOR THE MURDER, BUT MS. CASTANOS WAS REPORTEDLY A WITNESS TO A RECENT MURDER IN A HOUSE SOMEWHERE IN QUEZON CITY, METRO MANILA.

BEIJING (JUNE 27) XINHUA - CHINA'S CHEMICAL EXPORTS INCREASED AT AN ANNUAL RATE OF 23.5 PERCENT OVER THE PAST FOUR YEARS, LIN YINCAI, VICE-MINISTER OF CHEMICAL INDUSTRY, ANNOUNCED TODAY.

THE COUNTRY EXPORTED 2.09 BILLION U.S. DOLLARS WORTH OF CHEMICALS IN 1989, LIN REPORTED AT A NATIONAL CONFERENCE ON CHEMICAL EXPORTS, WHICH OPENED HERE TODAY.

CHINA NOW EXPORTS 138 TYPES OF CHEMICALS TO MORE THAN 100 COUNTRIES AND REGIONS.

LIN SAID THE INDUSTRY STILL FACES MANY PROBLEMS, INCLUDING AN ADVERSE BALANCE OF TRADE, AN IRRATIONAL EXPORT STRUCTURE AND A LACK OF OVERALL CONTROL OF CHEMICAL EXPORTS BY THE STATE.

LIN CALLED FOR EFFORTS TO KEEP ABREAST OF INTERNATIONAL MARKET INFORMATION IMPROVE MANAGEMENT AND TECHNOLOGY, AND MAINTAIN STABLE, SUSTAINED AND COORDINATED DEVELOPMENT.

HANOI (JUNE 27) XINHUA - DELEGATES OF THE VIETNAMESE NATIONAL ASSEMBLY ARE WORRIED ABOUT THE CURRENT POLITICAL AND SOCIAL SITUATIONS IN THE COUNTRY, ACCORDING TO A PRESS REPORT HERE TODAY.

THE CURRENT SEVENTH SESSION OF THE EIGHTH NATIONAL ASSEMBLY OF VIETNAM HEARD YESTERDAY A ROUND-UP OF OPINIONS FROM LOCAL DELEGATIONS ON THE REPORT OF THE COUNCIL OF MINISTERS ON ECONOMIC AND SOCIAL DEVELOPMENTS IN

THE FIRST SIX MONTHS.

THE ROUND-UP SAID THAT THE DELEGATES AGREED THAT THERE HAD BEEN SOME PROGRESS IN AGRICULTURAL PRODUCTION, PRICE STABILIZATION AND EXPORT BUSINESS. BUT THEY WERE GENERALLY OF THE VIEW THAT THE REPORT OF THE COUNCIL OF MINISTERS "FAILED TO GIVE A CLEAR ACCOUNT OF THE TRUE SITUATION IN THE COUNTRY", "WAS NOT SERIOUS ENOUGH" AND "CONTAINED A CERTAIN AMOUNT OF WHITE-WASHING".

IT SAID, "IT SHOULD BE NOTICED THAT THE SITUATION REMAINS FAR MORE DIFFICULT AND HAS BECOME EVEN GRAVER IN SOME DOMAINS, AND THAT PRODUCTION IN SOME SECTORS IS STAGNANT OR DECLINING."

THE ROUND-UP LISTED SOME OF THE "WORRISOME" MATTERS SUCH AS SERIOUS SHORTAGES OF CHEMICAL FERTILIZER, A GENERAL DECLINE IN PRODUCTION IN INDUSTRY AND HANDICRAFT WITH THE EXCEPTION OF ONLY A FEW UNITS, THE EXISTENCE OF VERY TOUGH PROBLEMS IN BANKING, FINANCE AND THE BALANCE OF PAYMENTS IN THE NATIONAL BUDGET, AND THE FAILURE TO SOLVE BASIC PROBLEMS IN SOCIAL, CULTURAL AND EDUCATIONAL WORK AND THOSE WITH MOUNTAINOUS REGIONS.

MOSCOW (JUNE 27) XINHUA - THE SOVIET UNION IS CARRYING OUT THE UNILATERAL DISARMAMENT DECISION CONSCIENTIOUSLY AND HAS SO FAR CUT ITS TROOPS BY 300,000 MEN.

SOVIET DEFENSE MINISTER DMITRY YAZOV MADE THIS REMARK HERE TODAY IN A SPEECH TO THE SOVIET PARTY ORGAN PRAVDA.

AT THE 43RD UNITED NATIONS GENERAL ASSEMBLY HELD IN DECEMBER OF 1988, SOVIET PRESIDENT MIKHAIL GORBACHEV DECLARED THE UNILATERAL REDUCTION OF

SOVIET ARMED FORCES BY 500,000 MEN IN TWO YEARS.

TALKING ABOUT SOVIET MILITARY REFORM, YAZOV SAID THE REFORM MEASURES SHOULD NOT BE DIVORCED FROM MILITARY-POLITICAL REALITIES. "ALTHOUGH U.S. AND NATO LEADERS HAVE CLAIMED POSSIBLE CUTS IN MILITARY EXPENDITURE AND ARMS, LITTLE HAS BEEN DONE IN REAL TERMS," HE ADDED.

OPPOSING THE IDEA OF ESTABLISHING "ETHNIC" OR "REPUBLICAN" ARMED FORCES, THE DEFENSE MINISTER STRESSED THAT THIS WILL NOT ONLY DESTROY THE SOVIET UNION'S DEFENSE CAPABILITIES BUT ALSO COURT THE DANGER OF CONVERTING ETHNIC CONTRADICTIONS INTO FRATRICIDAL CLASHES.

BEIJING (JUNE 27) XINHUA - A SENIOR MOTOROLA COMPANY EXECUTIVE ANNOUNCED AT A PRESS CONFERENCE HERE TODAY THAT THE CHICAGO-BASED TRANSNATIONAL TELECOMMUNICATIONS FIRM PLANS TO INCREASE ITS INVESTMENT IN CHINA.

CHI-SUN LAI, CORPORATE VICE-PRESIDENT OF MOTOROLA, SAID HIS COMPANY HAS SIGNED AN AGREEMENT WITH THE DEVELOPMENT ZONE IN EAST CHINA'S PORT CITY TIANJIN FOR A SOLELY-OWNED VENTURE, WHOSE CONSTRUCTION IS SCHEDULED TO BEGIN AT THE END OF THE YEAR.

TOTAL INVESTMENT IN THIS MOTOROLA SUBSIDIARY, WHICH WILL PRODUCE TELECOMMUNICATIONS EQUIPMENT, IS ESTIMATED AT 300 MILLION TO 400 MILLION U.S. DOLLARS, AND INITIAL INPUT IN 1991 WILL BE 20 MILLION U.S. DOLLARS.

LAI SAID MOTOROLA WILL ALSO INCREASE ITS INVESTMENT IN OTHER MANUFACTURING PROJECTS, INVOLVING AUTOMOTIVE ELECTRONICS, TELEPHONES AND SEMICONDUCTORS. HE SAID MORE CUSTOMER SERVICE AND PRODUCT MAINTENANCE FACILITIES ARE ALSO PLANNED FOR CHINA.

IN ADDITION TO THE TWO MOTOROLA MOBILE-PHONE SYSTEMS ALREADY INSTALLED IN BEIJING AND SHANGHAI, HE SAID, THREE MORE OF THE COMPANY'S SYSTEMS ARE SOON EXPECTED TO GO INTO OPERATION IN XIAMEN, FUZHOU AND JINAN.

A MAJOR INTERNATIONAL TELECOMMUNICATIONS MANUFACTURER, MOTOROLA DEVELOPED THE FIRST MOBILE-PHONE SYSTEM AND AND ITS PRODUCTS NOW ACCOUNT FOR 40 PERCENT OF ALL THE MOBILE-PHONE SYSTEMS IN OPERATION AROUND THE WORLD.

LAI ANNOUNCED THAT MOTOROLA PLANS TO BEGIN BUILDING A NEW GLOBAL COMMUNICATIONS SYSTEM IN 1992.

THE NEW SYSTEM, SET TO BE OPERATING BY 1996, WILL PROVIDE CONTINUOUS COVERAGE OF THE WHOLE GLOBE VIA 77 SATELLITES IN LOW-EARTH ORBIT, ALLOWING PEOPLE TO DIAL ANYWHERE ON EARTH WITH A PORTABLE CELLULAR RADIOTELEPHONE.

LAI NOTED THAT THERE IS A BIG MARKET IN CHINA FOR THE SYSTEM AS THE COUNTRY'S POOR COMMUNICATIONS INFRASTRUCTURE IS NO LONGER COMPATIBLE WITH ITS ECONOMIC GROWTH.

LAI SAID THE COMPANY EXPECTS TO FURTHER COOPERATE WITH CHINA ON THIS SYSTEM AND EXPRESSED FULL CONFIDENCE IN THE PROSPECTS FOR COOPERATION.

#90178h0075 06/27/1990 ~Chinese News Agency

MANILA (JUNE 27) XINHUA - THE PHILIPPINE MILITARY TODAY JOINED THE SEARCH FOR A MISSING KUWAITI PRINCE AND HIS 12-YEAR-OLD SON WHO WERE KIDNAPPED IN MANILA JULY OR AUGUST LAST YEAR.

DEFENSE SECRETARY FIDEL RAMOS SAID THAT HE HAS ORDERED MAJ. GEN. CESAR NAZARENO, CHIEF OF THE PHILIPPINE CONSTABULARY, TO "SUPPORT EFFORTS TO LOCATE THESE VIPS, RECOVER THEM SAFELY AND APPREHEND AND PROSECUTE THE PERPETRATORS."

MISSING AND BELIEVED KIDNAPPED WERE SHEIK SALMAN AL-SABAH, 43, AND HIS 12-YEAR-OLD SON, PRINCE FASAL. AL SABAH IS REPORTEDLY THE NEPHEW OF KUWAITI KING AMIR SHEIK JABER ALAMAD AL SABAH.

THE NATIONAL BUREAU OF INVESTIGATION HAS BEEN SEARCHING FOR THE TWO MISSING KUWAITI PRINCES SINCE LAST JULY.

UNVERIFIED REPORT HAS IT THAT THE PRINCE AND HIS SON WERE KIDNAPPED FOR A ONE MILLION U.S. DOLLAR RANSOM.

KUWAIT HAS SOUGHT THE ASSISTANCE OF THE PHILIPPINE AUTHORITIES TO LOCATE AND RESCUE THE KUWAITI PRINCES.

#90178h0078 06/27/1990 ~Chinese News Agency

LONDON (JUNE 27) XINHUA - ENVIRONMENT MINISTERS OF 56 GOVERNMENTS THAT HAVE RATIFIED THE MONTREAL OZONE PROTECTION TREATY MEET HERE JUNE 27-29 TO SPEED UP THE PHASING-OUT OF OZONE-DEPLETING CHEMICALS.

OVER 40 UN-RATIFIERS AND WORLD INDUSTRIAL COMPANIES ALSO ATTEND THE THREE-DAY INTERNATIONAL OZONE CONFERENCE.

DR MOSTAFA K. TOLBA, EXECUTIVE DIRECTOR OF THE UNITED NATIONS ENVIRONMENT PROGRAM (UNEP), EMPHASIZED THAT THE MOST IMPORTANT ISSUES ON THE AGENDA ARE OZONE TECHNOLOGY TRANSFER AND FINANCIAL ASSISTANCE FROM THE DEVELOPED COUNTRIES TO THE DEVELOPING ONES.

THE UNEP ORGANISED THE LONDON CONFERENCE AS A FOLLOW-UP ON THE SEPTEMBER

1987 MONTREAL PROTOCOL MEETING WHERE PARTICIPATING COUNTRIES RATIFIED A TREATY WHICH SET A TIMETABLE FOR REDUCING CHLOROFLUOROCARBONS (CFCS) BY 50 PER CENT BY 1999.

THE LONDON MEETING IS EXPECTED, HOWEVER, TO AMEND THE PROTOCAL TO PHASE OUT ALL CFC PRODUCTION BY THE YEAR 2,000.

AND FOR THAT TARGET TO BE ACHIEVED, THE LONDON MEETING WILL DEBATE THE SETTING UP OF AN INTERNATIONAL FUND TO HELP DEVELOPING COUNTRIES INVEST IN LESS HARMFUL ALTERNATIVE CHEMICALS.

IT IS ESTIMATED THAT DEVELOPING COUNTRIES WILL NEED 220 MILLION DOLLARS TO ENABLE THEM TO CONFORM TO THE MONTREAL AGREEMENT.

A PREPARATORY MEETING WAS HELD FOR THE THREE-DAY MINISTERIAL CONFERENCE BECAUSE THERE WERE HARD NUTS TO CRACK ON TECHNOLOHY TRANSFER AND FINANCIAL ASSISTANCE WHICH WOULD MAKE IT FEASIBLE FOR DEVELOPING COUNTRIES TO USE SUBSTITUTES AND ALTERNATIVES TO THE CFCS AND OTHER OZONE DEPLETING SUBSTANCES.

DR TOLBA SAID SOME DEVELOPING COUNTRIES HAVE NOT YET RATIFIED THE 1987 MONTREAL PROTOCAL "BECAUSE THEY ARE WAITING TO SEE WHETHER THE WEALTHY NATIONS THAT BENEFITED FROM USING OZONE DEPLETING CHEMICALS IN THEIR DEVELOPMENT ARE NOW PREPARING TO HELP THE THIRD WORLD FINANCIALLY AND TECHNOLOGICALLY TO DEVELOP WITH OZONE-FRIENDLY CHEMICALS".

"IF THE DEVELOPED COUNTRIES FAIL TO RISE TO THE CHALLENGE AND TO FACE UP TO THEIR RESPONSIBILITIES," HE REMARKED, "THEN THE OUTLOOK FOR NORTH-SOUTH COOPERATION IN COPING WITH GLOBAL CLIMATE CHANGE AND IN PROTECTING BIOLOGICAL DIVERSITY -- WHICH WILL BOTH INVOLVE TECHNOLOGY TRANSFER AND MASSIVE FINANCIAL SUPPORT -- IS GRIM."

#90178h0081 06/27/1990 ~Chinese News Agency

BEIJING (JUNE 27) XINHUA - THE CENTRAL METEOROLOGICAL STATION REPORTED HERE TODAY THAT TYPHOON PERCY IS MOVING TOWARD THE EASTERN PART OF TAIWAN PROVINCE.

THE TYPHOON IS IN THE OCEAN TO THE EAST OF THE PHILIPPINES, 16.4 DEGREES NORTH LATITUDE AND 123.8 DEGREES EAST LONGITUDE. THE CENTER OF THE TYPHOON IS MOVING NORTHWEST AT A SPEED OF 20 KM PER HOUR, ACCORDING TO THE STATION.

THE STATION FORECASTS THAT WINDS WILL MAGNIFY TO FULL GALE FORCE IN THE BALINTANG AND BASHI CHANNELS, THE NORTHEAST PART OF THE SOUTH CHINA SEA AND ON TAIWAN PROVINCE. HEAVY RAIN IS EXPECTED TO HIT THE ISLAND.

THE CENTRAL METEOROLOGICAL STATION IS ALSO FORECASTING THUNDERSTORMS FOR

NORTHEAST AND NORTH CHINA AND THE VALLEYS OF THE YELLOW AND HUAIHE RIVERS.

THE EASTERN PART OF NORTHWEST CHINA, THE VALLEYS OF THE YANGTZE AND HUAIHE RIVERS, LARGE PARTS OF SOUTH AND SOUTHWEST CHINA WILL HAVE 3-15 MM OF RAIN WITH SOME AREAS RECEIVING 30-60 MM TOMORROW.

#90178h0082 06/27/1990 ~Chinese News Agency

BEIJING (JUNE 27) XINHUA - LEADING ECONOMISTS FROM AROUND THE WORLD MET IN A HEATED ROUND-TABLE CONFERENCE HERE TODAY TO DISCUSS PRIORITIES AND MAJOR PROBLEMS FOR CHINA'S ECONOMIC DEVELOPMENT AND REFORM IN THE 1990S.

PROFESSOR GAO SHANGQUAN, VICE-MINISTER OF THE STATE COMMISSION FOR RESTRUCTURING THE ECONOMY, SAID CHINA IS ENTERING A SUSTAINED AND STABLE DEVELOPMENT PERIOD IN THE COMING DECADE.

"IN THE 1990S, CHINA'S REFORM SHOULD FOCUS ON A DEVELOPMENT STRATEGY WHICH WILL SERVE TO DOUBLE THE COUNTRY'S GNP BY THE END OF THIS CENTURY," HE SAID.

LAWRENCE R. KLEIN, A NOBEL LAUREATE IN ECONOMICS AND A PROFESSOR AT THE UNIVERSITY OF PENNSYLVANIA, SAID THAT ONE OF THE MAJOR PROBLEMS FOR CHINA IN ESTABLISHING A PLANNED MARKET ECONOMY IS THE NEED TO DEVELOP A PHILOSOPHY AND GOALS FOR THE ECONOMY AFTER THE INITIAL RESTRUCTURING PERIOD.

PROFESSOR DALE W. JORGENSON FROM HARVARD UNIVERSITY SAID THAT IN LONG-TERM PLANNING IN THE NEXT 10 YEARS, CHINA SHOULD TAKE SEVERAL FACTORS INTO CONSIDERATION. HE SAID CHINA SHOULD DECIDE WHAT ITS MOST IMPORTANT RESOURCES FOR ECONOMIC GROWTH ARE; THE ALLOCATION OF TANGIBLE ASSETS, MARKETS AND TECHNOLOGY; AND THE DEVELOPMENT OF HUMAN CAPITAL.

"IN THE YEAR 2000, HUMAN CAPITAL WILL BE A CRUCIAL ISSUE IN CHINA'S LONG-TERM DEVELOPMENT," HE NOTED.

PROFESSOR LAWRENCE J. LAU FROM STANFORD UNIVERSITY SAID THAT IN THE 1990S, INVESTMENT WILL PLAY A KEY ROLE IN CHINA'S REFORM AND ECONOMIC DEVELOPMENT.

HE SAID THAT "IN THE FUTURE, CHINA'S CENTRAL GOVERNMENT SHOULD CONSIDER ONLY INFRASTRUCTURE IN ITS INVESTMENT PLANS AND INCREASE INVESTMENT IN THE ENERGY AND TRANSPORTATION SECTORS."

HE MAINTAINED THAT INVESTMENT IN INDUSTRY AND ENTERPRISES SHOULD BE LEFT TO ENTERPRISES USING BASICALLY INTERNALLY-GENERATED FUNDS TO AVOID THE BUDGET CONSTRAINTS OF THE CENTRALLY PLANNED ECONOMY.

PROFESSOR MA BIN, A SENIOR ADVISOR TO THE STATE COUNCIL'S DEVELOPMENT

RESEARCH CENTER, SAID THE INSTRUCTION AND GUIDANCE OF CHINA'S CURRENT PLANNED MARKET ECONOMY MUST FOLLOW THE OBJECTIVE LAWS OF ECONOMICS. "WE SHOULD USE ECONOMIC LEVERAGE AND THE MARKET MECHANISM IN OUR PLANNING WHILE STRENGTHENING MACRO CONTROL OF ECONOMY," HE ADDED.

PROFESSOR GREGORY C. CHOW FROM PRINCETON UNIVERSITY SAID HE EXPECTS HEALTHY GROWTH FOR CHINA'S ECONOMY IN THE 1990S, ADDING THAT CHINA'S GOAL OF DOUBLING ITS GNP BY THE YEAR 2000 CAN BE ACHIEVED.

"BUT IN ECONOMIC STRUCTURAL REFORM, CHINA IS FACING MAJOR PROBLEMS IN PRICE REFORM, THE REFORM OF STATE ENTERPRISES, THE REFORM OF THE MACRO CONTROL MECHANISM, DEALING WITH CORRUPTION, AND UNEVEN GROWTH IN DIFFERENT GEOGRAPHIC REGIONS," HE SAID.

PROFESSOR ZHANG ZHUOYUAN OF THE CHINESE ACADEMY OF SOCIAL SCIENCES SUGGESTED A MEDIUM RATE OF GROWTH FOR CHINA'S ECONOMY.

"WITH A GROWTH RATE OF FIVE TO SIX PERCENT, CHINA CAN MAINTAIN STABLE ECONOMIC DEVELOPMENT AT A LOWER RATE OF INFLATION, CREATING FAVORABLE CONDITIONS FOR REFORM," HE NOTED.

PROFESSOR ALBERT ANDO FROM THE UNIVERSITY OF PENNSYLVANNIA SAID HE BELIEVES ONE OF THE MAJOR PROBLEMS FACING CHINA IS THE NEED TO MAKE BETTER USE OF THE PRICE MECHANISM AND TO EQUITABLY RESOLVE THE PROBLEM OF INCOME DISTRIBUTION.

"PRICE REFORM CAN BE ACHIEVED ONLY AFTER THE SOLUTION OF THESE PROBLEMS," HE SAID.

PROFESSOR ANDRAS SIMON FROM THE UNIVERSITY OF BUDAPEST SAID THE EXPERIENCE OF HUNGARY OVER THE PAST TWO DECADES INDICATES THAT THERE ARE SOME CONTRADICTIONS BETWEEN PLANS AND THE MARKET. HE SUGGESTED CHINA FIND A WAY IN WHICH THE PLANNED ECONOMY AND THE MARKET ECONOMY DO NOT DISTURB EACH OTHER.

ZHENG JIAXIANG, DEPUTY-CHIEF OF THE STATE STATISTICAL BUREAU, REPORTED AT THE MEETING THAT IN ORDER TO IMPROVE MACRO ECONOMIC FORECASTING, CHINA WILL MAKE GREATER EFFORTS TO MAKE ITS STATISTICS MORE ACCURATE AND AVAILABLE TO ECONOMISTS.

#90178h0083 06/27/1990 ~Chinese News Agency

FREETOWN (JUNE 27) XINHUA - MONROVIA'S CHIEF NEGOTIATOR SENATOR TAMBAKAI JANGABA HAS SAID THAT THE GOVERNMENT OF PRESIDENT SAMUEL DOE IS SERIOUS ABOUT THE PEACE TALKS WITH THE REBEL NATIONAL PATRIOTIC FRONT OF LIBERIA.

THE PEACE TALKS FAILED TO RESUME ON MONDAY IN THE SIERRA LEONEAN CAPITAL

OF FREETOWN AS A RESULT OF THE REBEL FRONT'S REFUSAL TO ATTEND THE TALKS AND ITS DEMAND FOR THE RESIGNATION OF PRESIDENT DOE.

IN A PRESS RELEASE ISSUED HERE ON TUESDAY, SENATOR JANGABA SAID THAT THE LIBERIAN GOVERNMENT REMAINS COMMITTED TO A "PEACEFUL AND TIMELY" RESOLUTION TO THE SIX-MONTH CONFLICT IN THE WEST AFRICAN COUNTRY.

HE ASSURED THE MEDIATION COMMITTEE CONSISTING OF THE COUNTRY'S CHRISTIAN AND MUSLIM CHURCH LEADERS THAT MONROVIA WILL FULLY COOPERATE WITH THE COMMITTEE'S EFFORTS TO FIND A SETTLEMENT OF THE CIVIL WAR.

MEANWHILE, MR. LEVEE MOULTON, PRESIDENT OF THE LIBERIAN COUNCIL OF CHURCHES, SAID THAT REPRESENTATIVES OF THE COMMITTEE EARLIER DISCUSSED WITH REBEL LEADER CHARLES TAYLOR THE PEACE TALKS AND A FORMAL STATEMENT ON THE STATUS OF THE DIALOGUE WILL BE ISSUED SHORTLY.

THE REBEL FORCES, WHICH HAVE FOUGHT TO WITHIN 30 KILOMETRES OF MONROVIA, SAID ON MONDAY THAT THEY HAD LOST PATIENCE WITH THE FREETOWN TALKS AND VOWED NOT TO ATTEND THE PEACE TALKS UNTIL PRESIDENT DOE RESIGNS.

DOE, WHO CAME TO POWER 10 YEARS AGO IN A BLOODY COUP, HAS REFUSED TO RESIGN BUT OFFERED NOT TO CONTEND THE REELECTIONS IN 1991.

IN ANOTHER DEVELOPMENT, THOUSANDS OF PEOPLE FROM ALL WALKS OF LIFE MARCHED IN MONROVIA ON TUESDAY AND TODAY TO DEMAND AN IMMEDIATE END TO THE CIVIL WAR.

#90178h0084 06/27/1990 ~Chinese News Agency

XIAMEN (JUNE 27) XINHUA - THE TOTAL INDUSTRIAL OUTPUT VALUE OF XIAMEN CITY IN SOUTH CHINA'S FUJIAN PROVINCE WILL REACH 13.5 BILLION YUAN BY 1995 ACCORDING TO SHI ZHAOBIN, SECRETARY OF THE CITY PARTY COMMITTEE, SPEAKING TODAY AT THE OPENING CEREMONY OF THE CITY'S SEVENTH COMMUNIST PARTY CONGRESS.

SHI SAID THE INDUSTRIAL OUTPUT VALUE FROM FOREIGN-FUNDED ENTERPRISES WILL ACCOUNT FOR 60 PERCENT OF THE TOTAL. THE OUTPUT VALUE FROM EXPORTING GOODS WILL MAKE UP 47 PERCENT OF THE TOTAL, HE SAID.

ACCORDING TO SHI, BY THE END OF MAY, THE CITY HAD APPROVED 1,120 FOREIGN-FUNDED PROJECTS, INVOLVING A TOTAL INVESTMENT OF 2.988 BILLION U.S. DOLLARS. THERE ARE NOW 300 TAIWAN-FUNDED ENTERPRISES, WITH A TOTAL OF 800 MILLION U.S. DOLLARS IN INVESTMENT, HE SAID.

#90178h0086 06/27/1990 ~Chinese News Agency

NEW DELHI (JUNE 27) XINHUA - INDIA'S INDUSTRIAL PRODUCTION FOR MARCH THIS YEAR REGISTERED A RECORD HIGH INCREASE OF 22.4 PERCENT, AS COMPARED WITH THE SAME PERIOD OF LAST YEAR, PUSHING UP THE GROWTH RATE FOR 1989-90 (FROM APRIL 1, 1989, TO MARCH 31, 1990) TO 8.3 PER CENT.

ACCORDING TO THE QUICK ESTIMATE OF INDEX OF INDUSTRIAL PRODUCTION RELEASED TODAY BY THE CENTRAL STATISTICAL ORGANIZATION, THE INDEX STOOD AT 255.3 IN MARCH 1990, COMPARED TO 208.6 A YEAR AGO (1980-81 AS 100).

BUT GROWTH IN INDUSTRIAL PRODUCTION FOR MOST PART OF THE YEAR HAD BEEN LOW LARGELY DUE TO THE SLUGGISH PERFORMANCE OF THE MANUFACTURING SECTOR. AT THE END OF THE THIRD QUARTER ENDING DECEMBER 1989, THE GROWTH RATE WAS 5.7 PER CENT. IT WAS AT 6.8 PER CENT BY THE END OF FEBRUARY 1990.

THE MARKED GROWTH FOR MARCH 1990 WAS ATTRIBUTABLE TO THE 29 PER CENT GROWTH RATE ACHIEVED BY THE MANUFACTURING SECTOR. THE INFRASTRUCTURE SECTORS OF MINING AND ELECTRICITY GREW BY 0.8 PER CENT AND 6 PER CENT RESPECTIVELY.

ACCORDING TO OFFICIAL "ECONOMIC SURVEY 1989-90", THE ANNUAL GROWTH RATE OF INDUSTRY IN 1984-85 WAS 8.6 PERCENT, 8.7 PERCENT IN 1985-86, 9.1 PERCENT IN 1986-87, 7.3 PERCENT IN 1987-88 AND 8.8 PER CENT IN 1988-89.

#90178h0087 06/27/1990 ~Chinese News Agency

BEIJING (JUNE 27) XINHUA - FOREIGNERS INTERESTED IN CHINA'S CULTURE AND HISTORY BUT DAUNTED BY THE EFFORT NEEDED TO VISIT THE COUNTRY'S WIDELY SCATTERED CULTURAL SITES WILL APPRECIATE AN EXHIBITION FEATURING THE GEMS OF CHINA'S ANTIQUITIES, SET TO OPEN ON SATURDAY AT THE WENHUADIAN PALACE (HALL OF CULTURAL ACHIEVEMENTS) TO THE EAST OF THE PALACE MUSEUM IN CENTRAL BEIJING.

SIX MONTHS WERE SPENT GATHERING 245 ART TREASURES FROM CHINA'S 28 PROVINCES, MUNICIPALITIES AND AUTONOMOUS REGIONS IN PREPARATION FOR THE EXHIBITION, SET TO RUN FOR SIX MONTHS.

"IT IS THE FIRST OF ITS KIND EVER HELD IN CHINA IN TERMS OF SUPREMACY AND THE CONCENTRATION OF NEW FINDINGS," SAID ZHANG DEQIN, DIRECTOR OF THE CHINA ADMINISTRATIVE BUREAU OF MUSEUMS AND ARCHEOLOGICAL MATERIALS.

THE EXHIBITS, INCLUDING THE CRANIAL FOSSIL OF THE PITHECANTHROPUS, CERAMICS, PORCELAIN, STONEWARE, BRONZES, GOLD AND SILVER ITEMS, LACQUERWARE, IVORY AND BONE SCULPTURE, EMBROIDERY, SHELL AND BONE INSCRIPTIONS, BAMBOO SLIPS, SEALS, FRESCOES, WRITING INSTRUMENTS AND TIBETAN EMBROIDERED CARPETS, ARE OF GREAT HISTORIC, SCIENTIFIC AND ARTISTIC VALUE, ZHANG SAID.

VISITORS WILL BE ABLE TO PURCHASE REPRODUCTIONS OF THE EXHIBITS PRODUCED UNDER THE SUPERVISION OF THE PALACE MUSEUM.

#90178h0089 06/27/1990 ~Chinese News Agency

COLOMBO (JUNE 27) XINHUA - SRI LANKAN PRESIDENT RANASINGHE PREMADASA REITERATED TODAY THAT HE HAD NOT GIVEN UP THE EFFORT TO FIND SOLUTIONS TO PROBLEMS IN THE NORTH AND EAST THROUGH DISCUSSION AND CONSULTATION.

"BUT WE CAN'T REMAIN PASSIVE AFTER THEY BITE THE HAND OF FRIENDSHIP. SECURITY FORCES ARE NOW ENGAGED IN BATTLES TO PROTECT THE PEOPLE AND THE SOVEREIGNTY OF THE COUNTRY..." HE SAID.

THE PRESIDENT WAS ADDRESSING PEOPLE'S REPRESENTATIVES AND GOVERNMENT OFFICIALS AT THE NINTH DISTRICT CONFERENCE HELD IN KEGALLE OF THE CENTRAL PROVINCE, ACCORDING TO THE SRI LANKA BROADCASTING CORPORATION.

THE GOVERNMENT AND THE LIBERATION TIGERS OF TAMIL EELAM (LTTE), THE MOST POWERFUL TAMIL MILITANT GROUP IN THE COUNTRY, HAD BEEN HOLDING NEGOTIATIONS TO SOLVE ETHNIC PROBLEMS SINCE APRIL LAST YEAR.

THE TALKS COLLAPSED AS THE LTTE LAUNCHED SURPRISE ATTACK ON MILITARY CAMPS AND POLICE STATIONS IN THE NORTH AND EAST ON JUNE 11.

THE REBELS ATTACKED AT LEAST 10 ARMY CAMPS, FOUR NAVAL BASES AND OVERRUN 30 POLICE STATIONS IN THE PAST TWO WEEKS.

SECURITY FORCES HAVE CLEARED THE EASTERN PROVINCE AFTER LAUNCHING A COUNTER-OFFENSIVE AND HAVE TURNED THEIR FORCES ON THE NORTH WHERE THE LTTE IS STRONGER. MORE THAN 400 PEOPLE FROM THE TWO SIDES HAVE BEEN KILLED IN THE CONFLICT.

THE PRESIDENT SAID THAT BY NOW EVERYBODY HAD REALIZED THAT THE SITUATION IN THE NORTH AND EAST HAD NOTHING TO DO WITH RACIAL DIFFERENCES.

"WE ARE PREPARED TO FIND SOLUTIONS TO PROBLEMS THROUGH DISCUSSION. THAT POLICY DOES NOT SIGNIFY WEAKNESS. IT SHOWS STRENGTH. TODAY THE WORLD HAS WITNESSED AND COMMENDED OUR POLICIES OF PEACE AND GOODWILL," HE SAID. PREMADASA SAID THAT SUCH GOODWILL AND FRIENDLINESS ON THE PART OF THE PEOPLE AS WELL AS THE SECURITY FORCES IN THE NORTH AND EAST WOULD GO A LONG WAY TO EXTINGUISH THE FLAMES OF VIOLENCE NOW RAGING THERE.

#90178h0090 06/27/1990 ~Chinese News Agency

LAGOS (JUNE 27) XINHUA - U.N. GENERAL ASSEMBLY PRESIDENT JOSEPH GARBA HAS CALLED ON THE WEST NOT TO IMPOSE DEMOCRACY ON AFRICA, SAYING THAT

DEMOCRACY IN THE CONTINENT MUST BE A GRADUAL PROCESS.

IN A WRITTEN SPEECH READ AT A LECTURE HERE LAST NIGHT ON "POST COLD WAR REALITY, WORLD POLITICS", THE U.N. PRESIDENT ARGUED THAT MANY AFRICAN COUNTRIES CAN NOT EVEN FINANCE WESTERN- STYLE DEMOCRACY AT THE MOMENT.

AFRICA IS THE LOSER IN THE DRAMATICAL CHANGES IN EASTERN EUROPE, SAID MR. GARBA, ADDING THAT THE SOVIET UNION, THE UNITED STATES AND THE WESTERN EUROPE HAVE ALL RESHAPED THEIR POLITICAL PRIORITY TO THE CHANGES THERE.

MR. GARBA'S CALL ECHOED THE REMARKS MADE BY OAU SECRETARY GENERAL SALIM AHMED SALIM AT NIGERIA'S GUARDIAN NEWSPAPER ANNIVERSARY LECTURE A WEEK AGO.

MR. SALIM NOTED THAT THE CALL FOR DEMOCRACY AND MULTI-PARTY SYSTEM IN AFRICA IS NOW A NEW WESTERN CONDITIONALITY FOR AID TO AFRICAN STATES.

"MULTI-PARTISM BY ITSELF CAN NOT BRING ABOUT DEVELOPMENT OR EVEN GENUINE DEMOCRACY FOR THAT MATTER... IT CAN NOT BY ITSELF MAKE SIGNIFICANT DIFFERENCE TO THE FUNDAMENTAL ECONOMIC PROBLEMS OF OUR CONTINENT," HE DECLARED.

MR. GARBA POINTED TO THE RECENT VOTING OF 12 BILLION U.S. DOLLARS IN ESTABLISHING A DEVELOPMENT BANK FOR EASTERN EUROPE, SAYING THAT AFRICA HAS NEVER BEEN GIVEN SUCH ATTENTION BY WESTERN EUROPE.

MEANWHILE, THE DEBT SERVICING IN TERMS OF TRADE AND CAPITAL FLIGHT THIS YEAR ALONE WILL SIPHON 5.5 BILLION DOLLARS FROM BLACK AFRICA' TREASURY, HE SAID.

THE U.N. GENERAL ASSEMBLY PRESIDENT CALLED ON THE WORLD POWERS TO USE THE OPPORTUNITY PROVIDED BY THE EASING OF EAST-WEST TENSION TO TACKLE SUCH HUMAN PROBLEMS AS HUNGER, DESERTIFICATION, DEPLETION OF THE OZONE LAYER AND HUMAN RIGHTS ABUSE.

#90178h0095 06/27/1990 ~Chinese News Agency

MANILA (JUNE 27) XINHUA - THE PHILIPPINE SUPREME COURT TODAY ORDERED THE NORTHWEST ORIENT AIRLINES TO PAY A TOTAL OF 260,000 PESOS (11,300 U.S. DOLLARS) IN DAMAGES TO FOUR FILIPINO WOMEN PASSENGERS FOR THE NEGLIGENCE AND ARROGANCE OF ITS PERSONNEL OVER 12 YEARS AGO.

THE COURT SAID IN A DECISION THAT THE FOUR COMPLAINANTS SUFFERED ANXIETY AND HUMILIATION AFTER THEY WERE SUBJECTED TO "HOSTILE AND OVERBEARING TREATMENT" BY THE AIRLINES' ARROGANT EMPLOYEES.

THE COURT ORDERED THE UNITED STATES AIRLINES TO PAY EACH OF THE FOUR 65,000 PESOS (ABOUT 2,820 U.S. DOLLARS) IN DAMAGES.

IT WAS IN APRIL 1978, WHEN THE AIRLINES' PERSONNEL IN MANILA USED THE WRONG CONVERSION RATES OF EXCHANGE IN THE COMPUTATION OF THE AIR FARE OF THE FOUR FILIPINO WOMEN. ON THE BASIS OF THE WRONG COMPUTATION, THE FOUR PASSENGERS PURCHASED THEIR TICKETS FOR THEIR FLIGHT TO THE UNITED STATES VIA HONG KONG AND TOKYO.

UPON THEIR ARRIVAL IN HONG KONG, THEY WERE INFORMED BY THE AIRLINES PERSONNEL THERE ABOUT THE MISTAKE. BUT THE PERSONNEL REFUSED TO RELEASE THE TWO PREPAID TICKETS FOR THE CONNECTION FLIGHTS OF EACH OF THE FOUR COMPLAINANTS.

THE FOUR COMPLAINANTS REQUESTED THAT THE HONG KONG PERSONNEL CHECK WITH THEIR MANILA OFFICE, SAYING THAT THEY HAD PAID THE RIGHT AMOUNT. BUT THEIR REQUEST WAS "ARROGANTLY" TURNED DOWN. AS THEIR FLIGHT TO TOKYO WAS TO TAKE PLACE IN A SHORT WHILE, THE FOUR PASSENGERS WERE FORCED TO PAY THE DIFFERENTIAL.

AS A RESULT OF THE UNEXPECTED EXPENSE, THE COMPLAINTS CLAIMED THAT THE FOREIGN CURRENCY THEY WERE TO USE IN THEIR TRIP WAS DEPLETED, CAUSING THEM "A GREAT DEAL OF TENSION AND INCONVENIENCE." THEN THEY SUED FOR DAMAGES.

#90178h0096 06/27/1990 ~Chinese News Agency

COLOMBO (JUNE 27) XINHUA - THE SRI LANKAN GOVERNMENT WOULD NOT HESITATE TO USE EMERGENCY POWER TO CRACK DOWN ON ERRANT FOREIGN EMPLOYMENT AGENCIES THAT VIOLATED THE RECENT TEMPORARY BAN ON HOUSEMAIDS BEING SENT TO KUWAIT, A SENIOR MINISTER WARNED HERE TODAY.

SPEAKING TO FOREIGN EMPLOYMENT AGENTS AT A MEETING IN COLOMBO, MINISTER OF LABOR AND VOCATIONAL TRAINING G. M. PREMACHANDRA SAID THAT THE BAN WAS IMPOSED WITH CABINET APPROVAL FOLLOWING FACTS HE HAD GATHERED ON HIS RECENT VISIT TO KUWAIT.

ABOUT 10,000 LANKAN HOUSEMAIDS HAD REVEALED THEIR SHOCKING PLIGHT IN A PETITION THEY HAD SENT TO PRESIDENT RANASINGHE PREMADASA, THE MINISTER SAID.

HE SAID THAT AS MINISTER RESPONSIBLE FOR FOREIGN EMPLOYMENT, THE PETITION WAS REFERRED TO HIM FOR INVESTIGATION AND ACTION.

THE MINISTER NOTED THAT THE GOVERNMENT TOOK A UNANIMOUS DECISION TO BAN THE SENDING OF HOUSEMAIDS TO KUWAIT UNTIL THINGS WERE SORTED OUT.

HE HAD FOUND THAT SINCE THE BAN WAS IMPOSED LAST WEEK 392 WOMEN HAD BEEN SENT TO KUWAIT BY LICENSED AND UNLICENSED AGENCIES, AND THIS SHOULD STOP, HE ADDED.

HE SAID THAT NEXT MONTH HE WOULD PRESENT A BILL IN PARLIAMENT TO AMEND THE FOREIGN EMPLOYMENT ACT, PROVIDING FOR STRINGENT PUNISHMENT OF ERRANT EMPLOYMENT AGENCIES.

#90178h0098 06/27/1990 ~Chinese News Agency

SAN JOSE (JUNE 27) XINHUA - JORGE GUARDIA, THE PRESIDENT OF COSTA RICA'S CENTRAL BANK, TUESDAY URGED THE LEGISLATIVE ASSEMBLY TO APPROVE NEW TAXES IN ORDER TO PAY FOR THE GROWING PUBLIC DEFICIT.

THE TAXES, GUARDIA CLAIMED, ARE AN ESSENTIAL PREREQUISITE TO THE SIGNING OF A NEW ACCORD WITH THE INTERNATIONAL MONETARY FUND (IMF), WHICH THE GOVERNMENT HOPES TO HAVE READY IN AUGUST.

THE APPROVAL OF THE TAXES, HOWEVER, FACES SEVERE OPPOSITION FROM THE LEFT-LEANING NATIONAL LIBERATION PARTY, THE SECOND-LARGEST PARLIAMENTARY GROUP.

THE NEW TAXES WOULD BRING IN AN EXTRA 11 BILLION COLONES (SOME 122 MILLION DOLLARS) INTO THE NATION'S FISCAL COFFERS, A FIGURE WHICH REPRESENTS NEARLY A THIRD OF THIS YEAR'S PROJECTED PUBLIC DEFICIT, WHICH COULD SURPASS EVEN THE 30-BILLION-COLON MARK, GUARDIA SAID.

THE GOVENMENT HAS ALEADY ADOPTED SEVERAL OTHER MEASURES AIMED AT DEFLATING THE PUBLIC DEFICIT, INCLUDING A HIKE IN THE PRICE OF PUBLIC SERVICES AND THE PRICE OF FUELS.

AS COMPENSATION FOR THE UNWELCOME ECONOMIC MEASURES, THE GOVERNMENT HAS ANNOUNCED AN IMPORTANT REDUCTION IN NEXT YEAR'S PUBLIC SPENDING, BUT NO FIGURES WERE DISCLOSED.

COSTA RICA'S CURRENT SOCIAL CHRISTIAN GOVERNMENT ASSUMED POWER LAST MAY 8,

DECRYING THE ECONOMIC CONDITION IT FOUND THE COUNTRY IN AND CONDEMNING THE SOCIAL DEMOCRATIC GOVERNMENT IT INHERITED THE SITUATION FROM.

#90178h0100 06/27/1990 ~Chinese News Agency

WELLINGTON (JUNE 27) XINHUA - NEW ZEALAND LABOR PRIME MINISTER GEOFFREY PALMER AND OPPOSITION NATIONAL PARTY LEADER JIM BOLGER PRESENTED THEIR CLAIMS TO ECONOMIC CREDIBILITY LATE TONIGHT IN THE FIRST OF A SERIES OF TELEVISION DEBATE AS BOTH PARTIES GEAR UP FOR THE OCTOBER GENERAL ELECTION.

THE QUESTION PUT TO THEM BY THE PRESENTER OF THE SHOW WAS HOW DO THEY RESPOND TO SCEPTICISMS AMONG THE OVER 30 PERCENT UNDECIDED VOTERS THAT NEITHER OF THE TWO PARTIES ARE CREDIBLE IN THEIR ECONOMIC POLICIES.

PALMER, ALSO LEADER OF THE LABOR PARTY, STRESSED THAT WHAT THE GOVERNMENT HAS DONE THROUGH ITS REORIENTATION OF ECONOMIC POLICIES DURING THE PAST SIX YEARS IS "TO LAY A NEW SET OF FOUNDATIONS" THAT WILL "ACTUALLY GET THE ECONOMY ON A SUSTAINABLE PATH TOWARDS ECONOMIC GROWTH."

HE SAID WHILE HE WISHES "THE RECESSION HASN'T BEEN AS DEEP, OR AS LONG AS IT'S BEEN", "GAIN FROM THAT PAIN WILL ULTIMATELY BE FULL EMPLOYMENT" "IN FIVE YEARS" AS INFLATION HAS BEEN BROUGHT DOWN ALONG WITH REDUCED DEBT AND BUDGET DEFICITS.

BOLGER, ON HIS PART, SAID WHILE NATIONAL AGREES TO THE NEED FOR CHANGE, IT WANTS "DIFFERENT PRIORITIES", BECAUSE THE GOVERNMENT HAS FAILED TO "PRODUCE THE BENEFIT FOR NEW ZEALANDERS". "INTEGRITY IS THE MOST IMPORTANT THING IN POLITICS."

BY PRIORITIES, HE MENTIONED IN PARTICULAR THE LOWERING OF REAL INTEREST RATES, THE WAY TO ACHIEVE WHICH, HE SAID, IS TO "DO SOMETHING ABOUT THE LABOR MARKET, TAKE AWAY SOME OF THE CONSTRAINTS, OR RESTRAINTS" ALONGSIDE A COMPLEMENTARY MONETARY AND FISCAL POLICY.

BUT PALMER RESPONDED BY SAYING THAT THE NATIONAL'S PRIORITIES WILL MEAN BRINGING NEW ZEALAND INTO AN "INDUSTRIAL JUNGLE", BECAUSE "LOW-PAID PEOPLE NEED (UNION) PROTECTION IN A COMPETITIVE ENVIRONMENT".

ASKED WHERE THE HUNDREDS OF MILLIONS OF DOLLARS IN INCREASED EXPENDITURE WOULD COME FROM TO FULFIL NATIONAL'S PROMISES TO INTRODUCE SUCH MEASURES AS MAKE-WORK SCHEMES AND TERTIARY STUDY GRANTS, WHILE AT THE SAME TIME REDUCING REVENUE THROUGH TAX CUTS, BOLGER REPLIED "BY CHANGING PRIORITIES" AND PALMER WAS QUICK TO REMIND HIM "YOUR PROMISES HAVE GOT TO ADD UP, BECAUSE YOU GOTTA PAY FOR THEM."

COMMENTING ON THE PRESENTER'S CLAIM THAT THE GOVERNMENT'S POLICY DIRECTION HAS NOT BEEN CLEAR SINCE JANUARY OF 1988 WHEN IT RESHUFFLED THE CABINET

WITH BOTH THE PRIME MINISTER AND THE FINANCE MINISTER CHANGED, PALMER MAINTAINED THAT THE POLICIES HAVE BEEN "CONSTANT" AND "CONSISTENT".

NICOSIA (JUNE 27) XINHUA - THE CYPRUS GOVERNMENT TODAY EXPRESSED "ABSOLUTE SATISFACTION" WITH THE NEW POSITION ON CYPRUS TAKEN TUESDAY BY THE EUROPEAN COUNCIL DURING A TWO-DAY MEETING IN DUBLIN.

GOVERNMENT SPOKESMAN AKIS FANTIS TOLD REPORTERS THAT THE MOST IMPORTANT ELEMENT IN THE EC'S NEW STAND WAS THE "DIRECT LINKAGE OF THE CYPRUS PROBLEM TO THE EC-TURKEY RELATIONS," AND SPECIFICALLY THE STATEMENT THAT THE CYPRUS PROBLEM AFFECTED THOSE RELATIONS.

HE SAID THE CYPRUS GOVERNMENT WELCOMED THE EC STAND, REGARDING "AS A CLEAR MESSAGE TO TURKEY THAT EXPRESSES THE POLITICAL WILL OF THE MEMBER-STATES OF THE COMMUNITY REGARDING THE CYPRUS PROBLEM."

HE ADDED, "AS LONG AS TURKEY CONTINUES TO STICK TO ITS NEGATIVE ATTITUDE ON THE CYPRUS PROBLEM SHE CANNOT HOPE FOR A POSITIVE RESPONSE TO HER APPLICATION FOR EC MEMBERSHIP OR FOR PROMOTION OF HER RELATIONS WITH THE COMMUNITY IN GENERAL."

IN A STATEMENT, THE EUROPEAN COUNCIL STRESSED THE "NEED FOR THE PROMPT ELIMINATION OF THE OBSTACLES THAT ARE PREVENTING A JUST AND VIABLE SOLUTION TO THE QUESTION OF CYPRUS."

THE EC LEADERS ALSO DEMANDED WITHDRAWAL OF THE ESTIMATED 30,000 TURKISH

TROOPS AND 50,000 TURKISH MAINLAND SETTLERS FROM NORTH CYPRUS AND RETURN THERE OF 200,000 GREEK CYPRIOT REFUGEES.

THE SPOKESMAN ALSO NOTED WITH SATISFACTION THE FACT THAT THE CYPRUS PROBLEM CONSTITUTED A "SEPARATE SUBJECT FOR DISCUSSION ON THE AGENDA OF THE EC LEADERS." ACCORDING TO HIM, THIS INDICATED THE UPGRADED INTEREST OF THE COMMUNITY MEMBER-STATES IN THE CYPRUS PROBLEM.

MEANWHILE, REPORTS REACHING HERE SAID THE ISTANBUL DAILY "GUNES" SAID TODAY THAT TURKEY HAS SUSTAINED "A SERIOUS SETBACK" BECAUSE OF THE EC DECLARATION.

#90178h0105 06/27/1990 ~Chinese News Agency

CAIRO (JUNE 27) XINHUA - NEW ZEALAND IS SENDING 900,000 SHEEP TO SAUDI ARABIA FOR THE ANNUAL HAJI SACRIFICE NEXT WEEK, ACCORDING TO A REPORT FROM RIYADH, THE SAUDI CAPITAL.

SHIPLOADS OF SHEEP ARE ARRIVING FROM THE SOUTH PACIFIC ISLAND COUNTRY AND WILL CONTINUE THROUGH TO MONDAY, THE DAY FOR THE SACRIFICE IN MECCA AND MEDINA, THE HOLIEST SHRINES OF ISLAM.

TURKEY, SOMALIA AND OTHER MOSLEM COUNTRIES ARE ALSO PROVIDING LIVE ANIMALS FOR SLAUGHTER IN COMMEMORATION OF PROPHET ABRAHAM'S OFFERING OF HIS SON TO ALLAH. ASIDE FROM SHEEP, THE HAJJIS OR PILGRIMS CAN SACRIFICE GOATS OR CAMELS.

AN ESTIMATED 2 MILLION PILGRIMS ARE EXPECTED TO GATHER FOR THE SACRIFICE, WHICH MARKS THE START OF THE FOUR-DAY EID AL-ADHA OR FEAST OF SACRIFICE.

NEW ZEALAND, WHICH RAISES SHEEP MAINLY FOR MEAT, HAS EXPORTED 1.2 MILLION SHEEP TO SAUDI ARABIA SINCE FEBRUARY THIS YEAR. THE KINGDOM IMPORTS ABOUT 7 MILLION SHEEP A YEAR FOR ITS POPULATION OF SOME 12 MILLION.

AUSTRALIA, WHICH EXPORTS 3 MILLION SHEEP A YEAR TO THE KINGDOM, IS NOT DIRECTLY INVOLVED IN THE HAJI BECAUSE IT RAISES SHEEP MAINLY FOR WOOL WHILE THE HAJI SACRIFICE REQUIRES YOUNG RAM LAMBS WITH UNCLIPPED TAILS.

BRUSSELS (JUNE 27) XINHUA - EC EXECUTIVE COMMISSION WOULD STUDY NORWEGIAN REQUEST FOR SOME KIND OF ASSOCIATE MEMBERSHIP OF EUROPEAN MONETARY SYSTEM (EMS), AN EC SOURCE SAID HERE TODAY.

NORWEGIAN FINANCE MINISTER ARNE SKAUGE HAD PRESENTED A MEMO TO THE EC COMMISSION OF FINANCIAL AFFAIRS AT A MEETING IN BRUSSELS, ASKING THE EC

EXECUTIVE COMMISSION TO CONSIDER GRANTING NORWEGIAN LINK TO EMS, THE SOURCE SAID, ADDING THAT "THE COMMISSION WILL STUDY IT WITH A POSITIVE VIEW TO ENCOURAGING THE SPREAD OF STABILITY-ORIENTED ECONOMIC POLICY TO THIRD COUNTRIES."

THE SOURCE ALSO SAID EC WOULD TAKE SOME TIME TO DEFINE WHAT ASSOCIATE MEMBERSHIP WOULD ENTAIL.

EC SO FAR HAS NOT GRANTED ANY ASSOCIATE EMS MEMBERSHIP, THOUGH AUSTRIA AND SWITZERLAND HAVE CLOSELY SHADOWED THE WEST GERMAN MARK.

#90178h0111 06/27/1990 ~Chinese News Agency

SANTIAGO (JUNE 27) XINHUA - SOME 50 ART OBJECTS PREVIOUSLY BELONGING TO THE LATE EX-PRESIDENT SALVADOR ALLENDE WERE RETURNED TO HIS FAMILY TUESDAY BY THE NEW ADMINISTRATION OF PRESIDENT PATRICIO AYLWIN.

HEALTH MINISTER JORGE JIMENEZ DE LA JARA OFFICIALLY RETURNED THE VALUABLE PROPERTY THAT HAD BEEN DISCOVERED SOME TIME AGO IN THE BUILDING HOUSING THE MINISTRY OF PUBLIC HEALTH.

THE ART OBJECTS WERE RETURNED AT A CEREMONY THAT TOOK PLACE WITHIN THE MINISTRY AND WAS ATTENDED BY ALLENDE'S WIDOW, HORTENSIA BUSSI, HIS DAUGHTER, ISABEL ALLENDE, THE MINISTERS OF THE INTERIOR, THE ECONOMY, EDUCATION AND TRANSPORTATION, AMBASSADORS AND DIPLOMATS, RELATIVES, FRIENDS AND FORMER FIGURES OF THE THEN SOCIALIST GOVERNMENT.

DURING THE CEREMONY, JIMENEZ AND BUSSI SIGNED AN OFFICIAL DOCUMENT RETURNING THE 32 PAINTINGS, 15 CERAMIC OBJECTS AND REMAINING 10 PIECES THAT HAD RESIDED IN THE FORMER PRESIDENTIAL RESIDENCE OF TOMAS MORO ON SEPTEMBER 11, 1973 AND WERE LATER FOUND AT THE HEALTH MINISTRY, WHERE THEY HAD REMAINED IN THE CARE AND CUSTODY OF MINISTRY OFFICIAL MARIA ANDREWARTHA FOR THE PAST 16 YEARS.

TUESDAY MARKED THE 82 ANNIVERSARY OF THE BIRTH OF SALVADOR ALLENDE, WHO DIED SEPTEMBER 11, 1973 DURING THE MILITARY COUP THAT OVERTHREW HIS GOVERNMENT. ACCORDING TO NEWS REPORTS, CEREMONIES BOTH IN THE CAPITAL AND IN THE COASTAL TOWN OF VINA DEL MAR, WHERE ALLENDE IS NOW BURIED, PAID HOMAGE TO THE NATIONAL HERO.

#90178h0113 06/27/1990 ~Chinese News Agency

GABORONE (JUNE 27) XINHUA - SOUTH AFRICAN PRESIDENT F.W. DE KLERK HAS WARNED RIGHT-WING WHITE EXTREMISTS NOT TO BLOCK THE TALKS BETWEEN HIS GOVERNMENT AND THE AFRICAN NATIONAL CONGRESS (ANC).

HE ISSUED THE WARNING ON TUESDAY WHEN HE MET WITH LEADERS OF SERVERAL RIGHT-WING WHITE GROUPS INCLUDING THE HERSTIGTE NASIONALE PARTY (HNP) AND AFRIKANER WEERSTANDSBEWEGING (AWB) IN PRETORIA.

THE "CITIZEN" NEWSPAPER OF SOUTH AFRICA TODAY QUOTED DE KLERK AS SAYING AFTER THE MEETING THAT THE ANC-PRETORIA TALKS ARE AIMED AT CREATING A SITUATION IN WHICH THERE IS AN UNCONDITIONAL AND UNEQUIVOCAL COMMITMENT TO A PEACEFUL SOLUTION TO THE PROBLEMS ARISING FROM APARTHEID.

BUT HE WARNED THAT HIS GOVERNMENT WILL NOT TOLERATE ANARCHY AND LAWLESSNESS, AND WILL NOT ALLOW ANY PERSONS TO TAKE THE LAW INTO THEIR OWN HANDS.

"THE JUSTIFICATION OF VIOLENCE BY THOSE ON THE LEFT AND CERTAIN FAR-RIGHT ORGANIZATIONS DISTURBS AND HINDERS NEGOTIATIONS AND IS UNACCEPTABLE," SAID DE KLERK.

THE SOUTH AFRICAN PRESIDENT HOWEVER PROMISED TO CONSULT THE PEOPLE AGAIN BEFORE INTRODUCING A NEW CONSTITUTION WHICH IS EXPECTED TO ALLOW THE BLACK MAJORITY TO SHARE POWER WITH THE RULING WHITE MINORITY.

THE RIGHT-WING GROUPS YESTERDAY VOWED TO CONTINUE MOBILIZING THEIR ARMED FORCES TO DEFEAT DE KLERK'S PLAN OF REFORMING APARTHEID POLICIES AND GRANTING POLITICAL RIGHTS TO THE BLACKS.

ONE OF THE RIGHT-WING LEADERS WARNED AFTER THE MEETING THAT THE AUTHORITIES' MOVES TO ACT CONTRARY TO WISHES AND INTERESTS OF WHITES WITHOUT CALLING ELECTIONS WILL FORCE PEOPLE TO LOOK FOR OTHER MEANS TO ENFORCE THEIR INTERESTS.

DE KLERK'S RELEASE OF POLITICAL PRISONERS INCLUDING ANC LEADER NELSON MANDELA, LIFLING OF BANS ON DOZENS OF ANTI-APARTHEID GROUPS AND HOLDING OF A PRELIMINARY PEACE TALKS WITH THE ANC HAVE ANGERED THE RIGHT-WING WHITE GROUPS. SOME RIGHT-WING WHITE EXTREMIST GROUPS HAVE ACCUSED HIM OF BETRAYING THE WHITES AND THREATENED TO USE VIOLENCE TO DISRUPT HIS REFORM PLAN.

#90178h0114 06/27/1990 ~Chinese News Agency

KUWAIT (JUNE 27) XINHUA - THE IRANIAN AMBASSADOR TO KUWAIT HAS EXPRESSED HIS GOVERNMENT'S APPRECIATION FOR THE HUMANITARIAN AID OFFERED BY KUWAIT FOR THE VICTIMS OF THE EARTHQUAKES THAT HIT IRAN EARLY LAST THURSDAY.

AMBASSADOR HUSSEIN SADEQI RELAYED THE APPRECIATION TODAY WHEN HE MET KUWAITI DEPUTY PRIME MINISTER AND FOREIGN MINISTER SHEIKH SABAH AL-AHMED AL-JABER AL-SABAH, THE KUWAIT NEWS AGENCY REPORTED.

FOLLOWING THE MEETING, SHEIKH SABAH TOLD REPORTERS THAT HE HAS ASKED THE AMBASSADOR TO CONVEY A VERBAL MESSAGE FOR IRANIAN FOREIGN MINISTER ALI AKBAR VELAYATI TO VISIT KUWAIT.

SHEIKH SABAH SAID THEY DISCUSSED, AMONG OTHER THINGS, BILATERAL RELATIONS AND A NUMBER OF REGIONAL ISSUES OF COMMON INTEREST.

THE KUWAITI AMIR SHEIKH JABER AL-AHMED AL-SABAH WILL NOT RECEIVE WELL-WISHERS AS USUAL FOR EID AL-ADHA FEAST AS A GESTURE OF SYMPATHY FOR THE EARTHQUAKE VICTIMS IN IRAN, AN OFFICIAL ANNOUNCEMENT SAID.

EACH YEAR, LIKE LEADERS IN THE REST OF THE COUNTRIES ON THE ARABIAN PENINSULA, THE AMIR MARKS THE BEGINNING OF THE TWO MAIN ISLAMIC FEASTS BY RECEIVING WELL-WISHERS AT HIS PALACE AFTER THE DAWN PRAYERS.

THE FOUR-DAY EID AL-ADHA, OR THE FEAST OF SACRIFICE, STARTS NEXT MONDAY TO COMMEMORATE PROPHET ABRAHAM'S READINESS TO SACRIFICE HIS SON TO GOD. THE OTHER FEAST IS EID AL-FITR, WHICH ENDS THE RAMADAN MONTH OF FASTING TWO MONTHS AGO.

SHEIKH JABER'S GESTURE SIGNALS THE IMPROVEMENT OF RELATIONS BETWEEN KUWAIT AND IRAN. THEIR RELATIONS DETERIORATED BECAUSE OF THE EIGHT-YEAR GULF WAR. IRAN ACCUSED KUWAIT OF ASSISITNG IRAQ'S WAR EFFORT.

KUWAIT AND OTHER GULF STATES, INCLUDING SAUDI ARABIA AND IRAQ, WERE AMONG THE FIRST TO SEND CONDOLENCES TO IRANIAN PRESIDENT HASHEMI RAFSANJANI IN THE WAKE OF THE QUAKE.

#90178h0118 06/27/1990 ~Chinese News Agency

WINDHOEK (JUNE 27) XINHUA - NAMIBIAN PRESIDENT SAM NUJOMA RETURNED HERE THIS AFTERNOON AFTER ATTENDING THE U.N. SPONSORED DONORS CONFERENCE IN NEW YORK AND VISITING THE UNITED STATES.

HE TOLD A PRESS CONFERENCE AT THE WINDHOEK AIRPORT THAT THE DONORS CONFERENCE WAS "VERY SUCCESSFUL" AND ABOUT 500 MILLION RAND (200 MILLION U.S. DOLLARS) AND SOME TECHNICAL ASSISTANCE WERE PLEDGED TO NAMIBIA.

PRESIDENT NUJOMA EXPRESSED HIS THANKS TO THE U.N. SECRETARY GENERAL FOR THE WORLD BODY'S INITIATIVE TO ORGANIZE THE CONFERENCE FOR NAMIBIA.

THE PRESIDENT SAID THAT HE ALSO TOOK THE OPPORTUNITY TO HAVE TALKS WITH U.S. PRESIDENT GEORGE BUSH AND OTHER U.S. LEADING FIGURES ON DEVELOPMENT OF BILATERAL RELATIONS.

MR. NUJOMA LEFT FOR NEW YORK ON JUNE 15 FOR HIS FIRST VISIT TO THE U.N. HEADQUARTERS AND THE UNITED STATES SINCE HE BECAME PRESIDENT OF THE NEWLY

INDEPENDENT COUNTRY ON MARCH 21 THIS YEAR.

NAMIBIA INHERITED 700 MILLION RAND OF DEBTS FROM THE FORMER COLONIAL ADMINISTRATION AND FORSEES 500 MILLION RAND BUDGET DEFICIT IN THIS FISCAL YEAR.

#90178h0119 06/27/1990 ~Chinese News Agency

TEHRAN (JUNE 27) XINHUA - FIVE DAYS AFTER THEY WERE BURIED IN RUBBLE FROM LAST WEEK'S EARTHQUAKE, AN IRANIAN MOTHER AND HER SON WERE STILL ALIVE WHEN THEY WERE RESCUED TUESDAY, THE OFFICIAL IRANIAN NEWS AGENCY IRNA REPORTED TODAY.

THE 40-YEAR-OLD WOMAN AND HER 12-YEAR-OLD SON WERE IN "CRITICAL CONDITIONS" WHEN THEY WERE DUG OUT FROM BENEATH RUBBLE IN KELISHOM VILLAGE NEAR ROUDBAR, A HARDEST HIT AREA IN THE 7.3-MAGNITUDE EARTHQUAKE THAT OCCURRED IN NORTHWESTERN IRAN EARLY THURSDAY LAST WEEK.

BOTH WERE IN CRITICAL CONDITIONS, AND RUSHED TO THE PROVINCIAL CAPITAL RASHT FOR HOSPITALIZATION, IRNA SAID.

THE EARTHQUAKE WAS THE WORST FOR DECADES IN IRAN AND KILLED 40,000 TO 50,000 PEOPLE.

ALSO ON TUESDAY, IN THE VILLAGE OF JIRANDEH, RESCUE WORKERS REMOVED MASSIVE PILES OF RUBBLE AND DUG FOR FOUR HOURS AND SAVED THREE MEMBERS OF A FAMILY -- A MAN, A WOMAN AND A BOY.

THE AGENCY DID NOT SAY HOW, IN THE TWO SEPARATE CASES, THE FIVE PEOPLE SURVIVED THE ORDEAL AND HOW THEY WERE DETECTED.

RESCUE TEAMS ARE GIVING UP THEIR WORK TO SAVE PEOPLE BURIED IN RUBBLE AS HOPE OF THEIR SURVIVAL IS GETTING INCREASINGLY SLIM, AND THERE HAVE BEEN REPORTS THAT FOREIGN RESCUE WORKERS MAY LEAVE IN A WEEK.

BUT THE LATEST SUCCESSES MAY PROMPT RESCUE OPERATIONS TO CONTINUE. IN TEHRAN, VISITING FRENCH MINISTER IN CHARGE OF HUMANITARIAN AFFAIRS BERNARD KOUCHNER SAID TODAY THAT FRENCH MEDICAL TEAMS ARE LEAVING FOR HOME FRIDAY, BUT NEW TEAMS WILL ARRIVE SOON.

IN A RELATED DEVELOPMENT, SOME MEMBERS OF IRAN'S PARLIAMENT RULED OUT ANY FORGIVENESS FOR SALMAN RUSHDIE, THE UNITED STATES AND OTHER ENEMIES FOR THEIR DONATIONS.

BRITISH AUTHOR SALMAN RUSHDIE REPORTEDLY CONTRIBUTED 5,000 POUNDS (8,650 U.S. DOLLARS) TO A NEWSPAPER RELIEF FUND. DESPITE THAT, PARLIAMENT MEMBER AYATOLLAH SADDEGH KHALKHALI SAID THAT THE DEATH SENTENCE AGAINST HIM WOULD

NOT BE REVERSED.

IRAN'S LATE TOP LEADER AYATOLLAH KHOMEINI ORDERED RUSHDIE'S DEATH IN FEBRUARY 1989 FOR BLASPHEMING ISLAM IN HIS NOVEL "THE SATANIC VERSES."

AFTER THE QUAKE, IRAN ANNOUNCED WILLINGNESS TO ACCEPT AID FROM ALL COUNTRIES EXCEPT SOUTH AFRICA AND ISRAEL.

WHEN MEETING A GROUP OF VISITORS HERE TODAY, THE CURRENT SUPREME LEADER AYATOLLAH ALI KHAMENEI EXPRESSED THANKS TO MOSLEM AND OTHER COUNTRIES WORLDWIDE FOR "RUSHING TO THE IRANIAN PEOPLE'S ASSISTANCE WITH A FEELING OF RESPONSIBILITY."

-30- 2581

#90178h0122 06/27/1990 ~Chinese News Agency

UNITED NATIONS (JUNE 27) XINHUA - A U.N. STUDY PUBLISHED HERE TODAY HAS DRAWN A RATHER GLOOMY PICTURE FOR THE WORLD IN THE 1990S THAT WOULD BE FEATURED WITH A WIDENING GAP BETWEEN THE RICH AND THE POOR, TIGHTER ENERGY SITUATION, GROWING UNEMPLOYMENT AND RISING ILLITERACY.

THE STUDY, CONDUCTED BY THE U.N. DEPARTMENT OF INTERNATIONAL ECONOMIC AND SOCIAL AFFAIRS (DIESA), SHOWED A WIDENING ECONOMIC GAP BETWEEN THE DEVELOPED AND DEVELOPING COUNTRIES.

WHILE THE DEVELOPED MARKET ECONOMIES WILL HAVE AN AVERAGE GROWTH OF 3.1 PERCENT PER YEAR, THE STUDY SHOWED, THE LEAST DEVELOPED AND HEAVILY INDEBTED COUNTRIES ARE LIKELY TO HAVE NEGLIGIBLE GROWTH OR AN ABSOLUTE DECLINE.

ENTITLED "THE GLOBAL OUTLOOK 2000," THE STUDY PREDICTED THAT THE WIDENING GAP IN TECHNOLOGY BETWEEN THE DEVELOPED AND DEVELOPING COUNTRIES MIGHT THREATEN FUTURE NORTH-SOUTH TRADE MUCH MORE THAN DISPARITIES IN INCOME LEVELS.

ACCORDING TO INFORMATION PROVIDED BY THE UNITED NATIONS, IN 1971, THE WORLD ORGANIZATION CLASSIFIED 24 COUNTRIES AS THE LEAST DEVELOPED ONES, WHOSE AVERAGE PER CAPITA INCOME IS LESS THAN 220 DOLLARS. HOWEVER, 10 YEARS LATER, THE NUMBER HAS RISEN TO 42.

THE U.N. STUDY PROJECTED THAT HIGH GROWTH RATES IN THE DEVELOPED MARKET ECONOMIES, IN ADDITION TO THE STABILIZATION OF OIL PRICES, WILL CONTINUE TO CREATE A HIGHER-THAN-EXPECTED ENERGY DEMAND IN THE WORLD.

IT SAID THAT ALTHOUGH CURRENT SURPLUS CAPACITIES WILL INITIALLY BE ADEQUATE, NEW PROBLEMS ARE LIKELY TO APPEAR AS A RESULT OF THE INCREASING GEOGRAPHIC CONCENTRATION OF RESOURCES AND ENVIRONMENTAL PROBLEMS NOT EARLIER FORESEEN.

WITH THE WORLD POPULATION EXPECTED TO REACH 6 BILLION JUST BEFORE THE TURN OF THE CENTURY, THERE WILL BE CONSIDERABLE REGIONAL DIVERSITY, THE STUDY NOTED.

IT PREDICTED LOWER LABOR-FORCE GROWTH RATES IN THE DEVELOPING WORLD, AVERAGING FROM 2.5 TO 3 PERCENT, WHILE IN THE DEVELOPED COUNTRIES, GROWTH RATES WILL BE LESS THAN 1 PERCENT.

AS THE URBAN POPULATION IN THE DEVELOPING COUNTRIES CONTINUES TO GROW FASTER THAN THE GENERAL POPULATION, THE STUDY SAID, THE TOTAL NUMBER OF ILLITERATES WILL ALSO RISE.

IT SAID SCHOOL ENROLMENTS WILL IMPROVE, BUT 100 MILLION CHILDREN IN DEVELOPING COUNTRIES BETWEEN THE AGES OF 6 TO 11 WILL NOT BE ENROLLED IN SCHOOL IN THE YEAR 2000.

AS FOR ENVIRONMENTAL DEVELOPMENT, THE STUDY ALSO SAID INEQUALITIES IN INTERNATIONAL ECONOMIC RELATIONS, COUPLED WITH INAPPROPRIATE ECONOMIC POLICIES IN MANY DEVELOPED AND DEVELOPING COUNTRIES, WILL CONTINUE TO CAUSE ENVIRONMENTAL DEGRADATION AND LIMIT DEVELOPMENT.

#90178h0123 06/27/1990 ~Chinese News Agency

ISTANBUL (JUNE 27) XINHUA - ALBANIAN PRIME MINISTER ADIL CARCANI SAID TODAY THAT HIS COUNTRY IS READY FOR TALKS WITH THE UNITED STATES AND THE SOVIET UNION ON ESTABLISHING DIPLOMATIC RELATIONS.

BEFORE LEAVING ANKARA FOR ISTANBUL, CARCANI REPORTERS AT THE AIRPORT THAT THE TALKS SHOULD BE "WITHOUT ANY PRECONDITIONS".

THE ALBANIAN PRIME MINISTER WHO ARRIVED IN ANKARA MONDAY ON A FOUR-DAY OFFICIAL VISIT ALSO SAID THAT HIS COUNTRY HOPED TO ESTABLISH RELATIONS WITH THE EUROPEAN COMMUNITY. THE ALBANIAN GOVERNMENT HAS RAISED THE ISSUE TO THE ORGANIZATION, BUT HAS RECEIVED NO RESPONSE YET FROM IT, HE SAID.

ON THE TALKS WITH TURKISH LEADERS, CARCANI SAID THAT THEY ARE "VERY POSITIVE" AND "COMPREHENSIVE", AND THEY GAVE SPECIAL IMPORTANCE TO ISSUES OF THE BALKAN COUNTRIES.

CARCANI ALSO SAID THAT HIS COUNTRY WILL MAKE EVERY EFFORT TO EVELOP THE EXISTING RELATIONS WITH TURKEY, AND HE BELIEVED THAT HIS TRIP TO TURKEY, WHICH IS THE FIRST TRIP ABROAD BY A TOP ALBANIAN OFFICIAL IN 23 YEARS, WOULD HELP EXPAND THE TIES AND STRENGHEN COOPERATION BETWEEN THE TWO COUNTRIES.

DURING HIS VISIT IN ANKARA, CARCANI HELD TALKS WITH TURKISH PRIME MINISTER

YILDIRIM AKBULUT, AND DISCUSSED WITH HIM BILATERAL RELATIONS, INTERNATIONAL AND REGIONAL DEVELOPMENTS, AND HE WAS ALSO RECEIVED BY TURKISH PRESIDENT TUGUT OZAL.

CARCANI SIGNED AN ECONOMIC AGREEMENT TUESDAY IN ANKARA WHICH CALLS FOR COOPERATION IN TOURIST, TEXTILE, METALLURGICAL AND CONSTRUCTION INDUSTRIES AND BROADCASTING.

THE ALBANIAN PRIME MINISTER IS SCHEDULED TO RETURN HOME THURSDAY AFTER A DAY OF SIGHTSEEING IN ISTANBUL.

#90178h0128 06/27/1990 ~Chinese News Agency

ADDIS ABABA (JUNE 27) XINHUA - THE ETHIOPIAN GOVERNMENT SAID TODAY THAT IT MAY CONSIDER THE PROPOSAL MADE BY TIGRAI REBELS ON SLOVING THE PROBLEM IN TIGRAI IF THEY CHANGE THE POSITION OF PROMOTING SECESSION OF ERITREA.

THE STATE COUNCIL SAID THIS IN A STATEMENT BROADCAST BY THE ETHIOPIAN TELEVISION TONIGHT AS THE GOVERNMENT'S RESPONSE TO THE RECENT PROPOSAL MADE BY THE TIGRAI PEOPLE'S LIBERATION FRONT (TPLF) ON ENDING THE CONFLICTS IN TIGRAI.

IT WAS REPORTED THAT THE TPLF HAS PROPOSED A CEASEFIRE WITH GOVERNMENT FORCES AND THE ESTABLISHMENT OF A TRANSITIONAL GOVERNMENT. BUT IT ALSO DEMANDS THE STEPDOWN OF PRESIDENT MENGISTU.

"THE GOVERNMENT HAS NO ASPIRATION OTHER THAN PROMOTING AND STRIVING FOR THE PROTECTION OF THE INTEGRITY OF ETHIOPIA AND FOR THE CONSOLIDATION OF PEACE THROUGH THE ELIMINATION OF ALL CONFLICTS", SAID THE STATEMENT.

THE TPLF HAS BEEN FIGHTING FOR YEARS TO TOPPLE THE GOVERNMENT OF PRESIDENT MENGISTU HAILE-MARIAM. SINCE LAST YEAR, IT HAS BEEN IN COORDINATION WITH SECESSIONIST REBELS IN THE FARTHER NORTH REGION OF ERITREA IN THEIR FIGHTINGS AGAINST GOVERNMENT TROOPS. SINCE THEN, THE GOVERNMENT HAS BEEN ACCUSING IT OF ATTEMPTING TO DISMEMBER ETHIOPIA.

THE STATEMENT ALSO SAID THE GOVERNMENT WISHES TO REACTIVATE THE PEACE TALKS WITH REBELS IN BOTH TIGRAI AND ERITREA, WHICH HAVE BEEN STALLED SINCE EARLY THIS YEAR. BUT THE REBELS IN ERITREA HAVE ALREADY REJECTED THE GOVERNMENT PROPOSAL FOR THE RESUMPTION OF THE TALKS.

THE STATEMENT CAME A FEW DAYS AFTER THE CONCLUSION OF AN ETHIOPIAN PARLIAMENT SESSION HELD TO PRIMARILY CONSIDER THE SECURITY SITUATION IN NORTHERN ETHIOPIA. FACED WITH INCREASED DEFEAT SUFFERED BY GOVERNMENT FORCES IN BATTLES WITH THE REBELS, PRESIDENT MENGISTU CONCEDED AT THE SESSION THAT THE COUNTRY IS ON THE VERGE OF COLLAPSE.

ISLAMABAD (JUNE 27) KYODO - JAPAN WILL GRANT 5,663 MILLION YEN (37.7 MILLION DOLLARS) IN AID TO PAKISTAN FOR FIVE PROJECTS UNDER AN AGREEMENT SIGNED WEDNESDAY.

THE PROJECTS INCLUDE AN EDUCATIONAL TELEVISION CHANNEL, A MODEL INTEGRATED RURAL AREA DEVELOPMENT SCHEME, MODERNIZATION OF LABORATORIES AT THE PAKISTAN COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH, GEOSCIENCE LABORATORIES, AND EXPLOITATION OF GROUND WATER RESOURCES IN BALUCHISTAN.

THE AGREEMENT WAS SIGNED BY THE CHARGE D'AFFAIRES AT THE JAPANESE EMBASSY AND THE SECRETARY OF PAKISTAN'S ECONOMIC AFFAIRS MINISTRY.

OFFICIALS SAID THE AGREEMENT BRINGS TOTAL JAPANESE GRANTS TO PAKISTAN PLEDGED FOR 1990-91 TO 6,649 MILLION YEN OR 43 MILLION DOLLARS.

#90178k0077 06/27/1990 ~Japanese News Agency

TOKYO (JUNE 27) KYODO - JAPAN AND THE UNITED STATES REACHED A BROAD AGREEMENT WEDNESDAY ON THE OPENING OF THE JAPANESE TELECOMMUNICATIONS MARKET, OFFICIALS OF THE POSTS AND TELECOMMUNICATIONS MINISTRY SAID.

THE OFFICIALS SAID THE AGREEMENT WAS REACHED AT A MEETING BETWEEN MINORU SHIOYA, VICE MINISTER OF POSTS AND TELECOMMUNICATIONS, AND LINN WILLIAMS, DEPUTY U.S. TRADE REPRESENTATIVE.

THE OFFICIALS SAID SHIOYA AND WILLIAMS AGREED ON THE OPENING OF THE JAPANESE MARKET FOR DIGITAL SERVICE UNITS, OR NETWORK CHANNEL TERMINATING EQUIPMENT, AND INTERNATIONAL VALUE-ADDED TELECOMMUNICATIONS NETWORK.

BOTH SIDES AGREED TO SOLVE REMAINING ISSUES AS SOON AS POSSIBLE, INCLUDING THE TIMING OF THE OPENING OF THE INTEGRATED SERVICES DIGITAL NETWORK (ISDN) MARKET, THE OFFICIALS SAID.

AS FOR THE VALUE-ADDED NETWORK (VAN) ISSUE, WILLIAMS EXPRESSED HIS HOPE THAT JAPAN WILL SIMPLIFY PROCEDURES FOR FOREIGN ENTRY INTO THE MARKET, ALLOWING FOREIGN FIRMS TO INAUGURATE NEW SERVICES WITHOUT APPLYING TO THE POSTS AND TELECOMMUNICATIONS MINISTRY FOR PERMISSION EACH TIME.

SHIOYA REPLIED THAT JAPAN WOULD STUDY THE MATTER IN VIEW OF DIFFERENCES IN SYSTEMS BETWEEN THE TWO COUNTRIES, THE OFFICIALS SAID.

EXPERTS FROM THE TWO COUNTRIES WILL STUDY THE ISSUE AT A MEETING TO BE HELD IN THE MIDDLE OF JULY, THEY ADDED.

-30- 1496

#90178k0078 06/27/1990 ~Japanese News Agency

NAGOYA (JUNE 27) KYODO - THE ISHIDA GROUP, A TOYOTA MOTOR CORP.-AFFILIATED ORGANIZATION, SAID WEDNESDAY THAT IT HAD DECIDED TO CALL OFF ITS PLANNED TAKEOVER OF A U.S. AIRCRAFT PARTS MAKER.

IN FEBRUARY, THE ISHIDA GROUP, WHICH PLANS TO DEVELOP VERTICAL TAKE-OFF AND LANDING AIRCRAFT (VTOL), REVEALED THE PLAN TO PURCHASE THE FLORIDA-BASED CRESTVIEW AIRCRAFT CORP. FOR 6 MILLION DOLLARS FROM ITS PARENT COMPANY, FAIRCHILD AIRCRAFT CORP.

BUT ISHIDA GROUP CHAIRMAN TAIICHI ISHIDA SAID THE COMPANY HAS ABANDONED ITS PLAN BECAUSE THE GROUP HAD NOT HEARD FROM CRESTVIEW ON WHETHER THE COMPANY COULD SATISFY STATE ENVIRONMENTAL REGULATIONS.

CRESTVIEW'S WATER-DISPOSAL FACILITY HAS BEEN FOUND VIOLATING FLORIDA'S ENVIRONMENTAL REGULATIONS.

''WE COULD NOT ALSO REACH AN AGREEMENT ON SHARING OF RESPONSIBILITIES IN CASE OF AN ACCIDENT, AND WE FOUND THE PURCHASE COST WOULD BE LARGER THAN EXPECTED,'' ISHIDA SAID.

ISHIDA SAID THE GROUP HAS NOT ABANDONED PLANS TO DEVELOP VTOL AIRCRAFT AS

IT IS POSSIBLE TO MAKE VTOL PARTS WITHIN THE GROUP'S RELATED MANUFACTURERS.

-30- 1239

#90178k0081 06/27/1990 ~Japanese News Agency

TOKYO (JUNE 27) KYODO - THE CENTRAL UNION OF AGRICULTURAL COOPERATIVES ON WEDNESDAY CALLED FOR REVISION OF THE GOVERNMENT'S UNIFORM RICE PRICE SYSTEM, CLAIMING IT WILL DEAL A BLOW TO FARMING HOUSEHOLDS.

THE UNION, KNOWN AS ZENCHU, MADE THE APPEAL ON THE BASIS OF ITS STUDY OF THE NATION'S RICE PRICING SYSTEM.

IT SAID THE GOVERNMENT'S RICE PURCHASE PROGRAM WILL NOT CONTRIBUTE TO PROMOTING LARGE-SCALE RICE FARMING EVEN IF PRODUCER PRICES OF RICE ARE LOWERED.

ON THE CONTRARY, ZENCHU SAID, IT WILL DISCOURAGE RICE GROWERS AND FORCE THEM TO FIND NEW SOURCES OF INCOME OTHER THAN FARMING.

THE REPORT, COMPILED BY AN EXPERT PANEL COMMISSIONED BY THE UNION, WAS RELEASED AS DEBATES ON RICE PRICES FOR THE 1990 HARVEST APPROACH A CRUCIAL STAGE.

THE REPORT SAID THERE IS A STRONG POSSIBILITY THAT LARGE-SIZED RICE GROWERS WOULD WITHDRAW FROM FARMING IF THEIR PROFITABILITY WORSENED, AND THAT SMALL-SCALE FARMERS WOULD BE DRIVEN TO FIND NEW SOURCES OF INCOME IF RICE PRICES SHOULD FALL.

THIS TENDENCY IS PARTICULARLY STRONG AMONG FARMERS WHO PRODUCE RICE OF LOWER GRADES SET BY THE GOVERNMENT, SUCH AS THOSE IN HOKKAIDO AND AOMORI PREFECTURE, IT SAID.

THE REPORT URGED THE GOVERNMENT TO SET RICE PRICES BY TAKING INTO CONSIDERATION THE REGIONAL SITUATIONS AND PROBLEMS OF FARMERS.

#90178k0083 06/27/1990 ~Japanese News Agency

LONDON (JUNE) 27 KYODO - A GROUP OF CREDITOR BANKS HAS AGREED TO ALLOW BULGARIA TO SUSPEND INTEREST PAYMENTS ON ITS DEBT FOR THREE MONTHS STARTING SATURDAY, FINANCIAL SOURCES HERE SAID WEDNESDAY.

THE ACCORD FOLLOWED A REQUEST FROM THE BULGARIAN FOREIGN TRADE BANK, WHICH HOLDS ABOUT 9 BILLION DOLLARS OF THE COUNTRY'S TOTAL DEBT BURDEN OF 10 BILLION DOLLARS, THE SOURCES SAID.

THE BANK UNILATERALLY STOPPED PAYING THE PRINCIPAL AT THE END OF MARCH, AND THE CREDITORS HAVE BEEN NEGOTIATING WITH THE BANK TO GET IT TO PAY.

AFTER THE SUSPENSION OF INTEREST PAYMENTS, THE CREDITOR BANK GROUP PLANS TO HOLD AN ADVISORY COMMITTEE MEETING ON THE ISSUE IN MID-JUNE IN LONDON, THE SOURCES ADDED.

-30- 886

#90178k0085 06/27/1990 ~Japanese News Agency

TOKYO (JUNE 27) KYODO - JAPAN HAS PROPOSED SPENDING OF SOME 430 TRILLION YEN OR MORE ON PUBLIC WORKS PROJECTS IN THE NEXT 10 YEARS IN AN ATTEMPT TO BREAK THE CURRENT IMPASSE IN THE FINAL ROUND OF STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS, GOVERNMENT SOURCES SAID WEDNESDAY.

PRIME MINISTER TOSHIKI KAIFU WILL SOON OFFICIALLY DECIDE ON THE ADDITION OF 15 TRILLION YEN OR MORE TO JAPAN'S ORIGINAL PROPOSAL OF 415 TRILLION YEN TO REMOVE THE LAST OBSTACLE TO CONCLUDING THE YEARLONG TALKS, THE SOURCES SAID.

KAIFU MET FINANCE MINISTER RYUTARO HASHIMOTO AT THE PRIME MINISTER'S OFFICIAL RESIDENCE TO DISCUSS SETTLEMENT OF THE BILATERAL TALKS FOR MORE THAN 30 MINUTES UNTIL 9:39 P.M., THE SOURCES SAID.

BEFORE MEETING THE PREMIER, HASHIMOTO MET U.S. AMBASSADOR TO JAPAN MICHAEL ARMACOST AND ASSISTANT TREASURY SECRETARY FOR INTERNATIONAL AFFAIRS CHARLES DALLARA AT THE FINANCE MINISTRY APPARENTLY TO SOUND OUT THE U.S. REACTION TO JAPAN'S NEW OFFER.

THE U.S. HAS REJECTED JAPAN'S ORIGINAL PROPOSAL, SAYING THE FIGURE IS NOT SUFFICIENT TO SLASH JAPAN'S MASSIVE TRADE SURPLUS WITH THE U.S., WHICH TOTALED 49 BILLION DOLLARS LAST YEAR.

THE TWO SIDES HAVE ALREADY COME NEAR TO AGREEMENTS IN FOUR OUT OF THE SIX ISSUES ON THE NEGOTIATING TABLE, LEAVING ONLY TWO SUBJECTS -- JAPAN'S PUBLIC WORKS SPENDING AND THE SHORTENING OF THE JAPANESE PROCESS OF GRANTING PATENTS -- AS SNAGS TO CONCLUDING THE TALKS, THE SOURCES SAID.

THE TWO GOVERNMENTS ARE EXPECTED TO RELEASE A FINAL REPORT TO THE TALKS AS SOON AS THE TWO ISSUES ARE SETTLED, THEY SAID.

MEANWHILE, A U.S. GOVERNMENT OFFICIAL, BRIEFING REPORTERS ON CONDITION OF ANONYMITY, SAID THERE IS STILL A POSSIBILITY THAT THE TWO SIDES WILL FAIL TO REACH AGREEMENT IN TOKYO.

IN THAT CASE, THEY WILL RESUME THE TALKS SOMETIME IN THE U.S., HE SAID.

"IF WE DON'T REACH AGREEMENT TOMORROW WE WOULD PICK UP SOMETIME IN THE

STATES," HE SAID. "I CANNOT TELL YOU WHERE IT WOULD BE, BUT IT WOULD BE EASY TO PICK UP AGAIN AND FINISH UP THE REMAINING DETAILS ... PRIOR TO THE (HOUSTON) SUMMIT."

THE OFFICIAL SAID THE AREAS IN WHICH NO AGREEMENTS HAVE BEEN REACHED ARE THE SAVINGS AND INVESTMENTS (JAPAN'S PUBLIC WORKS SPENDING) ISSUE, EXCLUSIONARY BUSINESS, PRIMARILY PATENT AND PRIVATE RIGHTS OF ACTION AGAINST CARTELS, ''KEIRETSU'' BUSINESS GROUPINGS, AND FOREIGN INVESTMENT.

-30- 2527

#90178k0103 06/27/1990 ~Japanese News Agency

TOKYO (JUNE 28) KYODO - NIPPON TELEGRAPH AND TELEPHONE CORP. (NTT) SAID THURSDAY IT HAS DEVELOPED THE WORLD'S FASTEST TRANSISTOR WHICH WILL ENABLE PRODUCTION OF AN INTEGRATED CIRCUIT (IC) CAPABLE OF PROCESSING 30 GIGABITS OR 30 BILLION BITS, OF INFORMATION PER SECOND.

THE GIANT DOMESTIC TELECOMMUNICATIONS COMPANY SAID THE BIPOLAR TRANSISTOR, MADE OF GALLIUM ARSENIDE AND ALUMINUM GALLIUM COMPONENTS, CAN RESPOND TO 170 BILLION VIBRATIONS PER SECOND, OR 170 GIGAHERTZ.

THE COMPANY SAID IT PLANS TO START COMMERCIAL PRODUCTION OF THE NEW TRANSISTOR IN A FEW YEARS.

THE NEW TRANSISTOR IS MORE THAN FIVE TIMES FASTER THAN EXISTING BIPOLAR ONES AND CAPABLE OF BOOSTING THE TRANSMISSION SPEED 20-FOLD IF APPLIED TO AN OPTICAL FIBER COMMUNICATIONS SYSTEM, THE COMPANY SAID.

IT ALSO SAID THE NEW TRANSISTOR CAN SPEED UP THE PROCESSING SPEED OF A SUPERCOMPUTER BY NEARLY FIVE TIMES.

NTT DEVELOPED THE WORLD'S FIRST SUPER-FAST TRANSISTOR WITH A PROCESSING SPEED OF 105 GIGAHERTZ IN 1987. THE COMPANY SAID THE NEW PRODUCT IS AN IMPROVED VERSION OF THAT TRANSISTOR.

IT SAID THE NEW TECHNOLOGY WILL BE INTRODUCED AT THE DEVICE RESEARCH CONFERENCE TO BE HELD IN SANTA CLARA, CALIFORNIA, ON WEDNESDAY.

-30- 1383

#90178k0121 06/27/1990 ~Japanese News Agency

TOKYO (JUNE 28) KYODO - THE BANK OF JAPAN INJECTED FUNDS TOTALING 1.2 TRILLION YEN INTO THE BANKING SYSTEM THURSDAY MORNING BY PURCHASING 600 BILLION YEN IN TWO-WEEK DISCOUNT BILLS AND LENDING 600 BILLION YEN TO COMMERCIAL BANKS, MONEY BROKERS SAID.

THE BILLS ARE DUE ON JULY 16.

THE INJECTION OF 1.2 TRILLION YEN, EQUAL TO THE ESTIMATED FUND SHORTAGE FOR THE DAY, INDICATED THE CENTRAL BANK IS WILLING TO ALLOW SHORT-TERM MONEY RATES TO RISE, A MONEY BROKER AT A MAJOR COMMERCIAL BANK SAID.

-30- 663

#90178m0001 06/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT reports that the index of leading economic indicators rose 0.8%. Economist were expecting a rise of 0.7%

Nikkei surges 740.98. ... In London, the FTSE is down nearly 20 points. ... MCI COMMUNICATIONS signed a loan agreement for up to $1 billion with a group of 22 banks to finance its acquisition of TELECOM USA. ... CONTINENTAL BANK CORP. has announced it will be cutting back on services and eliminating 900 positions from its staff. ... DONALD TRUMP managed to avoid bankruptcy by coming up with $20 million in short-term financing. ... CHRYSLER CORP. plans to purchase DOLLAR RENT A CAR in an effort to increase consumer exposure to its products.

WHAT'S AHEAD:

White House and Congressional budget negotiators continue their talks with new taxes now on the table. ... TREASURY SECRETARY NICHOLAS BRADY is scheduled to give a briefing on the upcoming G-7 economic summit at 12:00 noon EDT. ... The SENATE CONSUMER SUBCOMMITTEE will hold hearings on the effectiveness of the FEDERAL TRADE COMMISSION. this Sunday.

FROM THE BULLS:

"We knew that eventually reality would have to set in," says LOUIS EHRENKRANTZ of EHRENKRANTZ & KING, explaining why PRESIDENT BUSH's about face on taxes did not effect the market. He believes that Bush's declaration is a positive for the market because it means a lower deficit, and therefore, lower interest rates. "If the tax increase is voted, and voted quickly, I think the Fed will be forced into a more accommodative stance, and then you're looking at a very strong stock market," says Ehrenkrantz, who thinks the news makes a rally of 100 to 200 points likely. (FNN "Marketwrap", 6/26)

FROM THE BEARS:

"The equity market has really been lead by a few, select blue chip stocks

and that's not a good implication for the three to six month outlook," says GAIL DUDACK of S.G. WARBURG. "That kind of market means that there is something that really concerns investors and I think it is earnings." She says that she has been fond of the energy sector, which has held up well in view of lower oil prices. Ms. Dudack recommends this sector for the long-term investor. She adds, "I think, for the most part though, you can get most stocks cheaper probably later in the summer." Currently Dudack says, "I don't think the Dow is sustainable above 2900 for any length of time, so it is a good time to raise some cash, especially where you've made some good price gains off the May/June rally." (FNN "Marketwrap", 6/26)

STOCK MARKET:

"We are looking for worse earnings" for the second quarter, says ED MATLUCK of ZACKS INVESTMENT RESEARCH. "Right now the consensus is that earnings on average for the S&P 500 will be down about 6% from the same quarter a year ago." He believes that the market has already discounted these poor earnings just as they had discounted the poor first quarter earnings. (FNN "Marketwrap", 6/26)

The recent doldrums in the stock market are merely a "corrective phase," which will continue while the market is "digesting the roughly 300 points since late April," according to EUGENE SIT of SIT INVESTMENT ASSOCIATES. "I expect the summer months will be dull," says Sit. He says the market will not fall below 2750, and within a year could be as high as 3100. ("Investor's Daily", 6/27)

"We're dealing with a hair trigger market here," says PETER BARRY, director of research at GERARD KLAUER MATTISON & CO. "Earnings expectations have been too high, and investors see no room for error." ("USA Today", 6/27)

"The market's action was very disappointing," says JON GROVEMAN, president of LADENBURG, THALMANN & CO. "Stocks are in a corrective mode, and the early rise appeared to be just a technical bounce representing some short-covering." ("Investor's Daily", 6/27)

PRESIDENT BUSH's proposals on reducing the federal budget deficit sparked an early sharp run-up in stock prices, but the news had little lasting impact on shares, which closed lower on near-term concerns. "It helped bonds more than stocks. We are looking more at things like second quarter earnings and the strength of the economy," says one trader. "If we raise taxes, we could go from an economic soft landing to a crash landing," says ALFRED GOLDMAN of A.G. EDWARDS. "Talk is cheap, particularly among politicians. There's no guarantee that our political leaders are willing to remove their elephant and donkey buttons and work for the good of the country." He continues, "I think cold reality is coming in. People

realize you can't cure problems with a few words, so it's back to the short-term trend, which is down." (Reuters, 6/26 and "USA Today", 6/27)

"The Bush tax statement gave the market confidence early in the day, but then investors began to believe they were hearing more jawboning than action itself on the deficit," says ALAN ACKERMAN, senior vice president at GRUNTAL & CO. "And the absence of concrete developments on the deficit front means rates will probably hang at these levels." (UPI, 6/26)

"So much for the 'peace dividend,'" says WALTER BAUMANN, a strategist at NIKKO SECURITIES, on the new Bush tax stance. "The Cold War has finally come to an end, yet our taxes are going up. The market is viewing this development with very mixed emotions." ("The Washington Post", 6/27)

STOCK TIPS:

ROY BURRY, food and tobacco analyst at KIDDER PEABODY, says QUAKER is very attractive and believes ANHEUSER BUSCH is undervalued. He also likes two tobacco stocks, PHILIP MORRIS and AMERICAN BRANDS. (CNN "Business Day", 6/27)

STUART CRANE, analyst at GRUNTAL & CO., says CORNING INC. "is a lovely company, but apparently its earnings can't overcome softness in some of its business segments." Crane has lowered his estimate for Corning's 1990 per-share earnings to $2.70 from $3, and says 1991 per-share earnings may only reach $2.80. "And I have a very low degree of confidence in that." ("USA Today", 6/27)

JEFFREY VINIK, portfolio manager for the $510 million FIDELITY CONTRAFUND, says he has "significantly" cut his position in two regional brokerages: RAYMOND JAMES and A.G. EDWARDS. Regionals "went from being great buys to solid holds." He says, "In terms of buying, I'd wait until they're cheaper." (WSJ, 6/27)

JEFF LANDLE of STOVALL/TWENTY-FIRST ADVISERS says IBM's new PS/1 home computer will follow the failure of the PC/Jr. "IBM has disappointed us a number of times in the past as far as moving into the home computer market. I think this is an area where they don't have a lot of expertise, so my expectation is it's not going to be gangbusters." JOHN MAXWELL of DILLON, READ & CO. disagrees, saying, "I thought it was impressive. I thought IBM had finally come out with a personal computer where they listened to the customers and responded to them in terms of price, performance and service." (CNBC "Business View", 6/26)

MOTOROLA's plans for a "cellular system in the sky" will change the company's image, according to JOHN PEMBERTON, an analyst at GARTNER GROUP. "They'll be a different corporation over the next 10 years," says Pemberton. "They changed their character into the big leagues."

("Investor's Daily", 6/27)

PRESIDENT BUSH's reversal on taxes makes it almost certain that tobacco levies will be raised, pushing per pack prices toward two dollars. It's the latest in a stream of bad news events that has caused ALLAN KAPLAN, analyst at MERRILL LYNCH to place a neutral rating on tobacco stocks. But Kaplan admits the impact of negative news is more likely to be psychological than fundamental. "People who own tobacco stocks have gotten used to hearing bad news [but] earnings keep going up ... I have no problem with the earnings of any of these companies." Kaplan says smokers tend to be insensitive to price -- in Canada, smokers pay four dollars per pack and business is very profitable. (CNN "Business Morning", 6/27)

Other targets for new taxes are oil and gasoline. "If you go through [a tax of] twenty cents per gallon on gasoline, you start to cut back consumer usage," says SIMON TRIMBLE, oil analyst at SHEARSON LEHMAN. The Administration's decision to delay offshore drilling in some areas will delay the U.S.'s ability to replace proven reserves, according to Trimble who says the country now imports more than fifty percent of its oil. Despite recent weakness, Trimble sees oil prices firming and quality of oil company earnings improving. His pick: TEXACO. (CNN "Business Day", 6/27)

INTERSTATE/JOHNSON LANE recommends stock in HELIG-MEYERS CO. one of the USA's largest home furnishing retailers, operating 305 stores in 12 Southeastern states. The company's earnings should average 15% to 20% annual growth as the company's of the last three years starts adding profits. They expect to continue expanding 10% annually in the next few years. ("USA Today", 6/27)

The investment theme for the early 1980s was disinflation and in the late 1980s takeovers," says EUGENE SIT of SIT INVESTMENT ASSOCIATES. "The theme for the 1990s will be to buy companies with sustainable earnings growth in industries showing dynamic change, such as environmental, health-care and technology [stocks]." Sit also recommends "world class stocks' such as BOEING. ("Investor's Daily", 6/27)

-30- 9791

#90178m0002 06/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The German mark rose yesterday in advance of the German monetary union on Sunday. "All this is surprising in the run-up to German monetary union,

when we could have expected a softer Deutsche mark," says ANDY ROBERTSON, CHASE MANHATTAN's corporate foreign-exchange sales manager. "It's too early to tell if this is the long-term direction." (WSJ, 6/27)

"A lot of people have been bullish on Europe and the mark for some time, and the market just decided to stand out of the way and let it go up," says DAVID WILSON, a New York vice president with GIROZENTRALE Vienna. (WSJ, 6/27)

PRESIDENT BUSH's startling concession yesterday pushed the dollar up, then when it was learned that the President had been vague, the currency dropped again. "What appeared to first be positive turned out negative," says WALTER SIMON of BANK JULIUS BAER & CO. ("Investor's Daily", 6/27)

"I think that both markets [stock and bond] are caught between a rock and a hard place," says GAIL DUDACK of S.G. WARBURG. "I have basically been cautious on the market. I think that interest rates may go higher short-term. I don't think they will be sustained, so we may have a good buying opportunity in the bond market over the short run." (FNN "Marketwrap", 6/26)

Credit market analysts were heartened by Bush's willingness to talk about curbing spending on politically sensitive entitlement programs in addition to looking at possible tax increases. "Bush's statement was very carefully crafted; he kept things deliberately vague," says CHARLES LIEBERMAN, a managing director at the MANUFACTURERS HANOVER SECURITIES CORPORATION. "But mentioning the 'E' word is just as important as talking about taxes." (NYT, 6/27)

"The fundamental picture is bullish [for bonds], but right now we have a little problem finding buyers," says one Government bond trader. "A lot of our traditional customers have cash and are positive on the market, but they don't want to screw up their books by taking on new positions at the end of the quarter." (NYT, 6/27)

THE ECONOMY:

ALAN LEVENTEN, managing director of BALFOUR MACLAINE, says that Wednesday's leading indicators report should not hold any surprises "I'm expecting ... what a lot of other people are expecting," says Leventen, who believes the figures should be up around 0.6%. But he cautions, "I don't think it's going to mean a hell of a lot of a difference one way or the other." He says the figures are no longer a good indicator. (FNN "Marketwrap", 6/26)

"The economy does not need a heck of a lot of tightening now," says ROBERT ORTNER, a former Undersecretary of Commerce for economic affairs and author of a new book, "Voodoo Deficits." He believes that a large deficit

reduction package would pose a threat to continued growth. "The economy is already sputtering ... One more twist would do it." ("The Washington Post", 6/27)

"Do the right thing for long-run budget policy and leave it up to the Fed to do the right thing with interest rates," says GEORGE PERRY of the BROOKINGS INSTITUTION. But doing the right thing might not be enough in the short-run, Perry continues. "This is the first time in a long time that I have felt the economy is shaky. This is a worse time to [cut the budget deficit] than any in the last five years. But I still say do it. I think there is room for interest rates to fall a lot." ("The Washington Post", 6/27)

"The low unemployment rate is mainly a labor force story," says ALLEN SINAI, chief economist at BOSTON CO., who believes the low rate belies the actual economic weakness. "The thrust of all the demographic studies is that we will continue to see slow growth in the labor force in the 1990s." ("Investor's Daily", 6/27)

"Part of the Fed's game plan is to keep growth below potential in order to get the unemployment rate up and reduce pressure on wages and inflation," says DOUGLAS LEE, chief economist at COUNTY NATWEST. Despite naysayers, Lee thinks the plan is working. "The Fed only got the economy onto a slow growth track about six months ago and probably sees it plan as being on track, but financial markets are impatient - they think it's not working." ("Investor's Daily", 6/27)

IN WASHINGTON:

PRESIDENT BUSH distances himself from his campaign promise of "no new taxes" in a press briefing released yesterday: "It is clear to me that both the size of the deficit problem and the need for a package that can be enacted require all of the following: entitlement and mandatory program reform, tax revenue increase and growth incentives." ("Nightly Business Report", 6/26)

SEN. BOB PACKWOOD (R. - Org.) says the President's new stance on tax increases will pave the way for budget concessions before the Congressional recess. "With everything on the table, and with the President's statement [yesterday] clearly everything is on the table, we could have a budget package through the Congress and to the President by the August recess in early August." (CNBC "Business View", 6/26)

"The President has concluded that tax increases are necessary," says SENATE MAJORITY LEADER GEORGE MITCHELL (D. - MAINE). "We share the President's view." (WSJ, 6/26)

The best known line of the 1988 Presidential campaign has come back to

haunt PRESIDENT BUSH. Yesterday the President acknowledged that, in order to bring about a budget compromise, some "tax revenue increases" would be necessary, a direct contradiction of Bush's "No New Taxes" pledge. Response to Bush's change of heart was mostly positive. "Republicans and Democrats concur that we have to deal in a budget summit with each one of these specifics, including tax increases," said SPEAKER OF THE HOUSE THOMAS FOLEY (D. - Wash.) However, some, like JERRY JASINOWSKI, president of the NATIONAL ASSOCIATION OF MANUFACTURERS, were somewhat less enthusiastic. "Business is concerned that the effort will be to simply tax business in order to solve this problem," said Jasinowski. (FNN "Marketwrap", 6/26)

PRESIDENT BUSH's announcement left many members of his own party stunned yesterday. "A tax increase is unacceptable," read a letter to Bush written by REP. ROBERT WALKER (R. - Penn.), which included the signature of many other conservative Representatives. "We will not vote for a budget package that increases tax rates," the letter continued. ("Investor's Daily", 6/27)

In another controversial announcement, PRESIDENT BUSH banned most new offshore drilling until after the year 2000. He also canceled a planned lease program, but, on the condition that studies show the environment can be protected, allowed for drilling in some areas. As those who compromise often do, the President drew fire from both sides of the issue. "Locking up these energy-rich lands at a time when our dependence on foreign energy is escalating is a serious mistake," said a statement from the AMERICAN PETROLEUM INSTITUTE. On the other hand, LISA SPEER, a senior staff scientist at the NATURAL RESOURCES DEFENSE COUNCIL, praised the idea of Bush's announcement, but added, "It falls short in several crucial respects." Speer said a permanent ban is necessary. ("Investor's Daily", 6/27)

#90178p0148 06/27/1990 ~PR Newswire

RIVERTON, Wyo. (JUNE 27) PR NEWSWIRE - Metro Cable Corp. (NASDAQ: METO) today announced a net loss of $150,381 or 6 cents per share for the year ended March 31, 1990 compared to net earnings of $4,078,201 or $1.53 per share in the previous fiscal year.

Robert Thrailkill, president, said the company is continuing to explore other business opportunities since the company's remaining cable systems were sold in the prior year. Thrailkill noted that the cable business is still a viable investment since asking prices for cable systems are starting to decline.

Thrailkill also indicated that management continues to view Metro's stock as undervalued and the company will continue to purchase its shares in the

open market.

OYSTER BAY, NY (JUNE 27) PR NEWSWIRE - "The Simpsons" will reach gaming fans in September when Acclaim Entertainment Inc. (NASDAQ: AKLM) begins shipping its new SuperPlay (tm) Hand-held electronic video games based on the original family of characters created by cartoonist Matt Groening. Under an exclusive licensing agreement, Acclaim is creating SuperPlay Hand-held, Nintendo Entertainment System (NES) and Game Boy (tm) video games based on the popular "Simpsons" property.

"By all standards, "The Simpsons' is the runaway licensing sensation of the year, perhaps even the decade," says Robert Holmes, president of Acclaim. "And since Bart Simpson and his family ideally translate as game characters, we anticipate an extremely successful September release for our first 'Simpsons' product, a SuperPlay Hand- held."

The Acclaim 'Simpsons' SuperPlay Hand-held will be available in September and is expected to retail for approximately $19.95.

Acclaim Entertainment Inc., is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

CALABASAS HILLS, CALIF. (JUNE 27) PR NEWSWIRE - Western Data Systems (WDS), the leading manufacturer of contract-oriented management resource planning (MRP II) software systems announced today Visionary Corporate Technologies (VICOR) of Palo Alto, Calif., has acquired a controlling interest in WDS.

Gerald J. Burnett, chairman and chief executive officer of VICOR, said "We are extremely pleased to be associated with the people, products and clients of WDS and expect that the company will grow rapidly over the next few years. We look forward to our involvement working with WDS' employees who will become substantial owners of the firm. We are also pleased that the company's current investors - largely comprised of major venture capital organizations - will continue to be associated with the

company through preferred stock positions."

In commenting on the transaction, Larry Smart, president of WDS, said "VICOR principals bring a high level of understanding of our business, products and services. We are delighted to be able to utilize their substantial expertise and industry relationships as we expand further into aerospace and defense markets and commercial contract oriented manufacturing industries. VICOR and WDS both view customer relationships as critical to the firm's success and we will be working together to provide enhanced and expanded systems and services to our clients."

WDS's products and services are utilized internationally with sales and support offices in the United States and Europe.

#90178p0168 06/27/1990 ~PR Newswire

BELLEVUE, WA (JUNE 27) PR NEWSWIRE - Quality Food Centers Inc. (NASDAQ: QFCI) today reported net earnings for the second quarter ended June 16 of $3,586,000, compared with the $3,307,000 in net earnings for the corresponding 1989 quarter. Net earnings per share were 37 cents, compared with 35 cents per share for the second quarter of 1989, after giving effect to the two-for-one stock split effective Sept. 26, 1989.

Sales for the second quarter were $77.5 million, compared with $76.5 million last year. Second-quarter sales in 1989 were boosted by the area-wide labor dispute that began on May 11 and was settled on July 30, 1989. The 12-week strike affected approximately six weeks of the second quarter and involved most supermarkets in the Seattle/King County area, excluding QFC and a few other independents.

In commenting on the results, Marc Evanger, vice president and chief financial officer said, "Sales for the second quarter of 1990 were strong throughout QFC, particularly in our remodeled stores and the three new stores that we have opened since August 1989. Our operating margins improved slightly to 6.7 percent of sales; and this, together with higher sales and reduced interest expense, produced the increase in net earnings for the quarter."

"We are extremely pleased with our second-quarter sales and earnings," said Dan Kourkoumelis, QFC president and chief operating officer. "In comparing 1990 results with 1989, the second quarter was quite challenging

and we anticipate even more challinging comparisons in the third quarter. Our people worked very hard to produce these results while meeting a rigorous grand opening schedule for our new and remodeled stores during the quarter. We extend to each of them our sincerest thanks."

For the 24 weeks ended June 16, net earnings were $6,713,000, or 70 cents per share, compared with net earnings of $5,286,000, or 55 cents per share in the comparable period last year. Sales for the 24-week period of 1990 reached $151 million, compared with $136 million in the comparable 1989 period.

QFC is the largest independent supermarket chain in Seattle/King County. QFC has served this growing area for 35 years and today has 25 stores. In operating its stores, QFC's first priority is satisfying customers' needs by emphasizing superior service, high-quality perishables and convenient store locations.

CLEVELAND (JUNE 27) PR NEWSWIRE - To better serve its customers, The Cleveland Electric Illuminating Company (CEI) (NYSE: CX) will open a new, larger downtown Cleveland Customer Service Center at 696 Euclid Ave. on July 2.

The new office will replace CEI's Customer Service Center, opened in 1958 on the first floor of The Illuminating Building at 55 Public Square. The new Euclid Avenue location will feature a full complement of CEI services and many added conveniences.

"Our new customer center will provide 'one-stop shopping,'" says James L. Atkinson, CEI director of customer service. "Customers will be able to pay their electric bills, have new electric service turned on, enroll in

various payment assistance programs, or receive duplicate or final bills--all from the same window. We'll also have an express line for simple transactions."

Customers also will be able to pick up energy cost-saving information at the office or discuss their electric service with any of 18 consumer service representatives.

"I think our customers will find the new location to be easier to reach," Atkinson says. "It is in the heart of downtown Cleveland, close to banks, other utility companies and government agencies. Public parking and bus stops are nearby. Plus, our new location avoids some of the major downtown building and road construction."

During the week of July 2, the office will be open from 8:30 a.m. to 5 p.m. weekdays. Beginning July 9, the office will be open weekdays from 7:45 a.m. to 5:30 p.m.

#90178p0172 06/27/1990 ~PR Newswire

CHARLOTTE, MI (JUNE 27) PR NEWSWIRE - Spartan Motors, Inc. (NASDAQ: SPAR) reached a new record revenue level of $5 million in May 1990, according to George Sztykiel, president.

The company, which last year reported revenues of approximately $36 million, has experienced significant monthly revenue gains this year, following the introduction of a new line of fire trucks and following the company's entry into the motor-home chassis field.

This year, Spartan recorded revenues of $4.1 million in January, $3.6 million in February, $4.1 million in March, $4.5 million in April and $5 million in May.

Sztykiel pointed out that profitability suffered earlier this year due to certain inefficiencies associated with the new-product introductions. However, profit margins have begun to improve and should continue to improve on this higher level of revenues.

Spartan Motors, Inc. is the leading manufacturer of custom-designed fire truck chassis, motorhome chassis and other specialty and emergency vehicle chassis.

MIAMI, FL (JUNE 27) PR NEWSWIRE - Columbia Laboratories, Inc. (AMEX: COB) today announced that it has signed an agreement in principle to raise approximatley $3.2 million from a syndicate of European venture capitalists for its U.K. subsidiary, Columbia U.K. Ltd. Among the members of the syndicate will be Charterhouse Venture Funds and Alta-Berkeley, both London based venture funds.

The investment, to be made in exchange for a 25 percent interest in the Columbia subsidiary, will be used to fund the marketing and distribution in the United Kingdom and The Netherlands of Columbia's patented vaginal moisturizer, Replens(R).

"This agreement enables Coulmbia to implement the launching of Replens in Europe without drawing capital from the U.S. parent company," said John E.A. Kidd, Columbia's chairman of the board. "There are more than 75 million women in Europe for whom Replens represents the first convenient and simple solution to the serious problem of vaginal dryness that comes inevitably with menopause," Kidd noted.

Replens will be available to British and Dutch women beginning this summer at a retail price of approximately $18 for a one-month supply.

Charterhouse Venture Funds, headquartered in London, are one of the leading European health-care investors. It manages $80 million of institutional funds in two limited partnerships devoted to technology sectors. Alta-Berkeley is a major investor in health-care projects in Europe. Affiliated with the U.K. venture firm, Burr, Egan, Deleage, it has $65 million under management.

Columbia Laboratories, Inc. is a pharmaceutical company established in 1987 to develop and commercialize proprietary products based on its patented bioadhesive drug delivery system. The company's first bioadhesive-based product, Replens, is a vaginal moisturizer introduced to consumers in the United States during the first quarter 1990.

#90178p0178 06/27/1990 ~PR Newswire

SAN DIEGO, CA (JUNE 27) PR NEWSWIRE - Supercomputing Solutions, Inc.

(NASDAQ: SUPR) today announced that it has sold its first CAPPS-9064 supercomputer. The unit was purchased by TRW, Inc. (NYSE: TRW) and will be used at TRW's Space Park operation in Redondo Beach, Calif. Actual delivery of the unit awaits the modification of TRW's computing facility, and will likely take place within 30 days.

As part of the official sell-off procedure, TRW's space station simulation software code was successfully demonstrated on the CAPPS-9064 supercomputer. In addition to space station simulation, Supercomputing Solutions will port (i.e. integrate) additional codes onto the CAPPS- 9064 which would allow TRW to utilize it for additional functions such as computational fluid dynamics, electromagnetics, and crash simulation. The TRW CAPPS-9064 unit is a 20-node parallel processing system, outfitted for expansion to 32-nodes. A "node" is the equivalent of one full computer.

"We are very proud that TRW, a prestigious and very respected high technology company, has purchased the first unit of the CAPPS-9064. This sale represents the culmination of the major phase of our research and development efforts on this innovative supercomputer," said Allan Simon, chairman and chief executive officer.

"Developing the 9064 has been the primary focus of our company over the past two years and we are now in a position to significantly expand our sales and marketing efforts. We are optimistic the 9064 will be successful in the marketplace because we provide both hardware and applications software solutions to specific scientific problems," Simon said.

"As a result, the 9064 has achieved a price/performance ratio demonstrably superior to any supercomputer currently on the market. Given this affordability and capability, the 9064 brings supercomputing to mid-size companies as well as the traditional users of supercomputers -- large companies, government agencies, and universities," Simon said.

Supercomputing Solutions, Inc. is a developer, manufacturer and marketer of supercomputing systems. This includes hardware and software that operates based on parallel processing -- whereby dozens of computers are linked together to tackle mammoth assignments. As a result, Supercomputing Solutions is able to offer superior price/performance supercomputing capabilities across a broad spectrum of scientific applications.

IRVINE, CA (JUNE 27) PR NEWSWIRE - Fluor Daniel announced today that it

has been awarded a program management contract by Saudi Aramco, the state-owned Saudi Arabian Oil Company. The total program will be developed over the next five to nine years. The five year contract includes options for four years of additional work. The total value of the contract was not disclosed. The program is still being defined and work will be released in phases.

Fluor Daniel's Hydrocarbon Sector will act as overall program manager for both onshore and offshore facility expansions and de- mothballing for Saudi Aramco's northern area onshore/offshore oil and gas plants program. The scope of work includes gas plants, pipelines, production facilities and offshore platforms.

Les McCraw, vice chairman and chief executive officer of Fluor Corporation said: "We are pleased to have been selected to work with Saudi Aramco once again. Their confidence in our ability to repeat prior successes in a comprehensive expansion program of this magnitude is gratifying."

Work will begin in July 1990 and executed primarily out of Fluor Daniel's Al Khobar, Saudi Arabia and Houston offices with support from Fluor Daniel's global network of technical expertise.

Fluor Daniel Inc., Fluor Corporation's (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

#90178p0183 06/27/1990 ~PR Newswire

TROY, MI (JUNE 27) PR NEWSWIRE - Volkswagen of America, Inc. broke ground today for construction of a new corporate headquarters in Auburn Hills, Mich.

When completed in September 1991, the 380,000-square-foot building will house about 850 VWoA employees who currently operate from four locations in Southeast Michigan.

"We are happy to be moving into this 38-acre site in the Oakland Technology Park, which is developing into one of the real high-tech hot spots in the automotive industry," said VWoA President and Chief Executive Officer Hans Hungerland.

Situated east of I-75 in the northern Detroit suburb of Auburn Hills, the Oakland Technology Park is home to the Chrysler Technology Center, EDS, GMF Robotics, ITT Automotive, the UAW/GM Human Resources Center and other

prestigious firms.

VWoA's four-story brick and glass building will be bordered by Hamlin Road to the north, M-59 to the south, Squirrel Road to the west and the Clinton River on the east. The building will integrate office and research and development operations in two wings which angle outward from a central atrium lobby and vehicle display area.

Outdoor attractions will include a formal motor court arrival plaza, a landscaped pond, a natural waterfall and an outdoor dining patio.

VWoA's headquarters is being developed by Etkin Equities, Inc., of Southfield, Mich. The architect is Hobbs & Black Associates, Inc., of Ann Arbor, Mich., and the general contractor is A.J. Etkin Construction Co., of Farmington Hills, Mich.

VWoA has agreed to a 15-year lease with Etkin and its joint venture partner in the building, Shostak Brothers & Co., of Southfield.

VWoA is a wholly owned subsidiary of the West German automaker Volkswagen AG and markets VW and Audi cars through a national network of about 1,000 dealers.

LA JOLLA, CA (JUNE 27) PR NEWSWIRE - Marrow-Tech Incorporated (NASDAQ: MAROA,MAROZ) announced today that the U.S. Patent Office has granted a notice of allowance for the company's patent on its core technology. When issued, this product patent will cover three- dimensional living stromal tissue, or stroma, cultured outside the body on a bicompatible framework. Stroma is composed of special support cells; these cells secrete a variety of growth factors and structural proteins that support organ formation and growth. The company uses its three-dimensional cultured stroma to grow skin, bone marrow and liver tissues; and has been investigating its use in the growth of other organ tissues.

Marrow-Tech intends to commercialize toxicity screening kits this year. The kits will contain three-dimensional cultures of actively growing human skin tissue. The company's patent filing for toxicity screening has been granted "fast track" status by the Patent Office. In another use of the technology, the company is growing a three- dimensional in vitro dermal replacement. Marrow-Tech plans to file an Investigational Device Exemption this year with the FDA in order to begin clinical trials of the dermal replacement for burn patients.

The company already holds U.S. Patent No. 4,721,096 covering a process that includes in vitro growth of bone marrow for transplantation. In addition, Marrow-Tech has filed an application with the Patent Office covering the use of the core technology in toxicity screening, and intends to file applications covering other products and uses of the core technology.

According to Arthur J. Benvenuto, Marrow-Tech's chairman, president and CEO, "The notice of allowance for the patent is a milestone in Marrow-Tech's progression from development stage to an operating company. Our core technology serves as the foundation for a wide variety of potential applications in therapy and research."

CONTACT: Rand P. Mulford, vice president-finance of Marrow-Tech, 619-450-5730, or Anthony Russo of Noonan/Russo Communications, 212-979-9180, for Marrow-Tech.

LOS ANGELES (JUNE 27) PR NEWSWIRE - First Executive Corporation (NASDAQ: FEXC), in a joint statement by Fred Carr, chairman and chief executive officer, and Alan Snyder, president and chief operating officer, announced the following personnel actions:

William L. Sanders, a 20-year accounting firm veteran, was named chief financial officer and vice president of First Executive. Sanders most recently was director of the financial institution group at the Los Angeles office of Deloitte & Touche.

For the last four years at Deloitte & Touche, Sanders was the partner-in-charge of auditing First Executive. He was also a member of the international banking and securities committee of Deloitte & Touche.

Sanders replaces Vice President Merle Horst, who assumes responsibility for two newly defined functions, institutional markets and industry relations. As director of institutional markets, Horst will manage the guaranteed investment contracts, pension products and specialized annuities.

As director of industry relations, Horst will manage the firm's relations with the financial services industry. In this capacity, he will work with investors, creditors, security analysts, rating agencies and insurance regulators.

Horst will continue as vice president of First Executive and senior vice president of Executive Life Insurance Company, the principal subsidiary of First Executive.

William C. Adams was named senior vice president in charge of a newly formed corporate services group at Executive Life, announced Carr and Snyder.

The group will include general administrative services, such as personnel, and two new departments, corporate communications and corporate planning and analysis. The group is a natural evolution of the company's growth, according to Carr and Snyder.

G. Rodney J. Letts, who for the past three years has been senior vice president of reinsurance for Executive Life Insurance, was named to direct a new, broader insurance operations department for the company, announced Carr and Snyder. Letts will add operations to his current responsibilities under the combined department.

First Executive Corp. has total assets of over $17 billion, and is the parent of Executive Life Insurance Co., the largest life insurance company based in California.

CONTACT: William C. Adams of First Executive Corp., 213-312-2225.

ATLANTA (JUNE 27) PR NEWSWIRE - The Nuclear Regulatory Commission staff has issued a Systematic Assessment of Licensee Performance (SALP) report on the V.C. Summer nuclear power station, operated by South Carolina Electric and Gas Co. near Columbia, S.C.

Performance at Summer was evaluated in the functional areas of plant operations, radiological controls, maintenance/surveillance, emergency preparedness, security, engineering/technical support and safety assessment/quality verification. The NRC said its evaluation indicated superior performance in the majority of the assessment categories.

In the NRC rating process, Category 1 is the highest rating achievable, and Category 3 is the minimum acceptable level.

At Summer, these were the ratings:

Functional area	Rating last period 8/1/87-12/31/88	Rating this period 1/1/89-4/30/90
Plant operations	2	1
Radiological controls	1	1
Maintenance/surveillance	1	1
Emergency preparedness	2	2
Security	2 (declining)	1
Engineering/Technical support	2	2
Safety assessment/quality		

verification 2 2 (improving)

The NRC staff will review the details of the SALP report with SCE&G officials in a public meeting to be held at the plant on July 10 at 9:30 a.m. Members of the public and the news media are welcome to attend for purposes of observation.

#90178p0193 06/27/1990 ~PR Newswire

MATTHEWS, N.C. (JUNE 27) PR NEWSWIRE - Family Dollar Stores, Inc. (NYSE: FDO), a discount store chain operating 1,650 stores in a 27-state area ranging as far north as Wisconsin, east to New York, south to Florida and west to Texas, today reported that sales in the third quarter had reached record high levels, and that earnings for the quarter also had increased substantially. For the third quarter ended May 31, 1990, sales were $217,457,131, or approximately 16 percent above sales of $187,642,211 for the third quarter of the prior fiscal year. Net income was $7,782,146, or approximately 65 percent above net income of $4,716,359 for the comparable quarter last year, and earnings per share increased to $.28 from $.17.

For the nine months ended May 31, 1990, sales were $651,666,816, or approximately 17 percent above sales of $554,907,383 for the first nine months of the prior fiscal year. Net income was $23,043,748, or approximately 29 percent above net income of $17,903,862 for the comparable nine-month period, and earnings per share increased to $.83 from $.65.

In commenting on the operating results, Leon Levine, Chairman of the Company, attributed the sales gains to increased sales in existing stores and to sales from new stores opened as part of the Company's store expansion program. Sales in existing stores increased approximately 9 percent both in the third quarter ended May 31, 1990, and in the nine months ended May 31, 1990. The Company's advertising program featuring two circulars each month continues to increase customer traffic in the stores. Family Dollar's low and low-middle income customer base is finding an improved in-stock position of basic, low priced merchandise in the stores, and this also has contributed to the sales increases. Sales in existing stores in June to date are estimated to have increased approximately 2 percent. The sales comparison in June was difficult as strong sales were generated last June by unusually high promotional and clearance markdowns.

LOS ANGELES (JUNE 27) PR NEWSWIRE - L.A. Gear Inc. (NYSE:LA) today reported that net sales for the second fiscal quarter ended May 31, 1990 were $225,373,000, an increase of 33 percent over the year- earlier second fiscal quarter.

Net income for the second fiscal quarter of 1990 was $10,248,000, compared to $16,060,000 in the same period last year. Earnings per share were $.51 versus $.91 in the second fiscal quarter of last year.

The company said that, as it had previously disclosed, lower gross profit margins were the primary reason for this decrease in net income.

Net sales for the six-month period ended May 31, 1990 were $412,653,000, up 75 percent over the $235,679,000 recorded in last year's comparable period. Net income for the first six months of fiscal 1990 was $24,147,000, or $1.20 a share, compared to $21,418,000 or $1.23 per share in the same period last year.

Incoming orders during the second quarter were approximately $400,000,000 an increase in excess of 50 percent over the year- earlier period.

"This increase in incoming orders and the expected strong retail demand for our new higher margin styles, including the Michael Jackson line and an expanded line of hikers, should contribute to renewed earnings increases in subsequent periods," said Robert Greenberg, chairman and chief executive officer.

On a related matter, the company also announced an increase of approximately 8 percent in its annual advertising and promotions budget.

L.A. Gear Inc. is a leading designer and marketer of a complete line of high-quality and fashionable athletic footwear, related apparel products and accessories.

BALTIMORE (JUNE 27) PR NEWSWIRE - The $25-plus billion-asset bank holding company MNC Financial Inc. (NYSE: MNC) today announced it has received approval from the Office of the Comptroller of the Currency to merge Equitable Bank, of Baltimore, into Maryland National Bank.

The legal merger of the two MNC bank subsidiaries, which will take effect June 30, 1990, creates the largest full-service commercial banking organization headquartered and managed in the Baltimore/Washington marketplace, with 250 offices throughout the state of Maryland.

MNC's application to merge the two banks was filed with regulatory authorities in late March, following the earlier approval in mid-December, 1989 by the Federal Reserve Board of the merger of Equitable's parent, Equitable Bancorporation, into MNC Financial. The merger of the two parent companies was completed Jan. 18, 1990.

MIAMI (JUNE 27) PR NEWSWIRE - Florida Power & Light Company customers can expect an extra charge on bills beginning July 1, 1990 because of an increase in Florida's gross receipts tax. Although the price charged for electricity remains the same, about 38 cents more will be added to the typical 1,000 kilowatt-hour residential bill of $75.44 in this first stage of a three-step tax increase. The amount will be listed on the bill along with other state and local taxes and franchise charges.

The current gross receipts tax of 1.5 percent is included in FPL's rates and is not itemized on bills. However, according to the newly passed law, this year's 0.5 percent increase will be billed as a separate item and will not be subject to regulatory approval. On July 1, 1991, the tax will increase from 2 percent to 2.25 percent and on July 1, 1992 to 2.5 percent. The Florida legislature authorized the tax increase to pay for bonds used to build Florida's new schools.

HOUSTON (JUNE 27) PR NEWSWIRE - Enterra Corporation (NYSE: EN) today announced that Thomas S. McIntosh has resigned as president and chief executive officer. McIntosh said the resignation will become effective Aug. 24, 1990. He said he chose that date to provide enough time for the board to name a replacement and allow an orderly transition for his successor.

McIntosh, who joined Enterra in 1987, said he resigned to pursue petroleum service industry opportunities as an equity investor. Enterra said that its board expected to be able to announce a replacement within that time

frame.

"After serving for 17 years as an industry executive, I decided the time had come to directly pursue my own ideas," McIntosh said. "I have enjoyed my tenure at Enterra and am pleased with the contributions I have been able to make, but it's just time to move on."

Stanley P. Gold, chairman of Enterra, said that the board appreciated McIntosh's contributions to the company and wished him well.

"We understand Tom's desire to strike out on his own and appreciate his willingness to stay on and work with us during this transition period. We are in the process of interviewing candidates for his replacement and hope to be able to make an announcement soon. Tom has agreed to stay on as president and chief executive for 60 days to facilitate an orderly transition for his successor."

Enterra Corporation, which last year had revenues of $108.9 million consists of oil and gas service companies which provide products and services to the oil and gas industry worldwide. The company is engaged in the rental of specialized equipment for drilling and servicing onshore and offshore oil and gas wells and the design, manufacture, sale and rental of specialized equipment for pipeline construction.

NEWARK, N.J. (JUNE 27) PR NEWSWIRE - Chase Pharmaceutical Inc. today announced it completed the acquisition of assets and businesses of Chase Chemical Company, L.P., a national manufacturer and marketer of pharmaceutical and nutritional supplement products, based here.

Terms were not disclosed. Andlinger & Company Inc., a private investment and management company headquartered in Tarrytown, N.Y., recently formed Chase Pharmaceutical to acquire the assets and businesses of Chase Chemical, for undisclosed terms, from partners of Chase Chemical.

Andlinger said, "With Chase's excellent products and reputation, it is well positioned in the marketplace. We plan to invest in the future of the company and work closely with management to help Chase capitalize upon its growth potential."

Richard Remaly, president and chief executive officer of Chase, said, "With Andlinger's financial and management support, we plan to continue to strengthen our product line and increase market penetration in all segments of our business, including the expanding generic pharmaceutical

business of our Chase Laboratories division."

Chase, founded in 1929, is one of America's most experienced producers of pharmaceutical products and nutritional supplements. A leading manufacturer of soft gelatin capsule dosage forms, as well as tablets and other solid dosage forms, Chase also produces a variety of products for other national pharmaceutical and nutritional supplement companies.

Andlinger is a private investment and management company specializing in the acquisition of domestic and international companies. Since its founding in 1976, Andlinger has completed more than 40 purchase transactions, with combined sales exceeding $1 billion.

ARLINGTON, VA (JUNE 27) PR NEWSWIRE - CACI International Inc (NASDAQ: CACIA) announced today that its board of directors has adopted an amendment to its stockholder rights plan at its meeting on June 21, 1990.

The amendment will reduce the threshold amount of stock held by a beneficial owner which triggers the "flip-in" and "flip-over" features of the rights plan from 20 percent to 15 percent of the outstanding class A common stock.

Under the "flip-in" feature, if any person or group becomes the beneficial owner of 15 percent or more of the company's class A common stock, then each right not owned such person or group or certain related parties will entitle its holder to purchase, at the right's exercise price of $11.00, shares of the company's class A common stock having a market value of twice the right's exercise price.

Under the "flip-over" provision, if, after any person or group becomes the beneficial owner of 15 percent or more of the company's common stock, the company is involved in a merger or other business combination transaction with another person, or sells 50 percent or more of its assets or earning power in one or a series of related transactions, each right will entitle its owner to purchase, at the right's exercise price of $11.00, shares of common stock of such other person having a market value of twice the right's exercise price.

Details of the stockholder rights plan were outlined in a summary of the rights plan which was mailed to all stockholders of record as of May 16, 1990.

CONTACT: John H. Baker, or Charles P. Revoile, general counsel, 703-841-7800, both of CACI International.

WESTWOOD, MA (JUNE 27) PR NEWSWIRE - Bird Corporation (NASDAQ: BIRD), announced today a plan to raise capital through the private offering of approximately a 40 percent interest in its Housing Group subsidiary. The Housing Group subsidiary currently owns 100 percent of the Bird housing-related activities, consisting of the roofing, vinyl siding and windows, and building materials distribution businesses. Sales of these activities in 1989 approximated $125 million.

The primary purpose of the offering is to broaden the corporation's capital base and to fund an aggressive five-year growth program, not only in the corporation's building materials area, but also in its growth environmental business. An acquisition program is planned in both areas to add strategically important operations that are synergistic with present activities and which is directed toward the high growth sectors of both businesses. Bird believes that it has an especially attractive growth strategy that can best be attained through the parallel pursuit of the two business sectors. The company further expects that investment in these programs could be highly rewarding to both existing shareholders and the new investors.

C.J. Lawrence, Morgan Grenfell, Inc. of New York City, the corporation's

investment banker will act as agent for the actual private placement. A spokesman for the investment banker indicated that the offering process will commence shortly with selected potential investors. The actual consummation of the transaction will depend on market conditions and the receipt of acceptable offers.

Bird Corporation is a new holding company which owns all of the interests of Bird Incorporated. The new corporate structure was approved at Bird's annual meeting held on May 24, 1990. The purpose of the new structure is to provide the corporation maximum flexibility in optimizing the organization, operations and financing of its varied business interests and to maximize long term shareholder return.

Bird is a 195-year-old company and is one of the 10 oldest continuosly operated corporations in the United States. It is a manufacturer and distributor of building materials and a provider of environmental services.

JACKSONVILLE, FL (JUNE 27) PR NEWSWIRE - Barnett Bank (NYSE: BBI) recently began offering student loans throughout Florida as part of the Guaranteed Student Loan Program.

The Barnett Student Loan Department works directly with school financial aid offices to expedite the origination of student loans. Presently, Florida residents attending any educational institution in or out of Florida, or out-of-state students attending a Florida school may be eligible for this program.

Students should first obtain a financial aid package from the financial aid office of their educational institution. Included in these packages are needs analysis forms which determine eligibility for a student loan. When the college financial aid office determines a student is eligible for a guaranteed student loan, the Barnett Student Loan Department may accept the loan application and provide financing of the loan.

Barnett entered the student loan market after purchasing the $90 million Guaranteed Student Loan portfolio previously owned by Florida National Bank.

For more information on the types of student loans available and Barnett's Higher Education Loan Program, stop by any Barnett Bank office or call the Barnett Student Loan Department toll-free at 800-633-7912.

#90178p0220 06/27/1990 ~PR Newswire

PHILADELPHIA (JUNE 27) PR NEWSWIRE - Hunt Manufacturing Co. (NYSE: HUN), reported today that for the second fiscal quarter, net sales of $50.7 million were up 5.6 percent, and net income of $2.5 million was 48.2

percent below the second quarter results of fiscal 1989. Earnings per share decreased to $.15 from $.30 reported in the prior year second quarter.

The most significant factors causing the decrease in profitability were unit volume sales decreases for several of the company's traditional product lines and losses incurred by the Data Products business acquired in June 1989.

Excluding the revenues of businesses acquired after the second quarter of fiscal 1989 (Data Products acquired in June 1989, and Bunzl's Graphic Art businesses acquired May 1990), net sales in the second quarter of fiscal 1990 were 5.6 percent below the prior year. This decrease was comprised of a unit volume decrease of approximately ten percent partially offset by selling price increases.

For the first six months of fiscal 1990, sales of $100.1 million increased 5.5 percent, and net income of $6.4 million decreased 25.7 percent from the fiscal 1989 first half results. Earnings per share decreased to $.40 from $.54 reported for the first six months of fiscal 1989.

Excluding the revenues of acquisitions, the comparable net sales were 2.6 percent below the first half of fiscal 1989. This decrease was due to lower unit volume (down approximately seven percent) partially offset by selling price increases.

Ronald J. Naples, chairman and chief executive officer, commented, "The earnings fall-off in the second quarter is a tremendous disappointment. It's caused in part by the generally soft demand afflicting both our industries as a whole.

"In part, it's a function of the dynamics of changes in the marketplace, particularly in the office products business. And it's also a result of continuing manufacturing problems in our Mexican operation where we have made and continue to make major changes with the objective of the fastest possible resolution.

"The magnitude of the earnings short-fall in the second quarter versus prior year has all but dashed our previous expectation of another record earnings year for Hunt, short of a remarkable recovery. We're more optimistic about sales in the second half as customer inventories are replenished, although there is still significant uncertainty in the marketplace."

Hunt Manufacturing Co. is a leading manufacturer and distributor of office and art/craft products for the business, education, and consumer markets.

WILMINGTON, DE (JUNE 27) PR NEWSWIRE - Du Pont (NYSE: DD) announced today it has received a U.S. patent for a high-temperature superconducting material containing thallium, barium, copper and oxygen.

The composition is structurally related to thallium-lead superconducting materials covered by a previous Du Pont patent, but differs by the presence of a single copper-oxygen layer rather than multiple layers. It is superconductive at temperatures in the range of 90 Kelvin (minus 300 F).

Du Pont has received seven U.S. patents in high-temperature superconductivity, the most of any company working in the field. It has been involved in superconductivity research for more than 25 years.

The latest superconducting material was developed at DuPont's Experimental Station outside Wilmington by M.A. Subramanian and J. Gopalakrishnan.

Superconducting materials have been the object of intense research worldwide the last three years since the discovery of a large class of new materials based on copper and oxygen with record high transition temperatures.

These materials conduct electricity without resistance below their critical temperature. Potential commercial applications include electrical power generation and storage, transportation, electronics and communications.

Du Pont is involved in a three-year superconductivity project with Hewlett-Packard Company and Los Alamos National Laboratory in New Mexico. One of the largest research and development collaborations ever concluded between a government laboratory and industry, it is valued at $11 million and involves 25 or more researchers. The first object of the collaboration is to develop thin-film, high-temperature superconductors for electronic components.

Du Pont also has established separate cooperative superconductivity research agreements with the other two Department of Energy pilot centers, Argonne National Laboratory in Illinois and Oak Ridge National Laboratory in Tennessee.

CINCINNATI, OH (JUNE 27) PR NEWSWIRE - Micromeasurements, Inc. of Berkeley, Calif. acquired the BASES Burke Institute's Eye Movement Research (EMR) Group May 16, 1990. Micromeasurements, a leading developer of computerized research tools, will now offer market research services for package, print, billboard, and television commercial testing using BASES Burke Institute's Find Test, Print Test, CopyLab, MedTrac, and Flashglance.

Keith Sherman, president and founder of Micromeasurements, announced Randy Leaning joined Micromeasurements as Partner and Director of the EMR Group. She will promote the Find Test, Print Test, CopyLab, MedTrac, and Flashglance services which have been validated in more than 500 studies. Leaning also plans to introduce new services, designed for early intervention, when research results are most actionable.

According to Sherman, "The transition of the Eye Movement Research Group (EMR Group) went smoothly because of BASES Burke Institute's personnel. In fact, the EMR Group ran their first study as part of Micromeasurements just days after the acquisition was completed."

Micromeasurements' EMR Group will operate out of BASES Burke Institute's Cincinnati headquarters through August, when they will open permanent offices in Connecticut. Currently, the firm is headquartered at BASES Burke Institute, Inc., 800 Broadway, Cincinnati, Ohio, 45202.

DEARBORN, MICH. (JUNE 27) PR NEWSWIRE - Ford Motor Company (NYSE: F) plans to invest $95 million in a modernization plan to equip its Dearborn (Mich.) Glass Plant with technologically advanced processes and equipment.

A key element of the plan is replacement of two of the present automotive windshield manufacturing operations with highly automated in-line processes. It is planned that the first line will be fully operational in fall 1991 and the second line about a year later. A major rebuild of the Float Furnace operation beginning in October 1991 and a 77,000-square-foot building expansion also are included in the modernization plan.

"This investment by Ford signals its confidence in the long-term viability of the Dearborn Glass Plant and its commitment to the Rouge complex," said Dennis F. Wilkie, general manager - Ford Glass Division. "It was made possible through the dedication of Dearborn Glass Plant employees and the cooperation and support of UAW representatives at the plant, Local 600,

and the National Ford Department. Together, we have raised the quality and improved the competitiveness of the plant's products to a level that merited Ford's confidence in our ability to become best-in-class glass producers and to compete on a global basis."

The modernization plan will enhance the quality of products manufactured at the Dearborn Glass Plant and will give the plant the technical capability to meet the demands of future product programs for Ford Motor Company. Full implementation of the plan will proceed concurrent with negotiations with the City of Dearborn and the State of Michigan with regard to tax and other issues.

The Dearborn Glass Plant began operations in 1923 as one of the first facilities in the Ford Rouge complex. In 1989, the plant produced more than 2.2 million original equipment and replacement windshields and automotive flat glass for Ford and other automotive manufacturers.

CONTACT: Rex Greenslade of Ford Motor Company, 313-322-9211

#90178p0234 06/27/1990 ~PR Newswire

PITTSBURGH (JUNE 27) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today anounced that it expects to report a net loss for the second quarter of 1990 projected in the range of $12.0 million to $17.0 million, equal to a net loss per common share of between $1.08 and $1.50.

Equimark reported a corporate net loss of $15,447,000, or $1.38 per common share in the first quarter of 1990. The range of the projected net loss for the first six months of 1990 is between $27.4 million ($2.46 per share) and $32.4 million ($2.88 per share). It is presently anticipated that the second quarter financial results will be released in mid-July 1990.

Equimark's results of operations in the second quarter of 1990 include a net gain of approximately $14.2 million on the sale of Equibank's credit card operations in Delaware. Effective April 30, 1990, Equimark sold to a nonaffiliated institution approximately $349.1 million of credit card loans at a premium of $31.2 million.

The gain is net of certain severance costs, contract termination fees, and the full amount of a $10 million recourse provision related to a specific portfolio sold. If future loan losses of the specific portfolio fall below the three-year recourse limit, then any unused portion of the reserve established by Equimark would be reversed to corporate income.

The sale did not include approximately $7.6 million of deliquent credit card balances, which were retained by Equimark and continue to be

substantially reserved. In addition, revolving unsecured credit loan balances of $108 million at April 30, 1990, issued by Equimark's Delaware subsidiary were retained by Equimark.

The projected net loss in the second quarter of 1990 is primarily attributable to three factors. First, Equimark has absorbed residual expenses from the termination of Equimark's recapitalization program at National Bancshares Corporation of Texas ("NBC").

Second, the corporation's provision for possible loan losses is projected to remain at a high level in the second quarter of 1990. The second quarter provision will absorb a relatively high level of consumer loan chargeoffs, will replenish the reserve for possible loan losses for commercial and real estate loan chargeoffs and will increase the overall level of the reserve, expected to approximate 2.00 percent of outstanding loans at June 30, 1990.

Third, Equimark has projected that it will absorb certain increased legal and other costs and non-loan related expenses in the second quarter of 1990. The increased legal costs relate to litigation, loan collection and other matters. In addition, Equimark intends to provide for anticipated significant loss on the under-performance of a balance sheet hedge.

CONTACT: James H. McLaughlin, (412) 288-5300, or Libby Fishman, (412) 288-5938, both of Equimark Corp.

ST. PAUL, MINN. (JUNE 27) PR NEWSWIRE - Northwest Airlines today announced low leisure fares for travel between the Southwest and the Northeast.

Northwest cut as much as $147 off its roundtrip fares for flights from cities in California and Arizona to more than 30 destinations in 10 northeastern states and the District of Columbia. (The eastern states are New York, Connecticut, Massachusetts, Pennsylvania, Maryland, Virginia Rhode Island, Ohio, Michigan and Kentucky.)

Travel can take place through Dec. 13, and tickets must be purchased by July 12. The offer is available for flights between the Northeastern cities and Los Angeles, Orange County, Ontario/Riverside, San Francisco, San Jose, San Diego, Sacramento, Phoenix and Tucson.

As examples of the low fares, Northwest said Phoenix travelers can save $84 on flights to New York City with roundtrip fares trimmed to $258 from $342. Los Angeles passengers can save $106 on roundtrip travel to Boston with fares reduced from $404 to $298. San Francisco passengers bound for

Washington, D.C., can save $128 with fares reduced to $298 from $426.

Lowest fares are available for travel on Tuesdays, Wednesdays and Thursdays with slightly higher prices the rest of the week. Tickets, which are nonrefundable, must be purchased at least seven days before travel or within 24 hours after reservations, whichever comes first. Passengers must stay at their destinations over a Saturday night and seats are limited. These fares are not available over the Thanksgiving holiday.

PITTSBURGH (JUNE 27) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) announced today that it has filed applications with the Comptroller of the Currency to consolidate the charters of its five Pennsylvania banks.

Upon receiving the comptroller's approval, Mellon will consolidate Commonwealth National Bank in Harrisburg, Pa.; Mellon Bank (Central) in State College, Pa.; Mellon Bank (East) PSFS in Philadelphia; Mellon Bank, N.A. in Pittsburgh; and Mellon Bank (North) in Oil City, Pa., into a single bank -- Mellon Bank, N.A. Mellon also said that in connection with the consolidation, it plans to change the name of Commonwealth National Bank to Mellon Bank.

The consolidation, which became permissible under Pennsylvania law earlier this year, is being undertaken to simplify the corporation's financial and legal structure and to provide added banking convenience for its customers. It will not affect the management structure, boards of directors or employees of Mellon's five Pennsylvania banks.

Under Mellon's consolidation plan, Mellon Bank, N.A. and Mellon Bank (East) PSFS will be consolidated later this year, and all of Mellon's Pennsylvania banks will be consolidated by early 1991. Once consolidated, each of the present banks will become regions of Mellon Bank, N.A.

In the Philadelphia area, Mellon will eventually use the name Mellon PSFS for its retail delivery system. Elsewhere in Pennsylvania, Mellon will market itself as "Mellon Bank." With the exception of Mellon PSFS, each of the present banks will be referred to internally and on business cards and stationery as regions of Mellon Bank, N.A: Mellon Bank (Central) in State College will be known as "Mellon Bank - Central Region;" Mellon Bank (North) in Oil City will be known as "Mellon Bank - Northern Region;" what currently is Mellon Bank, N.A. in Pittsburgh will be known as "Mellon Bank - Western Region;" Commonwealth National Bank will be known as "Mellon Bank - Commonwealth Region."

Donovan noted that Mellon will do business under the name Mellon PSFS once the integration of the Mellon and PSFS computer systems is completed. He said the integration is likely to be completed in early 1991.

Immediately upon completion of the consolidation, Mellon customers will be able to cash checks at any of the 353 Mellon Bank branch offices statewide and, in time, will be able to do all of their banking at any Mellon branch office in Pennsylvania.

NEW YORK (JUNE 27) PR NEWSWIRE - Banyan Corp. (AMEX: BYC) formerly The Fur Vault, Inc., today announced that the company was no longer actively soliciting potential purchasers of its Andrew Marc division. In November of last year, the company indicated that it was seeking purchasers of its retail fur operations and/or its Andrew Marc division. The retail fur operations were sold to Jindo Corporation last month.

The company stated that with the sale of the retail fur group,

substantially consummated, the company will now focus its full attention on optimizing long-term opportunities in its highly successful Andrew Marc division.

NEW YORK (JUNE 27) PR NEWSWIRE - Coudert Brothers, one of the world's oldest and largest international law firms, announced today that it has expanded its Asian network, by forming an affiliation with Chandler & Thong-Ek, a well-known law firm based in Bangkok, Thailand, effective July 1.

Coudert presently has offices in Tokyo, Beijing, Shanghai, Hong Kong, Singapore and Sidney, The firm has 16 offices and 370 attorneys on five continents.

Under the arrangement, Coudert Brothers lawyers will assist on international financial, investment and commercial matters arising in Thailand, while Chandler & Thong-Ek will act as local counsel on all matters involving Thai legal work.

James Sitrick, the chairman of Coudert Brothers' executive committee, said "this affiliation will permit Coudert Brothers to assist its international clients with business transactions in Thailand and will also give the firm a local presence in Bangkok to assist Thai clients in structuring their investment and commercial activities outside Thailand."

Sitrick added that the booming Thai economy, with its expanding links to the United States, Europe and Asia, is an important market for the firm's international legal services. In May, Coudert Brothers entered into an agreement with V/O Vnesheconomservice, an organization within the U.S.S.R. in February 1988.

Chandler & Thong-Ek is a Thai law firm founded in 1974 with a broad commercial, financial and natural resources practice. It has three partners and 15 associates.

AZUSA, CA (JUNE 27) PR NEWSWIRE - Optical Radiation Corp. (NASDAQ: ORCO) and Eastman Kodak Company (NYSE: EK) today announced that "Days of Thunder" will be the second major motion picture film released using the new Cinema Digital Sound technology.

"Days of Thunder" opens today in theaters across the United States. Mann's National, Mann's Chinese, and Pacific Lakewood Theaters in the Los Angeles area and the Pacific Corte Madera Theater in the San Francisco area will feature "Days of Thunder" with Cinema Digital Sound.

Cinema Digital Sound technology is a process by which a digital optical sound track is printed directly onto motion picture film. This results in sound quality comparable to compact discs. This new sound technology was formally introduced to the entertainment industry on May 4, 1990, in Hollywood.

The first major motion picture film to use Cinema Digital Sound was "Dick Tracy" which premiered in U.S. theaters on June 15, 1990. Cinema Digital Sound is now available in selected 70mm theaters, and will be available in 35mm theaters in early 1991.

#90178p0256 06/27/1990 ~PR Newswire

NEW YORK (JUNE 27) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL) Chairman Joseph Elmaleh issued the following statement today:

In response to urgent questions from Isramco shareholders, members of the financial communities and the public both in the United States and abroad, concerning a news story carried by Reuters yesterday about the Yam 2 well drilled off the coast of Israel, Isramco wishes to make it clear that the Yam 2 well is not being abandoned by the participants of the Negev Venture 2.

In addition, the Yam structure, upon which the well was drilled, is not considered uneconomic for future oil production. In offshore exploration commerciality is never considered on the basis of one well alone, but on the basis of a field. In fact, based upon the 800 barrels of oil a day produced on initial flow without acid treatment which often enhances production from the type of formation in which the oil discovery was made, the results of the Yam 2 indicate the possibility that a commercial field can be developed on the 11,500-acre Yam structure. Far from abandoning the area, we are already engaged in studies that pinpoint the location of additional wells to be drilled to the same oil producing formation.

The Reuters news story appearing originally at 12:57 p.m. EDT and a shortened version appearing at 1:58 p.m. EDT entirely misstated our position concerning the economic value of the Yam 2 and our intentions to use the well for possible further exploration and production purposes in the future. The fact that the drill ship will leave the site of the Yam 2 simply means that that equipment is presently not useful to the program while the studies are taking place. At the time such equipment is needed in the future, it will be brought into the area.

On Tuesday, June 26, Isramco issued the following release in the United States and in Israel which accurately states the current status of the Negev Venture 2's exploration program to discover oil in Israel:

The operator of the Negev Venture 2 announced today that testing has been concluded in the exploratory Yam 2 well drilled off the coast of Israel. Testing of the perforated interval 12,902-12,922 feet was non- productive.

The high-quality 47 degree API oil which flowed from the deeper zone from perforations at 17,414-17,440 feet at an initial rate of 800 barrels a day are the first hydrocarbons discovered offshore Israel and indicate the possibility of a major development project. The flow rate was obtained on a drill stem test, without the planned acidization, a procedure often used to increase the flow in limestone formations.

The Yam 2 was drilled on a very large anticlinal structure paralleling the coast line extending over 11,500 acres with 1,500 feet of vertical relief. It is therefore feasible to drill additional wells to determine the lateral extent of the producing reservoirs of oil across the Yam structure.

CHICAGO (JUNE 27) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) announced today that the United States Bankruptcy Court has entered an order authorizing Neal L. Wolf of Winston & Strawn, the Class 4 disbursing agent for the official committee of unsecured creditors, to distribute not more than 45.6 percent of the Class 4 creditor stock, or approximately 5.9 million shares, on a pro-rata basis, to those parties entitled thereto.

The court's order is in accordance with the Consolidated Plan of Reorganization of UNR Industries, Inc., confirmed on June 2, 1989, under which the disbursing agent is authorized to make interim distributions of Class 4 creditor stock. On Nov. 29, 1989, the court issued a similar order, authorizing the disbursing agent to distribute up to 25 percent of

the Class 4 creditor stock to those parties entitled thereto. In December 1989, the disbursing agent made the authorized distribution, which amounted to approximately 3.2 million shares of such stock. The number of remaining shares to be distributed by the disbursing agent, pursuant to the plan, is approximately 3.8 million shares.

WEST ORANGE, NJ (JUNE 27) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS), a manufacturer of Bedside Nursing Patient Care Systems and Healthcare Financial Management Systems, told a group of security analysts today that "Earnings for the first fiscal quarter ending June 30, 1990, should be up by some 70 percent to around 20 cents per share on a sales rise of about 50 percent," according to S.M. Caravetta, chairman and chief executive officer. A year ago, first quarter net earnings were $219,000 or 12 cents per share on net revenues of $1,627,000. For the fiscal year ended March 31, 1990, the company reported record earnings of $911,000 or 49 cents per share on record revenues of $7,449,000.

Said Caravetta: "Micro Healthsystems now has installed or has under contract for installation the MEDTAKE(R) System at more than 4,000 beds in 29 healthcare institutions, making us the clear leader in this rapidly growing marketplace. Our financial packages for outpatient programs at healthcare clients continue to produce record sales and profits as well, and we see growth in this marketplace this year and beyond."

Caravetta emphasized that, "With 1.3 million hospital beds in the U.S. alone, not counting the applicability of our system at hospitals internationally, we believe our outstanding technology and low pricing will permit us to not only maintain a leadership position in this marketplace, but to accelerate our penetration of the market as well. Our marketing strategy of offering the MEDTAKE hardware/software system at a cost of $2,100 to $2,800 per bed provides us with a deep reach into a market that is highly conscious not only of technology but of cost, and our recent marketing agreement with IBM of our proprietary software for their Clinical Workstation(TM) permits the migration of our software into higher priced IBM hardware. Our near term plan is to begin seeking a strategic partner for the purpose of creating a joint venture or marketing alliance to introduce the MEDTAKE System on a worldwide basis."

In addition to its Bedside Nursing Patient Care Systems, the company's Healthcare Financial Management products include an Inpatient Management System; an Integrated Hospital Financial System; a Home Care Management System; a Physician's Billing and Management System for hospital-based and private physician group practices; and a Facilities Management program for out-patient billing and accounts receivable to hospitals, utilizing Micro Healthsystems' own staff.

ROCKVILLE, MD (JUNE 27) PR NEWSWIRE - Sage Software, Inc. (NASDAQ-NMS: SGSI) announced today it has signed a letter of understanding with IBM Eurocoordination, LaGaude, France, for Sage Software to enter into marketing agreements with local subsidiaries of IBM World Trade EMEA.

Under the terms of the agreements, local subsidiaries of IBM World Trade EMEA will provide marketing support of Sage-PVCS/Make, for use with IBM's new RISC System/6000 running AIX.

Sage Software, Inc. is presently an IBM Business Partner under IBM's Cooperative Software Program (CSP) having signed a marketing agreement authorizing IBM to directly market Sage-PVCS/Make in North America for use with IBM's RISC System/6000.

Sage-PVCS/Make is the market leading configuration management software for desktop development with over 35,000 users at more than 7,500 customer sites worldwide. Configuration management is an essential tool for implementing the IBM technical CASE solution sets (i.e.: C, Fortran, ADA, C++, etc.). The RISC 6000 excels in a workgroup environment using Local Area Networking (LAN) technology. This architecture allows a high degree of shared access and reusability among development team members, but also brings to the surface the requirment for the whole area of configuration management and control. Sage-PVCS/Make allows users to manage changes to source code, documentation and even binary files by keeping track of who made a change, what the change consists of, why it was made, when it was made and which revisions contain the change.

Sage-PVCS/Make provides storage and retrieval of multiple versions of text or code in a space-efficient manner. The most up-to-date version is instantly available, and its genesis is completely audible. Conflicting module changes from two or more developers are eliminated. The build management component, Make, automatically rebuilds the complete software system after any module is changed. Sage-PVCS/Make offers high performance, low resource utilization, automatic dependency generation, conditional constructs and the ability to define corporate standards for building systems.

Sage Software, Inc. has the broadest line of CASE tools for the PC-DOS, OS/2, Local Area Networks, and now AIX on the new IBM RISC System/6000. There are over 10,000 customer sites world-wide, with over 65,000 developers, using Sage's market-leading tools including APS application generators, Sage PVCS/Make, Sage Professional Editor, Dan Bricklin's Demo II, PLink86+, and PLink86+/LTO. Sage Software's worldwide headquarters is located at 3200 Tower Oaks Blvd., Rockville, Md. 20852, located outside Washington.

CONTACT: Lin Pearce, executive vice president - sales and marketing, 301-230-3215, or Reid Conrad, director - international sales, 301-230-3325 both of Sage Software, Inc.

#90178p0277 06/27/1990 ~PR Newswire

ITHACA, N.Y. (JUNE 27) PR NEWSWIRE - Cornell University, Xerox Corporation and the Commission on Preservation and Access are collaborating in a pilot project to test an advanced technology for recording deteriorating books as digital images and producing, on demand, multiple high-quality copies.

An 18-month research-and-development study with potential benefits for libraries worldwide will include scanning 1,000 volumes in Cornell's Olin Library into a digital image storage system. The test is being funded partially by the Commission on Preservation and Access, a private non-profit organization acting on behalf of the nation's libraries, archives and universities to develop collaborative strategies for preserving and providing access to deteriorating scholarly resources.

Xerox, based in Stamford, Conn., is providing the technology and extensive staff support. Cornell University's Library and Information Technologies units are participating in the study. Participants expect the combined value of funding, equipment and personnel to bring the project's total cost to several million dollars.

The project will explore the technical feasibility and cost- effectiveness of the process; the criteria for selecting materials to be preserved; and methods of cataloging, searching and retrieving the stored materials.

"This is tremendously exciting," said Alain Seznec, the Carl A. Kroch University Librarian and former dean of Cornell's College of Arts and Sciences. "Many scholars in the humanities are fully aware of the deterioration of library collections, but they are reluctant to let go of real, paper books. This technology offers a way to have our cake and eat it, too."

Worldwide, about one-third of the books on shelves in research libraries are deteriorating because of chemical processes used to make paper since the mid-19th century. Chemical treatments can only slow the rate of deterioration.

Many libraries have begun copying their most precious works and are looking for ways to preserve others. Until now, libraries have been putting the works on microfilm or making photocopies.

"Although microfilming does allow copying for distribution, many patrons don't like it for access," said M. Stuart Lynn, Cornell's vice president for information technologies. "Digital image scanning can be highly efficient for access because multiple copies can be made quite readily at any time after the document is digitized. Digitizing also enables material to be transmitted across the nation's computer data networks."

The high-quality copies that are created are stored as a scanned digitized image for distribution and reproduction as needed, rather than in alphanumeric form, as numbers and letters. Although a computer could not be used to search such digitized images for certain passages or to index it, the scanned documents could be converted into alphanumeric form at some later time.

The project will explore the potential capabilities of digital image technology to combine the storage and duplication characteristics of microfilm and the usability of paper reproductions, with transmission and distribution capabilities not available with film and paper.

Lynn noted that although several libraries have developed customized systems for similar purposes, the Cornell project will be the first to provide higher-quality images and a standardized system that ultimately can be used by any library.

Xerox vice president of worldwide marketing and customer operations, Charles E. Buchheit, said, "Through joint projects like this, Xerox gains a better understanding of the requirements of document users. The Cornell project is an example of Xerox employing its capabilities to provide solutions to document problems that cannot be solved using existing methods. And while many technologies are limited to preservation, this solution also provides access to stored materials."

Said Patricia Battin, president of the Commission on Preservation and Access: "This project will assist us in exploring applications of new capture and storage technologies for use in the university environment and will help answer questions of national significance regarding the public access to the information contained in our deteriorating scholarly resources." The commission's involvement in the project is being supported by the Andrew W. Mellon Foundation.

NEW YORK (JUNE 27) PR NEWSWIRE - General Instrument Corporation (NYSE: GRL) announced today the appointment of Donald P. Aiken as president of its worldwide wagering group.

In this position, Aiken will be responsible for the company's on-track, off-track, lottery, and international wagering operations as well as the

New York City benefits delivery program. He will report to George E. Safiol, president and chief operating officer of General Instrument, who has been acting president of the wagering group.

Aiken joins General Instrument from the Texas Instruments Corporation where he most recently served as vice president of the information technology group. Aiken was president of Rexnord Automation, Inc. when it became part of Texas Instruments. Prior to this, he was corporate vice president of the Foxboro Company in Foxboro, Mass.

"Mr. Aiken's expertise is in general management, with particular emphasis in sales, marketing, and systems engineering," said Safiol in announcing the appointment. "He has proven himself in a variety of important positions. We believe he will be a valuable asset for General Instrument. He brings the special blend of skills and experience needed for this post."

General Instrument Corporation is the leading supplier of electronic systems for on-track and off-track wagering and also provides on-line services and equipment to lotteries in Connecticut, Massachusetts, and Missouri; the Province of Quebec, Canada; and Israel.

General Instrument also is the industry leader in coaxial cable, cable TV electronics and satellite TV encryption systems. The company's primary strategies are directed toward communication systems. The company's common stock is listed on the New York, Midwest, Pacific and London stock exchanges.

SOMERVILLE, N.J. (JUNE 27) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED) announced that Spiro-32(R) (spirogermanium HC1), the company's pharmaceutical for the treatment of rheumatoid arthritis, has produced positive responses in patients who failed to respond to commonly used antirheumatic pharmaceuticals.

Results of a pilot study of Spiro-32 rheumatoid arthritis were presented today by Dr. Sanford H. Roth, medical director of the Arthritis Center, Ltd., Phoenix, at the Second Congress of the International Society for Rheumatic Therapy, London.

Dr. Roth noted, "Results of the 19 patient study are particularly encouraging since these patients failed to respond adequately to nonsteroidal anti-inflammatory drugs or were unable to tolerate at least one disease modifying antirheumatic drug."

Patient responses to Spiro-32 were rapid, as early as four weeks after starting treatment, and were generally sustained well after treatment was discontinued. Currently approved therapies may take three to six months to produce an effect with symptoms usually returning once treatment is stopped.

Further, adverse effects of Spiro-32 were uncommon and mild. Other disease modifying antirheumatic drugs such as gold compounds, methotrexate and cyclophosphamide often cause serious adverse reactions.

Spiro-32 was effective in alleviating symptoms such as swollen joints, joint pain and tenderness, and morning stiffness. Most patients reported they felt better after treatment. Based on these results, Roth has recommended that expanded studies of Spiro-32 in rheumatoid arthritis be carried out.

Commenting on the study, Dr. Harold Tenoso, Unimed's president and chief executive officer, said, "These results suggest that Spiro-32 may be a valuable addition to rheumatoid arthritis therapy. These positive effects should enhance the value of Spiro-32 in our ongoing discussions with potential marketing partners."

Unimed is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

MOSCOW (JUNE 27) PR NEWSWIRE - Nokia Corp. and Moscow Telephone Network (MGTS), under the joint venture company AMT, announced that they have officially opened the first public mobile telephone network in Moscow.

Initial coverage by the new network, which is based on a mobile radio system, will include metropolitan Moscow, Sheremetjevo Airport and primary connecting highways. By the end of this year network coverage will be expanded to a 50-kilometer radius around Moscow.

The AMT mobile network will primarily serve international firms and embassies located in Moscow. At commissioning ceremonies held in Moscow in early June, Sakari Salminen, a Nokia executive, cited a significant demand awaiting the opening of the network. He said the system is expected to cater to more than 1,000 subscribers by year-end. AMT's Managing Director, Valentin Antonov, said that the new network offers a variety of versatile services including the ability to make direct international calls.

Nokia and MGTS have also indicated that they will expand the network's activities to include the building of a personal paging network to cover the Moscow region with service to start next year. It is expected that the personal paging network will serve 10,000 subscribers initially.

The Finnish-based Nokia, which is one of the world's leading manufacturers and distributors of cellular telephones, has its U.S. cellular telephone headquarters in Largo, Fla.

#90178p0296 06/27/1990 ~PR Newswire

PITTSBURGH (JUNE 27) PR NEWSWIRE - Browning-Ferris Industries (BFI) (NYSE: BFI), one of the world's largest waste services companies, and

Alcoa Recycling Co., the world's largest aluminum can recycler, today announced an agreement under which BFI will sell Alcoa used aluminum beverage and food cans it collects in the United States and Canada.

This is the first national agreement Alcoa has signed with a major waste services company.

"Our agreement with Alcoa is a major milestone to boost aluminum can recycling nationwide," said William D. Ruckelshaus, chairman and chief executive officers of BFI. "This contract provides to BFI's municipal recycling customers a more consistent market for the aluminum cans we collect. We believe the agreement also will help our partners at Alcoa efficiently recover a greater percentage of the amount of aluminum in municipal solid waste," he added.

Alcoa Recycling Co. president George L. Cobb said Alcoa's 20 years of experience as the nation's largest recycler of aluminum cans, coupled with BFI's international experience in solid waste handling should be a powerful combination for advancing recycling growth, education and awareness in the United States and Canada. Cobb said Alcoa remelts and rolls used aluminum cans into new can sheet for sale to can makers, often completing the loop between a used can and new metal for new cans within 90 days.

"Alcoa collected 17.1 billion aluminum cans for recycling in 1989," Cobb said. "Most of these cans were purchased from consumers at 2,600 recycling centers participating in Alcoa's national can recycling activity. The aluminum industry recycled a record 61 percent of the 82 billion beverage cans consumed in the United States last year, and the best way we know to boost recycling above that level is to develop new sources of used cans. Municipal curbside recycling programs represent a major new source of aluminum available for recovery, and we welcome this opportunity to work with such waste recovery firms as BFI to harvest the above ground 'aluminum mine' represented by used cans in the municipal waste stream," he said.

Under the joint agreement, BFI will sell all the aluminum cans it collects to Alcoa, where practicable. The agreement provides for BFI's use of Alcoa's technical, educational and promotional assistance in setting up new recycling programs and processing used cans for shipment to Alcoa reclamation mills.

Alcoa Recycling Machinery Services, a new entry in the machinery parts and services field, also will be working closely with BFI to develop new and more efficient recycling and can handling equipment.

Ruckelshaus said BFI collected about two percent of the 49 billion used aluminum beverage cans collected in the United States in 1989, which

amounted to some 1 billion cans or 37 million pounds of aluminum.

#90178p0297 06/27/1990 ~PR Newswire

LEXINGTON, MA (JUNE 27) PR NEWSWIRE - Raytheon Company's (NYSE: RTN) board of directors today elevated William H. Swanson to be a senior vice president of the company and elected James W. Carter as a company vice president.

Swanson, 41, will become the general manager of Raytheon's Missile Systems Division in Bedford, Mass., upon the retirement of Senior Vice President John P. Shanley, the current division general manager, on August 1. Swanson is presently the division's assistant general manager for operations and the Andover plant manager. He was elected a Raytheon vice president in June 1987.

Carter, 44, is the manager of Missile Systems Laboratories in Tewksbury, Mass. The division's extensive technical laboratory system has made it a leader in systems design, missile guidance, radar systems, digital systems, software development, mechanical engineering and electro-optical technologies.

"Raytheon is fortunate to have young leaders of the caliber of Bill Swanson and Jim Carter to assume senior management positions," said Raytheon Chairman and CEO Thomas L. Phillips.

"They reflect the dedication and fine management tutelage of the division's excellent leaders - such as Jack Shanley and Dennis Picard, our company president - who have gone before them. I am proud that management development continues to be a Raytheon hallmark," Phillips said.

Swanson joined Raytheon in 1972. He was the manufacturing manager at the company's Waltham facility before becoming the Andover plant manager in 1984. He also became the division's assistant general manager of operations in 1989.

Missile Systems Division, the company's largest operating unit, has more than 17,000 employees worldwide and major facilities in Andover, Bedford, Lowell, and Tewksbury, Mass.; Manchester, N.H.; and Bristol, Tenn.

Carter joined Raytheon in 1968. He was the program manager for the Hawk air defense missile system prior to being appointed to his current position in 1987.

NEW CUMBERLAND, PA (JUNE 27) PR NEWSWIRE - Ronald H. Smith, chairman of the board of CCNB Corp. (NASDAQ-NMS: CCNC), and Gary L. Holman, president and chief executive officer of Homestead Holding Corp. (NASDAQ-NMS: HMSD), announced today that plans are being made to merge the two holding companies.

Under the terms of this agreement, Homestead Holding Corp. and its subsidiaries would become wholly owned subsidiaries of CCNB Corp. The acquisition would be consummated by means of an exchange of CCNB common stock for Homestead Holding Corp. common stock. Based on the current market value of CCNB's common stock, it is anticipated that Homestead stockholders will receive CCNB common stock worth $15.48 for each share of Homestead common stock. The acquisition is contingent upon execution of a definitive agreement and the approval of CCNB Corp. and Homestead Holding Corp. boards of directors. Consummation of the agreement is also contingent upon the approval of federal regulators and shareholders of Homestead Holding Corp.

It is expected that Holman would continue in his present capacity. It is also anticipated that the officers and employees of Homestead will continue in their present positions following the proposed acquisition.

Homestead Holding Corp.'s assets equaled more than $259 million on March 31, 1990, with stockholder equity of $18,017,000. CCNB Corp., a multibank and thrift holding company, currently has assets of more than $1.2 billion.

CCNB Corp. is the parent company of CCNB Bank N.A., The Gettysburg National Bank, and Parent Federal Savings Bank which operate 41 financial offices in six counties.

CONTACT: Gary L. Holman, chairman, president and chief executive officer, or David A. Doyle, director of investor relations of Homestead Holding, 717-944-1301

NEW YORK (JUNE 27) PR NEWSWIRE - The Burton Group plc today issued the following trading update:

As early as 1988, the Burton Group forecast difficulties in the retail sector. More recently at the group's interim results, the chairman said "we are under no illusion about 1990. It is going to continue to be

tough".

These forecasts have been borne out by the trading pattern of major segments of retailing in the U.K. and whilst Burton enjoyed encouraging sales in the early part of this year, over the most recent period sales have deteriorated.

JACKSON, MI (JUNE 27) PR NEWSWIRE - Consumers Power Company's residential electric and gas rates are lower than 80 percent of the nation's utilities according to two new independent surveys.

Eighty-two percent of 187 electric utilities surveyed by the National Association of Regulatory Utility Commissioners (NARUC) for summer 1989 electric bills charged rates higher than Consumers Power for a typical residential customer using 500 kilowatt-hours per month. At an average cost of $32.30, Consumers Power's typical monthly residential bill was 23 percent lower than the NARUC survey's national average, 21 percent lower than the Midwest average, and lower than 154 other utilities.

An American Gas Association (AGA) survey of fourth-quarter 1989 natural gas rates for typical residential space heating customers using 25,000 cubic feet per month showed that 81 percent of the nation's gas utilities had higher bills than Consumers Power Company. Based on a fourth-quarter 1989 residential space heating bill of $109.73 per month for 25,000 cubic feet, Consumers Power's gas rates were 18 percent below the national average, almost 12 percent below the East North Central U.S. average, and lower than 92 other utilities.

The NARUC survey showed Consumers Power's typical residential electric customer's average cost of power per kilowatt-hour last summer was 6.5 cents, compared with a nationwide average of 8.3 cents. The report compares the largest service territories of major investor-owned electric utilities in 49 states and the District of Columbia. NARUC is a nonprofit organization whose members include regulatory bodies of the 50 states, the District of Columbia, Puerto Rico and the Virgin Islands.

The AGA surveyed 113 investor-owned natural gas distribution utilities throughout the lower 48 states. The AGA is a national trade association composed of approximately 250 natural gas distribution and transmission companies.

Consumers Power serves electricity to more than 3.3 million people in a

27,800-square-mile service area spanning 61 Lower Peninsula counties. It serves more than 3.4 million people with natural gas in a 12,900-square-mile service territory covering 40 Michigan counties.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

WASHINGTON (JUNE 27) PR NEWSWIRE - Sidney Harman, chairman and chief executive officer of Harman International Industries, Inc. (NYSE: HAR), told a small group of analysts today that the company is experiencing a "relatively soft fourth quarter" and as a result he a anticipates that "year-end earnings will be modestly below those of a year ago."

"The fourth quarter of this year and the first quarter of next year will be disappointing to us," he said. "Sales for the year ending June 30, 1990 will be approximately 6 percent above last year. Earnings, however, are expected to be approximately 5 to 7 percent below last year's record results and the first quarter of the next year will be lower than last year's first quarter. Beyond that, the balance of next year looks very strong and we anticipate double digit growth in both sales and earnings for the full year."

To strengthen the company for the future, Dr. Harman announced two key appointments. Richard James has been appointed president of JBL, Inc., and Alex Wijnen president of the new consumer electronics group. Dr. James will be responsible for all JBL activities including those of the professional, international and consumer divisions. Presidents of each of the three JBL divisions will report to him.

Most recently, Richard James was vice president, customer and marketing services, Thompson Consumer Electronics. Previously he was vice president, marketing at Thompson for America and Canada. Dr. James graduated with a Ph.D. in mathematics from Purdue University.

As president of the newly-formed consumer electronics group, Alex Wijnen will be responsible for the activities of Harman Kardon, Harman Video, Concord Auto Sound and EPI Loudspeakers. Heads of these divisions will report to him.

Wijnen joins Harman from the Robert Bosch Corporation -- Blaupunkt division, where he spent the last 18 years in general management and senior marketing and sales roles. Most recently he headed the mobile

communication division of Blaupunkt in the United States. Wijnen has a strong international background including assignments in Copenhagen, Denmark; Amsterdam, Netherlands; and West Germany. He received bachelor's and master's degrees from the University of Oregon.

Dr. James and Wijnen will be located at Harman International in Northridge Calif., and will report to Donald J. Esters, president and chief operating officer of the corporation.

Dr. Harman noted that a series of six natural groups has evolved within the company. "The JBL group and the consumer electronics group will complement the existing professional, manufacturing, automotive, and international distributing groups. With the appointments of Dr. James and Wijnen we complete a logical and coherent structure without compromise to our prized flat organizational design."

Harman International Industries, Inc., is a leading manufacturer and worldwide marketer of high-quality, high-fidelity audio and video products for consumer, professional and original equipment manufacturer markets. The company's stock is traded on the New York Stock Exchange.

#90178p0310 06/27/1990 ~PR Newswire

TOKYO (JUNE 27) PR NEWSWIRE - Koito Manufacturing Co., Ltd. today announced that as of the close of business today, the company received proxies representing over 83 percent of the outstanding shares, other than those shares held by Boone Co.

These proxies have been voted in support of the company's proposals that will be acted upon at tomorrow's annual shareholders meeting in Tokyo. The company said it expects further support from shareholders voting tomorrow at the meeting.

Tomoatsu Aoyama, a Koito director, said, "We are gratified at the overwhelming support that management has received from our shareholders. This compares very favorably to the less than two percent of shareholder proxies supporting Boone Co.

"After corporate raider Boone Pickens' lengthy and highly visible campaign to attack Koito, disrupt our business, and create controversy to further his greenmail scheme, it is revealing that he can obtain the support of fewer than two percent of the other shareholders," continued Aoyama.

"We understand that Mr. Pickens failed to win shareholder support in his

proxy battles with American companies, such as KN Energy and Gulf Oil, and it is no surprise that his methods are not faring better with Japanese shareholders."

Aoyama stated that the proxies Koito has received also indicate overwhelming support the company's decision to oppose the Pickens board slate and other proposals. He said, "As will be made clear at the shareholders meeting tomorrow, our reasons for opposing the Pickens proposals include the following:

"First, Mr. Pickens is not acting for himself, but as the agent or nominee of Kitaro Watanabe, a notorious Japanese greenmailer who still holds the real economic interest in the shares registered in Pickens' name.

"Second, Pickens and Watanabe are engaged in a greenmail effort targeted at Koito and its shareholders. Greenmailers have no place on corporate boards. Indeed, not one of the American companies Mr. Pickens targeted put him on its board.

"Third, Mr. Pickens has a deserved reputation as a corporate raider. The courts in the U.S. have found that he cannot be believed when he says he is a 'long-term investor.' Putting someone with this reputation on our board would be harmful to our relations with customers, employees, and others.

"Finally, Aoyama concluded, "Mr. Pickens and his Boone Co. colleagues have no experience or knowledge in the automobile industry, or in any manufacturing business. His own company, Mesa, lost over $60 million last year, has stopped paying dividends, and is selling at an all-time low.

CONTACT: Richard Wolff (in Tokyo), 03-507-0730, or Ruth Pachman of Kekst and Co., (212) 593-2655, both for Koito Manufacturing.

HOUSTON (JUNE 27) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC) today announced successful results from a dry sodium SO2 control demonstration carried out jointly with Wisconsin Electric Power Co. (NYSE: WEC). The demonstration, completed at WEPCO's Port Washington station, achieved SO2 reductions of more than 70 percent while maintaining opacity and particulate compliance. Demonstration results were presented by WEPCO at the EPRI/EPA SO2 Control Symposium held in New Orleans.

Dry sodium bicarbonate injection is one of the methods being considered by the utility industry because of its lower capital costs, minimal space requirements, short installation time and compatibility with older generating units equipped with electrostatic precipitators.

This marks the fourth successful demonstration of dry sodium bicarbonate injection for NaTec. A fifth demonstration is underway at Public Service Company of Colorado's (NYSE: PSR) Cherokee Station in Denver.

NaTec is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility, industrial power generation, pulp and paper, refining and municipal solid waste.

NEW YORK (JUNE 27) PR NEWSWIRE - The Topps Company, Inc. (NASDAQ: TOPPC), today announced that its board of directors has declared a three-for-two stock split in the form of a 50 percent stock distribution on its common stock.

Holders of the company's common stock will receive one additional share for each two shares of common stock that they hold of record as of the close of business on July 9, 1990. Certificates representing additional shares will be distributed on Aug. 1, 1990.

The three-for-two stock split will increase the number of shares of the company's common stock outstanding from approximately 31,500,000 to approximately 47,250,000.

The company also announced that its board of directors declared a quarterly cash dividend of $.05 per share, payable on Aug. 1, 1990, to stockholders of record on July 9, 1990. Payment of this dividend, after giving effect to the three-for-two stock split, represents a 25 percent increase over the quarterly cash dividend previously paid by the company.

Topps is well known for its collectible picture products, which feature sports and other entertainment themes, and its internationally registered trademark, BAZOOKA.

#90178p0316 06/27/1990 ~PR Newswire

ARLINGTON, TX (JUNE 27) PR NEWSWIRE - Employees at the Chevrolet-Pontiac-Canada Group's Arlington assembly plant celebrated the

production of their first all-new 1991 Chevrolet Caprice today. The white Caprice Classic rolled off the assembly line at 11 a.m., marking completion of the plant's $125 million conversion.

"We have been working hard over many months in planning for the production of the new Caprice," said Arlington Plant Manager Arthur C. Hester. "This new car symbolizes a new beginning for us."

The Arlington plant ceased 1990 model production on April 27 to install new equipment and tooling required for production of the 1991 Caprice. A lay-down side frame system installed in the body shop utilizes robots to weld together metal components to form the body sides. Most of the equipment installed in the body shop contains single sets of tooling for welding the vehicle body vs. multiple sets of tools used previously. The use of single tooling provides consistency in the build process and enhances dimensional control.

Also new in the body shop is a coordinate measuring machine (CMM) that statistically monitors critical body dimensions, body openings and metal fits. Several vehicle bodies are analyzed in the CMM each day to ensure process control.

Of the total investment at Arlington, nearly $100 million was spent building a state-of-the-art paint shop. The new 720,000-square-foot facility uses base coat/clear coat paint applied through extensively automated systems. Base coat/clear coat paint provides a lustrous, high-quality finish to the 1991 Caprice and Cadillac Broughams built at the plant.

In the trim and chassis departments, layout of work areas has been changed and production material rearranged to provide greater production efficiency.

According to Hester, new equipment installed in the plant incorporates significantly improved and up-to-date technology. "Arlington employees have participated in more than 96,000 hours of training necessary to effectively maintain and operate these new systems," he said.

Skilled trade employees in the body shop received training in operation and maintenance of robots, and programming and operation of mini-computers. Employees in the new paint shop received extensive training on the application of base coat/clear coat paint and operation of the technically complex application systems. Group leaders and team leaders in every department received training on workplace layout and organization prior to rearranging their work areas.

Teamwork is a key element in Arlington's efforts to increase their competitiveness. Implemented in 1986 with United Auto Workers Local 276,

the team concept process focuses around teams of workers with increased responsibility and participation in critical business decisions, reduced classifications, and intensive training. During the conversion, hourly team leaders have been responsible for planning their own areas and for training their team members.

#90178p0319 06/27/1990 ~PR Newswire

ALLENTOWN, PA (JUNE 27) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) has acquired a 49-percent interest in Sapio Industrie, a major Italian industrial gas company based near Milan with annual revenues approaching $100 million.

This strategic move achieves Air Products' aim to have a strong presence in every major industrial market in Western Europe and strengthens the company's position as the industrial gas supplier with the broadest European position.

Commenting on the company's expansion in Italy, Air Products Chairman Dexter F. Baker said, "Expanding our industrial gases and chemicals businesses around the world is a major corporate strategy, with Europe as a prime target. We began stepping up our European investment rate in 1985 at a time when our bullishness about Europe was not shared by many others. Now, as Europe moves towards economic unity, Air Products is exceptionally well positioned to produce and market industrial gases across Europe."

Since the mid-1980s, Air Products has invested more than $500 million in Europe, effectively doubling its asset base there. This past April, the company announced that it acquired options which would increase its stake in Carburos Metalicos, the largest industrial gas supplier in Spain and Portugal, to approximately 30 percent. The company presently has operations in 11 European countries that generate almost $600 million in revenues through the sale of industrial gases, cryogenic equipment and chemicals.

Air Products' equity position in Sapio continues the company's policy of investing in strong and well-established local national companies. Sapio's entrepreneurial approach to producing and marketing industrial gases has resulted in strong market positions in northern and southern Italy. Overall, Sapio ranks among Italy's top industrial gas companies. Four Air Products representatives, including two European vice presidents and the general manager of Air Products' own Milan-based operation, will become members of Sapio's nine-member board.

With operations in 22 countries and annual revenues approaching $3 billion

Air Products is a major international supplier of industrial gases and related equipment, chemicals, and environmental and energy systems. Approximately 30 percent of the company's revenues are derived outside the United States.

NEW YORK (JUNE 27) PR NEWSWIRE - Reginald F. Lewis, chairman and principal stockholder of TLC Beatrice International Holdings, Inc., today announced the appointment of Dumas M. Simeus as president and chief operating officer (COO) of the international food company that had sales in 1989 of $1.14 billion. Lewis will continue as chief executive officer.

Simeus, who will report to Lewis, was also named to the company's board of directors.

Simeus has extensive experience in the international arena. He served for four years as president of Beatrice International's Latin American division. Prior to joining Beatrice in 1985, he worked with the international divisions of several companies including Bendix and Rockwell International.

Simeus has an M.B.A. from the University of Chicago and is an electrical engineering graduate of Howard University. He is fluent in French and Spanish.

Lewis and his investors acquired TLC Beatrice International on Dec. 1, 1987 for $985 million. Since then, the company has retired all of its

initial acquisition debt, including all high yield bonds.

Lewis has repositioned the company around a decentralized, pan- European core of 20 food operations involved in wholesale and retail food distribution, and the manufacture and sale of ice cream, processed snacks and other grocery products. Many of the company's brands hold significant market positions in various countries.

The company's segment operating income rose to $76.9 million for 1989 compared to $63.5 million for 1988, an increase of 21 percent. Sales increased by 12 percent during the same period.

Lewis also announced that promotion of David A. Guarino to vice president and controller of TLC Beatrice International. He will report to Mark Thorne, the company's chief financial officer.

Guarino, who over the past two years traveled extensively with Lewis between the company's New York and Paris offices, will continue to work with him on some special projects.

#90178p0326 06/27/1990 ~PR Newswire

ELDERSBURG, MD (JUNE 27) PR NEWSWIRE - Londontown Holdings Corp. and Merrill Lynch Capital Partners, Inc., a Merrill Lynch affiliate, jointly announced today that they have merged a corporation formed at the direction of Merrill Lynch Capital Partners into Londontown Holdings. Londontown Holdings is a holding corporation and the parent of Londontown Corporation.

The merger will have no effect on Londontown Corporation's employees or operations. In addition, Londontown Corporation's existing debt will remain outstanding.

The senior preferred stock of Londontown Holdings held by the public has been redeemed at par. Holders of warrants to purchase shares of Londontown Holdings' Class B common stock received the right to receive $1,631.23 per warrant, in cash, less the exercise price. As a result of the merger, Merrill Lynch Capital Partners became the new majority shareholder of Londontown Holdings.

Londontown Corporation is the leading manufacturer in the United States of quality men's and women's rainwear and a leading manufacturer of quality men's and women's outerwear. Londontown Corporation designs, manufactures and distributes its products under the London Fog trademark and under a variety of other well-known brand names.

Mark H. Lieberman, chairman of the board, president and chief executive officer of Londontown Corporation, said, "During the past 15 years, Londontown Corporation has enjoyed an almost uninterrupted sustained growth in revenues that we anticipate will reach a $300 million level in our current fiscal year, which ends in February 1991, and essentially exhibits a 10 percent compound growth rate in revenues during this 15-year time frame. We are fortunate in that our growth rates have accelerated somewhat during the recent four years, including fiscal 1991.

"Londontown's performance is illustrative, and we feel it is directly attributable to the popularity of the London Fog brand name and the confidence of the consumer in the quality and styling of London Fog products, and what they stand for. It is our feeling that the consumer of the 1990's will rely upon manufacturers, such as Londontown, with established brand names, and a tradition of quality, styling and value.

"With the merger now complete, I look forward to a continuation of Londontown's growth in revenue and earnings. The addition of Merrill Lynch Capital Partners to the Londontown team as our majority equity owner and the continuation of General Electric Capital Corporation as our major lender, together with our loyal customers, suppliers and employees, all provide us with the sound formation for our future expansion and the growth of London Fog branded products at an ever- accelerating rate."

#90178p0334 06/27/1990 ~PR Newswire

WOODLAND HILLS, CA (JUNE 27) PR NEWSWIRE - Perceptronics Inc. (NASDAQ: PERC) today reported completing a full year of consistent profitability.

For the year ended March 31, 1990, Perceptronics' net income equalled $1,097,626, or $.32 per share. This contrasts with a fiscal 1989 net loss of $7,431,796, or $2.15 per share. Revenues for fiscal 1990 totalled $28,937,632 compared with a $28,525,491 a year earlier. Fiscal 1989 revenue figures include sales of approximately $3.5 million from the FAAC subsidiary sold in May 1989.

For the fiscal 1990 fourth quarter period, Perceptronics earned net income of $281,644, or $.08 per share, on revenues of $8,081,482. In the corresponding year earlier period, the company recorded a net loss of $4,922,433, or $1.42 per share, on revenues of $6,034,498.

Fiscal 1990 net income figures include $452,000, or $0.13 per share, for

the full year and $123,500, or $.03 per share, for the fourth quarter, representing utilization of a net operating loss carryforward.

"In fiscal 1990, Perceptronics substantially reduced general and administrative expenses and improved the balance of revenues generated by our business units," said Dr. Gershon Weltman, chairman and chief executive officer.

"While our work on the SIMNET program continued to contribute a large part of last year's revenues, we are beginning to see success in building the contributions from other areas as SIMNET has wound down," Weltman said.

"We are particularly pleased with the contributions from programs such as our ongoing subcontract with the Wegmann Company to develop and produce Leopard 2 tank simulators for the German army and our subcontract with Loral Fairchild to produce TOW and DRAGON anti-tank missile trainers for the U.S. Army and Marine Corps."

Weltman added: "The outlook for fiscal 1991 is challenging. Perceptronics is prepared to keep our operating costs in line with sales levels, which may decline in the short-term due to the increasingly tight U.S. defense budget.

"We are more optimistic about fiscal 1992 as production phases of current development programs come on line. We also have confidence that the growing contributions to Perceptronics from various non-DoD program, such as truck driving simulators, PERCNET simulation software, and foreign defense contracts, will make Perceptronics a stronger company."

At March 31, 1990, the firm contract backlog was $15.2 million and the option backlog was $29.6 million, for a total backlog of $44.8 million. A year earlier, firm contract backlog was approximately $12.2 million (excluding FAAC) and option backlog was $45.3 million, for a total backlog of $57.5 million. The change in the option backlog is principally due to elimination of unexercised SIMNET options.

CONTACT: Dr. Gershon Weltman, chairman and CEO, Perceptronics, (818) 884-7470, or Cecilia A. Wilkinson of Rifkind Pondel & Parsons, (213) 207-9300, for Perceptronics.

ATLANTA (JUNE 27) PR NEWSWIRE - Georgia families with newborn and small children will find it easier to get product and service help by telephone thanks to a new toll-free mini directory from AT&T.

The new directory, AT&T Toll-Free 800 from A to Z, A Parent's Guide, is

based on listings from AT&T's widely distributed consumer edition of the Toll-Free 800 Directory. It includes about 400 toll-free listings of special interest to families, such as Nannies, Diaper Services, and Travel/Destination Resorts.

The new mini directory also offers special discounts from companies that use AT&T 800 service. The directory, magnetic-backed to stick to a kitchen appliance for handy reference, features a personal baby-sitter message center for caretaker information such as emergency numbers, parent's numbers, and medical information about the children. Thirty-five thousand directories have been mailed to parents across the country with children under the age of four.

Parents may also request the toll-free mini guide by sending $2.50 per directory in check or money order to cover shipping and handling along with their names and addresses to AT&T American Transtech, Mini Directory, P.O. Box 44068, Jacksonville, FL 32256.

#90178p0339 06/27/1990 ~PR Newswire

WATERTOWN, MA (JUNE 27) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM) announced today that the first patients have been treated intra-operatively with the ExciMed(tm) UV300 excimer laser to remove coronary artery blockage. The procedures are being performed at the University of Rochester, Rochester, N.Y.

The goal of the investigation is to determine efficacy and safety of

excimer laser angioplasty to remove coronary artery blockage. The excimer laser surgery was performed while the patient was undergoing a coronary artery bypass graft. The excimer laser surgeries were uneventful and the arteries were unblocked by the laser catheter. The patients are being followed to determine long term efficacy and restenosis rates.

Coronary artery disease is the major cause of death in the United States. Approximately 1,000 health care facilities in the U.S. (2,000 worldwide) may require laser angioplasty equipment and it is projected that there may be as many as 1 million angioplasty procedures performed worldwide by 1990.

Summit Technology, Inc. has established a leadership position in designing manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where application have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. The start of clinical trials in angioplasty represents Summit's usage of the excimer laser for a second major medical application. Summit is the only company using an excimer laser in multiple medical specialties. The company has received six approvals from the F.D.A. for clinical trials with its excimer laser systems.

ASHLAND, KY (JUNE 27) PR NEWSWIRE - Ashland Exploration Inc., a subsidiary of Ashland Oil Inc. (NYSE: ASH), announced today that it has completed the purchase of Appalachian natural gas properties from OXY USA Inc., a subsidiary of Occidental Petroleum Corp (NYSE: OXY).

The transaction is valued at approximately $107 million, subject to final adjustments.

Ashland Exploration is acquiring approximately 550,000 net acres of OXY's natural gas producing and undeveloped properties located primarily in West Virginia and Eastern Kentucky. Natural gas production from nearly 700 producing wells on the properties averages approximately 18 million cubic feet per day. Independent petroleum engineers have assigned total proved reserves of 142 billion cubic feet to the properties.

James R. Boyd, president of Ashland Exploration, said the acquisition will more than double Ashland's existing Appalachian acreage and increase the company's total natural gas production by over 30 percent.

"This acquisition is a strategic fit for Ashland since many of the new

properties are contiguous to our existing operations and we expect to realize significant efficiencies from the combined operation," said Boyd. "In addition, we see significant value in the long-life reserves of the region and the high-return development potential that these properties will provide for years to come."

Boyd added that Ashland will also benefit from favorable federal tax credits on some of the OXY properties that produce from the Devonian shale. He further commented that the company continues to seek this type of strategic acquisition.

With headquarters in Houston, Ashland Exploration Inc. is engaged in oil and gas exploration and production both onshore and offshore in the United States and in Nigeria.

DALLAS (JUNE 27) PR NEWSWIRE - MCorp (PSE: M.P) today announced it has executed a definitive agreement to sell its interest in MBank Brownsville to a private investor group sponsored by the bank's management. Specific terms of the agreement will be set forth in documents filed with the bankruptcy court when the proposal is submitted for approval.

MBank Brownsville is a wholly owned banking subsidiary of MCorp with assets of $445 million and deposits of $415 million at March 31, 1990. The transaction, which is subject to applicable regulatory and bankruptcy court approvals, is expected to be completed prior to Dec. 31, 1990. MCorp has been in Chapter 11 proceedings since March 31, 1989.

The proposed sale of MBank Brownsville reflects MCorp's ongoing efforts to maximize the company's value for the benefit of its creditors and shareholders. On Feb. 27, 1990, MCorp completed the sale of MVestment to Ameritrust Corp. A gain for consolidated financial reporting purposes of $96.3 million was realized on this transaction, although the gain has been deferred pending completion of the sale of the remaining banks.

In addition, MCorp announced it had executed definitive agreements for the sale or disposition of MBank El Paso and MBank Corpus Christi on Feb. 26, 1990, and March 9, 1990, respectively.

On March 9, 1990, a wholly owned subsidiary of MCorp entered into an earnest money contract for the sale of a tract of undeveloped land in downtown Houston for $24 million in cash. These transactions, which are subject to regulatory and bankruptcy court approvals, are expected to be completed by Sept. 30, 1990.

MCorp continues to evaluate various alternatives with respect to the disposition of both its other banking subsidiaries and its remaining financial assets in connection with, or prior to, filing a plan of reorganization.

MCorp is a Texas-based financial services organization. In addition to Brownsville, Corpus Christi and El Paso, MCorp has banking operations in New Braunfels and Waco.

VIRGINIA BEACH, VA (JUNE 27) PR NEWSWIRE - Home Quarters Warehouse, a Virginia Beach-based retailer of home improvement products and building materials, will celebrate the grand opening of its 17th store on Thursday, June 28, at 8 a.m. in Fairfield, Ala.

The new Home Quarters, located adjacent to Flintridge Center at 6501 Flintridge Road, is the second of three Home Quarters stores planned for the Birmingham area.

The management team at the new store is headed by Jerry Lewis, the general store manager; Ed Travis is operations manager. The store managers are Jim Brocking, Joe Jeffries, Ann Gerzina and Charles Powell.

Home Quarters Warehouse opened its first stores in Hampton and Virginia Beach, Va., in February 1985. Since its founding, Home Quarters has grown to 17 stores in six southeastern states.

The typical Home Quarters store consists of almost two acres of selling space, devoted to one of the widest selections of name brand hardware, building materials, home improvement items and lawn and garden products available under one roof anywhere.

"Our goal is to offer our customers the widest possible assortment of home improvement products at everyday low prices," according to company founder and president, Frank C. Doczi. He explained: "We offer the lowest prices because we buy in large volume direct from manufacturers. Our large warehouse stores allow us to give our customers a huge assortment to choose from; they can get everything they need to build a house, repair a leaky faucet or for almost any other project at our store."

Home Quarters prides itself on its high quality customer service and this is another important aspect of the Home Quarters philosophy. "We are

proud to offer the friendliest, most knowledgeable people in our store," said Doczi. "For a customer to feel good about a home improvement purchase, he or she has to have confidence in the advice we give. So we train our associates to answer customers' questions so that they get full value for their purchases. We want customers to know that we not only have the products they need, we have the answers they need to use the products, too."

In addition to having helpful sales personnel, each Home Quarters has up to 20 registers, for fast customer checkout. There is also a centrally located HQ Answer booth, staffed by a knowledgeable home improvement expert, anxious to answer customers' questions.

Home Quarters continues to pursue its aggressive expansion plan, with new stores planned for the southeastern United States, Midwest and New England areas.

LOS ANGELES (JUNE 27) PR NEWSWIRE - California Federal Bank, FSB, today said its board of directors elected Charles J. Buchta executive vice president of the consumer bank, western states.

In this position, Buchta will oversee California Federal's 148- branch consumer banking operations in California, Nevada and Arizona, as well as the bank's investment services, marketing and central operations divisions.

He succeeds Warren A. Raybould who recently resigned.

Buchta, 48, joins California Federal from First Interstate Bank of California, where he served as executive vice president in charge of the bank's Los Angeles North division of 53 branches and its personal trust division. In his six years at First Interstate, he had been responsible for the bank's centralized administrative operations and numerous other functions, including business marketing and product management, international operations support and the auto leasing business.

Prior to 1984, Buchta served as vice president and division executive for Chase Manhattan Bank. He also held numerous management positions for Girard Bank and Citibank.

Buchta is a member of the board of directors and former chairman of the board of the Alliance of Businesses for Childcare Development (ABCD) and chairman of the board of the Los Angeles County Childcare Advisory Board. His other charitable activities include service on the boards of the

National Women's Employment and Education Inc. and the Weingart Center for the Homeless.

Buchta received his bachelor's degree in English from Holy Cross College in 1963 and his master's degree in business administration from Fordham University in 1971.

Buchta resides in Westlake Village, Calif., with his wife and three children.

California Federal Bank is the principal subsidiary of CalFed Inc. (NYSE: CAL), a $25 billion consumer-based financial services company headquartered in Los Angeles. California Federal Bank has nearly 200 consumer banking offices in California, Florida, Nevada, Georgia and Arizona.

HARRISBURG INTERNATIONAL AIRPORT, PA (JUNE 27) PR NEWSWIRE - USAir will introduce three new daily non-stop flights between Harrisburg International Airport and Charlotte, N.C., its largest connecting hub, beginning Sept. 5.

The new service is in response to requests from the communities served by Harrisburg International for more convenient access to the southern part of the United States, according to an airline spokesman. It also gives travelers from central Pennsylvania their first direct access to USAir's largest connecting hub.

At Charlotte, travelers will be able to connect with more than 300 daily USAir jet flights to points throughout the south and southeastern United States, as well as to the Bahamas, Puerto Rico and Great Britain. Another approximately 150 daily flights operated by the airline's USAir Express affiliates link Charlotte with many smaller and mid-size southeastern cities.

With the Sept. 5 introduction of the new flights to Charlotte, Harrisburg

International Airport will have frequent daily service to USAir's four largest connecting hubs, Charlotte, Pittsburgh, Baltimore/Washington International and Philadelphia.

In addition to the three daily Charlotte flights, USAir will operate five daily jets to Pittsburgh, where connections are available to 289 USAir and 127 USAir Express flights to points throughout the Midwest, Southwest and West Coast, as well as to USAir's new non-stop flights to Frankfurt, West Germany.

There are also seven daily USAir Express flights between here and Philadelphia International and its 138 USAir and 118 USAir Express flights.

Eight daily USAir Express flights link Harrisburg International with BWI, where connections will be available to 146 USAir jet and 99 USAir Express flights.

USAir Express flights also operate between Harrisburg International and Boston, Washington National Airport, Newark and New York's LaGuardia Airport.

New Charlotte flights, all operated with 68-passenger F-28 twin-jets, will depart Harrisburg International at 7:40 a.m., 11 a.m. and 6:45 p.m., and arrive Charlotte at 9:15 a.m., 12:30 p.m. and 8:15 p.m.

Return flights will depart Charlotte at 9:10 a.m., 4:30 p.m. and 7:30 p.m. and arrive Harrisburg International at 10:40 a.m., 6 p.m. and 9 p.m.

BRANCHBURG, NJ (JUNE 27) PR NEWSWIRE - Air & Water Technologies Corporation (AMEX: AWT), a leading environmental treatment and services company, today announced that its subsidiary Metcalf & Eddy Companies, Inc. (NASDAQ: METC) has entered into a definitive agreement to acquire all of the issued and outstanding capital stock of Petrolgroup, Inc. ("Petrolgroup"), headquartered in Hialeah, Fla., from Petrolgroup's four stockholders. Petrolgroup, which does business under the name of "Pieco " assesses, tests, and remediates non-hazardous petroleum leaks, primarily at automobile service stations. Petrolgroup also designs, engineers, sells, installs, and services fueling facilities. Petrolgroup has additional facilities in Deerfield Beach, Orlando, and Tampa, Fla.

Under the terms of the stock purchase agreement, Metcalf & Eddy will pay to the sellers $3.5 million in cash at the closing and will issue approximately 207,000 shares of Metcalf & Eddy common stock, which had a value of approximately $6 million. The stockholders may also receive payments based on the operating income of Petrolgroup (together with Metcalf & Eddy's Ocala, Fla. operation) after the closing date. Under the stock purchase agreement, the sellers have agreed not to compete with Petrolgroup for a period of time and to indemnify Metcalf & Eddy against certain expenses incurred as a result of any breach of a representation or warranty.

For Petrolgroup's most recent fiscal year, ended Aug. 31, 1989, it earned approximately $1.2 million in net income on sales of approximately $26 million.

Air & Water Technologies Corporation, through its business units, Metcalf & Eddy Companies Inc., Research-Cottrell, Inc., and Residuals Management Group, provides a broad range of environmental services for water resource management, air pollution control and waste by-product disposal and reuse.

#90178p0357 06/27/1990 ~PR Newswire

NEW YORK (JUNE 27) PR NEWSWIRE - The shareholders of The Prospect Group, Inc. (NASDAQ: PROSZ) today approved the liquidation of the company and the plan for the distribution of assets submitted to them at the annual meeting.

Prospect's board of directors adopted the plan of complete liquidation and dissolution in February and recommended it to shareholders for approval. The company's management subsequently developed the distribution plan that was disclosed in the proxy statement for the meeting.

Gilbert H. Lamphere, chairman, president and chief executive officer, told shareholders that the board considered all options in its quest to return maximum value to shareholders and decided that "the optimum return for shareholders would be achieved through the distribution of assets, either in cash or in kind."

The plan anticipates the distribution by mid-September of Prospect's major holdings, including Illinois Central Corporation, Sylvan Foods Holdings, Inc.;, The Forschner Group, Inc., and MidSouth Corporation.

Prospect's holdings in Recognitions Equipment Inc. and Noel Group, Inc., will not be distributed in the near future.

Prospect distributed its common stock interest in Illinois Central to shareholders in January and the stock currently is traded in tandem ("stapled") with Prospect stock. The unstapling is anticipated no later than mid-September, by which time two related events are expected to have taken place: the listing of the Illinois Central stock on the NASDAQ National Market System and the exchange of Prospect's preferred stock for common stock in Illinois Central. The common will then be distributed to Prospect shareholders. Voting rights in Illinois Central which now attach to the preferred stock will cease with the exchange and each share of common stock outstanding will be entitled to one vote.

The Prospect Group, a leveraged acquisition company, was founded in 1983 and went public in 1986.

#90178p0360 06/27/1990 ~PR Newswire

LAKE SUCCESS, NY (JUNE 27) PR NEWSWIRE - Park Electrochemical Corp. (NYSE: PKE) today reported its first-quarter performance.

Sales were $42,165,000 compared to $38,052,000 for the first quarter of last year.

Earnings were $1,003,000 (20 cents per share) compared to $1,050,000 (20 cents per share) for last year's first quarter.

Jerry Shore, president said, "We are pleased with our 11 percent sales increase since that increase was due to improved market share, despite price reductions which amounted to approximately 3 percent on a company-wide basis. Profit margins continued to be under severe pressure except in the writings of those who do forecasting for the electronics trade."

Park Electrochemical Corp., through its subsidiaries, is primarily a manufacturer of advanced electronic circuit materials.

#90178p0362 06/27/1990 ~PR Newswire

LOS ANGELES, (JUNE 27) PR NEWSWIRE - Guerdon Industries Inc. has been acquired by A.W. Preusch and an investor group that includes its former owner. Preusch and the investor group, which is led by Nagelvoort & Co.,

acquired the company's outstanding capital stock from Fred Huckvale and associated interests for an undisclosed amount of cash and stock.

Debt financing for the transaction was provided by B W Capital Corporation and Amsterdam Pacific Corporation.

Guerdon Industries is among the nation's 20 largest producers of manufactured and modular homes, with plants in Oregon, Idaho, Nebraska and Mississippi. The company had been acquired in April 1985 by Huckvale Acquisition Inc., which is controlled by Fred Huckvale. Huckvale will continue with the company as a key management advisor and as a member of its ownership group and board of directors.

A.W. "Al" Preusch, 47, will serve as president and chief executive officer. He was for three years president and chief executive officer of Baker Service Tools, a major manufacturing and service company in the oilfield equipment industry, and for six years as vice president and chief financial officer of Baker Hughes Production Tools, a holding company with eight operating subsidiaries. Preusch, a certified public accountant, began his business career with Deloitte Haskins & Sells and rose to become a partner of that public accounting firm.

Preusch said that Guerdon Industries' revenues total approximately $40 million annually, and that all of its plants have long records of high-quality production and profitable operation. He indicated that the company's monthly revenues for the year to date have been exceeding those of the year-earlier months by 30 to 40 percent, and that Guerdon's order backlog is at its highest level in many years.

He said, "Manufactured housing increasingly provides answers to the question of home affordability, particularly for first-time home- buyers, and it satisfies the needs of the rapidly growing retiree population. Federal lending regulations that provide for traditional real estate financing for factory-built homes, as well as the growth of commercial lenders' facilities for this kind of housing, continue to encourage the growth of this industry."

"In addition," Preusch said, "progressive legislation from the 1980's allows manufactured housing to be located in virtually all single-family-zoned areas, enlarging the market greatly."

Preusch noted that Guerdon's plants are advantageously situated in the path of population growth and migration in the Pacific Northwest, and in oilfield and farm-belt areas where growth is resuming. He indicated that additional capital is being invested for the expansion of operations in these fast-growing markets.

Guerdon produces annually some 2,500 single-family homes, about

three-fourths of which are placed on occupant-owned land. One-third of sales are to first-time homebuyers and another third are retirement-oriented. Guerdon employs a total of approximately 300 persons.

WEEKI WACHEE, FL (JUNE 27) PR NEWSWIRE - Barnett Bank of Citrus County and Barnett Bank of Hernando County have completed their merger to form Barnett Bank of the Suncoast, N.A.

The combined affiliate has 14 offices in the two counties and $435 million in assets. The main office is located in Weeki Wachee.

The merger, announced in mid-January, reflects a trend to create multi-county institutions in areas that have similar markets.

H.M. Shirley, former chief executive officer of Barnett Bank of Hernando County, is CEO for the combined bank. Shirley has been with Barnett since 1984.

Customers will see no change in their banking services and will not need to take any action as a result of the merger. They will continue to be served by the same banking staffs in the expanded office network.

The bank is an affiliate of Barnett Banks, Inc. (NYSE: BBI), a two-state multibank holding company with assets of more than $30 billion. Its stock (BBI) is listed on the New York Stock Exchange.

SANTA CRUZ, CA (JUNE 27) PR NEWSWIRE - Silicon Systems, a leader in the design and manufacture of mixed-signal integrated circuits, announced today that it is expanding its wafer fabrication facilities in Santa Cruz and in Tustin, Calif.

The company's 178,000 square-foot Santa Cruz facility is allocating 36,000 square feet of manufacturing area to accomodate the production of six-inch wafers. These modifications will result in 28,000 square feet of "Class 1" clean room. The plant will initially produce six-inch wafers using 1.5 micron CMOS processes. Currently the Santa Cruz fabrication facility has

a Class 100, four-inch line, using 3-micron bipolar and CMOS processes. Most of the output will serve telecommunications and automotive market segments. The upgrade is scheduled for completion by March 1991.

Carm Santoro, Silicon Systems' president and chief executive officer, commented, "Funding from our parent company TDK has made it possible for us to participate closer to the state-of-the-art geometries for non-memory products. The Santa Cruz upgrade will allow us to move from our current level to sub-micron capability and will play a key role in our plans for accelerated growth in the 90s."

Concurrently, Silicon Systems will also be modifying its Tustin fabrication facility expanding the existing 15,000 square feet to a 22,000 square foot capacity. The Tustin site will continue to produce four-inch, bipolar and CMOS wafers, but will be retrofitted with new equipment to run a new high-speed bipolar process.

The company will continue to use OKI Electric Industry Co. as a second source under a supplemental foundry agreement which was recently broadened to include 1.2 and 1.5 micron technologies.

Both the Tustin and Santa Cruz facilities will employ stepper technology, to substantially improve registration accuracy during the photo alignment process. Don Crim, Silicon Systems' vice president of wafer fab operations, noted, "Our manufacturing capability, enhanced by both the Santa Cruz and Tustin expansion, will soon be well on its way to achieving the quality goals we have set for fiscal year 1991. Establishing a position of quality leadership is the highest priority for Silicon Systems today."

Silicon Systems, a wholly owned subsidiary of TDK Corp., designs, manufactures and markets worldwide application-specific, mixed-signal IC's (MSICstm) used primarily in disk drive, communications and automotive products.

MIAMI (JUNE 27) PR NEWSWIRE - The joint venture owners of two of Palm Beach County's largest business parks have paid off $50 million in mortgages on the properties.

According to Marc Kovens, president of Kovens Enterprises, the mortgage payments for Vista Center in West Palm Beach and Boca Commerce Center were made possible through changes in their joint venture partnerships.

Under the new partnerships, Kovens Enterprises serves as managing partner at both business parks. BocaCo has stepped in as an additional partner at 327-acre Boca Commerce Center, while PalmCo shares ownership of 500-acre Vista Center. Both BocaCo and PalmCo are U.S. subsidiaries of a European investment group.

Michael M. Adler, developer of the highly successful Miami International Commerce Center and 1221 Brickell Avenue office building, will continue to be associated with Kovens Enterprises in both joint venture partnerships, Kovens said.

"We are holding discussions with a number of developers and potential users regarding land for new corporate office and warehouse facilities in both locations," said Kovens Enterprises Chairman Cal Kovens, whose firm invested in both properties since their inception.

"We have always believed in the tremendous growth potential of Palm Beach County market and have underscored that commitment with this new $50 million payment. Both of our properties are located in prime business development areas and are very well positioned to capitalize on the future growth of the dynamic Palm Beach County area."

Vista Center is located at Okeechobee Road, just west of the Florida Turnpike. The first phase of a 160,000-square-foot, mixed-use project is currently under construction at the park with completion scheduled for August 1990. Vista Center also is home to Emerald Dunes, an 18-hole championship golf course designed by Tom Fazio, and an $8 million showcase Don Carter's All-Star Bowling Lanes.

Boca Commerce Center is directly adjacent to Interstate 95, north of Yamato Road on Congress Avenue. The park currently contains 386,000 square feet of street-level and dock-height warehouse facilities, a 25,000-square-foot professional office building and a 120-room Residence Inn by Marriott.

CHICAGO, (JUNE 27) PR NEWSWIRE - First Chicago Corp. (NYSE: FNB) said that William G. Jurgensen has accepted the position of chief financial officer, effective July 16.

Jurgensen, 39, has spent his career at Norwest Corp. headquartered in Minneapolis, and has held positions in various Norwest subsidiaries. He is

presently an executive vice president of Norwest Bank Minnesota, N.A., where he is responsible for several relationship management divisions, operations and cash management. He is a graduate of Creighton University in Omaha, Neb., receiving an undergraduate degree in 1973 and an M.B.A. in 1976.

"We are please to have someone of Jurgensen's caliber and fine reputation joining First Chicago in this critical position," Chairman Barry F. Sullivan said. "His experience at Norwest, ranging from treasurer of the banking group to president of Norwest Investment Services to his most recent relationship management and operational responsibilities, prepares him for the challenges that lie ahead."

As chief financial officer, Jurgensen's responsibilities will include asset and liability management for First Chicago as well as accounting, tax, financial administration, treasury, and insurance.

He is currently a member of Public Securities Association, Robert Morris Associates and a member of the board of Bank Capital Markets Association.

CLEVELAND (JUNE 27) PR NEWSWIRE - The board of trustees of the Gateway Economic Development Corporation unanimously approved the appointment of Calfee, Halter & Griswold and Robert M. Carter as bond counsel for the Gateway stadium and arena project.

The Gateway Board proposes to issue up to $200 million of tax-exempt bonds to finance the stadium and arena facilities to house the Cleveland Indians and Cleveland Cavaliers. The proposed financing must be completed by Dec. 31, 1990 to comply with federal tax laws.

Calfee, Halter and Carter were selected through an intensive selection process involving written proposals and interviewing. According to Gateway Director Thomas V. Chema, both firms were selected for their extensive qualifications in tax-exempt financing.

Calfee, Halter & Griswold is one of the foremost bond counsel firms in the state and regularly represents the State of Ohio, the City of Cleveland, and other Ohio municipalities, school boards and counties as bond counsel.

Additionally, Calfee, Halter & Griswold represents the Gateway Corporation in lease negotiations with the Indians and Cavaliers. The corporate law firm, founded in 1903, has 140 attorneys in offices in Cleveland and Columbus.

BAGSVAERD, DENMARK (JUNE 27) PR NEWSWIRE - Novo Nordisk A/S (NYSE: NVO), today announced that it has merged its Australian pharmaceutical operations. The merger, effective July 1, 1990, means that the two present operating subsidiaries, CSL-Novo Pty. Ltd. and Nordisk Australia, will become Novo Nordisk Pharmaceuticals Pty. Ltd. (Australia).

At the same time, agreements have been signed with Commonwealth Serum Laboratory (CSL) to the effect that all manufacturing of insulin vials for Novo Nordisk will be carried out by CSL, and with Wellcome who will handle the distribution of the entire product range and provide back-up detailing support to general practitioners and pharmacists.

Torben Thaning Larsen former managing director of CSL-Novo, has been appointed managing director of the new company. Ken Capuano, former general manager of Nordisk Australia, is executive director.

Commenting on the merger and the new agreements, Lars Almblom Joergensen, vice president, international operations, Novo Nordisk Health Care Group, says, "Teaming up with CSL with its reputation as a high quality manufacturer and with the strength of Wellcome whose distribution and marketing efforts are known worldwide, we will be able to bring to Australian diabetic patients the newest break-throughs in patient care. And, with our increased resources, we will also be in a good position to introduce other pharmaceutical products in Australia."

Novo Nordisk A/S is a major force in insulin manufacture and diabetes treatment and is the world's largest producer of industrial enzymes. The company also manufactures and markets a variety of other pharmaceutical and bioindustrial products. Headquartered in Denmark, Novo Nordisk employs more than 8,000 people in 30 countries and markets its products in 120 countries. Its B shares are listed on the stock exchanges in Copenhagen, London, Basel, Zurich and Geneva. Its ADSs are listed on the New York Stock Exchange.

LONG BEACH, CALIF. (JUNE 27) PR NEWSWIRE - Delta Air Lines has converted three McDonnell Douglas MD-88 twin-jet options to firm orders, bringing its total MD-80 firm backlog to 30 aircraft.

The Atlanta-based carrier is the largest operator of the MD-88 short-to-medium-range aircraft -- having taken delivery of 62 to date. The MD-88 is powered by the low-noise Pratt & Whitney JT8D engine and features as a standard option the EFIS (electronic flight instrumentation system) cockpit.

In November 1989, Delta launched the next generation of McDonnell Douglas twin-jets -- the MD-90, when it announced its intention to place orders 50 firm and 110 option MD-90-30 series.

The three MD-90 versions being offered to airlines are powered by two IAE V2500 engines, built by an international consortium of engine manufacturers. The V2500, already certified for commercial use, will be the quietest engine in its class.

Recently, Delta's chairman and chief executive officer, Ronald W. Allen, announced plans to lease two MD-11 long-range aircraft with early delivery positions in the program, and the purchase of two additional MD-11s. Allen noted that the MD-11s will be key in Delta's bid for service rights from Los Angeles to Tokyo. Delta now has orders and options for 42 MD-11s, in addition to the leased aircraft.

McDonnell Douglas (NYSE: MD) had received a total of 1,587 commitments for the MD-80, more than 300 for the MD-90, and 371 for the MD-11, as of June 1, 1990.

ATLANTA (JUNE 27) PR NEWSWIRE - Lufthansa German Airlines today announced special "Carolinas Appreciation Fares" in recognition of local support for the new non-stop flights from Charlotte, N.C., to Frankfurt, West Germany, which begin on Aug. 1.

Passengers can book a round-trip ticket in tourist class for $399 from Charlotte to Frankfurt from Aug. 1-Sept. 26. Travel must be completed by Oct. 3. Minimum stay on this non-refundable fare is 7 days, maximum 14 days. Seating is limited and some restrictions apply.

In addition, Lufthansa is offering 2-for-1 bonuses in first and business class. Anyone purchasing these tickets for travel from Charlotte to Germany between Aug. 1 and Aug. 29 will receive a complimentary companion

ticket in the same class. Return travel is permitted any time within the one-year validity of the tickets.

"We are opening up a considerable number of seats on every flight for this special fare to introduce our new service and just to say 'thank you' to the many people who supported our efforts to fly to Charlotte," remarked Uwe Hinrichs, vice president, USA South.

Passengers are requested to contact Lufthansa reservations at 800-645-3880 or their travel agent for details and to book their flights.

#90178p0401 06/27/1990 ~PR Newswire

ROCHESTER, NY (JUNE 27) PR NEWSWIRE - Rochester Community Savings Bank (NASDAQ: RCSB) today reported of $4 million or 29 cents per share for the second quarter ended May 31, 1990, an increase of 25.0 percent from net income of $3.2 million or 23 cents per share in the year-ago quarter. Net income increased 12.5 percent for the first six months of fiscal 1990, to $9.0 million or 65 cents per share, compared to $8.0 million or 58 cents per share for the same period in fiscal 1989.

Increases in net interest income and other income contributed to 1990 second quarter results,. Leonard S. Simon, RCSB chairman and CEO, commented, "We are pleased with second quarter results and anticipate that earnings for the second half of 1990 will be stronger than this year's first half, as has previously been the case. This quarter we took a key step toward sustaining significant long-term earnings growth by acquiring Shadow Lawn Savings Bank, a 19-branch mutual thrift institution based in Monmouth County, one of the most prosperous areas of central New Jersey."

RCSB's second quarter earnings include the results of Shadow Lawn Savings Bank (SLSB), a wholly owned subsidiary, from April 2, 1990, the date of the acquisition, to the end of the second quarter. There was no outright purchase price paid for SLSB; RCSB's $47 million capital contribution to SLSB remains on RCSB's consolidated balance sheet. Simon commented, "As we previously stated, this acquisition will be non- dilutive to RCSB's 1990 earnings. Looking ahead, we anticipate that operating efficiencies from the integration of Shadow Lawn into RCSB and the expansion of Shadow Lawn's retail banking activities will make a substantial contribution to RCSB's bottom line."

Net interest income for the second quarter of 1990 increased by 17.9 percent to $22.7 million largely due to movement of RCSB's one-year adjustable-rate mortgage portfolio to higher rates and SLSB's net intarest income.

Net interest margin for the second quarter of fiscal 1990 increased to 2.21 percent from 1.95 percent for the 1989 second quarter. Simon noted, "Because net interest income represents the largest component of our earnings, we are especially pleased with this upward trend which reflects the combined impact of RCSB's widening margins and Shadow Lawn's favorable margins."

Other income for the 1990 second quarter increased by 13.3 percent to $14.7 million due to continued growth in bank fees and service charges. Stable mortgage banking income, and the issuance of $125 million in auto loan-backed securities. The largest component of other income, mortgage banking income, was $8.8 million for the recent quarter. Servicing fee income from auto loans securitized in prior years and SLSB retail banking fees were the major contributors to the increase in bank fees and service charges to $3.4 million, which was 52.2 percent higher than the 1989 second quarter. On a year-to-date basis, other income increased by 23.0 percent to $27.6 million.

Simon noted, "Our diversification strategy continues to produce strong earnings results. In mortgage banking, we matched the excellent performance of last year's second quarter, despite this year's softer housing market. On the whole, solid results in mortgage banking, automobile lending and our core retail banking operation offset reduced levels of activity in commercial real estate lending."

Operating expenses for the second quarter of 1990 were $26.4 million, compared to expenses of $24.7 million for the 1989 second quarter, due to the inclusion of SLSB's operating expenses. Operating expenses for the first half of the year were $47.9 million, a 4.8 percent increase from expenses of $45.7 million for the same period. Simon explained, "Taking out the effect of Shadow Lawn's operating expenses, RCSB's operating expenses for the second quarter were down by 7 percent, demonstrating the longer-term impact of our aggressive expense control program implemented last year. Clearly one of our strengths as a company is our ability to control operating expenses on a sustained basis."

Total assets at May 31, 1990 were $4.71 billion compared to $3.98 billion at the end of fiscal 1989, with nonperforming assets at 2.40 percent of total assets. The increase in nonperforming assets from 1.70 percent of total assets at the end of the 1990 first quarter was primarily attributable to the inclusion of SLSB's nonperforming assets, which Simon noted had been anticipated and adequately reserved for prior to the acquisition. RCSB's reserves for loan losses were $16.3 million at May 31 1990, up by 74.9 percent from reserves of $9.3 million at 1989 fiscal year-end.

At the beginning of the third quarter, RCSB initiated steps to acquire

title to real estate properties owned by a large developer which secure both loans from RCSB and performing loans held by other institutions. RCSB's loans to this developer were included in nonperforming assets during the second quarter. The bank expects to fully recover its principal in connection with all of these loans. RCSB's action, however, could increase its level of real estate owned by approximately $30 million in the third quarter, reflecting the addition of the loans to the developer from other institutions.

In explaining RCSB's approach to managing non-performing assets, Simon stated that RCSB is proactive in handling real estate work-outs. "While this strategy may increase nonperforming assets initially, our experience has been that by electing to take control of sound and marketable properties, we ultimately realize the highest end return to the bank and its shareholders," he said.

The Bank's one-year rate sensitive gap, the amount of deposits and borrowings exceeding assets that reprice within one year, remained low at 0.3 percent of total assets at May 31, 1990, compared to 0.9 percent at Nov. 30, 1989.

Deposits at May 31, 1990, increased to $3.11 billion from deposits of $2.63 billion at the end of fiscal 1989, as a result of the acquisition of SLSB. Shareholders' equity increased to $328.9 million or $23.81 per share from $325.6 million or $23.57 per share at Nov. 30, 1989. The ratio of equity to assets was 6.99 percent at the end of the second quarter, reflecting the addition of $650 million in SLSB assets to RCSB's balance sheet. RCSB exceeds all regulatory capital requirements and ranks among the best-capitalized thrifts in the United States. Total residential mortgage originations were $365.5 million for the quarter and $678.5 million year-to-date.

Rochester Community Savings Bank is a publicly owned, state- chartered savings bank headquartered in Rochester, N.Y. The company operates 23 retail banking offices in the greater Rochester area, and owns subsidiaries engaged in retail banking, mortgage banking, automobile financing, commercial real estate banking, insurance, and securities brokerage.

NORTH FORT MYERS, FL (JUNE 27) PR NEWSWIRE - After a careful evaluation of the branch location, Fortune Savings Bank said it will close its Foxmoor branch as of noon Friday, Aug. 3.

The bank said it will automatically transfer accounts from the Foxmoor facility to its Cape Coral branch at 1821 Del Prado Blvd. If they prefer, customers may use either of the bank's Fort Myers branches, one in Royal Palm Plaza and the other at Cypress Trace Shopping Center.

Customers will not have to take any action, said Roger Pearman, Fortune's vice president and regional manager for Lee, Sarasota and Charlotte counties. "All account records and data will be transferred to Cape Coral, and customers will be able to transact business at that branch or at any Fortune's 45 other locations," he said.

Fortune is considering adding branches in other Lee County locations. Pearman said Fortune expects to transfer affected personnel to other branches.

DETROIT (JUNE 27) PR NEWSWIRE - The following was released today by Commuter Transportation Company.

In early February of this year, Commuter Transportation Company attempted to negotiate a new labor agreement with Teamsters Local 299. Regrettably, we failed to do so. The pre-strike demands of the Teamsters were economically unsound and unfair.

On June 10, the Teamsters elected to conduct an economic strike. Commuter Transportation Company opted to continue to provide transportation services to the community as well as be a job provider in this community.

As of this date, we are pleased to announce that we have succeeded in both endeavors with the help of salaried employees, some permanent replacements but most of all, Teamster members who failed to see the benefit of an economic strike.

At present we are operating at full capacity and have approximately 70 percent union employees working with 30 percent permanent replacements supplementing the work force.

As it is now, Teamster officials are conducting an economic strike against their own members.

ARLINGTON, VA (JUNE 27) PR NEWSWIRE - The American Boiler Manufacturers Association (ABMA) elected officers at its 102nd annual meeting recently concluded in Hershey, Pa.

Frank E. Lammers was re-elected president of the association; H. Kerner Smith was re-elected vice president. George J. Tate continues as secretary/treasurer of the organization.

Lammers is president of Peabody Engineering Corporation, Stamford, Conn.;

Smith is president and chief executive officer of Riley Stoker Corporation Worcester, Mass.; and Tate is director, Burner and Boiler Controls, Honeywell, Inc., Golden Valley, Minn.

Reelected for a three-year term on the ABMA board of directors were: E.O. (Neal) Hooker (Babcock & Wilcox Company, Copley, Ohio); Dennie S. Hunt (Henry Vogt Machine Company, Louisville, Ky.); Paul W. Goggins Sr. (Industrial Boiler Company, Thomasville, Ga.); and Tom Sellers (Sellers Engineering Company, Danville, Ky.).

Maurice Kennedy (Cleaver Brooks Division/Aqua Chem, Inc., Milwaukee) was elected to an unexpired two-year term on the board.

Continuing as directors are: Robert M. Eisert (Zurn Industries, Inc.); Lyle Hafeman (York-Shipley Division/DONLEE Technologies, Inc.); Frank P. Fagan (ABB Combustion Engineering Systems); H. Kerner Smith (Riley Stoker Corporation); Frank E. Lammers (Peabody Engineering Corporation); Willard B. McBurney (The McBurney Corporation); and Bryan Stephan (Foster Wheeler Energy Corporation).

Tate, director of Burner and Boiler Controls at Honeywell, Inc., Golden Valley, Minn., remains as chairman of the ABMA associates group and continues on the board of directors.

Gerald D. Debban, senior market manager for Bailey Controls Company, Wickliffe, Ohio, was re-elected as vice chairman of the ABMA associates group and also continues to serve on the ABMA board of directors.

The American Boiler Manufacturers Association, founded in 1888, is a voluntary, non-profit corporation with headquarters in Arlington. The only national association representing the commercial, industrial and utility boiler manufacturers, the ABMA serves to provide a common working forum for the industry to improve technology, to establish code and standards guidelines, to develop safety programs, to assure product and service quality, and to conduct research. The association represents more than 80 companies employing 40,000 at plants and offices in 41 states.

COSTA MESA, CA (JUNE 27) PR NEWSWIRE - Parker Automotive Corporation (OTC) today announced the signing of a five-year distribution agreement for CarbonClean products in the Republic of China (Taiwan) with Essen Corporation of Taipei. The agreement calls for annual minimum purchases of the CarbonClean products by the distributor of approximately $1,000,000.

B. Shih, managing director of Essen Corporation traveled to Parker Automotive's Costa Mesa headquarters to execute the agreement. Concerning his decision to distribute Parker's emission-reducing products Shih stated "The entire world is aware of the current state of the environment in Taiwan, and our government is determined to right it. They have committed $44 billion to this effort, and we are confident that a small portion of that will be spent on CarbonClean," continued Shih.

This agreement closely follows the execution of similar agreements in Greece, Denmark, Sweden, Liechtenstein, and Switzerland. Michael E. Parker chairman and chief executive officer of Parker Automotive noted, "We believe that the Essen Agreement is one of many that will be environmentally driven. We're seeing an unmistakable trend towards government driving business to get involved in environmental issues. We're delighted," added Parker.

CarbonClean is a patented system that cleans harmful pollutants from the fuel systems of internal combustion engines. In addition to greatly reducing emissions, the cleaning process improves fuel economy (gasoline or diesel) and restores engine performance.

To date, CarbonClean products are distributed in more than 50 countries, and domestically, they are approved and in some cases marketed by numerous auto makers, petroleum and tool companies.

In addition to its Southern California headquarters, Parker Automotive Corporation maintains sales offices throughout the world and a manufacturing facility in Fountain Valley, Calif.

FAIRMONT, MINN. (JUNE 27) PR NEWSWIRE - Richard S. Bradley, president and chief executive officer of WEIGH-TRONIX (NASDAQ: WGHT) has announced his plans to retire from full-time executive duties from the company sometime early this fall. He will continue to serve on the board of directors. Bradley has been retained by the company as a consultant for three years following his retirement. In this capacity, he will aid in the engineering development of new products and provide management consultation on request.

Bradley has been credited with the development of many products in the field of electronic weighing. He created many patents involving strain gage transducers and is particularly noted for his invention of the Weigh Bar, the load cell used in many of WEIGH-TRONIX's scale products. He

also is directly responsible for the first fully electronic floor scale ever to be approved by the National Bureau of Standards.

Bradley started the company as a division of Art's-Way Mfg. in Armstrong, Iowa, in May of 1970. Under his leadership the company has been profitable every month of its 20-year existence. The company was spun off in 1980 to its Art's-Way shareholders and is today publicly traded with Staveley plc of Croydon, Great Britain, as a majority stockholder.

WEIGH-TRONIX Inc. is a manufacturer of electronic scales. It produces industrial, agricultural, retail and postal scales; force measurement equipment; printers; and stationary feed mixers. Corporate offices are located in Fairmont, Minn., with manufacturing facilities in Minnesota, California and Ontario, Canada.

STAMFORD, CT (JUNE 27) PR NEWSWIRE - Schenley Industries, Inc. of Dallas, has announced the sale of its "Cocktails for Two" prepared drinks trademarks to Heublein Inc. of Farmington, Conn.

Schenley Industries Inc. is an affiliate of United Distillers, the spirits company of Guinness PLC of London. Heublein is a unit of International Distillers and Vintners, the wine and spirits division of Grand Metropolitan PLC of London.

James Espey, deputy managing director of United Distillers U.K., as well as chairman of Schenley Industries Inc., stated that the transaction will better enable Schenley management to focus on its major branded spirits lines which include such premium names as Dewar's White Label, the top selling Scotch brand in the United States, Pinch 15-year, George Dickel, and Gordon's Gin and Vodka.

Heublein produces and imports an extensive line of fine wines and spirits, including Smirnoff Vodka, the world's largest selling vodka brand, Black Velvet Canadian Whiskey, Jose Cuervo Tequila, Inglenook and Almaden wines.

CONTACT: James Espey, deputy managing director of United Distillers, in London, 011-4481-846-8040; William L. Ellis Jr., vice president, general counsel and secretary of United Distillers, (203) 359-7130; or Lory E. Roston of Lory Roston Associates, (212) 877-8590, for Schenley Industries.

SOUTHPORT, CONN. (JUNE 27) PR NEWSWIRE - Hunter Environmental Services, Inc. (NASDAQ: HESI) announced today that its majority owned subsidiary, Hunter Industrial Facilities, Inc. (HIFI), has obtained the required draft permits from the Texas Water Commission (TWC) allowing the development of a unique industrial park capable of processing and disposing of hazardous waste in underground salt dome caverns in Texas. The TWC has issued a notice for public hearings, which will be held in August. HESI and HIFI expect final permits to be issued later this year.

Hunter stated that its proposed salt dome located at the North Dayton facility is far larger than people imagine. It is literally a mountain of solidified salt which extends more than 45,000 feet into the earth. (Mount Everest is only 29,000 feet tall.) Some domes date back hundreds of millions of years. Hunter's salt dome is more than 60 million years old and will safely contain the waste for as long as it remains hazardous, permanently in fact. It is, Hunter stated, one of the safest places (on earth) to place dangerous materials. This opinion is backed by the fact that the National Academy of Sciences recommended the use of salt domes in the 1950s. In addition, the government has detonated two atomic bombs in a Mississippi salt dome and the dome completely contained the blast and the cavern was only enlarged by 55 feet. Salt domes are recognized as among the most stable geological structures on earth. The EPA has suggested that they could certify that this type of facility would not leak for over 10,000 years.

Caverns in the salt domes will be treated through a proven solution-mining process. Currently, more than 1.1 billion barrels of hazardous raw materials are stored in salt caverns and have been for more than 40 years. More than 1,000 such solution-mined caverns have been used to store hydrocarbon liquids and gases, and more recently over 500 million barrels of crude oil have been stored in such caverns by the Department of Energy's Strategic Petroleum Reserve. All groups of hazardous wastes are chemically compatible with and can be exposed to salt with no chemical reaction at temperatures below 500 degrees centigrade. Salt is an ideal host medium because it is a solid with very low permeability. It is similar to glass in its chemical reactiveness. Thus, it prevents the migration of fluids into or out of the caverns. Salt also tends to "creep" slowly because of surrounding rock pressure so that voids between cavern walls and deposited wastes will close. Salt is also strong enough to withstand stresses experienced around subsurface excavations and to remain fractureless. It has greater compressive strength than many construction concretes.

The proposed surface facility will be a "state of the art" waste treatment and processing installation. All of the processing and treatment of the waste will take place indoors with advanced air treatment systems to reduce air emissions. The waste is to be processed into concrete-like pellets through the addition of portland cement and other additives and

will then be pneumatically conveyed into the cavern. From the time the waste is accepted by HIFI, it will not be exposed to the environment.

The adjacent industrial park is also unique in its concept and is envisioned as a prototype park for the 1990s. It is becoming more difficult every year to site new industrial facilities largely due to the local, state and federal permitting requirements for all industrial complexes. HIFI will welcome industry and, with its extremely safe waste disposal system, is very attractive to companies looking for new sites. In addition, the park will be served by the largest concentration of pipelines in the nation. This allows HIFI to make available salt dome cavern storage for seasonal energy needs and a wide range of petrochemical products.

HESI indicated that more than $6 million has been spent in the permitting processing and it expects to spend an additional $3 to $4 million. Once the final permits are issued, the construction and development of the $60 to $70 million project will take approximately two years. Hunter intends to use its own resources and outside project financing to complete this unique industrial complex.

WARRENTON, ORE. (JUNE 27) PR NEWSWIRE - A.B. Holding Group, Inc. (NASDAQ: AGBG) announced today that it has signed an agreement whereby Price Waterhouse has been engaged as the company's outside auditor for the year ending Dec. 31, 1990. Price Waterhouse is replacing Morrison & Liebswager, Certified Public Accountants.

Sohail Masood, president of A.B. Holding Group, Inc., said "We have been very pleased with the services provided by Morrison & Liebswager but feel that as a public company with international growth, the company needs a larger firm who is known both within the financial community as well as by our suppliers and customers."

Masood noted that Price Waterhouse would begin their services by reviewing and issuing a formal review opinion on the company's financial statements for the quarter and six months ended June 30, 1990.

A.B. Holding Group, Inc. manufactures and sells patented bagging machinery and large (up to 250-feet long) disposable plastic storage bags to the agricultural industry for the storage of feed.

WESTLAKE VILLAGE, CA (JUNE 27) PR NEWSWIRE - Management of Corporate Capital Resources Inc. ("CorpCap") (NASDAQ: CCRS), a venture capital company, announced today the change of name of its publicly traded subsidiary, Central Corporate Reports Service Inc. (OTC) to Combined Assets Inc. ("CA"). The operation of the 20-year- old publicly traded investor/broker relations business will be transferred from Boca Raton, Fla., to Westlake Village, and will henceforth be conducted as a division of CA. CorpCap has announced new management teams from both Central Corporate Reports Service and its parent, Combined Assets.

The immediate purpose of CA is to combine the assets of two or more

companies in order to meet the new listing requirements of NASDAQ, and simultaneously, allow a conversion of the CA preferred shares owned by the shareholders of the participating companies into CA common stock, thereby allowing them the liquidity and exposure not presently available to them as shareholders of the individual participating "smaller" companies.

CA intends to acquire each participating company by issuing a separate series of CA preferred shares and thereafter to pay for each of the participating companies by converting these preferred shares into CA common shares using a conversion formula based on a multiple of the average of its after-tax earnings over a five-year period. Each participating company will operate as a separate profit center submitting both quarterly and annual statements for the filing of consolidated financial reports by CA.

CorpCap is a regulated Business Development Company (BDC) that divests in, or provides collateral for companies prior to, or after, their public offering, or obtains funding for these companies, either internally or through public or private offerings of CorpCap's or their securities. CorpCap provides significant managerial assistance and guidance aimed at developing the companies into successful independent enterprises, owned in whole or in part by both CorpCap and its shareholders.

BIRMINGHAM, MICH. (JUNE 27) PR NEWSWIRE - "Mommy, Daddy, I can't sleep," seems to be a familiar cry that many parents experience. Why won't Brian or Carrie just go to sleep? Certainly all children have restless nights, but some children experience chronic anxiety and tension that results in terrifying nightmares.

"Never fear," says Clinical Psychologist Dr. George H. Kates, Ph.D., director of Adult/Youth Developmental Services Inc., in Farmington, Mich. "There's hope somewhere over the rainbow. A soothing, calming, comforting, experience ... particularly at bedtime to help children more easily fall asleep."

A new night light, called the Sweet Dreams Rainbow Light, is being used successfully at the world-renown C.S. Mott Children's Hospital, Ann Arbor, Mich., to help children fall asleep. Researchers believe the full spectrum of pure color stimulates an emotional response in the limbic system, the emotional center of the brain, which causes a calmed and relaxed emotional state for children and adults alike.

The Sweet Dreams Rainbow Light is a compact 4-inch cube, sells for $39.95,

plus shipping and handling, and can be purchased directly from the Rainbow Light Company. For more information on the Rainbow Light, please call the Rainbow Light Company, 1-800-262-2002, or write, P.O. Box 138, Birmingham, MI 48012.

NEW YORK (JUNE 27) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) today announced the appointment of Robert Neimeth as president of Pfizer International subsidiaries.

Neimeth, executive vice president of Pfizer International, was named president of Pfizer International subsidiaries after Barry MacTaggart, Pfizer International chairman and president, announced plans to retire early in 1991 after 32 years with the company.

Neimeth will continue to report to MacTaggart, who remains chairman and CEO of Pfizer International subsidiaries. At the time of MacTaggart's retirement, Neimeth will assume overall responsibility for Pfizer International and will report to William C. Steere, Jr., senior vice president, Pfizer Inc., and president of Pfizer Pharmaceuticals Group.

A graduate of Cornell University, Neimeth joined Pfizer International in 1962. After various assignments in New York, Europe and Nigeria, he was appointed country manager of Nigeria in 1965. In 1968, he became pharmaceutical development director for Pfizer Asia, was named vice president in 1970 and became president of Pfizer Asia in 1972.

In 1977, Neimeth left Pfizer International to become vice president of Pfizer Pharmaceuticals and director of operations of Pfizer Laboratories. Three years later, he rejoined international when he was appointed president of Pfizer Europe. In 1984, he was named executive vice president of Pfizer International.

Neimeth is a member of the Organization of Economic Cooperation and Development (OECD) Business and Industry Advisory Committee where he serves as chairman of the Trade Committee, and he serves on the Economic Policy Committee of the United Nations Association of the U.S.A. Neimeth is also a national trustee of Boys' Clubs of America.

MacTaggart joined Pfizer in 1959 as an auditor. Over the years, he assumed positions of increasing responsibility, serving in Asia and Australia. He came to New York headquarters in 1972 as executive vice president of Pfizer International, was named president in 1980 and became

chairman of Pfizer International in 1981.

MIAMI (JUNE 27) PR NEWSWIRE - Thomas J. Hutchison today was named president, chief operating officer and a member of the board of directors of General Development Corporation (NYSE: GDV) by the company's board of directors.

Hutchison, 48, who has been special assistant to General Development Chairman and Chief Executive Officer Charles Simons for the past eight weeks, takes over day-to-day operations of the company effective July 1.

"Tom Hutchison brings to General Development 25 years of experience running successful major real estate development operations throughout the country," Simons said. "He is of the highest personal integrity. The board of directors feels that he is the ideal person to lead General Development through this difficult period in its history and to help the company emerge as a financially sound and honorably operated company in the future.

"One of the strongest endorsements of Tom Hutchison is the board's conviction that he can resolve problems effectively and at the same time develop a vision for the company's future operation and build a management team capable of carrying out that vision," Simons said.

Hutchison is a native of South Bend, Ind. and studied at Purdue and the University of Maryland. For the past five years he has headed Hutchison Development Group in Easton, Md. which has real estate development operations in Maryland and Delaware.

For more than seven years, Hutchison was chief executive officer of Murdock Development Group, based in Los Angeles, where he oversaw more than $1 billion in real estate projects, and various other real estate related affiliates.

Hutchison is a member of the board of directors of Burris Foods, Inc., the Bank of Maryland and the Maryland State Bank; on the board of sponsors of Loyala College; the advisory council of the Peabody Institute of the Johns Hopkins University and has been a member of the Young Presidents Organization since 1979.

In addition, he has served on the board of directors of the John F. Kennedy Institute for Handicapped Children, the National Aquarium, the

University of Maryland Medical System and on the Governor's Salary Commission of the State of Maryland.

OAK BROOK, IL (JUNE 27) PR NEWSWIRE - Amtrak, GTE Railfone and AT&T today announced Amtrak passengers on the Metroliner and San Diegan Service trains can use their AT&T Calling Cards to operate the Railfone(R) On-board Telephone Service offered by GTE. The AT&T Calling Card is the first long-distance calling card to be used on the Railfone(R) service.

The Railfone service is available on Amtrak's Metroliner Service trains between Washington and New York City, and the San Diegan Service trains between Los Angeles and San Diego. The Railfone service is provided through a joint venture between Amtrak and GTE Railfone.

"The Railfone service has been extremely popular with Amtrak passengers," said Elyse Wander, vice president of corporate planning and development for Amtrak. "The service averages 4,500 calls a week on the Metroliner and San Diegan services. The acceptance of the AT&T Calling Card will be an added convenience for our passengers."

"We're making our Amtrak customers' travel even better by letting them use their AT&T Calling Cards for the GTE Railfone service," said Robert Calafell, president of GTE Railfone. "As Americans become more and more mobile, we need to keep in touch with work and family -- even from trains."

"Customers who travel now can use their AT&T Calling Cards to make important connections while traveling by rail as well as from public phones nationwide," said Merrill Tutton, vice president, AT&T Consumer Services. "This adds to the value and versatility of the AT&T Calling Card."

Calling to 271 Countries and Areas From an Amtrak Train Travelers on Amtrak trains equipped with the GTE Railfone service will be able to use the AT&T Calling Card to make long-distance calls to locations throughout the United States and to 271 countries and areas worldwide. Railfone on-board telephones are located in booths in the first-class Club Service car, the dinette car and one coach of each Metroliner Service train. On San Diegan trains, telephones are located in custom-class coaches and food service cars.

Amtrak's Metroliner Service trains carried more than 2 million passengers during fiscal year 1989. The San Diegan route is Amtrak's second busiest corridor with 1.7 million riders annually.

Users of the Railfone service are charged $1.50 per minute, plus a $1.50 set-up fee per call, to place a call anywhere in the United States (including Alaska, Hawaii, Puerto Rico and the Virgin Islands) or Canada. International calls are $4 per minute, plus a $1.50 set-up fee per call. Fractions of minutes are billed at the full-minute rate on all calls and certain taxes may apply.

GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

DETROIT (JUNE 27) PR NEWSWIRE - AutoWeek magazine, in its July 2, 1990 issue, reports that its first reader survey finds widespread perceptions of a quality gap between American and imported cars.

The AutoWeek readers recognized seven cars as sources of pride for America's domestic automakers.

The "Magnificent Seven" are, in order of reader ranking:

1.) Chevy Corvette
2.) Ford Taurus
3.) Ford Mustang
4.) Ford Thunderbird
5.) Chrysler Minivans (Dodge Caravan, Plymouth Voyager)
6.) Lincoln Town Car
7.) Diamond Star coupes (Designed by Chrysler, but with heavy Japanese content, the Eagle Talon, Plymouth Laser and Mitsubishi Eclipse are produced in a joint-venture factory in the United States.)

Readers also responded to a number of questions regarding quality, performance, dependability, price and safety.

Nearly half the respondents (48.4 percent) said it mattered to them whether a car was built in the United States. Sixty-two percent of the respondents owned a domestic car, while 67 percent owned an import. Multiple car ownership results in a total exceeding 100 percent.

An overwhelming majority (71.9 percent) of AutoWeek readers did not consider cars built by Japanese transplants to be domestic cars.

Sixty-eight percent would not buy a domestic car in its first year of production, however, 53 percent would buy an import in its first year of production.

When it comes to recommending a car to friends, AutoWeek readers surveyed were virtually even in recommending domestic and Japanese cars.

AutoWeek Editor Matt DeLorenzo sums it up this way: "Simple patriotism isn't enough to close a deal on a car when it's the second-largest purchase in a person's life. Quality remains the driving force in vehicle purchase decisions and though American makers are closing the

quality gap with imports, the perception of inferior quality lags reality. Therein lies the Buy American challenge."

AutoWeek readers are considered "influencers" due to their high demographic profile and enthusiasm for cars. The average AutoWeek reader is male, 40 years of age with a household income of $89,300. More than half of AutoWeek's readers have college degrees and are employed in professional/managerial positions. The average AutoWeek subscriber owns more than three cars.

A total of 2,650 surveys were sent to AutoWeek subscribers (approximately 1 percent of subscribers) and 1,206 responses were received for an exceptionally high return rate of 45.5 percent.

HARRISBURG, PA. (JUNE 27) PR NEWSWIRE - The Insurance Department today announced it has granted the Aetna group of insurance companies a 9.1 percent increase in the base rate it will use to calculate the mandatory 10 and 22 percent rollbacks required of all insurance companies under the state's new auto insurance law.

Aetna had requested an increase of 25.6 percent in its base rate prior to enactment of the new law.

Both the change in the base rate and the rollbacks will take effect July 1. The 22 percent rollback will affect vehicle owners who choose limited tort coverage, while the 10 percent rollback will apply to those who elect full tort coverage under the new law.

Meanwhile, the Insurance Department will continue to press its position in Commonwealth Court that the Aetna premiums in effect as of Dec. 1, 1989, are the proper base under the new law for the 10 and 22 percent rollbacks. The department and Aetna have agreed to abide by the court ruling on the issue.

State Farm entered into a similar agreement with the department earlier.

ROGERS, CT (JUNE 27) PR NEWSWIRE - The board of directors of Rogers

Corporation (AMEX: ROG), at a meeting today, approved a number of cost reduction actions to improve profit margins. These steps include further organization consolidations, selected divestitures and a significant reduction in salaried payroll through a combination of early retirement inducements and terminations. Such measures will result in a second quarter pre-tax charge of approximately $7.0 million and will cause an after-tax loss for that period, as well as for the full year.

Norman L. Greenman, president of Rogers Corporation, said, "We expect that operating income for the full year, excluding this one-time charge, should be higher than in 1989; and savings from the actions taken are projected to recover the entire amount of the one-time charge within two years. Starting in the fourth quarter, most of the benefit of the expense reductions will be reflected in our operating margins. Furthermore, the company's cash position will be positively affected."

Greenman concluded by stating, "Rogers' financial position remains strong, with debt down somewhat since the beginning of the year and inventories relative to sales at a record low level. In addition, after some second quarter softness, the current business outlook appears better for the rest of the year. We believe the actions being taken in connections with the one-time charge will strongly enhance shareholder value, while preserving the company's long-term competitive position."

Headquartered in Rogers, Conn., Rogers manufactures a broad range of engineered materials and components for the electronics and other selected industrial markets.

HOBOKEN, NJ (JUNE 27) PR NEWSWIRE - The Maxwell House Coffee Company announced plans today to phase out operations at its plant here by early 1992.

The company also announced a wide-ranging program of transitional support for the plant's 600 employees.

Raymond G. Viault, president of Maxwell House, said the company was acting "to eliminate a costly excess in processing capacity."

The excess, he said, resulted from a 24 percent decline in coffee consumption in the United States since 1963.

Viault said Maxwell House still operates the four plants it operated in

1963, even though only 55 percent of their capacity is needed or used. The other plants are in Jacksonville, Fla., Houston, Texas, and San Leandro, Calif.

No Hoboken employees would lose their jobs immediately as a result of the phase-out, Viault said. He said a phase-out schedule would be published within three months.

The company will work to match as many employees as possible with job openings elsewhere in Maxwell House, Kraft General Foods and Philip Morris and support job-searches for their spouses at the locations to which they may be transferred, he said. Maxwell House is part of Kraft General Foods a Philip Morris company.

For workers seeking other employment, the company will provide opportunities for learning new job skills as well as assistance with their job searches. Stay-on bonuses will be paid to employees who remain until their jobs come to a close. Severance payments will be provided for those who leave the company. Further, a wide variety of counseling programs and personalized services will be available for employees and their families. Viault said management would discuss details of the employee benefits with union representatives.

MACON, GA (JUNE 27) PR NEWSWIRE - Michael Z. Kay has joined Charter Medical Corp. as executive vice president - Hospital Operations.

Kay comes to Charter Medical from the position of president and chief operating officer of Portman Hotel Co., Atlanta. In 1984, Kay formulated the overall business plan conceptualizing the Portman Hotel Co., then successfully developed and opened the flagship facility in San Francisco. Kay also established opportunities for succeeding hotels in the United States and abroad for the company.

From 1979 to 1984, Kay was president and chief executive officer of Omni International Hotels, where he was responsible for developing and implementing a significant 2,000 room expansion. Kay's profit and growth achievement led to the eventual sale of the company at exceptional multiple of earnings.

Kay also served as senior vice president of Operations for Americana Hotels from 1976 to 1979. While there, Kay delivered a 1978 profit representing a $13 million turnaround and first profitable year in the history of the company. Responsible for the profit performance of 19 hotels with 1978 revenues of $180 million, Kay directed a staff of 10 field and corporate executives supervising 5,000 employees and a $6 million capital expansion and enhancement program.

From 1965 to 1973, Kay was associated not only with the hotel industry, but with hotel management and conference service entities. In those roles, Kay negotiated major contracts and acquisitions; directed the development, construction and opening of 11 hotels; served as general manager for hotel operations; and established prototypical conference service models.

Kay received a bachelor of science degree from Cornell University and is a member of the Young President's Organization.

A resident of Atlanta, Kay was just installed as president of Jewish Family Services Agency and is a director of the Alliance Theatre Co.

FAIRFAX, VA (JUNE 27) PR NEWSWIRE - Mobil Chemical Company said today that an agreement with the Texas attorney general ends the litigation over Hefty degradable bags in that state. The attorney general will drop the suit, while Mobil has signed a letter confirming its previously announced decision to delete references to degradability on Hefty waste bag packaging.

Mobil announced last March that it would delete the degradability claim because of mounting misunderstanding and controversy over degradability claims in product advertising. Nevertheless, Texas and six other states sued Mobil over the claim. Texas now is dropping its suit.

Mobil also agreed to pay $15,000 for the Texas attorney general's investigative costs. The company said it thinks that is a fair price to pay to put this counterproductive litigation behind it and move to positive solutions such as establishing standards for degradability claims.

Mobil has provided extensive scientific tests and data fully substantiating the degradability information appearing on Hefty packages.

But fighting this issue out in the courts is the wrong way to go, said Mobil. Both manufacturers and consumers need widely recognized standards for degradable products. Mobil told the attorneys general of the states last month that it would participate in such an effort.

Mobil said that the new Hefty packaging without the degradable information was beginning to appear in stores, but it would take several months more to complete the changeover.

Mobil said that Hefty has taken the lead in removing degradability information from its packaging, and the company hopes that the many other manufacturers making degradability claims will voluntarily follow until widely accepted standards are established.

WASHINGTON, NC (JUNE 27) PR NEWSWIRE - Fountain Powerboat Industries, Inc. (AMEX: FPI), today announced the filing of a revised Form 10K with the Securities and Exchange Commission, in which it acquiesced to the auditor's opinion that it should change its method of revenue recognition for the fiscal year ended Oct. 1, 1989.

The revision resulted in a deferral of $3,612,000 in sales and $831,000 of pre-tax income. The company previously reported net income of $130,371, or $.03 per share for the fiscal year ended Oct. 1, 1989. As a result of the restatement, the fiscal net loss is $701,177, or $.16 per share.

A company spokesman said that shipments are continuing at a strong pace and the quarter ending June 30, 1990, is expected to be approximately 4 percent higher than the same quarter last year with an increase in profit over the previous quarter this year.

Fountain Powerboat Industries, Inc., through its wholly owned subsidiary, Fountain Powerboats, Inc., designs, manufactures, and markets high performance deep-water sports boats and sport fishing boats noted for style, performance, and quality construction.

SCHAUMBURG, IL (JUNE 27) PR NEWSWIRE - Motorola, Inc. (NYSE: MOT), said today that it received, as expected, a stay pending appeal of a lower court's injunction in a microprocessor patent lawsuit between itself and Hitachi, Ltd. (ADR - NYSE: HIT).

Motorola and Hitachi both requested the stay and have announced an agreement in principle that will serve as a framework for reaching an end to the two companies' intellectual property and technology disputes.

"We are pleased with the settlement framework and feel that, combined with this new stay, our customers remain assured of an uninterrupted supply of Motorola's 68030 microprocessor," Motorola said.

The stay, which will remain in effect until the appeal is heard and ruled upon, was granted by the U.S. Court of Appeals for the Federal Circuit in Washington, D.C., in a lawsuit involving Motorola's 68030 microprocessor and Hitachi's H8/532 microcontroller. On June 19, the appeals court had issued an emergency stay of an order from U.S. District Court in Texas. The lower court had enjoined both parties from manufacturing and selling certain microprocessors.

Motorola is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include two-way radios, pagers, cellular telephone systems, semiconductors, defense and aerospace electronics, automotive and industrial electronic equipment, computers, data communications and information processing and handling equipment. Motorola was a winner of the first annual Malcolm Baldrige National Quality Award in 1988, in recognition of its superior company-wide management of quality processes.

CINCINNATI (JUNE 27) PR NEWSWIRE - American Financial Corporation ("AFC") announced today that it has agreed to purchase Provident Travel Service

Corporation from Ballou Investment Company of Ohio.

Provident Travel is one of Cincinnati's leading travel agencies with a large leisure travel and group tour business and an extensive corporate client base representing many of Cincinnati's leading businesses. Provident Travel's gross sales for the year ended Sept. 30, 1989 were approximately $42 million.

Provident Travel was originally organized in 1931 by The Provident Bank as a service provided by the bank's Trust Department and was indirectly owned by AFC in the early 1970s. The agency has experienced steady growth and now employs 75 full and part-time personnel in offices in downtown Cincinnati and at the Greater Cincinnati International Airport. AFC intends to retain the Provident Travel name and to further develop and expand the travel agency.

AFC is a Cincinnati-based holding company with subsidiaries engaged in property and casualty insurance, annuity programs, savings and loan activities, food products operations, television and radio station operations and entertainment production and distribution. AFC also owns a significant portion of the voting equity securities of several publicly owned companies.

BUTTE, MT (JUNE 27) PR NEWSWIRE - Montana Power Co. (MPC) (NYSE: MTP) today filed new general rate cases with the Montana Public Service Commission (PSC) for both natural gas and electricity. MPC requested annual revenue increases totaling $70.3 million, and asked the Montana commission to implement interim rate boosts of $35.7 million as part of the initial filing.

MPC requested electric revenues be increased by $60.7 million, or about 22 percent annually. A $30.1 million interim adjustment, 11.2 percent, is calculated in conformance with established commission interim calculation rules and should be implemented in late August. The proposed electric rate increase would be partially offset by an $8 million (3 percent) reduction scheduled to become effective August 29.

MPC's natural gas filing requests $9.6 million in added annual revenues, an increase of 8.9 percent. The company seeks $5.6 million, or 5.3 percent, on an interim basis.

Under Montana law, the PSC has nine months in which to reach a final decision on the total combined filing. The Montana commission typically

acts on interim rate matters within one to three months after receiving an interim request.

NEW YORK (JUNE 27) PR NEWSWIRE - Michael Mortimer, MHP Machines, Inc. president, today announced results for the second quarter of the fiscal year ending Sept. 30, 1990. Net sales decreased to $2,552,000 for the three months ended March 31, 1990, from $4,143,000 for the same period last year. U.S. sales decreased 20.9 percent. Overseas, net sales decreased 56.2 percent as measured in local currencies and 58.5 percent after translation. The company had a net loss of $376,000 for the quarter compared to a net profit of $52,000 for the same period last year.

Total backlog was $1,690,000 at March 31, 1990, compared to $1,343,000 at March 31, 1989.

In addition, Mortimer announced that the board of directors of MHP Machines, Inc. has reached an agreement with Eastern Shore Consolidated Industries Inc. of Pequannock, N.J., to permit Eastern Shore to make a tender offer for 51 percent of the outstanding stock of MHP Machines at a price of $.50 per share. Should less than 51 percent of the outstanding shares be tendered, MHP's board of directors has agreed to authorize and issue to Eastern Shore such additional number of shares of common stock to result in Eastern Shore's owning 51 percent of the total issued and outstanding shares of common stock of MHP. The price for any additional shares would also be $.50 per share. The agreement, signed on June 26, 1990, will enable Eastern Shore, headed by Robert DeGeorge Sr., to obtain a controlling interest in MHP Machines, Inc. The transaction is expected to be completed within two months.

MHP manufactures metalcutting computer-numerically controlled machining and turning centers and has operations in both the United States and the United Kingdom.

#90178p0539 06/27/1990 ~PR Newswire

HARRISBURG, PA (JUNE 27) PR NEWSWIRE - The Department of Environmental Resources (DER) announced that Bethlehem Corp. today paid the first installment of a $30,000 civil penalty for improperly removing asbestos at its metal fabrication facility in Palmer Township, Northampton County.

"This is the largest penalty ever imposed in Pennsylvania for violation of our asbestos removal regulations," DER Deputy Secretary Mark McClellan said. "Let it stand as fair warning that we are committed to ensuring that asbestos is safely removed in the workplace."

McClellan said Bethlehem Corp. paid the first $10,000 of the fine, but its asbestos removal contractor, Allentown Industrial Construction Corp. (AICC) of Lehigh County, is also named in the penalty agreement.

McClellan said AICC removed 1,500 linear feet of asbestos materials from pipes at the Bethlehem Corp. facility in December while employees were on Christmas vacation. The firm failed to adequately wet the materials

during the removal process, did not carefully lower the materials to the ground and did not store the material in labeled, leak- tight containers.

Bethlehem Corp. also failed to notify DER of the removal project as required by federal regulations.

"The firms took none of the precautions necessary to ensure that asbestos fibers were not released into the air," McClellan said. "In many instances, improperly removing asbestos can be as dangerous as leaving the material in place."

McClellan said workers at the plant contacted the federal Occupational Safety and Health Administration, which in turn contacted DER. The materials have been properly disposed of at a DER-approved waste facility.

The initial $10,000 was paid to DER's Clean Air Fund. The firms must pay the remaining $20,000 by Sept. 1.

DALLAS (JUNE 27) PR NEWSWIRE - E-Systems Inc. (NYSE: ESY) today announced receipt of a contract from Mobil Exploration and Producing Services Inc., a subsidiary of Mobil Corp., to deliver and evaluate an advanced technology computer-based mass storage system. This system will be able to store Mobil's exploration data, currently contained on over one million reels of standard computer tapes, and to provide rapid access of the archived data from Mobil's computer network.

The E-Systems/Mobil system is an adaptation of an advanced mass storage system E-Systems is currently developing for a government customer. The first phase of this multi-million dollar project calls for E-Systems to develop and Mobil to evaluate a prototype mass storage system at the MEPSI Technical Computer Center in Dallas. The prototype system will have the capacity to manage automated access of 5.5 terabytes of data, the amount now contained on over 35,000 reels of tape. (A terabyte is equal to one trillion bytes of data.) The second phase of the project includes the option to refine the prototype to an on-line production class system. The production class system can be upgraded to increase the system capacity to 100 terabytes.

Since June of 1988 MEPSI, Mobil Research and Development Corp. and E-Systems have investigated the potential of using advanced data recording in the field of geosciences data management. Under a provision in the contract, the advanced mass storage system will be marketed to other

prospective energy companies as secondary participants.

The heart of E-Systems mass storage system is a high speed, high capacity helical scan recorder. This data recording/storage device is being jointly developed by E-Systems and Ampex Corporation. It is based on Ampex's highly successful Model VPR-300 video broadcast recorder which uses a standard 19mm digital type D-2 tape cassette. The refined D-2 technology as proposed in the project will be submitted later this year to the American National Standards Institute (ANSI) and to the Institute of Electrical and Electronics Engineers (IEEE) for standards review.

The file server computer for the mass storage system is a Convex Corp. Model C2 computer. The computer utilizes programmed robotics control for accessing ultra high density cassettes. Through high speed networks, archived data can be accessed in seconds rather than hours now required using current technologies.

E-Systems, is a major worldwide developer and producer of electronic systems and products in the areas of data processing, intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, and communications systems.

LAGUNA HILLS, CA (JUNE 27) PR NEWSWIRE - Barry G. Hon announced today that he has decided to terminate his option to acquire the 7,000-acre Oak Valley real estate project from Oak Tree Savings Bank, S.S.B., a subsidiary of Landmark Land Co. Inc.

Oak Valley is a master-planned community in Riverside County, , Calif. Landmark has granted an option to Hon to acquire the Oak Valley project after the federal Office of Thrift Supervision had disapproved the structure of an earlier transaction in which Hon would have acquired most of Oak Tree's real estate assets for $967 million.

Hon said, "My financial partners and I have determined that it would be to risky to acquire such a large project at the proposed price in the face of the current real estate recession. We decided to step aside and give Landmark a chance to explore its other options.

"I have high regard for the quality of Landmark's management and real estate projects," Hon said, "and hope to do business with them in the future."

SALT LAKE CITY (JUNE 27) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO), one of the nation's leading independent power producers, today announced that it has secured a fuel supply contract for its proposed 52 MW power generation facility in Sheldon Springs, Vt. The project will consume an average of 10.9 million cubic feet of natural gas per day.

The contract with Union Pacific Fuels Inc. the marketing subsidiary of Union Pacific Resources Co., Fort Worth, Texas, provides for 100 percent of the plant's requirements for natural gas at market responsive prices. Union Pacific Resources is a major producer of natural gas in the U.S. and Canada with deliverability in excess of 500 million cubic feet per day.

Bonneville's chairman and CEO, Robert L. Wood, noted that, "This fuel supply contract is a key element in the final development work on the Sheldon Springs project. It allows us to maintain our schedule for completion of the project and power production as early as June of 1992."

Bonneville has successfully developed 29 electric generating projects, and currently has projects with potential capacity of approximately 700

megawatts in various stages of active development.

TORONTO (JUNE 27) PR NEWSWIRE - Mount Wright Iron Mines Ltd. of Toronto announced today that it has obtained a decision from a Spanish court fixing the amount owed by Exploracion Minera Internacional Espana SA (Exminesa) which is controlled by Cominco Limited, pursuant to Mount Wright's one percent net smelter return royalty for the fiscal years 1977 to 1988 inclusive at 304,631,870 Spanish pesetas, which is approximately $3.4 million (Cdn.) at the current rate of exchange. The judgement came from the Court of Ponferrada, which is the local Spanish court having jurisdiction over the matter, on Friday, June 22, 1990.

Mount Wright intends to enforce payment of the judgement by execution proceedings against Exminesa as soon as possible.

Mount Wright, which is 48.3 percent owned by LAC Minerals Ltd., obtained a judgement from the Supreme Court of Ontario in July 1983 awarding it a one percent net smelter return on production from Exminesa's Rubiales mine which has been producing lead, zinc and silver since 1977. Exminesa refused to pay the NSR and Mount Wright commenced legal proceedings in Spain to enforce payment of the NSR.

SEATTLE (JUNE 27) PR NEWSWIRE - The Food and Drug Administration (FDA) today approved the use of the 22 Channel Cochlear Implant, a device that allows profoundly deaf people to hear, for use in children ages two to 17. Virginia Mason Medical Center was one of 25 facilities in the United States and Australia to participate in the clinical trials that led to today's FDA approval.

Cochlear implants, which have been approved for profoundly deaf adults since 1985, can help provide useful sound information to hearing impaired individuals who cannot be helped by hearing aids. Virginia Mason has used the device for children on an investigational basis as part of the FDA clinical trials since 1987. To date, the medical center has implanted seven children with the device.

The device is available for use with children who lost their hearing after acquiring speech and children born deaf or who lost their hearing very

early in life.

"FDA approval of the device will make it more accessible to children," said audiologist Sandra Kuprenas, who has worked with cochlear implant patients at Virginia Mason Medical Center since 1982. "Insurance companies will no longer consider the device investigational and hopefully will be more likely to cover the costs of the implant."

One in every thousand children are born deaf in the United States. Serious illness and accidents leave thousands more profoundly hearing impaired. The cochlear implant device, part of which is surgically implanted in the bone behind the ear, restores a broad spectrum of sounds and pitches to children who received little or no benefit from hearing aids.

Availability of the cochlear implant may provide these young people with skills that will help them access a broader range of educational, occupational and social opportunities. Children acquire language during their first five years of development; this includes not only verbal skills, but emotional, social and academic skills.

A total of 200 children were followed during the FDA clinical trials. Performance data was collected on 80 of the children. Study results showed that all of the children evaluated were able to detect medium to loud sounds, including speech. Some children were able to detect environmental sounds at comfortable loudness levels. Many children were better able to identify timing and rhythm of speech and identify words. For many, speech improved and a few were able to identify speech without lipreading.

To date, Virginia Mason Medical Center has provided 28 people, ages two years and older, with the 22 Channel Cochlear Implant. The medical center currently is the only facility in Washington state, and one of the major centers in the Northwest, to implant the device in both children and adults.

Virginia Mason Medical Center, a non-profit organization based in downtown Seattle, consists of a 336-bed bospital, the largest private group practice in the Northwest and a research center conducting ongoing studies aimed at the prevention, treatment and cure of human disease. Established in 1920, Virginia Mason's mission focuses on patient care, research and education. The medical center is dedicated to bringing the latest medical advances available to the Northwest, including the cochlear implant.

For a package of information on the 22 Channel Cochlear Implant, call Virginia Mason Medical Center's Audiology Department at 206-223-6392.

#90178u0194 06/27/1990 ~United Press International
(JUNE 27) UPI - The Senate has killed a constitutional amendment to ban flag desecration. In a symbolic vote only significant to those politicians looking for a campaign issue this fall, senators Tuesday night rejected a flag amendment. The vote was 58thirds margin needed for passage. Legislatively, the vote was meaningless because the House last week rejected the amendment.

Senator Edward Kennedy says Nelson Mandela's speech to a joint meeting of Congress Tuesday has ''clearly'' increased Capitol Hill support for continued U-S sanctions against South Africa. The Massachusetts Democrat calls economic sanctions ''indispensable'' in the fight to end apartheid. He predicts Mandela's U-S tour makes it ''less likely than ever'' they will be lifted ''prematurely'' by the Bush administration.

Southern California and the desert Southwest continued to sizzle in triple-digit heat Tuesday. The mercury topped out at 122 degrees in Phoenix and a number of other Arizona cities. It was 118 degrees in Borrego Springs, California, where firefighters were kept indoors for all

but essential duties. The thermometer reached 112 at the Los Angeles Civic Center... breaking a 107-year-old record high for the day by 14 degrees. The high in Texas was in Presidio, where the mercury hit 111 degrees for the second straight day.

A spokesman for the Gila County, Arizona, Sheriff's Office confirms six firefighters battling a wildfire in the Tonto National Forest were killed Tuesday when the blaze jumped fire lines. Chuck Olsen had NO information on the victims. But a spokesman for the Arizona Department of Corrections says five members of a prison inmate firefighting crew are missing. He doesN'T know if the five are among the fatalities. The lightning-caused fire began Monday night and has charred five-thousand acres of brush and timber.

#90178u0228 06/27/1990 ~United Press International

ROCHESTER, N.Y. (JUNE 27) UPI - The FBI has been called in to help investigate the ''well-planned'' $10.8 million armored car robbery that occurred when two guards stopped at a convenience store for a coffee break police said .

The robbery Tuesday was the second-largest armored car heist in U.S. history and police were investigating several leads in the case but did not know whether the crime was an inside job.

''I can tell you that it was obviously well planned and successfully executed,'' said sheriff's department Capt. Neil Flood.

The two Armored Motor Services of America guards were taking the cash to the Federal Reserve Bank in Buffalo when they stopped at the Bi-Rite Market at about 7 a.m. Tuesday in the Rochester suburb of Henrietta, said Monroe County Sheriff Andrew Meloni.

The $10.8 million was the second-largest amount ever taken in an armored car robbery in the United States, Meloni said. The FBI had been called in to help investigate the case, he said.

After the first guard entered the store, the driver was accosted by a man who jammed a shotgun through a gunport in the truck, said Flood.

Flood said the driver had less than two years of experience and the guard ''less than one.''

He said stopping for food and coffee at the convenience store was not part of a regular routine.

''But I can tell you that it's not (company) policy'' to leave the armored

car ''in order to get coffee,'' Flood said. ''I'm sure their corporate regulations forbid that.''

The first guard was grabbed when she returned to the vehicle with the coffee and sandwiches.

The gunman forced the two to drive to a wooded area behind the Rochester Institute of Technology in Henrietta, about one-half half mile from the store. There they were met by at least one other man.

''They were taken down a farm lane out of sight from the road and houses '' said Capt. Glen Marcus.

The guards were tied with tape, and the contents of the truck were transferred into a van.

Flood said it took ''at least two to transfer 1,600 pounds of money'' into the van. However, he said that because the driver and guard were ordered to ''look away'' the number of accomplices could not be determined.

The guards freed themselves about 15 minutes later and drove back to their company headquarters. They were not injured and their names were not released to protect them from possible retribution.

''They are our two key witnesses,'' Flood said.

The largest armored car heist in the United States occurred in the Bronx, Dec. 12, 1982, when $11 million was stolen from Sentry Armored Car-Courier.

Some $39 million in gold ingots and diamonds were stolen Nov. 26, 1983 from a Brink's Mat warehouse at England's Heathrow Airport in the world's largest holdup.

SACRAMENTO, Calif. (JUNE 27) UPI - The Sacramento Kings have acquired 7-foot back-up center Bill Wennington from the Dallas Mavericks, plus No. 14 and No. 18 picks in Wednesday's NBA college draft, it was announced Tuesday.

In exchange, the Kings sent the Mavericks veteran forward Rodney McCray, the 1990 second-round pick acquired from Utah and the 1991 second-round pick acquired Monday from Washington.

McCray played all 82 games for the Kings last year and averaged a career-best 16.6 points and 8.2 rebounds. In his seven-year pro career he has averaged 13.1 points and 7.0 rebounds.

Wennington was Dallas's first-round pick in 1986. During his five-year career, he has averaged 3.6 points and 2.9 rebounds in 11.7 minutes. This past season he averaged 4.5 points and 3.3 rebounds in 13.6 minutes.

(JUNE 27) UPI - Nelson Mandela received a tumultuous welcome Tuesday night from at least 19-thousand people at the Washington Convention Center. It was the South African nationalist's final scheduled event in the nation's capital. Mandela leaves for Atlanta Wednesday morning. Among the city officials at the rally- Mayor Marion Barry, who received a standing ovation but did NOT speak.

The drug and perjury trial of the Washington, D-C, mayor resumes Wednesday morning in a federal courtroom. Barry's lead attorney, R. Kenneth Mundy, says the prosecution's next witness is expected to be Rasheeda Moore. She's the former model who lured Barry to the Vista Hotel where he was arrested January 18th in an F-B-I-police sting operation.

Almost five hours of soul-searching debate by the Louisiana Senate ended with the passage Tuesday night of what could become the nation's most restrictive abortion law. One minor amendment was added to the House-backed bill, meaning it must go back to the lower chamber before being sent to Governor Buddy Roemer. But Roemer has said he'll veto any anti-abortion bill that does NOT contain exceptions for rape and incest. Those exceptions are NOT included in the Louisiana measure.

U-S negotiators entered a third day of trade talks with Japan Wednesday armed with President Bush's statement that he is willing to raise taxes to cut the federal deficit. Japan has long argued that a chief cause of the U-S trade deficit and general lack of competitiveness of American companies overseas is the budget deficit. The year-long talks are aimed at reducing the nearly 50-BILLION-dollar annual U-S trade deficit with Japan.

MOSCOW (JUNE 27) UPI - Russian republic President Boris Yeltsin said it ''might be a good idea'' to postpone next week's 28th Communist Party Congress to avoid a triumph by conservatives in the party.

Yeltsin acknowledged Tuesday that party members are discussing postponement and said any delay of the congress, to begin Monday, would

have to be approved by a plenum of the Central Committee, the leading body of the Communist Party.

He gave the impression at a news conference that such a plenum, or full meeting of the body, already had been set. ''It will go very hard,'' the maverick politician said. ''There will be a real fight at it.''

Yeltsin said he might leave the party if conservatives gained the upper hand at the Congress. He complained that the recently concluded party congress in the Russian republic went too fast in creating a new party for Russia, the largest of the 15 Soviet republics.

Hard-liner Ivan Polozkov, elected head of the Russian party after Yeltsin defeated him for the post of Russia's presidency, is expected to lead a strong conservative attack against Soviet President Mikhail Gorbachev's policies at the nationwide Congress.

''The Russian congress will exert a very serious influence on the 28th party congress, and this is alarming,'' Yeltsin said. ''A postponement might be a good idea in connection with this.''

Diplomats have forecast another showdown between Gorbachev and his conservative opponents at the Congress, held every five years but which Gorbachev had advanced six months from a scheduled January date.

Yeltsin said Gorbachev, who also is head of the national Communist Party, bore part of the blame for the vicious attacks on him at the meeting of the Russian chapter of the party.

''He was caught up in his presidential affairs and did not give attention to the preparation of the (Russian party) conference,'' Yeltsin said. ''He got an answer to this.''

The Russian president said he sees the 28th party Congress as ''the last chance for a radical renewal of the party. If no renewal happens ... then a split of the party is possible.''

Yeltsin said he might ''suspend his membership in the party or maybe take other steps'' if the Congress does not embark on what he considers to be serious reform.

If Yeltsin did leave, he would join a growing wave of defectors. Some 130,000 Soviet Communists have turned in their party cards this year, the same number as in all of 1989, although the party retains 19 million members, or 1 in 10 adults.

#90178u0337 06/27/1990 ~United Press International
(JUNE 27) UPI - Jerry Goff's first career home run was one in a million.

The Expos' rookie catcher, pinch hitting to lead off the ninth inning, blasted a 3-2 delivery off reliever Les Lancaster over the right field fence Tuesday to power the Expos to a 6-5 victory over the Chicago Cubs.

''I wasn't thinking home run,'' said Goff, recalled from Indianapolis of the American Association (AAA) June 16. ''It's not that I haven't dreamt it. That's gone through my mind a million times. It just so happened that today was the day.''

Goff stepped to the plate batting .158 with three hits in 19 at-bats.

''It was a fastball. He left it pretty much over the middle of the plate '' Goff said. ''He obviously didn't want to put it there. He was trying to

pitch me away.''

The shot off Lancaster, 5-4, stymied a Cubs' comeback from a 5-2 deficit.

Reliever Dave Schmidt, 3-0, allowed a two-run double to Mark Grace in the seventh and an RBI double by Shawon Dunston in the eighth, but still gained the victory.

Dunston's double to deep left apparently was touched by a fan near the basket that marks a home run, prompting Cubs Manager Don Zimmer to question the call.

''I don't know. I heard two versions,'' said Zimmer, who implored second base umpire Fred Brocklander to ask for help on the call. ''Somebody said it wasn't a home run. Somebody said it hit a kid's glove and bounced back. If that's the case, I don't think a kid could reach over the basket.

Expos starter Dennis ''Oil Can'' Boyd, seeking his first win since May 23, left the game after six innings with a 5-2 lead.

''Oil Can pitched good. He just ran put of gas,'' Expos Manager Buck Rogers said. ''The tank emptied fast.''

Steve Frey pitched the ninth for his fourth save.

Ryne Sandberg smacked his National League-leading 22nd home run and Andre Dawson hit his 18th, both solo shots off Boyd in the sixth. That cut the lead to 3-2 after the Expos scored three runs in the top of the inning.

The Expos scored twice more in the seventh off starter Greg Maddux and reliever Paul Assenmacher on a sacrifice fly by Junior Noboa and an RBI single from Dave Martinez to make it 5-2.

Montreal scored three times in the sixth when Maddux walked Spike Owen with the bases loaded and Larry Walker stroked a two-run single to right, making it 3-0.

Elsewhere in the National League: Pittsburgh blanked Philadelphia 1-0, Atlanta dumped Los Angeles 4-2, Cincinnati edged San Francisco 3-2 in 12 innings, San Diego shut out Houston 7-0, and New York slammed St. Louis 8-6 in 11 innings.

In the American League it was: New York 8, Milwaukee 2; Boston 3, Toronto 0; Baltimore 5, Cleveland 3; Minnesota 5, Texas 4; Oakland 3, Detroit 2; Kansas City 4, Seattle 1; and Chicago 11, California 7.

-- AROUND THE NL --

Pirates 1, Phillies 0

At Pittsburgh, Jay Bell singled home Jose Lind from second base with two out in the eighth. Rookie Scott Ruskin, 2-1, picked up the victory in relief and fellow rookie Stan Belinda recorded his second major-league save. Bruce Ruffin, 5-7, suffered the Phillies' fourth straight loss.

Braves 4, Dodgers 2

At Atlanta, Steve Avery, 1-1, earned his first major league win by pitching seven strong innings. It was the left-hander's third major league appearance. Joe Hesketh recorded his third save. The loss went to Mike Morgan, 7-6.

Reds 3, Giants 2, 12 innings

At Cincinnati, Herm Winningham scored from second on third baseman Matt Williams' throwing error in the 12th inning. Mark Thurmond, 1-1, suffered the loss. Randy Myers, 2-2, pitched the final two innings for the victory.

Padres 7, Astros 0

At Houston, Dennis Rasmussen scattered nine hits and Bip Roberts stroked four hits, including three doubles to lift San Diego to victory. Rasmussen 6-4, improved his lifetime record to 7-1 against the Astros in recording his third complete game of the season. Jim Clancy, 2-8, took the loss.

Mets 8, Cardinals 6, 11 innings

Howard Johnson doubled in two runs in the 11th inning to lift the New York Mets to victory, extending New York's winning streak to eight games. Alejandro Pena, 2-2, pitched two innings of one-hit ball for the victory. Ken Dayley, 1-2, took the loss. Todd Zeil had pulled the Cardinals into a 6-6 tie with his ninth inning homer.

#90178u0381 06/27/1990 ~United Press International

WASHINGTON (JUNE 27) UPI - The push for a constitutional amendment to ban desecration of the American flag has ended for the year in Congress, but the issue is likely to remain a burning topic on the campaign trail.

On Tuesday, the Senate followed the House in rejecting a proposal to amend the Constitution to ban flag desecration.

The 58-42 tally to pass the amendment was nine votes short of the two-thirds majority needed for adoption. Seven Republicans joined 35 Democrats in voting against the amendment, while 20 Democrats teamed with

38 Republicans in voting in favor.

Since the House rejected the plan first, some Democrats charged the two days and four votes the Senate devoted to the issue was a political exercise led by Republicans to generate fodder for fall campaigns.

In remarks highlighting the politicization of the issue, Sen. Edward Kennedy, D-Mass., said the Senate was being asked to vote for a constitutional amendment in part ''because of concern over the antics of a few obnoxious protesters but largely because of a partisan campaign to misuse the flag and abuse the Constitution for political advantage.''

''Stirred by fears of sound bites and 30-second spots, members of Congress who know better are expressing a willingness to sacrifice the Bill of Rights for what they hope will be a benefit in the polls,'' said Kennedy who added, ''We respect the flag most - and protect it best - when we honor the freedoms for which it stands.''

The amendment was thrust before Congress when the Supreme Court declared flag burning a protected form of free speech. It was the second time this year the high court issued such a ruling.

The amendment offered to both the House and Senate read: ''The Congress and the states shall have power to prohibit the physical desecration of the flag of the United States.''

If Congress had approved the measure by a two-thirds majority in each house, three-fourths of the nation's state legislatures would have had to ratify the plan by the same margin.

Tuesday's Senate debate took note both of the constitutional questions at stake and of the political nature of the issue.

Sen. Bob Kerrey, D-Neb., said that ''a wound has opened in America because of this debate. It will not go away. It is regretable.'' He urged the issue not be used for partisan political purposes.

Senate Democratic leader George Mitchell of Maine, closing the debate for amendment opponents, said, ''I oppose and condemn the burning of the flag. I find it offfensive and obnoxious. ... But I do not support changing the Constitution. We can support the American flag without changing the American Constitution.''

Mitchell said it would be a ''sad irony'' if a handful of flag burners got a monument to their cause written into the Constitution. The latest Supreme Court decision was based on flag burning cases in Seattle and Washington.

''This amendment rescues the Bill of Rights by correcting the Supreme Court's red, white and blue blunder,'' said Senate Republican leader Robert Dole, who declared it was ''a hoax'' that the proposal attacked the First Amendment. He argued that flag burning was ''malicious conduct, not speech'' as the Supreme Court has held.

But Sen. Dan Coats, R-Ind., argued, ''We do care deeply about symbols. ... The support I have seen and heard for such an amendment is undeniable. ... Most of all I can see it in the determination fixed in the faces of our veterans.''

Before the final vote, the Senate rejected two attempts to use the statute approach to the question. The first would have made it illegal to burn a flag if it would cause a breach of the peace. The second proposed to remove the flag issue from federal court jurisdiction.

In addition, a proposal by Sen. Joseph Biden, D-Del., to amend the Constitution to allow Congress to pass a special law making it illegal to burn, mutilate or trample the flag was defeated 93-7.

#90178u0387 06/27/1990 ~United Press International

(JUNE 27) UPI - Stan Jefferson first walked, then ran and the Cleveland Indians continued their warpath on American League Eastern Division teams.

Sandy Alomar's bloop single scored Stan Jefferson in the ninth inning with the winning run to send Cleveland to a 5-3 victory Tuesday night over the Baltimore Orioles.

It was Cleveland's third win in a row and eighth in their last 11 games. All have come against eastern division teams.

Although the Indians have recieved timely hitting and good pitching, it was Jefferson's base-running that helped.

''Speed is wonderful,'' Cleveland Manager John McNamara said. ''Jefferson was a big part of tonight.''

Pinch-running for Ken Phelps, Jefferson proceeded to steal second and third base to set up Alomar's RBI.

''If I get a jump, I can go,'' explained Jefferson, who is seven-for-eight in steal attempts. ''Our club is being aggressive on the bases.''

Oriole relief pitcher Joe Price made the pitch he wanted to Alomar. ''Fastball up and in,'' Price said.

''What made me sick is then I started overthrowing.''

Price walked Jerry Browne with the bases loaded to force in a fifth run.

Doug Jones, 4-2, got the win in relief of Greg Swindell, who struck out six in 6 2-3 innings but is winless since April 29.

Pete Harnisch, 7-4, took the loss.

''Timely hitting has been the big thing,'' McNamara said. ''Winning in the late innings shows character. It instills a positive attitude.''

Which Jones showed.

''Finding a hole (with a base hit) is the only way they are going to beat me,'' Jones said, who gave up an eighth-inning RBI single to Joe Orsulak that forged a 3-3 tie.

''We have pitchers who won't roll over and quit,'' added Jones.

The Orioles have lost five straight games and 11 of their last 13.

''We always seem to do some little thing to give away a run or two in a ballgame and it winds up costing us a ballgame,'' Oriole manager Frank Robinson said.

''It's not just the men left on base. We don't seem to make the most out of the opportunities we have.''

Elsewhere in the American League, Boston zipped Toronto 3-0, Minnesota edged Texas 5-4, New York crushed Milwaukee 8-2, Oakland nipped Detroit 3-2, Kansas City rapped Seattle 4-1 and Chicago knocked California 11-9.

In the NL, it was: Montreal 6, Chicago 5; Cincinnati 3, San Francisco 2 in 12 innings; Pittsburgh 1, Philadelphia 0; New York 8, St. Louis 6 in 11 innings, Atlanta 4, Los Angeles 2 and San Diego 7, Houston 0.

-- AROUND THE AL --

Red Sox 3, Blue Jays 0

At Boston, Carlos Quintana hit a two-run home run to power Boston to its fifth straight win. The Red Sox, have won nine of their last 11 and moved 1 1-2 games ahead of second place Toronto in the AL East. Wes Gardner, 2-4 surrendered two hits in six innings. Jeff Reardon notched his 12th save. David Wells, 5-2, absorbed the loss.

Twins 5, Rangers 4

At Minneapolis, Gene Larkin tripled home a run and scored on Gary Gaetti's sacrifice fly in the eighth inning, to lift Minnesota. Texas lost its fourth straight game. Juan Berenguer, 5-1, gained the win. Rick Aguilera pitched the ninth for his 18th save. Despite throwing his fourth straight complete game, Kevin Brown, 9-5, took the loss.

Yankees 8, Brewers 2

At New York, Steve Balboni knocked in two runs, including the tie-breaker with two out in the seventh inning, and Matt Nokes added a three-run homer to lead New York. Reliever Lee Guetterman, 5-2, allowed only one hit over the last 2 1-3 innings. Dennis Powell lasted 6-2-3 innings and fell to 0-2.

Athletics 3, Tigers 2

At Oakland, Calif, Felix Jose scored the go-ahead run on an error to lead Oakland. Scott Sanderson, 9-4, worked the first six innings to pick up the win.Jack Morris, 6-9, went the distance for Detroit and took the loss. Dennnis Eckersley pitched the ninth for his 24th save.

Royals 4, Mariners 1

At Seattle, Bo Jackson hit a two-run homer and Tom Gordon and Jeff Montgomery combined for a seven-hitter to lead Kansas City. Gordon, 5-4, allowed six hits over eight innings. Montgomery picked up his sixth save. Brian Holman, 8-6, lasted eight innings, allowing all four runs, to take the loss.

White Sox 11, Angels 9

At Anaheim, Calif., Ozzie Guillen and Lance Johnson delivered two-out singles to drive in two runs in the ninth inning to lift Chicago after it squandered an 8-run lead. Barry Jones, 9-1, earned the victory. Bobby Thigpen pitched the ninth for his major-league leading 25th save. Mark Eichhorn, 0-4, took the loss.

#90178u0392 06/27/1990 ~United Press International

BATON ROUGE, La. (JUNE 27) UPI - The bill lawmakers hope will become the nation's most restrictive abortion law must head back to Louisiana's lower house before facing an apparently insurmountable veto battle with Gov. Buddy Roemer.

The state Senate approved the bill 24-15 late Tuesday after almost five hours of often soul-searching debate but a minor amendment was added to the House-backed bill, sending it back to the House where it most likely

will be approved.

Even with that approval, the Legislature does not have the votes to override the expected veto by Roemer who has said he would veto any abortion bill that had no exceptions for rape and incest. The current bill has no such provisions.

After the vote, Donna Moss, a spokeswoman for Roemer, said the governor would have no comment on whether he would sign or veto the measure until he had read it. ''His position has not changed,'' she said.

Roemer has 10 days to sign the bill once it has finished legislative action, and each chamber of the Legislature then would have to give two-thirds approval to an override.

There has not been a successful veto override in Louisiana history, and indications are that the Legislature would have a hard time breaking that trend.

The bill passed the all-male Senate by only 4 votes over bare majority - 2 less than the 26 needed to override a gubernatorial veto. The House voted 74-27, only four votes more than would be needed for a veto override.

At least three Senators and five members of the House have said that while they voted for the bill, they would vote against an override.

Under the legislation, any doctor performing an abortion would be subject to a fine of up to $100,000 and a jail term of up to 10 years. The only exception in the proposed law would be if the woman's life were endangered by the pregnancy.

Moments after the vote was announced, some angry abortion rights advocates walked out of the upper chamber with tears streaking their faces.

''Women are going to die for what happened in this place today,'' said a badly shaken woman, who was immediately surrounded by friends.

But most of the 100 spectators who who crammed into the public balcony wildly applauded the Senate after the vote for more than one minute.

''This is the most important day in Louisiana since Jan. 21, 1973,'' said Sharon Fontenot, an abortion opponent, referring to the Supreme Court's landmark Roe vs. Wade decision that legalized abortion on demand.

During debate on the bill, Sen. Mike Cross, a co-author of the measure, told his colleagues that abortions are ripoffs. ''The doctor walks in, tries to make the woman feel at home,'' Cross said. ''He says something like, 'Hey honey, where do your mother and father think you are today?'

''I ask you what kind of man or woman would reach inside a woman and kill an unborn child? ... What kind of man would sit back and not try to stop the killing of unborn children of this nation?'' Cross asked.

Opponents tried three times to amend the bill to include exceptions for rape and incest, but each rider was defeated by more than 10 votes.

''The question is whether we are drafting into this bill a loophole big enough drive 5,000 abortions through,'' argued Sen. Ben Bagert.

That argument was countered by Sen. Jon Johnson. ''I don't have a right to say to the women of this state when you should or should not have abortion and you know what gentlemen? You don't have that right either,'' he said.

Rep. Louis ''Woody'' Jenkins, the author of the bill, said he expects the measure will be on Roemer's desk ''by Thursday, for sure.'' If so, the governor could wait until July 7 either to veto or sign the measure into law.

Should he veto it, the Legislature would have two days to override the action or desperately attempt to move another bill through the Legislature before the session ends on July 9.

A special ''veto session'' of the Legislature has never been held, according to the Public Affairs Research Council of Louisiana, which keeps such records.

#90178u0414 06/27/1990 ~United Press International

NEW YORK (JUNE 27) UPI - Donald Trump's bankers came to his rescue with a $20 million bridge loan that allowed him to meet a casino bonds payment deadline - and avoid personal bankrupcty.

The loan approved Tuesday is, in effect, an installment on a $65 million bailout package that will defer much of Trump's bank debt for up to five years.

''It's a great victory,'' Trump said in a telephone interview. ''We're really happy. It's been great for the banks and great for us.''

But the victory came at a price, albeit one most people would gladly pay: As part of the agreement, Trump must tighten his belt and live on $450,000 a month, among other restrictions.

''Remember, I came from Brooklyn. I can live any lifestyle I want,'' the 44-year-old developer told ABC News.

Meanwhile, The New York Times reported the deal has a far-more humbling cost. Trump will have to cede management control over his multibillion-dollar empire, at least temporarily, to his bankers, the newspaper said.

The bridge loan wired to Trump's bank account helped him meet a midnight Tuesday deadline to make a $43 million payment to holders of some high-yield ''junk bonds'' backing one of his Atlantic City casinos.

Had he missed that payment, he would have defaulted on loans backed by Trump's Castle and probably would have lost that casino to creditors. Such a default would have set off a chain of defaults that could have forced him to seek bankruptcy protections.

Trump himself seem exhilarated by the marathon negotiations that preceded the bridge loan agreement.

''I enjoyed it, actually,'' said Trump, author of 'The Art of the Deal.'

''It's been a great experience for me and I'm glad it worked out so well '' he said. ''It's been a great day and it's great to have this behind us and it's going to be great to get back to work.''

A bank source said Trump's seven major U.S. creditor banks and a consortium of about 60 foreign banks with stakes in his loans approved the bridge loan at 4 p.m. The bond trustee, First Fidelity Bank of New Jersey, said it had received the overdue payments late in the day.

Cooperating in the Trump rescue mission were Citicorp and Chase Manhattan - the two largest U.S. banks - with Bankers Trust, Manufacturers Hanover, and three New Jersey banking outfits.

Most of the banks had agreed to the deal by last week, but Chase and Citicorp had to negotiate and jawbone until hours before the deadline to persuade the last foreign banks - West Germany's Dresdner Bank and Societe Generale of France - to sign on.

Asked about his next moves, the magnate declined to say if he would begin to sell off assets to reduce his debt. ''We have five years,'' Trump said. ''You'll sell and buy and do other things - it's a business.''

Trump dismissed the notion that he might have overextended himself by nonstop acquisition of big-ticket ''trophy'' properties, airlines and casinos, blaming his financial position on a ''credit crunch'' in the United States.

He warned, ''If interest rates aren't allowed to come down substantially,

we are going to have a deep recession.''

The 11th-hour bridge loan ended the crisis, which over the past four weeks put Trump into nonstop talks to avoid insolvency.

Revenues from his three Atlantic City casinos, Manhattan hotels including the prestigious Plaza on Central Park, the Trump Shuttle airline and other properties fell short of his crushing obligations.

The clock started ticking June 15, when Trump admitted he could not come up with $43 million in bond payments. After notification by the bond trustee, he had 10 days to pay and avoid legally defaulting.

#90178u0519 06/27/1990 ~United Press International

(JUNE 27) UPI - Around the world... around the clock... the latest news from U-P-I.

Five prisoners and a guard died while fighting a wildfire in Arizona. Officials said last night the six belonged to a volunteer firefighting crew from a state prison. They were killed yesterday when erratic winds pushed the fire across fire lines in the Tonto National Forest. Four others in the unit have been air-lifted to a Phoenix hospital.

Police in a Rochester, New York, suburb say they're investigating several leads in the second-largest armored car heist in U-S history. Robbers stole 10-Million 800-thousand dollars when the car's two guards stopped at a convenience store for coffee and sandwiches. The guards were NOT hurt. The largest armored car heist was 11-Million dollars in the Bronx in 1982.

The Louisiana Senate has approved what could become the nation's most restrictive abortion law. The Louisiana House is expected to concur with the Senate on an amendment it made to the House-backed bill. The measure does NOT allow abortion even for rape and incest... and Governor Buddy Roemer says he won't sign it.

Elementary school principals say 15 students per teacher is ideal for kindergarten through first grade. But the U-S average is 23 in public schools. The National Association of Elementary School Principals also says 15 is optimum for youngsters with special problems.

Developer Donald Trump says a bridge loan he won yesterday is a great victory. Trump's creditor banks granted him a 20-Million-dollar loan that enabled him to beat a midnight deadline and avert default on two casino bond issues. Trump says it's great for the banks and great for him.

#90178u0525 06/27/1990 ~United Press International
(JUNE 27) UPI - Los Angeles had its hottest day in history yesterday... 112. But it was hotter elsewhere. Phoenix was 122. Tucson was 117. Presidio, Texas, was 111 for the second day. Lubbock, Texas, was 105. Utilities are concerned about the threat of brown-outs and black-outs from heavy use of air conditioners.

Officials at the federal maximum security prison in Lewisburg, Pennsylvania, ended a one-day non-violent work stoppage by giving in yesterday to inmate demands. Inmates working in the prison's metal furniture factory objected to building security features, such as bars. They won't have to anymore.

Police in New York have arrested an adopted son in connection with the decapitation and mutilation of a Staten Island couple found last night in their blood-spattered home. Police say the adopted son apparently was caught during the grisly dismemberment by the couple's nephew, who lives next door.

A general court-martial at Fort Ord, California, yesterday convicted the second of three U-S soldiers of unpremeditated murder during the U-S invasion of Panama. The three men were accused in the fatal shooting of a Panamanian woman. Private Mark McMonagle also was convicted of five additional charges.

In New York City, theater owners and labor unions joined yesterday in the first plan to encourage production of plays on Broadway at a modest cost. The new moves would allow for a 24-dollar ticket for an orchestra seat at three theaters. Most Broadway plays charge from 40 to 50 dollars for the best seats.

#90178u0590 06/27/1990 ~United Press International
MANNHEIM, West Germany (JUNE 27) UPI - A West German court Wednesday convicted industrialist Juergen Hippenstiel-Immhausen for participating in construction of a chemical weapons plant in Libya and sentenced him to five years imprisonment.

The court said the former chairman of Immhausen-Chemie violated export regulations by delivering plans and supplies for construction of a chemical weapons installation at Rabta, 40 miles south of the Libyan capital of Tripoli.

The court also found Hippenstiel-Immhausen guilty of failing to declare the proceeds of the deal to the West German tax authorities. Hippenstiel-Immhausen was sentenced to five years in prison.

On his third court appearance, June 13, the industrialist had admitted that he was involved in the construction of the Rabta plant, which he only referred to as a ''chemical installation.''

The Libyan authorities have denied the plant was used for weapons production and said it is a pharmaceutical products factory. West German and U.S. officials claim 30 tons of nerve gas were produced during a recent test run at the plant.

Hippenstiel-Immhausen said he had been involved in the construction of the plant since 1984, when he had been approached by Iraqi businessman Ishan Barbouti, who is reputed to have organized several major deals for Libyan leader Moammar Gadhafi.

The West German industrialist said after signing a $150 million deal with Barbouti, he built a pharmaceutical plant in Hong Kong, which was to serve as a front for the Libyan project.

The sentencing Wednesday came a day after a West German television report said West German firms were helping Libya build a second chemical weapons plant similar to an installation in Rabta.

The station, quoting West German intelligence sources, said Gadhafi was planning to erect the second chemical weapons plant at the Sheba oasis, about 60 miles south of Rabta.

Monday, Libya's minister for light industries dismissed reports the north African country had plans to set up chemical weapons plants.

But in its report Tuesday, the SWF television station said Libyan authorities were using the same plans that West German firms, including Immhausen-Chemie GmbH, had allegedly drawn for the construction of the Rabta installation.

#90178u0624 06/27/1990 ~United Press International

TEHRAN, Iran (JUNE 27) UPI - Three survivors, two women and a boy, were found under the rubble in a village in northwestern Iran destroyed by last week's massive earthquake, the official Islamic Republic News Agency said Wednesday.

The news agency said a 40-year-old woman and her 12-year-old son were found injured Tuesday under the rubble in the village of Kelishom and were taken immediately to hospital.

The third survivor, a woman, was found uninjured in the same area Tuesday,

said the dispatch from Roudbar, about 145 miles northwest of Tehran.

The news agency gave no more details and did not name the survivors, who were the latest found in the rubble left by the earthquake, which measured 7.7 on the Richter scale last Thursday.

Despite reports that 15 other survivors were found Monday in the town of Manjil, international relief workers said Tuesday they were winding down their rescue efforts.

In contrast, the Iranian news agency said the discovery of the latest survivors encouraged Iranian rescue teams to redouble their efforts. Iranian volunteers using bulldozers and other means continued clearing the rubble from several quake-hit towns and some 1500 villages.

The Red Crescent organization, Iran's equivalent of the Red Cross, put the casualty count at 40,000 dead and 50,000 injured, but Iran's ambassador to the United Nations said Monday the death toll was at least 50,000.

The International Red Cross said half a million people were left homeless, and Iran has said it would gladly accept help from abroad in the form of prefabricated housing and architects to assist in rebuilding some of the destroyed towns.

Tehran radio said helicopters were dropping relief supplies to survivors in villages in the Alborz Mountains still inaccessible by road.

The Iranian news agency said 39 more military and civilian aircraft carrying relief supplies from 19 countries landed at Tehran's Mehrabad Airport Tuesday, bringing to 171 the number of relief flights arriving in Iran since Thursday.

Despite their strained relations, the United States donated $291,000 in relief supplies including blankets, tents, water jugs and rescue equipment.

Iran's acceptance of assistance from the United States touched off a controversy in the hard-line Iranian press that continued Wednesday. But almost all Iranian newspapers have expresed gratitude to countries that sent help.

The English-language newspaper Kayhan International, which normally takes a hard-line stance, blasted the daily Jomhuri Islami, which Sunday urged the government to reject U.S. supplies. Kayan International said Tuesday that Iranian newspapers ''should not lose sight of the fact that what they write may have an adverse impact on the lives of hundreds of thousands of people.''

Diplomatic sources said French relief teams with a total of 205 doctors,

medics and other personnel, decided to pull out of the disaster area because there was little for them to do. Included in the French team were animal trainers who succeeded in finding several survivors under the rubble.

Other relief teams, including those from West Germany, Czechoslovakia and the Soviet Union, were also pulling out.

The Red Cross continued to appeal for donations and readied to airlift more emergency supplies to quake-stricken areas.

It also said an 11-member International Red Cross team is visiting disaster areas with the Iranian Red Crescent Society to assess damage and help coordinate assistance from Red Cross societies worldwide.

The head of the Tehran University Geophysical Center said the aftershocks could continue for two months before dying down. Bahram Akkasheh said the quake was along a roughly V-shaped fault in the Alborz mountain range sporadically active for at least 2,000 years.

#90178u0640 06/27/1990 ~United Press International

(JUNE 27) UPI - The second biggest armored car heist in U-S history... President Bush abandons his no-tax pledge... Nelson Mandela heads for the South... those stories and more, coming up next from U-P-I.

The F-B-I has been called in to help investigate the second largest armored car robbery in American history.

The 10-point-eight-Million-dollar heist took place in suburban Rochester, New York, when two guards stopped for coffee at a convenience store.

Said Sheriff's department Captain Neil Flood- ''I can tell you that it was obviously well-planned and successfully executed.''

Authorities say the two Armored Motor Services of America guards were taking the cash to the Federal Reserve Bank in Buffalo when they stopped at a store yesterday in the Rochester suburb of Henrietta.

Officials say that after the first guard entered the store, a gunman accosted the driver by jamming a shotgun through a gunport in the truck. The first guard was grabbed when she returned to the vehicle with coffee and sandwiches.

The gunman forced the two to drive to a wooded area about one-half mile from the store where they they were met by at least one other man. The gunmen tied the guards with tape and transferred the contents of the truck

to a van.

Officials say the stop for food and coffee was NOT part of a regular routine.

Police say they do NOT know whether the crime was an inside job.

The largest armored car heist in U-S history occurred in the Bronx in 1982 when 11-Million dollars was stolen from Sentry Armored Car-Courier.

White House and congressional negotiators will resume their budget summit talks today with their impasse apparently over.

President Bush probably broke the log-jam yesterday when he abandoned his ''NO new taxes'' campaign pledge.

Bush said it has become clear that what he termed ''tax revenue increases'' are needed to battle the soaring deficit. Bush insisted that taxes be just one part of a comprehensive deficit-reduction package.

In announcing his change of mind, Bush said it's vital that the budget talks progress immediately.

Republicans promised a partisan battle against any tax hikes. They insisted that the president was merely repeating his promise to Democrats that all options- including taxes- are on the negotiating table.

The Democratic presidential nominee in 1988... Massachusetts Governor Michael Dukakis... says he has been vindicated for his failure to rule out tax increases. As Dukakis put it- ''I told the truth and I paid the price.''

Democrats generally applauded Bush's statement and said it opened the door to serious deficit talks.

#90178u0642 06/27/1990 ~United Press International

(JUNE 27) UPI - South African black leader Nelson Mandela is leaving Washington today with a prediction of more congressional support for maintaining U-S sanctions against South Africa.

In a speech to Congress yesterday, Mandela said too many white South Africans are steeped in the ideology of racism to admit easily that change must come.

Senator Edward Kennedy said Mandela's speech clearly increased support on Capitol Hill for continued U-S sanctions against the white minority

government.

Mandela plans to leave Washington for Atlanta and travel to Miami later in the day.

In Atlanta, Mandela will lay a wreath at the grave of Martin Luther King Junior. One of King's former associates, Hosea Williams, will argue for Mandela to embarce non-violence as King did.

Williams also scheduled what he calls a ''poor people's liberation march'' during Mandela's visit. Williams says only people with money will hear Mandela speak in Atlanta.

Mandela won't be welcomed with unanimously open arms in Miami. The Florida governor and Cuban-American mayors in the area have denounced him for his support of Cuban President Fidel Castro. And... Jewish groups in Florida have objected to Mandela's praise for P-L-O leader Yasser Arafat.

The Iranians are celebrating their first miracle from last week's devastating earthquake that killed at least 50-thousand people.

An Iranian relief worker said in Tehran that 15 survivors were found under tons of rubble in the remains of the town of Manjil , about 140 miles northwest of Tehran. One report says one of the survivors was a six-year-old boy.

But despite this good news, the official Iranian news agency says the chances of finding anyone still living underneath the debris are rapidly fading.

Last Thursday's earthquake measured a staggering seven-point-seven on the Richter scale... devastating scores of towns and villages between the Caspian Sea and Zanjan province in northwestern Iran.

NO new casualty figures were released by Iran, but Iran's ambassador to the United Nations says the death toll is at least 50-thousand. Iran's Central Relief Headquarters put the figure at nearly 37-thousand... and the official news agency put total casualties at 80-thousand dead and injured.

The Red Cross says one-half Million people are homeless.

Diplomats say French relief teams decided to pull out of the disaster area because there was little for them to do. Other relief teams, including those from West Germany, Czechoslovakia and the Soviet Union, also are pulling out.

-30- 2748
#90178u0746 06/27/1990 ~United Press International
(JUNE 27) UPI - Two tornadoes hit North Dakota last the night as thunderstorms rolled across the Plains. Emergency officials in Dunn County North Dakota, say the tornado blew a sheriff's vehicle off the road as it moved through the western part of the state. A second tornado was reported near White Earth in northwestern North Dakota last night. NO serious damage was reported in either case.

In the Southwest, record hot weather is sending temperatures well into triple digits. The heat is contributing to a wildfire in an Arizona national forest that killed six volunteer firefighters yesterday. Officials say the firefighting crew from a state prison was killed when the fire jumped fire lines in Tonto National Forest. Five of the six were prison inmates.

President Bush has abandoned his ''NO new taxes'' campaign pledge and, in doing so, is drawing strong criticism from fellow Republicans. Bush met with top congressional leaders at the White House yesterday to prevent the collapse of a budget summit. Bush later issued a statement saying it was clear that what he called ''tax revenue increases'' are needed to battle the soaring deficit.

In Boston, the Democrat who ran against George Bush in 1988... Massachusetts Governor Michael Dukakis... appeared vindicated by Bush's statement. Upon hearing that Bush had broken his NO new taxes pledge... Dukakis said- quoting here- ''I told the truth and I paid the price.'' Dukakis refused during the 88 presidential campaign to rule out a tax hike to cut the deficit.

#90178u0758 06/27/1990 ~United Press International
(JUNE 27) UPI - Nelson Mandela flies to Atlanta this morning for the next leg of his U-S tour. In Atlanta, Mandela is to lay a wreath at the grave of Martin Luther King Junior... prompting one King associate to argue that Mandela should embrace non-violence as King did. Mandela told Congress yesterday that the violence is necessary to secure rights for blacks in South Africa.

The push for a constitutional amendment to ban desecration of the American flag is over in Congress... at least for this year. But lawmakers can rest assured they have NOT heard the end of the issue... which NO doubt will haunt their re-election campaigns in November. The Senate, in a symbolic vote yesterday, rejected a proposal to amend the Constitution to ban flag desecration.

The man who assassinated Senator Robert Kennedy 22 years ago this month

lost his 13th bid for parole yesterday. California corrections official David Brown said Sirhan Sirhan- quoting here- ''does NOT appreciate the magnitude of the crime.'' The Jordanian-born Sirhan begged the parole board to let him return to his homeland. Officials told Sirhan he could try again in two years.

Police arrested and expelled 246 British soccer fans yesterday after running street battles in the city of Rimini. The British fans clashed early yesterday with Italian fans who were celebrating their country's victory over Uruguay in World Cup soccer competition. Police sent the Brits home on a chartered aircraft. 20 fans from both sides were hospitalized for minor injuries.

#90178u0785 06/27/1990 ~United Press International

WASHINGTON (JUNE 27) UPI - The government's Index of Leading Economic Indicators shot up 0.8 percent in May after tumbling 0.1 percent in April, the Commerce Department reported Wednesday.

Private analysts anticipated a 0.7 percent jump in the index that predicts future economic activity.

Analysts at Fuji Securities in Chicago said the report ''foreshadows further sluggish economic growth, but it does not portend recession.''

Of the 11 components that make up the closely watched index, seven advanced last month and four declined, according to the report compiled by the department's Bureau of Economic Analysis.

On the positive side: average workweek, change in sensitive materials prices, manufacturers' new orders for consumer goods and materials, stock prices, average weekly initial claims for state unemployment insurance, vendor delivery time, and contracts and orders for plant and equipment.

On the negative side: consumer expectations, money supply, building permits, and change in manufacturers' unfilled orders.

The index itself stood at 146.2 in May and 145.1 in April.

The Commerce Department said that April's 0.1 percent decline was revised from a 0.2 percent fall originally reported last month, and follows a 1 percent surge in March.

''The monthly change in the leading indicators continues to follow a one-step forward one-step back pattern,'' economists said at Mitsubishi Bank in New York. ''However ... the economy is slowly showing signs of moving away from the risk of recession.''

A government spokesman said for the last six months the index advanced 1.1 percent after edging up 0.3 percent for the previous six-month period. Over the last 12 months it leaped 1.4 percent, after gaining 1.7 percent in the previous 12-month period, the spokesman said.

The composite index of coincident indicators, a monthly approximation of aggregate economic activity, increased 0.1 percent in May, while the composite index of lagging indicators dropped 0.2 percent, the department said.

#90178u0791 06/27/1990 ~United Press International

BEIJING (JUNE 27) UPI - President Yang Shangkun, who controls China's military and is a close ally and possible successor to senior leader Deng Xiaoping, has been hospitalized and operated on for acute appendicitis, officials said Wednesday.

The official Xinhua news agency said in a brief dispatch the 83-year-old Yang, one of China's most powerful leaders, could not attend a welcoming ceremony for a visiting dignitary because he was hospitalized Monday with ''acute appendicitis.''

A Foreign Ministry spokesman confirmed the report and said Yang underwentsurgery. The domestic China News Service reported that Premier Li Peng visited Yang in the hospital and reported him ''in good condition and recovering.''

Li was meeting with Chadian President Hissen Habre. Yang, as the country's ceremonial president, customarily greets such visitors.

Vice President Wang Zhen, who stood in for Yang at Habre's welcome ceremony, was quoted by the China News Service as telling Habre that although Yang is elderly, ''everything was very normal after the operation - heart, pulse, blood pressure.''

Yang has reportedly been one of the healthiest of the aged revolutionaries who wield ultimate power in China. He appeared robust in recent public appearances and made a 10-day trip to Latin America in late May.

Although his presidency is ceremonial, Yang is also a member of the Communist Party Politburo's ruling six-man Standing Committee, the pinnacle of party authority. He played a key role in the crackdown last year on the democracy movement.

He was shown on national television next to Li Peng when the premier made a crucial May 19, 1989, speech signaling the imposition of martial law.

The order took effect the next morning. Two weeks later, armed troops killed hundreds and possibly thousands of enraged citizens while clearing Tiananmen Square, the focus of the student-led protests.

Yang is also deputy chairman of the party's Central Military Commission, a position that affords him effective control of the country's 3-million-strong People's Liberation Army, despite his second billing.

Critics have accused Yang of trying to build a dynasty within the military. His younger brother, PLA political commissar Yang Baibing, was recently promoted to secretary general of the Central Military Commission.

The military commission chairmanship is held by Communist Party chief Jiang Zemin, who was picked by Deng but lacks military experience and has no power base in the army.

Yang, a stocky, balding general, is a veteran of the 1934-35 Long March and a close ally of Deng. Both were purged during the tumultuous 1966-76 Cultural Revolution but returned to power in 1978.

Yang's military clout makes him a likely successor to Deng when the 85-year-old senior leader dies but Western diplomats said the illness did not necessarily mean a change in the leadership's factionally split power equation.

''If he's sick in a way that he's not expected to work for a long time, it could affect the leadership,'' a Western diplomat said. ''But if he's up and around soon, it'll go away as a factor. The people loyal to him are also loyal to Deng.''

Yang's stint as political commissar in the army during its battles against the Nationalist government and the invading Japanese army during the 1930s and 40s gives him immense prestige in the military but by no means guarantees support in the ranks.

Despite grudging respect afforded Yang for his age and experience, Chinese military sources say there is widespread resentment of him among the armed forces. The younger Yang's promotion was regarded as evidence of the army's renewed emphasis on political indoctrination over professionalism.

Born into a wealthy landlord family in 1907, Yang joined the Chinese Communist Party at 18 and served under Chairman Mao Tse-tung.

When the tenuous alliance between the Communists and president Chiang Kai-shek's Nationalist government broke down in the 1940s, Yang went to Moscow as a student at Sun Yat-sen university.

He returned to China to serve in a variety of top party and military posts throughout the communists' arduous battle to power in 1949.

-30- 4443

#90178u0811 06/27/1990 ~United Press International

(JUNE 27) UPI - Another day of record heat loomed Wednesday in the Great Southwest and Southern California, where century-mark temperatures caused problems for people and animals and turned forests into tinderboxes.

Phoenix set an all-time heat record Tuesday at 122 degrees, as did Los Angeles at 112 degrees. ''We couldn't believe it,'' said Los Angeles forecaster David Gomberg.

The National Weather Service said at least 24 U.S. cities reached the 100-degree mark.

It was 105 in Lubbock, Texas, as the city tied its record of 17 days of 100-plus readings in a single month, set in July 1940.

Salt Lake City tied a record set in 1961 for consecutive June days with 100-degree or higher readings. The high Tuesday at Salt Lake International Airport was 102 degrees, the fourth consecutive 100-plus day, but relief was in sight.

''It looks like it's going to be a hair cooler today - somewhere in the upper 90s,'' said forecaster Bill Alder. ''We got a little cooler air coming in last night.''

The weather service offered no mercy elsewhere Wednesday, with forecasts of ''very hot'' for areas surrounding Phoenix, Dallas and Las Vegas. At 3 a.m. it was already 95 in Phoenix.

Power companies in Phoenix, San Diego and Las Vegas asked customers to set their air conditioner thermostats 2-3 degrees higher than normal and not to use ovens, electric hot water heaters, stoves, dishwashers, dryers or other major appliances until early evening.

Phoenix Fire Department Capt. Susan Dodt said paramedics responded to at least 50 heat-related calls Monday and Tuesday.

''A lot of the calls were elderly people who are afraid to turn their thermostats down and get overheated,'' Dodt said. ''Some are construction workers who are out working in the sun. Then we have the weekend athlete who doesn't have enough sense to stay indoors at this time of year.''

Wildfires claimed lives and destroyed forests in Arizona, New Mexico, Texas, Utah, southern California and New Mexico as relentless sun turned

undergrowth to tinder. Six firefighters died fighting a wildfire in the Tonto National Forest in central Arizona and flames threatened rare bears and falcons in the wilderness of New Mexico and Texas.

Two tornadoes hit North Dakota during the night as thunderstorms rolled across the Plains early Wednesday. No significant damage was reported from either one but emergency officials said one of them blew a Dunn County sheriff's vehicle off the road.

Early Wednesday, thunderstorms extended from west of Bismarck, N.D. to the eastern border at Fargo and north to Devils Lake.

The weather service reported thunderstorms producing small hail and heavy rain were moving through through the western part of the state and thunderstorms also were reported through Nebraska and into Iowa.

Clouds hung over Boston, although skies over most of the rest of New England were clear. Temperatures at 2 a.m. ranged from a chilly 58 degrees in Bangor, Maine, to 69 degrees in Boston.

Some thunderstorms were widely scattered in deep south Texas and eastern Colorado, while others moved from New Mexico into the Texas Panhandle and Oklahoma. Skies were clear to partly cloudy in the rest of the Southwest.

The eastern half of the mid-Atlantic states enjoyed clear skies Wednesday morning as scattered clouds covered the rest of the region.

#90178u0863 06/27/1990 ~United Press International

(JUNE 27) UPI - Japanese officials and economic analysts are welcoming President Bush's willingness to raise taxes to trim the U-S deficit. But some in Tokyo doubt Congress will co-operate. The tax proposal could benefit the trade talks under way in Tokyo.

One law enforcement official in Rochester, New York, says an armored car heist was obviously well planned and executed. Thieves made off with 10-Million 800-thousand dollars from the Armored Motor Services of America.

The Democratic nominee for governor in Alabama is teacher's lobbyist Paul Hubbert. He defeated Attorney General Don Siegelman yesterday in a run-off. Hubbert will face Republican Governor Guy Hunt in the November election.

President Bush says he will delay all oil drilling off the shores of California for at least six years and defer any development off the Florida Keys for 10 years. Bush says eight sales and leases are being canceled.

Both environmentalists and oil companies are critical of the president's decision to halt new drilling off the California coast. The environmentalists want a permanent halt. The oil companies say it will require the U-S to import more foreign oil.

Oil industry officials say oil production, halted by volcanic eruptions earlier this year, resumed yesterday in Alaska's Cook Inlet. Plus, an oil rig arrived to drill the first offshore exploratory well in the inlet in six years.

Preliminary studies show some success with experimental spraying of Alaska's beaches with a fertilizer that stimulates the growth of oil-eating micro-organisms. The fertilizer appears to be working on the Alaska oil spill.

China said today President Yang Shankung has undergone surgery for acute appendicitis. The government says Yang is in good condition and recovering. Yang is 83 years old.

WASHINGTON (JUNE 27) UPI - The government's Index of Leading Economic Indicators shot up 0.8 percent in May after tumbling 0.1 percent in April, the Commerce Department reported Wednesday.

Private analysts anticipated a 0.7 percent jump in the index that predicts future economic activity.

Analysts at Fuji Securities in Chicago said the report ''foreshadows further sluggish economic growth, but it does not portend recession.''

Of the 11 components that make up the closely watched index, seven advanced last month and four declined, according to the report compiled by the department's Bureau of Economic Analysis.

On the positive side: average workweek, change in sensitive materials prices, manufacturers' new orders for consumer goods and materials, stock prices, average weekly initial claims for state unemployment insurance, vendor delivery time, and contracts and orders for plant and equipment.

On the negative side: consumer expectations, money supply, building permits, and change in manufacturers' unfilled orders.

The index itself stood at 146.2 in May and 145.1 in April.

The Commerce Department said that April's 0.1 percent decline was revised from a 0.2 percent fall originally reported last month, and follows a 1 percent surge in March.

''The monthly change in the leading indicators continues to follow a one-step forward one-step back pattern,'' economists said at Mitsubishi Bank in New York. ''However ... the economy is slowly showing signs of moving away from the risk of recession.''

A government spokesman said for the last six months the index advanced 1.1 percent after edging up 0.3 percent for the previous six-month period. Over the last 12 months it leaped 1.4 percent, after gaining 1.7 percent in the previous 12-month period, the spokesman said.

The composite index of coincident indicators, a monthly approximation of aggregate economic activity, increased 0.1 percent in May, while the composite index of lagging indicators dropped 0.2 percent, the department said.

#90178u0891 06/27/1990 ~United Press International

TEHRAN, IRAN (JUNE 27) UPI - Seismologists recorded a cluster of aftershocks overnight in northwestern Iran, where two women and a boy were found alive under the rubble of a village destroyed by last week's massive earthquake, the official news agency said Wednesday.

The Islamic Republic News Agency said a 40-year-old woman and her 12-year-old son were found injured Tuesday under the rubble in the village of Kelishom and taken immediately to hospital.

The third survivor, a woman, was found uninjured in the same area Tuesday, said the dispatch from Roudbar, about 145 miles northwest of Tehran.

The news agency gave no more details and did not name the survivors, who were the latest found in the rubble left by the earthquake that measured 7.7 on the Richter scale last Thursday.

The Red Crescent organization, Iran's equivalent of the Red Cross, put the casualty count at 40,000 dead and 50,000 injured, but Iran's ambassador to the United Nations said Monday the death toll was at least 50,000.

The Geophysics Institute of Tehran University said at least 50 aftershocks including three temblors measuring more than 4 on the Richter scale, were recorded between Tuesday night and early Wednesday in quake-stricken villages and towns.

''The tremors followed the Thursday's devastating earthquake which claimed 100,000 casualties, turned into ruins vast fertile areas and made over half a million homeless in Gilan and Zanjan provinces in northern and northwestern Iran,'' the Iranian news agency reported.

It said at least 350 aftershocks have been registered since last Thursday.

Despite reports that 15 other people were found alive Monday in the town of Manjil, international relief workers said Tuesday they were winding down their search for survivors. Relief work was expected to continue.

In contrast, the Iranian news agency said the discovery of the latest survivors encouraged Iranian rescue teams to redouble their efforts. Iranian volunteers using bulldozers and other means continued clearing the rubble from several quake-hit towns and some 1500 villages.

The International Red Cross said half a million people were left homeless, and Iran has said it would gladly accept help from abroad in the form of prefabricated housing and architects to assist in rebuilding some of the destroyed towns.

Tehran radio said helicopters were dropping relief supplies to survivors in villages in the Alborz Mountains still inaccessible by road.

The Iranian news agency said 39 more military and civilian aircraft carrying relief supplies from 19 countries landed at Tehran's Mehrabad Airport Tuesday, bringing to 171 the number of relief flights arriving in Iran since Thursday.

Despite their strained relations, the United States donated $291,000 in relief supplies including blankets, tents, water jugs and rescue equipment.

Iran's acceptance of assistance from the United States touched off a controversy in the hard-line Iranian press that continued Wednesday. But almost all Iranian newspapers have expresed gratitude to countries that sent help.

The English-language newspaper Kayhan International, which normally takes a hard-line stance, blasted the daily Jomhuri Islami, which Sunday urged the government to reject U.S. supplies. Kayan International said Tuesday that Iranian newspapers ''should not lose sight of the fact that what they write may have an adverse impact on the lives of hundreds of thousands of people.''

Diplomatic sources said French relief teams with a total of 205 doctors, medics and other personnel, decided to pull out of the disaster area because there was little for them to do. Included in the French team were animal trainers who succeeded in finding several survivors under the rubble.

Other relief teams, including those from West Germany, Czechoslovakia and the Soviet Union, were also pulling out.

The Red Cross continued to appeal for donations and readied to airlift more emergency supplies to quake-stricken areas.

It also said an 11-member International Red Cross team is visiting disaster areas with the Iranian Red Crescent Society to assess damage and help coordinate assistance from Red Cross societies worldwide.

The head of the Tehran University Geophysical Center said the aftershocks could continue for two months before dying down. Bahram Akkasheh said the quake was along a roughly V-shaped fault in the Alborz mountain range sporadically active for at least 2,000 years.

(JUNE 27) UPI - The Tokyo Stock Exchange staged a strong rally Wednesday, with the leading indicator gaining more than 2 percent on institutional buying.

The Nikkei Stock Average of 225 selected issues surged 740.98 points, to close at 32,312.75, a 2.3 percent gain from Tuesday. The index had already gained 447.48 points Tuesday.

The Tokyo Stock Price Index of all major shares rose 39.05 point to end the day at 2,362.40. TOPIX had gained 22.33 points Tuesday.

Volume, estimated at a moderate 600 million shares, was well above the levels seen in recent weeks. During Tuesday's rally, only 396.46 million shares changed hands.

Elsewhere in Asia, stock prices lost ground in moderate trading on the Hong Kong Stock Exchange, with late profit taking ending an eight-session winning streak.

The Hang Seng Index shed 7.88 to close at 3,284.47. The drop followed a gain of 15.91 points Tuesday and was the first losing session since June 13.

Volume remained strong at 2.01 billion shares, but was down from Tuesday's turnover of 2.46 billion.

Prices rose on the Singapore Stock Exchange in sympathy with the surge in Tokyo and renewed interest by institutional investors.

The Straits Times Industrial Index rose 9.66 to close at 1533.25, with the biggest advance recorded in the afternoon following Tokyo's strong performance.

The All Singapore Index rose 9.29 points to close at 439.91.

Volume was 86.95 million units.

On the Sydney Stock Exchange, share prices softened after five days of gains, as investors remained cautious ahead of the release of major corporate results.

The All Ordinaries index shed 8.8 points to close at 1,504.3.

The national turnover was 110 million.

TOKYO (JUNE 27) UPI - Trade talks with Japan have snagged and the United States wants Japanese political leaders to get involved, a senior U.S. administration official on the negotiating team said Wednesday.

''We have said that we needed political input on both sides at higher levels than the negotiators,'' he told reporters at a briefing.

President Bush already made an important contribution to the talks by announcing Tuesday he will consider new taxes to cut the federal deficit, the official said.

The Structural Impediment Initiative talks, which are aimed at easing the nearly $50 billion trade imbalance between the two nations, were nearing a Thursday noon deadline with numerous issues unresolved, the official said.

He said the talks would end by noon Thursday, whether or not agreement was reached, but left open the possibility that they could resume shortly in the United States.

Among the remaining problems was the level of Japanese spending on public works, he said.

The U.S. side has been asking Japan to commit itself to spend $3.2 trillion on improving the nation's infrastructure.

The United States says this will increase Japan's imports and contribute to reducing its trade surplus. Japan says that spending more than $2.7 trillion would seriously worsen inflation.

The difference in figures has become a serious sticking point, one that the United States wants political leaders to resolve.

''We have heard no new number. We have not reached tentative agreement on any public investment numbers,'' said the senior U.S. official.

President Bush's ''political courage'' in offering to consider new tax revenues to cut the federal deficit should be matched by Japanese leaders on the public works issue, he suggested.

''We suggested it took somewhat more political courage to be willing to raise revenue than to increase public spending. They understood our point '' he said.

Among the unresolved areas Thursday evening were U.S. requests on Japan's exclusive business groupings, its antitrust penalties, and follow-ups to the SII talks.

Japan's requests on U.S. savings and investment patterns and its export controls on technologically sensitive items were also not fully resolved, he indicated.

But he said the talks remained cooperative and friendly.

Additionally, he said major progress had been made in several areas, including reform of the distribution system in Japan and the education system in America.

#90178u0931 06/27/1990 ~United Press International

CHICAGO (JUNE 27) UPI - The American Medical Association has rejected an attempt by the Illinois State Medical Society to muzzle the editor of the Journal of the American Medical Association.

The AMA's House of Delegates Tuesday overwhelmingly voted in favor of the journal's continued independence.

''The worst thing that could happen, if a proposal like this ever passed, is the loss of the journal's credibility,'' said Dr. George Ludenberg, editor of JAMA. ''By following a political agenda over a scientific one, we would lose the respect of our contributors and, most importantly, our readers.''

Ludenberg said only by allowing self-criticism within the journal's pages can the AMA serve the public interest.

The Illinois State Medical Society was angered by several JAMA editorials that criticized doctors and called for a censorship panel to review such material.

''We feel the editor should be responsible in some degree to the journal's publisher and owner,'' said Dr. James Anderson, president of the Illinois State Medical Society. ''The editorials not only have created controversy but have provided the basis for the public press to denigrate the profession and the practice of medicine.''

The Illinois society most recently was angered by a JAMA editorial that said, ''Physicians are not immune to the ... green virus,'' meaning money.

''That implied that doctors are impaired by greed without putting any balance or perspective to the article,'' Anderson said.

#90178u0978 06/27/1990 ~United Press International

MONROVIA, LIBERIA (JUNE 27) UPI - Troops opened fire to block a march in the capital by demonstrators demanding the resignation of President Samuel Doe Wednesday and several people were injured by the gunfire, witnesses and diplomats said.

A U.S. Embassy official said several injuries from gunfire were confirmed but no deaths immediately could be confirmed after the incident.

After the troops opened fire, soldiers went on a shooting spree in the streets of Monrovia, firing submachine guns wildly to disperse demonstrators, said the U.S. Embassy official.

By early afternoon, the situation appeared to be calming down as citizens began to creep onto the streets to try and find their way home.

Tension has been mounting in Monrovia, which is bracing for a rebel attack after talks between the rebels led by Charles Taylor, and Doe's government

broke down in Freetown, Sierra Leone, last week.

Monrovia has been living under an uneasy peace as the rebels and the government tried to find a peaceful agreement to the conflict. But with the collapse of the talks, the possibility of a rebel attack on the capital has become more likely, Liberian political analysts said.

Thousands of Liberians fearing a bloodbath in the the streets of the capital between Doe's military forces and the rebels have fled the capital for neighboring Sierra Leone or sought refuge at a Voice of America relay station near Careysburg, about 20 miles northeast of Monrovia, witnesses said.

About 4,000 people were seeking refuge at the Voice of America relay station, according to reports from the scene. Careysburg is controlled by the rebels.

SHADYSIDE, OH (JUNE 27) UPI - The death toll in flash flooding that hit eastern Ohio June 14 rose to 24 with the discovery of another body near the Hannibal locks on the Ohio River.

The body of James West was found among debris at the locks, said coroner's investigator Chris Vogt. At least two other people still are missing.

West's body was recovered by West Virginia State police troopers and New Martinsville, W.Va., firefighters, said Francesca Di Cosmo, community relations coordinator for the U.S. Environmental Protection Agency.

Meanwhile, two cranes have cleared about 60 percent of the estimated 15 acres of debris that washed about 25 miles down the Ohio River to a dam from creeks in the Shadyside area.

Di Cosmo said the debris includes several propane and oil containers in addition to unknown substances that will be tested to determine how to dispose of them.

#90178u1019 06/27/1990 ~United Press International

ATLANTA (JUNE 27) UPI - Cable television magnate Ted Turner, who is already worth millions, got a 66 percent salary increase in 1989, boosting his yearly pay to $729,952, Turner Broadcasting System said Wednesday.

Turner's 1989 salary included a $197,513 bonus and $53,000 for personal tax, legal and accounting services, according to Turner Broadcasting's proxy statement.

Last year, Turner Broadcasting paid Turner $440,649. Turner owns 30.6

million shares of the cable company's outstanding stock, worth about $1.5 billion.

Turner's salary increase was the result of a ''Turner Incentive Plan'' adopted by the company's board of directors in 1989.

''The plan is designed to provide certain key employees with incentives to achieve goals that will have a direct and significant influence on corporate performance,'' said TBS's proxy statement.

Turner Broadcasting also said it will ask shareholders on July 23 to approve a plan that would increase the number of authorized stock, giving the company more financial flexibility.

Turner proposes to triple the number of authorized shares of its Class A common stock from 25 million shares to 75 million shares, and double Class B shares from 150 million to 300 million, according to the proxy statement.

That would enable Turner to declare a stock split, increasing the marketability of its stock, which trades relatively thinly.

The move also would give the company more flexibility in making stock-based acquisitions, analysts said. The Class A stock closed Tuesday at $49.50; Class B at $48.87 1/2. Turner shares trade on the American Stock Exchange.

The moves would not dilute Ted Turner's majority voting control in the company, the proxy statement said. While Turner currently owns 39.7 percent of the company's outstanding ccent of the voting power.

Turner Broadcasting proposes to use the increased number of Class B shares to give it more flexibility to make financial transactions, without decreasing Turner's voting power.

#90178u1022 06/27/1990 ~United Press International

HOUSTON (JUNE 27) UPI - A federal judge has placed a $6.8 million price tag on four watercolors painted by a young Adolf Hitler and photographic archives of pre-war Europe and Nazi Germany.

In findings released Tuesday, U.S. District Judge Lynn Hughes also determined that the items, seized by the U.S. Army, could have produced more than $1.1 million in income during years of legal wrangling over their ownership.

Hughes's numbers were considerably less than the $30 million-plus value Billy Price of Houston placed on the items, but considerably more than the

zero value the federal government calculated.

Hughes issued his findings in a lawsuit challenging ownership of the paintings and two photographic archives the Army seized from a Bavarian castle in May 1945. Since that time, the federal government has claimed ownership of the property, which was brought to the United States in the 1950s.

But ownership also was claimed by the family of Heinrich Hoffmann, who operated a photographic business in Europe before and during World War II and who was given the paintings by Hitler.

Price, a collector of Hitler's works, helped the Hoffman family locate the watercolors and photographs in the early 1980s. He later bought an interest in the items from the family, and has been battling the government for their possession ever since.

Hughes ruled last year that the government had no right to the items. His decision is believed to have been the first ruling in favor of a U.S. citizen claiming ownership of articles captured in war by the Army.

Hughes' ruling on the value of the items clears the way for Price to seek a final judgment awarding him monetary damages, said Larry Campagna, one of Price's attorneys.

-30- 1946

#90178u1055 06/27/1990 ~United Press International

NEW YORK (JUNE 27) UPI - Shearson Lehman Hutton Inc. confirmed Wednesday it has reached a severance pact with its former chairman that will pay him $2.6 million plus deferred compensation that could bring the value of the deal to at least $10 million.

The beleagured brokerage ousted Peter A. Cohen, a 20-year veteran of the firm, as chairman and chief executive officer in a major shake-up orchestrated by Shearson's parent, American Express Co.

According to sources familiar with the agreement, the deal bars Cohen from suing all directors and officers of American Express and Shearson, as well as their families.

"We believe it is a fair and equitable settlement that recognizes Mr. Cohen's signficant contributions over 20 years of dedicated service," Gary Beller, American Express' general counsel, said in a statement.

Despite its position as the nation's second-largest brokerage, Shearson had stumbled financially after acquiring ailing E.F. Hutton & Co. for $1 billion in 1988. In another major blow, the firm was part of a group that

bid unsuccessfully for RJR Nabisco Inc. during a vitriolic takeover battle two years ago.

As part of the corporate divorce, Cohen will remain on the payroll as a consultant to Shearson until March 1991. Those familiar with the deal said Cohen will be able to exercise stock option and grants - issued as long as ten to 15 years ago - that could bring his total severance compensation to at least $10 million.

#90178u1078 06/27/1990 ~United Press International

WASHINGTON (JUNE 27) UPI - The Supreme Court ruled Wednesday that the Postal Service can ban solicitation from sidewalks on postal property.

The court, in a 5-4 decision by Justice Sandra Day O'Connor, upheld the policy in a case from Maryland. O'Connor said the policy ''passes constitutional muster under the court's usual test for reasonableness.''

In dissent, Justice William Brennan, joined by Justices Thurgood Marshall, John Paul Stevens and Harry Blackmun, said the postal regulation was unreasonable and that the sidewalk in question was a ''public forum.''

''Some postal patrons may thank the court for sparing them the inconvenience of having to encounter solicitors with whose view they do not agree,'' Brennan said.

He added, though, that those ''who are conscious of the importance of the First Amendment'' will be ''saddened.''

At issue was whether a ban on such activities as leafletting and fund raising on postal property violated the First Amendment guarantee of freedom of speech.

The case began in August 1986 when Marsha Kokinda and Kevin Pearl set up a card table near the entrance of a post office in Bowie, Md., to pass out literature and solicit contributions for the National Democratic Policy Committee, an organization associated with political extremist and convicted felon Lyndon LaRouche.

After complaints, postal workers asked them to leave the premises, but they refused and were charged with trespassing on postal property. Kokinda was fined $50 and sentenced to 10 days in jail and Pearl fined $100 and given 30 days, which was suspended.

However, the appeals court eventually overturned the convictions and held the postal regulation violated the First Amendment. The court said that the sidewalk was a ''public forum'' and the two could not be barred from

using it for political speech.

Seeking high court review, the government said the ''court of appeals in this case was mistaken in identifying the access walkway surrounding the Bowie Post Office as a traditional public forum.''

(JUNE 27) UPI - The government's chief set of signs about how the economy is going to do in the future shows it will do well. The Commerce Department reports the Index of Leading Economic Indicators went up eight-tenths of one percent in May. The increase is one-tenth of one percent more than what private analysts had predicted. Last month, seven of the 11 components of the index advanced. The other four declined. The index went down one-tenth of one percent in April.

The budget summit will resume today with a new impetus toward agreement. The impetus is thanks to President Bush, who has backed off on his campaign pledge of ''NO new taxes.'' Democratic congressmen involved in the budget talks say it will help a great deal in reaching an agreement between Congress and the White House on how to cut the nation's deficit. In Tokyo, Japanese leaders say the president's change of mind may also help trade talks.

A dispute in the Bush administration has prevented Health Secretary Louis Sullivan from announcing the specifics of his proposed food labeling rule. The dispute is over federal pre-emption of state laws. A source says Sullivan had hoped to make the announcement yesterday. But he was limited to presenting just an outline. The Center for Science in the Public Interest says the proposed regulations are inadequate.

An appellate court has ordered an end to a 20-year-old lawsuit. It tried to force the government to police federally funded schools that discriminate against women, minorities and the handicapped. The court in Washington says that victims of discrimination should consider filing suits against individual institutions... rather than against the government.

DUBLIN, IRELAND (JUNE 27) UPI - In the truest diplomatic tradition, everyone got half a loaf at a two-day European Community summit.

The European heads of state could all claim success on the questions of South African sanctions, aid to the Soviet Union and moves toward European integration.

British Prime Minister Margaret Thatcher crowed that the EC heads of state meeting in Dublin softened their stance on sanctions against South Africa. Her Irish counterpart, Prime Minister Charles Haughey, proudly proclaimed that the sanctions remained.

''Thatcher claims victory as community eases sanctions,'' proclaimed one London newspaper headline on Wednesday.

''EC stands firm on sanctions,'' said another.

In fact, the 12 heads of state, who wrapped up the summit Tuesday, said they would ''consider a gradual relaxation'' of sanctions ''when there is further clear evidence that the process of change already initiated continues.''

A significant softening, to be sure, but the sanctions remain. Half a loaf.

The EC leaders agreed with French President Francois and West German Chancellor Helmut Kohl that the faltering Soviet economy needs bolstering from the West, but declined to approve their proposal for an emergency $15 billion aid package.

Instead, the EC executive Commission will study the Soviets' needs for short-term credits and long-term structural aid, and report back to the heads of state at a special summit in October.

''A clear signal has been given and there is no reason for disappointment '' said Mitterrand.

Thatcher, who said aid to the Soviets would be wasted unless free-market programs were first implemented, also claimed victory. ''I favor support for economic reform but there has to be reform to support,'' she said.

The issue is expected to be argued again at a summit of the seven leading industrial democracies in Houston next month. President Bush takes the same position as Thatcher.

Meanwhile, European federalists like Kohl and Mitterrand won their bid to launch a special constitutional convention, on Dec. 14 in Rome, to forge an as-yet-undefined ''political union'' in the EC.

Thatcher, a fierce defender of national sovereignty, grudgingly went along with the decision to hold the convention, but succeeded in fine-tuning the agenda.

Kohl and Mitterrand can claim their dreams of a ''United States of Europe'' are moving closer to fulfillment, while Thatcher said Britain had

''struck a chord in the minds of most people'' on the need to preserve national identities, so ''you'll find that political union proposals are comparatively small.''

Finally, even those who sought an old-fashioned political row at the summit did not come away empty-handed. While the meeting's mood was far less confrontational than most, Mitterrand got in a zinger at the end - predictably aimed at Thatcher.

''You can always depend on her to make the discussion extremely long and to ensure that decisions once taken have to be retaken,'' the French president said.

(JUNE 27) UPI - Police in South Africa report two grenade explosions during the night. One grenade exploded outside a police station and damaged a patrol car in a black township near Cape Town. The other grenade blew up in front of a police officer's house in a township near Johannesburg. Police say NO one was hurt. No one claimed responsibility for the attacks, which a police statement condemned as ''cowardly.''

An attorney for former Philippine first lady Imelda Marcos says she's innocent of federal racketeering charges. In his closing argument, attorney Gerry Spence declared that Mrs. Marcos- in these words- ''committed NO crime but loving a man for 35 years, raising his children'' and receiving ''lavish gifts.'' The New York trial is expected to resume today with closing arguments for her co-defendant, Adnan Khashoggi.

A federal appeals court has barred award-winning prisoner-journalist Dannie Martin from working as a reporter or receiving bylines. The court in San Francisco upheld the constitutionality of federal prison rules forbidding inmates from working and receiving payments as reporters and from receiving bylines. The convicted bank robber has written articles about prison life for the San Francisco Chronicle.

A judge sent a speeding boater up the river... literally... in Florida. Citrus County Judge Gary Graham in Inverness is known for his stiff and sometimes outrageous sentences. Graham ordered a man caught speeding in a manatee zone... Al Porter... to sit in his boat on a river and hold up a sign that warns boaters to slow down to save the endangered animals.

NEW YORK (JUNE 27) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 74.00-75.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 124.35 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.25-$4.45 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $112.00-118.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $477.00-$479.50; dealer-approx., $472.00-$485.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $104.00-$105.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $107.50 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 294.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90178u1126 06/27/1990 ~United Press International

SRINAGAR, INDIA (JUNE 27) UPI - Security forces, apparently startled when a child popped an empty carton, opened fire on a butcher shop Wednesday, killing the shopkeeper and two customers, witnesses said.

Police told a different story about the incident, saying members of the Central Reserve Police Force opened fire when an unidentified person tried

to seize a weapon from a police colleague. They said a commander of the paramilitary unit denied knowledge of any fatalities arising from the incident.

The three slain civilians were among eight people killed Wednesday in separatist violence in the Kashmir Valley. In one incident, four paramilitary policemen were killed in a clash with Moslem rebels, a government source said. The rebels support a separatist movement in the largely Moslem Kashmir region against India's Hindu-led government.

The butcher-shop shooting incident occurred in the Khanyar district of Srinagar. Residents who live in the area and claim they witnessed the incident said a boy had just finished drinking a soft drink, placed the empty container on his knee and slapped it with his hand.

The popping noise - sounding like a firecracker or gun shot - startled security forces in a nearby bunker, and they opened fire on the butcher shop, apparently thinking a shot had been fired from the store, residents said.

Three people were killed but the boy was not injured, witnesses said.

Thousands of shopkeepers in the area closed their shops immediately to protest what one of them called the ''brutal killings of innocent civilians.''

Also on Wednesday, the Jammu and Kashmir Liberation Front, the most powerful of the groups advocating a separation of Kashmir from India, called for a cease-fire in the old city section of Srinagar.

''We don't want that our brethern in the old city should become the targets of Indian soldiers' barbaric torture and killings, so we have decided to declare a cease-fire from tomorrow,'' a spokesman said in a telephone call. ''We shall now direct our guns against the Indian occupants in suburban and rural Kashmir.''

The militants have fought the government for 2 1/2 years, but their drive turned into a popular uprising - supported by virtually all the region's 4 million Moslems, in mid-January - when security forces opened fire on demonstrators, killing at least 35 people.

Since then, more than 450 soldiers, militants, and civilians have died in near-daily violence.

In Anantnag, 30 miles south of Srinagar, militants opened fire Wednesday on a paramilitary patrol outside a local police station, killing four soldiers and wounding six others, a high government official said.

Police said one civilian was killed and witnesses said five others were injured after security forces returned fire.

Also Wednesday, a bomb explosion heavily damaged a hotel in Srinagar, police said. Further details were not immediately available.

In Sopore, 25 miles north of Srinagar, militants and security forces clashed in at least a dozen places Monday night, police said.

Security forces cordoned off many areas of town and conducted house-to-house searches. Two residents were shot dead and about 75 others reportedly were taken into custody during the search.

Angry residents protested the killings and security forces responded by setting fire to a 50-store shopping complex, residents said.
